GEORGE DEUKMEJIAN
GOVERNOR

State of California
GOVERNOR'S OFFICE
SACRAMENTO, CA 95814

January 10, 1984

To the Senate and Assembly of the Legislature of California:

In compliance with Article IV, Section 12 of the State Constitution, which requires that a balanced budget be presented to you within the first ten days of each calendar year, I submit herewith for your review and consideration the State of California Budget for the 1984-85 fiscal year.

The 1984-85 budget reflects the fact that we have resolved the fiscal problems which plagued us last year. We now have a balanced budget with no deficit, and a prudent reserve for economic uncertainties. This budget is based on the reality that, if we control expenditures and maintain prudent reserves, we will be able to deal with unexpected emergencies in the future such as those caused by major disasters, crop infestations, unfavorable court rulings, or drops in revenues.

The 1984-85 budget establishes as major priorities of my administration -- education, employment and economic development, public safety, and mental health reform. It carries on our determination to ensure that needed State services are provided in as efficient a manner as possible.

It is my hope that, after your review of this budget, we can work together to enact a spending plan which all reasonable people will agree is in the best interest of the citizens of our State.

Most cordially,

George Deukmejian

George Deukmejian

STATE OF CALIFORNIA GEORGE DEUKMEJIAN, *Governor*

DEPARTMENT OF FINANCE
DIRECTOR'S OFFICE
SACRAMENTO

January 3, 1984

The Honorable George Deukmejian
Governor, State of California
State Capitol
Sacramento, CA 95814

Dear Governor:

One year ago the State of California was in the throes of an unprecedented fiscal crisis. We faced a $1.5 billion deficit, had no cash reserves, and were uncertain whether or not our cash flow situation would allow us to pay our bills and avoid bankruptcy.

In response to this crisis, you proposed an 18-month spending plan which avoided a general tax increase by reducing expenditures in fiscal 82-83, rolling over the remaining year-end deficit into 83-84, and paying off the deficit through savings in the 83-84 budget.

This plan was ultimately adopted by the Legislature with the added condition that, should it fail, a standby sales tax increase would occur. The 1983-84 budget which you signed into law after vetoing $1.2 billion of excessive spending, carried out the intent of the plan.

Today I am pleased to inform you that your plan to restore fiscal responsibility to our State has been an unqualified success. The Brown Administration deficit will be retired during the current fiscal year, and the standby tax will not go into effect.

The 1984-85 budget, which we transmitted to you, is the final step toward returning California to sound fiscal management. It carries forward your major priorities, while creating a prudent reserve for economic uncertainties. It provides for needed State services while avoiding the over commitment of State revenues which was a major cause of the recent crisis.

This is the last budget that I, as Director of Finance, shall forward to you. I wish to express my appreciation to you for having given me the opportunity to serve the people of our State in that capacity, and to thank you for the support you have given me and my staff.

I close by once again commending to you the women and men of the Department of Finance. Last year I stated that they represented the best in State service. Today I know that they are the best in or out of State service. One major regret at leaving government is that I will be unable to continue to work with them.

Very truly yours,

Michael Franchetti

MICHAEL FRANCHETTI
Director of Finance

Budget Statement

The Governor's Budget proposes expenditures of $29.9 billion in General and Special Funds, a 13.0 percent increase over the 1983–84 fiscal year. The General Fund expenditures amount to $25.1 billion and represent 84.0 percent of the total. The remaining $4.8 billion in expenditures are from Special Funds which represent 16.0 percent of the total.

The table below displays the amount of expenditures for State programs or functions by funding source. The pie charts on the following pages reflect the percent that expenditures for each program or function are to total expenditures.

In addition, the Governor's Budget appropriates $13.6 billion in Federal funds, which, when combined with selected bond funds, brings the total State spending plan to $43.9 billion, an increase of 7.4 percent over last year.

The Governor's Budget estimates $30.4 billion in General and Special Fund revenues and transfers, a 12.1 percent increase over last year. The General Fund portion of these resources is $25.8 billion, or 84.8 percent, with the Special Funds contributing $4.6 billion, or 15.2 percent.

The table below shows the amount of General and Special Fund Revenues by source. The pie charts on the following pages reflect the percent that each revenue source contributes.

The estimated $1.5 billion deficit and accompanying cash management crisis inherited by this Administration necessitated significant borrowing in the 1983–84 budget year. In August 1983 $1.2 billion of revenue anticipation notes were sold to augment internal borrowable resources of approximately $1.5 billion. The use of these funds is expected to cost the State approximately $70 million in interest during the 1983–84 fiscal year.

However, the Administration's tight control on expenditures coupled with the economic recovery will enable the State to repay the $1.2 billion of external borrowing, eliminate the remaining deficit, and end the 1983–84 fiscal year with a reserve of $200.2 million. Borrowing in the 1984–85 fiscal year should be limited to the historically cash short months of July and August. Thus, the 1984–85 fiscal year cost for interest expenses should be only $35.0 million.

Also, consistent with Article XIIIB of the State Constitution, the Governor's Budget reflects an appropriation of $950.7 million as a General Fund Reserve. Prior experience has clearly illustrated the need for a prudent reserve to protect the State from unforeseen reduced levels of revenues and/or unanticipated expenditure increases. The proposed reserve represents 3.7 percent of estimated 1984–85 General Fund revenues. This amount should be sufficient to offset any revenue reductions and/or expenditure increases.

1984–85 Expenditure Dollars (in millions)

Budget History and Policy Perspective

Taking office in January 1983 and facing a projected deficit of $1.5 billion by June 1983, the Governor drafted an 18-month plan to restore fiscal responsibility to California without a general tax increase. The Governor's plan proposed:

- Reducing 1982–83 expenditures as much as possible in order to lower the projected deficit.
- Rolling over the remaining deficit into the 1983–84 fiscal year and paying it off from savings made in that budget.

The Deficit Paid

The Governor's plan was adopted by the Legislature (AB 28X; Chapter 10X) with the provision that, if it failed to restore fiscal solvency, a standby one-cent sales tax would go into effect on a temporary basis to ensure that fiscal 1983–84 would not end with a deficit. The Director of Finance was given responsibility for determining in October and again in January 1984 whether the standby tax would go into effect.

The 1983–84 budget, which was signed by the Governor after vetoing $1.2 billion in excessive expenditures, implemented the Governor's plan.

As fiscal 1983–84 progresses, it has become clear that the Governor's plan has worked and that the deficit will be paid off from increased revenues and decreased spending, rather than from the standby taxes. Neither standby tax will take effect, and the State will end the year with a modest surplus.

The success of the Deukmejian plan has depended on keeping expenditures sufficiently below revenues to ensure that there are adequate funds to repay the deficit and to provide a modest surplus. This goal has been achieved both through the Governor's $1.2 billion dollar veto of appropriations in the budget submitted to him by the Legislature, and through major economies effected by tight administrative control over the day-to-day operations of State government.

Size of Government

Another result of the Governor's tight administrative control over State operations has been a substantial reduction in the size of State government as measured by the number of persons employed. As a result of a strictly enforced freeze on new hiring, approximately 6,700 personnel years were vacant as of July 1983. A review of the vacancies by management showed that due to increased efficiencies approximately 5,900 of these positions were no longer needed, and could be eliminated from the State payroll.

Following the Governor's policy of setting priorities and redirecting funds and positions to higher priority programs, 1,000 of these positions were converted to positions in areas of urgent need such as prisons, highway patrol, and Caltrans.

The remaining 4,900 positions are no longer needed for State operations and are eliminated in this budget. This action reduced the number of authorized State employees from 234,400 to 229,500, a 2.1 percent reduction.

In the future, additional efficiencies in government will be explored to determine if even further reductions in authorized personnel can be achieved. These reductions have had no effect upon the efficient delivery of needed public services by State government.

Considerations in Preparing the 84–85 Budget

The Deukmejian Administration took office with the goal of resolving the State's fiscal problems without a tax increase. The Administration's review of government spending showed that the State was experiencing the same growth spiral that has characterized the American public sector for much of this century. The spiral exists because government has difficulty reducing the "base" and because government tends to "revenue budget."

The "base" in a government budget is the amount of money spent on a program in the previous year. Once "built into the base," a funding level is often viewed as a vested right to which a department and its program constituents are permanently entitled. Budget controversies do not usually revolve around rejustification of a program's base. The issue usually is how much more should be spent *in addition* to the base.

"Revenue budgeting" is budgeting to spend every penny of revenue. In the private sector there is an incentive to keep expenditures below revenues--"profit." In government, there is no such incentive. Rather, the incentive is to earn the support of various constituencies by spending on programs

and services that respond to their needs or interests. Thus, the incentive is to spend up to and sometimes beyond projected revenues.

These two concepts interact with economic and political cycles to create growth spirals in government. During good times, revenue budgeting creates a base equal to revenue. If a recession occurs and revenues decline, government is faced with the pressing problem of how to maintain the prior year's base expenditure level.

In California's case, the existence of a major revenue surplus between 1976 and 1981 lengthened the growth spiral. Initially, revenues poured into the State's Treasury faster than the Governor and Legislature could spend them. However, the base budget not only caught up with revenues, but eventually overtook them.

Permitting excessive growth while at the same time underwriting the massive Proposition 13 bailout to local government, meant that the State was using its surplus to live on borrowed time. Nevertheless, with vast indifference to the growing gap between its incoming revenues and its annual expenditures, the State continued its growth spiral, not only preserving its base, but adding to it.

If one side of the growth spiral supports "high living," the downward side of the spiral threatens red ink. A private organization faced with a similar situation might retrench and thus bring expenditures down to the level of revenues.

Government, on the other hand, typically tries to fund the base in some manner. Faced with a budget that cannot be supported by revenues, the common recourse is tax hikes. Later, when an economic recovery occurs, the newly expanded tax structure generates more tax dollars than are necessary to fund the old base. With additional money suddenly available, the tendency is to engage in another round of revenue budgeting, thereby creating a new and higher expenditure base. Then, when another drop in revenue occurs, the cycle is repeated, government grows, and taxes keep pace.

In view of these considerations, this budget is built upon certain budgetary principles:

- *Periodic fiscal crises are not necessary if government plans carefully and lives within its resources.* The growth spiral, not recessions per se or extraordinary use of surpluses, was the root cause of the State's fiscal dilemma. Prudent long-term planning can control the growth spiral and avoid future fiscal crises.
- *Expenditures should be keyed not to revenues but rather to reasonable limits that can be sustained through recessions by drawing on prudent reserves.* Revenue budgeting undermines government's ability to survive economic cycles unless tax hikes are made. The Governor and the Legislature should be responsible for charting an expenditure course which is realistically above the economic troughs, but prudently below the revenue peaks. By planning properly, economic stabilization can become a reality.
- *Base programs require ongoing review of their necessity.* The base merits the same careful scrutiny as do new programs. To the extent possible, redirections should fund new programs. Every effort must be made to achieve savings in the base by eliminating obsolete programs and reducing lower priority activities.
- *A prudent reserve is essential to fiscal stability.* Absent a prudent reserve, the State cannot ensure its ability to deal with economic fluctuations or other fiscal emergencies. Sound fiscal management demands that such a reserve be established and maintained.

Education

Education is the key to California's future if we are to continue to maintain a leadership position in our nation and the world. After years of neglect, elementary, secondary and higher education are among the highest priorities of State government. This Administration's goal is to make the California educational system one of the best in the nation.

General Fund expenditures in the Governor's Budget for all educational programs total $13,334.0 million, an increase of $1,901.9 million or 16.6 percent over 1983–84. This level of expenditure represents 53.1 percent of total General Fund expenditures for 1984–85. The allocation of these funds is shown in the following table.

Education Expenditures
General Fund and Local Revenue Sources
(dollars in thousands)

	1983–84	*1984–85*	*% Increase*
University of California	$1,110,012	$1,446,673	30.3
California State University	947,995	1,149,014	21.2
California Community Colleges	1,416,689	1,578,826 [1]	11.4
Student Aid Commission	81,077	90,376	11.5
K–12	10,983,000	11,902,000 [1]	8.4
State Teachers Retirement System	20,500	536,045	N/A
Other	13,135	16,875	31.1
Total Expenditures	14,572,408	16,719,809	14.7

[1] These totals include not only General Funds but expenditures from State School Fund revenues and local sources, primarily local property taxes, of $3,385.8 million.

Higher Education

California's system of public postsecondary education is the largest in the nation. As part of the Administration's focus on education in the 1984–85 Budget, particular emphasis has been given to higher education. With limited resources available during the past several years, common problems have arisen in the postsecondary education segments. They include faculty recruitment and retention, facilities maintenance, deferred maintenance, instructional equipment replacement, and instructional computing support. The Administration has uniformly dealt with these needs and has provided significant funding to address the identified problems.

University of California

The nine campuses of the University of California are recognized nationally and internationally for the excellence of their programs. In a recent widely respected study, the Berkeley and Los Angeles campuses were ranked number one and two in the nation among public institutions in terms of faculty quality.

Resource constraints of recent years have caused substantial deterioration in State support for the University. The 1984–85 budget represents the first year of a multi-year plan to restore the University's budget to a level that ensures the continued excellence of its programs in the future.

The plan calls for improvements (1) to the instructional program through increased support for items such as instructional equipment and instructional use of computers, (2) to facilities through additional support for both ongoing and deferred building maintenance as well as support for renovation and construction, and (3) to faculty compensation to secure a competitive position for the University in recruiting and retaining faculty.

The 1984–85 budget for the University will provide education to 118,842 full-time equivalent (FTE) students at the general campuses and 12,315 FTE students in the health sciences. This reflects an increase over 1983–84 of 2,510 FTE general campus undergraduate students and 200 FTE general campus graduate students. The Administration proposes an increase of $10.3 million to support these enrollment increases. The additional graduate students will strengthen the University's capacity to respond to student and societal demand for the development and expansion of programs in fields such as engineering, computer science, and other sciences.

The budget proposes a total of $1.447 billion from the State General Fund for the University, which represents a $126 million (11.2%) increase above the 1983–84 level of support for normal program expenditures. This is exclusive of $113.7 million for salary and benefit increases and $82.9 million reflecting resumption of the State's actuarially required contribution to the University's retirement systems, which was deferred in 1983–84.

- The budget proposes to provide salary and benefit increases for academic and staff employees. The faculty salary increase will be phased in during the year, with a first increment effective on July 1, 1984, and a second increment on January 1, 1985, for a total State-funded increase of 13 percent. The University is providing an additional 3 percent increase for faculty by shifting funds from retirement contributions to salaries. The total 16 percent increase will bring university faculty salaries to the average faculty salary levels projected for the University's eight comparison institutions in 1984–85.

  With the improved salary levels, the University will be able to compete effectively with other major research universities in efforts to attract and retain the nation's most outstanding scholars. This Administration has recognized this as one of its highest budget priorities, emphasizing that the quality of the faculty is the most important element in the quality of the University. The total cost of these actions will be $113.7 million.

- In order to provide relief to University students, whose fees have increased steeply in recent years, and to provide funding equity among the segments of higher education, the

A–2—77666

budget proposes an increase of $7 million to provide full State funding for the Student Affirmative Action Program and Educational Opportunity Program financial aid. These programs are designed to increase the opportunities of under represented groups in higher education. The State has recognized its responsibility for fully funding these programs at the California State University and the community colleges, but at the University the programs have received student fee support. The budget increase will replace University student fee income and allow an annual fee reduction of $70 per student.

- To support basic research and graduate education in microelectronics, computer science, engineering, and related fields, the Administration is proposing an increase of $2 million for its microelectronics research program. This program involves industry participation, and State funds are to be matched by industry contributions.
- In addition, an increase of $500,000 is provided for individual faculty research. This will assist junior faculty in becoming competitive with more established researchers in seeking extramural grants. For all faculty, it will support research costs such as supplies, equipment, and field work; serve as seed money in attracting extramural funds; and support research in fields where there is little or no possibility of extramural funding.
- To improve instructional programs an increase of $12.3 million is provided to fund the estimated level of annual depreciation of State-funded instructional equipment and prevent further growth of an inventory of obsolete equipment now exceeding $228 million. An increase of $4 million is proposed to expand student access to computers, provide course-oriented software, and support instruction in the use of computers.
- In recognition of the need to increase the number of women and minority graduate students and faculty members, this budget proposes an expansion of Student Affirmative Action programs directed at improving the academic skills of undergraduate students who demonstrate potential for graduate level work and the expansion of faculty affirmative action efforts by early identification of promising minority and women students at the graduate level for development and recruitment for faculty positions at a cost of $1 million.
- The 1984–85 budget provides a significant improvement in capital outlay funding for the University of California in order to begin to address deficiencies that have accumulated over time. 1984–85 represents the first year of a multi-year effort to ensure that University facilities provide appropriate support for the University's academic programs. The 1984–85 capital outlay budget for the University of California provides $55,260,000 from the Capital Outlay Fund for Higher Education (COFPHE) and $58,145,000 from the sale of high technology revenue bonds. Revenue bonds will be used to fund the construction of two new major academic facilities: the Life Sciences Building on the Berkeley campus and Engineering Unit 2 on the Santa Barbara campus. COFPHE funds will support a wide range of projects relating to improvement of academic facilities, correction of life-safety deficiencies, provision of access to the handicapped, and energy conservation improvements.
- An increase of $6.5 million is proposed as an initial step in reducing a backlog of critical deferred maintenance projects which exceeds $50 million. This will assist in beginning to return University facilities to a reasonable state of repair and functional capability. An additional $4 million is provided as the first phase of a plan for improving ongoing building maintenance, allowing more frequent preventive maintenance, prolonging the useful life of facilities, and reducing costly breakdowns.

California State University

The California State University (CSU) system with its 19 campuses is the largest system of its kind in the nation. It serves over 450,000 students who are enrolled in nearly 2.5 million courses and confers approximately 53,000 degrees annually.

As was true of the University of California, the State University system has also experienced the problems associated with limited resources over the past several years. The Governor's Budget represents the first year of a multi-year plan to restore the State University's budget to a level that ensures the continued excellence of its programs in the future. The plan calls for improvements (1)

to the instructional program through increased support for items such as instructional equipment and instructional use of computers, (2) to facilities through additional support for both ongoing and deferred building maintenance as well as support for renovation and construction, and (3) to faculty compensation to secure a competitive position for the State University in recruiting and retaining faculty.

The Administration proposes a 1984–85 General Fund expenditure level of $1,149,014,000, an increase of $201,019,000 or 21.2% over the 1983–84 operating budget. Overall expenditures are proposed to increase to $1,792,369,000.

- Faculty salaries in CSU have lagged 10 percent behind comparable institutions creating both recruitment and retention problems. To stop and reverse the "Brain Drain", the Administration is proposing an employee compensation program which would provide a 9 percent salary adjustment for faculty on July 1, 1984, and an additional adjustment of 1 percent on January 1, 1985, which would complete the adjustment and meet the currently estimated lag by the California Postsecondary Education Commission. Additional benefits of 1 percent on July 1, 1984, provide for a total package of 11 percent.
- In order to provide relief to State University students, whose fees have increased steeply in recent years, the budget proposes an increase of $11.9 million to provide full State funding for financial aid grants. The budget increase will allow an annual fee reduction of $42 per full-time student.
- The budget includes $1 million for faculty development, recruitment and retention. This amount will provide funds to upgrade computer literacy skills for approximately 3,000 faculty; enhance the teaching skills of practitioners who work in the engineering, computer science and business fields and are involved in part-time instruction; and provide for recruitment, relocation and moving expenses in such fields as engineering, computer science, business and health services.
- A major portion of CSU's instructional equipment was acquired in the 1950s and 1960s as a part of an ambitious capital outlay program. With the passage of time, much of this equipment needs to be replaced because of obsolescence. The need for these funds is made increasingly critical because of rapid technological advances and increased student demand in high technology disciplines. To preserve the quality of education the Administration has included $9 million as a first step in addressing needs in this area.
- The Administration also proposes improving services of the instructional programs by adding $3,425,000 and 170.4 personnel years for technical staffing, $2 million for supplies and services and $5 million for instructional computing.
- An increase of $6.6 million is proposed as an initial step in reducing a backlog of critical deferred maintenance projects which exceeds $40 million. This will assist in beginning to return State University facilities to a reasonable state of repair and functional capability.
- The 1984–85 budget proposes $27.7 million for the CSU capital outlay program. System-wide projects within the program include fire and life-safety corrections and the removal of barriers to the handicapped. Eleven energy projects are also proposed at various campuses in order to achieve future operational (utility) savings. Funds are also included to provide for a study of library utilization and standards. Construction funds provide for conversion and remodeling projects at several campuses and planning and working drawing funds for new engineering, math, computer sciences, and agricultural science buildings at three campuses.

High Technology

A significant factor in California's ability to take an early leadership position in high technology was the State's investment in University research and graduate education. State funding provided essential research support and educated skilled personnel for the new and growing high technology fields.

The Governor's Budget recognizes the economic importance of retaining and attracting high technology industries to this State. Because educational resources play such a crucial role in the high technology sector, this budget provides major assistance for basic university research and graduate education:

- For 1984–85 the Administration is proposing to increase State financing for high technology-related programs at the University of California by $6.6 million. These increases include $2 million for microelectronic research,

$.6 million for graduate science students, $4 million for instructional computing support and funds for additional equipment.

- The State University budget for 1984–85 proposes an increase of $17.4 million for high technology-related purposes. These increases include $9 million for instructional equipment, $5 million for instructional computing and $3.4 million and 170.4 personnel years for technical staffing.

California Community Colleges

By far the majority of students in postsecondary education in California are found in the Community Colleges. Enrollment was over one million in the fall of 1983. State General Fund support for these students and their colleges is approaching a billion dollars for 1983–84. But numbers of students and dollars, however great, fail to reflect the importance of the Community Colleges to the State and to their local constituents. Currently California's Community Colleges have undertaken a broad array of missions including the following:

- Transfer education
- Associate education and degrees
- Certificate programs for employment
- Joint programs with business, industry, and government
- Remediation and basic skills education
- Continuing and community education
- Community services

These functions represent the variety and nature of the activities currently being carried on by these institutions and represent how the financial support provided from State and local sources is expended.

The program budget for the Community Colleges in 1983–84 was approved at the level of $1,315 million which was lower than the previous year by approximately $97 million. This was the result of a disagreement between the Legislature and the Administration as to the appropriateness of instituting a fee for those students who have the financial ability to share in the cost of their education.

Among the significant issues contained in the Governor's Budget are the following:

- The Administration has not changed its position relating to the desirability of students contributing a portion of the cost of their education. However, in order that the students in Community Colleges do not become the victims of this policy difference, the Administration will propose by special legislation, at the earliest opportunity, providing for a $50 million augmentation for the 1984 spring semester which represents the financing lost to Community Colleges by the failure to allow the colleges to collect fees. For 1984–85, financing is provided to increase support by an additional $47 million to the level of $1,412 million. This represents an expenditure increase between two years of $97 million.

  The Administration continues to recommend implementation of an appropriate fee for all community college students. This revenue is estimated to have a value of $95 million which the districts would retain for basic program improvements. This action would raise the level of funding to $1,507 million or a change from the 1983–84 budget of $192 million. An appropriation of $10 million is included in the Chancellor's Office for allocation to the districts to cover financial aid for students unable to pay the new fee.

- Also within the Governor's Budget for 1984–85 is a 3 percent increase for Extended Opportunity Programs and Services (EOPS) and for the Disabled Students Program (DSP). The cost will be $0.75 million for EOPS and $0.66 million for DSP.

Program Funding Summary

1983–84 Level	$1,315 million
1983–84 Spring Semester Funding	50 million
1984–85 Interaction-New Partnership	10 million
Local Revenue Increases	37 million
Student Fees, Program Improvements	95 million
1984–85 TOTAL PROGRAM	$1,507 million

- The Governor's Budget proposes $26,704,000 for the Community Colleges Capital Outlay Program. This proposed expenditure will fund 22 projects totaling $3,145,000, for elimination of architectural barriers to the physically handicapped and $501,000 for an initial complement of library books for two libraries.

  Fifteen construction projects requiring $21,657,000 are proposed to improve and expand academic facilities at various campuses. These include initial permanent buildings for Mendocino Community College and the Orange/Canyon Campus of the

Rancho Santiago Community College District and site preparation for the Lake Tahoe College and the Occupational Education Building at Oxnard College.

Funds in the amount of $744,000 are requested for other projects which involve planning and working drawing funds for buildings at Lake Tahoe College, a Natural Science Building for Oxnard College, a Nursing Education and Health Technician Building for Imperial Valley College, preliminary planning for 1985–86 projects, and a study of library standards and utilization. Detailed information on projects can be found within the budget presentation.

Student Aid Commission

Through the Student Aid Commission financial assistance is provided to academically able, financially needy students who are pursuing postsecondary educational opportunities. In 1983–84, the Commission will administer approximately $85.8 million in grant assistance to over 63,000 students.

In addition to the grant programs, this agency administers the State Guaranteed Student Loan program and serves as the State guarantee agency for federally reinsured student loans. This rapidly expanding program is expected to generate approximately $600 million in new loans during 1983–84, bringing the total of the program to over $2 billion as of June 30, 1984.

While the current investment in educational opportunities provided by the State are substantial, the need for access and educational opportunity is also substantial if California is to develop its most valuable resource—its citizens. Most of the scholarship programs which the Commission manages have had no increase in the number of scholarships for almost a decade. The level of support in terms of maximum grant amounts has not increased since the 1981–82 fiscal year, a period of 3 years.

Therefore, the 1984–85 Governor's Budget proposes augmentations to increase assistance to educationally qualified and needy students in order that opportunities for higher education will be expanded. This increased assistance will provide:

- Scholarship Program (Cal Grant A):
  10% increase in grants, 10% increase in maximum award amounts.
- College Opportunity Grants (Cal Grant B):
  10% increase in the number of grants, 10% increase in maximum award amounts, and a 10% increase in the subsistence allowance.
- Occupational Education and Training Grants (Cal Grant C):
  6% increase in the number of grants and a 6% increase in the maximum award amount.
- Graduate Fellowship Program:
  6% increase in the number of grants and a 6% increase in the maximum award amount.
- Bilingual Awards:
  20% increase in the number of awards and a 6% increase in the maximum award.

These increases will result in an $11 million augmentation for 1984–85.

Elementary and Secondary Education

Providing a quality education for the young people of this State is one of the highest priorities of this Administration. The Governor's Budget reflects the Administration's commitment to ensuring that California's education system should be among the best in the nation.

California has a large elementary and secondary (K–12) education system. Its 1,029 local school districts spend over $13 billion annually to educate approximately 4 million students ranging in age from 3 to 18 years, and to educate adults through the K–12 districts and county offices of education.

In the 1983–84 fiscal year the Governor signed Chapter 498, Statutes of 1983 (SB 813), which initiated reforms in the areas of student academic performance and discipline, curriculum, and quality of teachers. To assist local education agencies in implementing those reforms, the Governor approved substantial increases in K–12 education funding in 1983–84. With the enactment and signature of SB 813 local education agencies are expected to receive $880 million of new revenue in 1983–84.

Notwithstanding these accomplishments additional reforms are required if we are to truly revitalize California's system of K–12 education. To assist local education agencies in making California's K–12 system the best in the nation, the Governor will be presenting his proposal for additional K–12 reforms early in 1984.

In keeping with his commitment to improving the quality of K–12 education in this State, the Governor, in 1984–85, is proposing to continue the 1983–84 funding provided by SB 813 and to add $900 million to provide for necessary price adjustments, to implement the SB 813 reforms scheduled to begin in 1984–85, and to implement the Administration's additional reform proposals. The additional K–12 funds the Administration proposes in 1984–85 are contingent on the adoption of those new reforms.

School Finance

Total revenues for the State's K–12 school districts are expected to be $880 million greater in 1983–84 than in 1982–83. Total general purpose revenues of school districts and county offices of education alone are estimated to be $8,484 million in 1983–84. The proposed budget for 1984–85 reflects $9,241 million for K–12 general purpose revenues and $2,543 million of State funding for categorical programs.

This general increase in funding in addition to the full funding of the second year costs of SB 813 will bring real expenditures per pupil in average daily attendance (ADA) to a five-year high:

- Expenditures per ADA are estimated to increase from $2,360 in 1982–83 to $2,751 in 1984–85—an increase over the first two years of this Administration of $391 or 16.6%.
- Even when compared in terms of constant dollars—with the effects of inflation removed—the 1984–85 Budget provides an increase in funding over the previous seven years. As the table below indicates, taking 1977–78, the last pre-Proposition 13 year as the base year and adjusting subsequent K–12 annual expenditure levels to remove the impact of inflation, the Governor's 1984–85 Budget provides a 2.9 percent increase in funding.
- The increases for 1983–84 and 1984–85 are particularly significant since they reverse the general decline in real spending which had been under way since 1979–80. An eight-year history of K–12 education expenditures and the cost-of-living index is displayed in the following table.

	K–12 Expenditures per ADA ($)	*GNP Deflator (1977–78 = 100)*	*Real K–12 Expenditures per ADA (in 1977–78 $)*
1977–78	$1,676	100.0	$1,676
1978–79	1,814	108.6	1,670
1979–80	2,065	117.8	1,753
1980–81	2,204	129.3	1,705
1981–82	2,358	139.6	1,689
1982–83	2,360	146.3	1,613
1983–84	2,567	151.7 •	1,692
1984–85	2,751	159.5 •	1,725
Percentage Change: 1977–78 to 1984–85	64.1	59.5	2.9

• Estimated

Under the proposed budget, school districts and county offices would receive a general increase of 3 percent for both regular and categorical programs. Consistent with Senate Bill 813, low-wealth school districts also would receive $145 million to increase their base revenue limits to the average base revenue limit for districts of the same type (elementary, high school, unified; small and large).

SB 813 Reforms

The following is a brief description of some of the major reforms initiated by SB 813:

High School Graduation Requirements. Achievement scores of California students have declined significantly during the past decade. SB 813 addressed this problem by establishing more rigorous statewide high school graduation requirements, to begin with the graduating class of 1986. By raising academic expectations, this reform will better enable schools to equip California's youth for their future role in society.

Incentives for Increased Instructional Time. Recent studies have indicated that California students spend fewer minutes per day and days per year in direct classroom instruction than do students in other states. To encourage the State's local education agencies to increase the amount of time students spend in the classroom, SB 813 authorized State funding for districts that operate schools for at least 180 days per year and a specified number of minutes per day. The Governor's Budget proposes $257 million in 1984–85 to fund the first year of SB 813's three-year implementation plan.

Summer School. Since 1978, State funding for summer school has been limited to remedial instruction for students not meeting proficiency or graduation standards. In 1984–85, the Governor's Budget provides State funding to expand summer school course offerings. Beginning in 1984–85, school districts and county offices will receive state funding for offering summer school instruction in math, science and other core courses.

The need for increased emphasis on basic instruction in math, science and English has been recognized by educators and concerned citizens throughout the country. To ensure that schools in California meet this need, the Governor's Budget contains $41 million to fund supplemental summer school instruction in these areas as well as $18 million for traditional remedial summer school instruction.

Instructional Materials. Textbooks are hands-on tools for direct use by all pupils in the education system. Textbooks must be available for all students, and they must be current and challenging. Recognizing this, SB 813 increased State funding for instructional materials for students in kindergarten through grade 8 and established a State-funded allocation for students in grades 9 through 12. The 1984–85 Governor's Budget provides $76.8 million to continue the expanded level of funding established by SB 813. This amounts to an 89 percent increase over the 1982–83 program level.

School Environment. To provide a safe and healthy school environment conducive to effective instruction, SB 813 strengthened the ability of school officials to take disciplinary measures against those few pupils who would disrupt the learning environment. Among other things, SB 813 provided for:

- Mandatory suspension and expulsion of pupils committing acts of violence on school grounds or at school activities.
- A streamlined process for suspending or expelling pupils who violate State laws and district regulations.
- Increased flexibility of school officials to determine the degree of make-up work necessary for suspended pupils.
- Authorization for school districts to promote and retain students based on locally-adopted policies.

Capital Outlay

The Governor's Budget recognizes that adequate school facilities are an essential part of California's education system. With this in mind, the budget provides over $325 million for school construction and $87 million for school facility deferred maintenance in 1984–85. This is an increase of $181 million, or 75 percent over 1983–84 expenditure levels.

Due to limitations in anticipated Tidelands Oil Revenue for 1984–85, it has been found necessary to reallocate the anticipated oil resources among all the capital outlay programs which are normally supported from this source.

Although revenues will not be sufficient to allow the State School Building Lease-Purchase Fund to receive the full amount scheduled by statute, it is recognized that there is an ongoing need for funds for school construction. The Governor's Budget

proposes that $100 million in Tidelands Oil Revenue be provided in lieu of the $200 million scheduled by Chapter 168, Statutes of 1981.

The current sources of school construction funding, which are school building bonds authorized by the State School Building Lease-Purchase Bond Act and Tidelands Oil Revenue, authorized by Chapter 168, Statutes of 1981 will not be available after the 1984–85 fiscal year. This budget proposes that current statutes be amended to provide $125 million per year through Fiscal Year 1988–89.

For the last several years the allocation of funds to local education agencies has been a slow and cumbersome process. In recognition of this, the Administration proposes to modify the allocation process in order to respond to the classroom needs of the students in the public school system more rapidly.

State Teachers' Retirement System

The State Teachers' Retirement System (STRS) has an unfunded liability that is estimated to reach $50 billion by the turn of the century. This is not a new problem for STRS. Since the inception of STRS in 1913, allowance payments were based on insufficient employer, employee, and State contributions. This mechanism inherently created a compounding unfunded liability of substantial proportion.

Although legislation was passed in 1972 to declare that STRS would be a reserve funded system, the funding formula was not sufficient to control the growth of the unfunded liability especially in light of liberalized disability benefits. Therefore, AB 8 of 1979 established the current formula for increased State contributions to STRS. This revised formula, however, still leaves the system short of the goal of meeting full funding in 40 years (the accepted norm for pension funds).

While contributions from employers, teachers and the State comprise about 52 percent of the annual revenues to the Teachers' Retirement Fund, approximately 45 percent of the annual revenues are currently derived from income earned on the assets of the fund. It is easy to see that the success of the investment program at STRS can greatly affect the need for additional state funding of the system.

The purpose of the fund, of course, is to pay benefits to retired members. Even though benefits paid to retirees and beneficiaries will approach $900 million in 1984–85, many recipients receive payments that are inadequate because of the effects of inflation.

These problems have evolved over the 70 years that STRS has been in existence. The unfunded liability is one of the largest fiscal problems facing the State of California. Rarely are there short-term solutions to long-term problems, and so it is with STRS. The 1984–85 Budget reflects the first steps in addressing these problems. Those steps include:

- Fully funding the State's contributions as required under AB 8 for an appropriation of $301 million.
- Restoring the $211.3 million withheld in 1983–84 due to the severe shortfall in the General Fund.

- Fully funding the purchasing power protection provisions of Education Code Section 24701 in the amount of $23.7 million.
- Providing additional purchasing power protection payments through $11.2 million in revenues derived from the sale or lease of surplus state school lands in accordance with the provisions of Chapter 1213, Statutes of 1983.
- Participating in the 12 member panel created by ACR 62 convened to study the funding and benefit structure of STRS in hopes of developing a long-term solution to underlying STRS problems.
- Endorsing the recommendations of the Blue Ribbon Committee convened by the Secretary for State and Consumer Services to review the investment strategy and policies of STRS and PERS. Those recommendations include: (1) the creation of an Investment Management Board separate from the STRS Board, to have fiduciary responsibility for investment policy and selection of internal and external investment management; (2) separate in-house investment staff for both STRS and PERS; (3) some management of funds by outside managers; (4) changing accounting procedures and record keeping to reflect total return based on current market values; and (5) investment staff compensation to be related, at least partly, to performance.
- Funding staffing needs and encouraging full implementation of a computerized information system.

These steps only address the immediate needs in finding a solution to the STRS funding and operational problems. The Administration and the Legislature must work together to guarantee the solvency of STRS for the years to come.

Public Safety

Our basic freedoms depend on society's observing and enforcing the laws of civilized existence. Yet crime statistics are high due to growth in the phenomena of career criminals, youthful offenders, and drug-related property crimes. Communities and families are both angry and afraid. This Administration is deeply committed to upholding the law and restoring public safety in California.

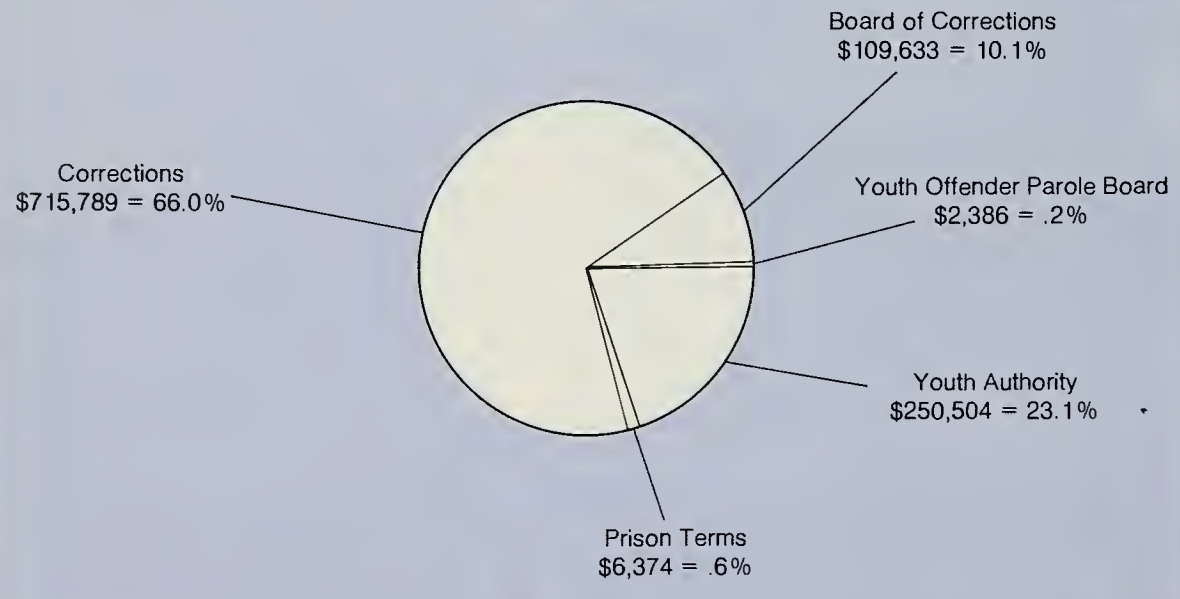
The Governor's Budget proposes expanding our prison system to accommodate the drastic increase in inmate population as a result of tough sentencing laws, increasing the number of correctional officers, improving law enforcement data systems, and increasing California Highway Patrol personnel to provide needed protection and assistance to the motoring public.

The budget also includes additional resources to strengthen local law enforcement. It provides increased financial assistance for training local peace officer and correctional personnel, local jail construction, delinquency prevention projects, victim assistance programs, and criminal prosecution efforts.

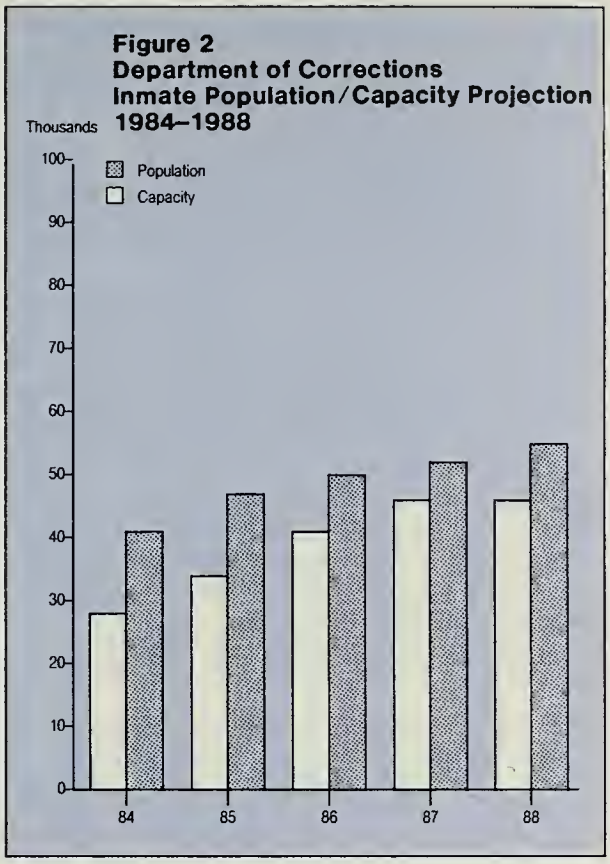
Prison Construction

As the people of California have sought tougher anti-crime measures, California's prison system has faced unprecedented increases in number of commitments and length of stay. For example, between June 1981 and June 1983 the inmate population increased from 27,000 to 37,000 inmates

Figure 1
Youth and Adult Corrections
Proposed 1984–85 Expenditures
Amounts in Thousands
(All Funds)



Excludes Capital Outlay



and is projected to reach 46,695 by June 1985. California's existing prisons are only designed to house 27,000 inmates. Thus, as Figure 2 indicates, California's prison facilities will exceed their design capacity by 52 percent in June 1984.

With the rising tide of commitments, the Department of Corrections has acquired trailers, tents, other emergency temporary structures, and has converted support spaces to temporary barracks in order to extend existing bed capacity. To meet these inmate pressures, prison facilities will require continued renovation and maintenance, and accelerated construction of new housing units.

However, acceleration of new prison construction under authority of prior Budget Acts and Chapter 958/83 (SB 422) has virtually exhausted the New Prison Construction Fund. Of the $495 million Prison Bond Funds approved by voters in June 1982, $472 million is appropriated, leaving a balance available as of September 30, 1983 of $23 million.

The Governor's Budget proposes a $94,650,000 General Fund appropriation to complete work on:

- The Southern Maximum Security Complex-Tehachapi (1,000 Level IV beds).
- California State Prison at Folsom (1,500 Level IV and 200 Level I beds).
- Ione (1,200 Level I/II beds).
- California Institution for Women, Frontera (50 Special Housing Unit beds).

This appropriation will also allow every project in the department's Master Plan to be completed through, at minimum, working drawings and land acquisition status.

The balance needed to complete construction at San Diego, Adelanto, Avenal, Riverside, Los Angeles and the Northern California Women's Facility totals $514.3 million. Proposed funding for this balance which may include lease-purchase financing from the private sector, is being explored as authorized in Chapter 958/83. The Department of Corrections is preparing a feasibility report for the Legislature's review.

In addition, the Administration will support Special Legislation in the current year providing $45.7 million ($17.0 million from the New Prison Construction Fund and $28.7 million General Fund) to maintain the accelerated construction schedule for new prison projects at CMF-Vacaville and working drawings for the Folsom Prison-Support Service Facility.

Concerning existing facilities, the Governor's Budget proposes $18.8 million to maintain code-required levels of operation or meet new demands caused by increased inmate populations. Projects include fire and structural safety work, environmental health work, expanded utility systems, and various security improvements.

State Corrections

The Department of Corrections is responsible for providing safe and secure detention facilities for the control, care and treatment of convicted felons and civilly committed nonfelon narcotic addicts. The department carries out this responsibility through the operation of 12 correctional institutions, three reception centers and 28 camps.

To help meet the inmate population capacity crisis at these facilities, a total of $716 million is proposed in the Governor's Budget which includes:

- $53 million in new money and 938 personnel years to provide custody, security and inmate

support costs to handle the additional 5,535 growth in inmate population.

- $6 million in new money and 100 personnel years to provide increased parole supervision and parole revocation hearing related workload.
- $5.4 million in new money and 159 personnel years to provide staffing for the planning, recruitment, testing, background investigation and training of correctional staff necessary to comply with accelerated construction and staffing of new facilities as required by SB 422 (Chapter 938/33).

Pursuant to the goals established by Chapter 1/82 (AB 1403), the department is required to develop full employment programs for all inmates. Participation in these programs allows the inmate to earn work time credits for sentence reductions provided by Chapter 1234/82 (AB 2954).

The department has been able to provide meaningful work assignment for most of but, because of the significant increases in inmate population, not all inmates. Approximately 27,000 inmates are currently involved in various work and training assignments, which include prison industries, academic/vocational education, institutional support services, and conservation camp programs. About 4,000 additional inmates are eligible for but do not have work assignments.

The department proposes to:

- Develop a plan with specific costs and requirements necessary to allow for full employment of all inmates, including the 1984–85 inmate population growth.
- Develop additional inmate labor programs for various statewide maintenance projects for the Department of Transportation.

Youth Authority

The primary objectives of the Youth Authority are to protect society from criminal and delinquent behavior by young people and to provide training and treatment directed toward helping these youths become useful and productive citizens. The Governor's Budget provides $251 million and 4,309.4 personnel years to accommodate ward population increases in ten institutions and six conservation camps.

The Governor's Budget includes:

- $1,073,000 and 10.7 personnel years to accommodate a ward population level of 5,860 by June 30, 1985.
- $60,000 and 1.5 personnel years for the Institution Industries Program to develop contracts with private sector and public agencies interested in establishing institution-based industry programs to provide employment opportunities for wards, and the sale of goods and services to offset ward related costs.
- $107,000 and 2 personnel years for the Nelles Public Service Program to expand the ward day labor program to include a community service component to provide ward labor for city, county, non-profit and community public service projects.
- $69.8 million and 52 personnel years to assist community correctional activities, including the County Justice System Subvention Program (AB 90), local juvenile detention facility standard setting and enforcement, delinquency prevention, and local justice training.

  The budget for this function also includes: a $1,256,000 augmentation for the County Justice System Subvention Program to allow counties to maintain existing delinquency treatment and prevention programs or fund new programs and a Youth Service Bureau funding increase of $348,000 to fund four additional bureaus for a total of 16 statewide.

Local Law Enforcement

Local corrections, like our state prison system, face increasing jail overcrowding and the need for additional bed capacity, as well as training and resources to assure that personnel are better able to handle these increased pressures. The Governor's Budget proposes:

- $100 million in continued assistance for the County Jail Capital Construction Program provided through a bond sale. This bond sale is the first stage in expending the $280 million authorized under Proposition 2, passed in 1982, for the construction of county jail facilities. In addition to this bond sale, the Administration will support legislation to authorize the issuance of another $300 million of general obligation bonds for the improvement and construction of county jail facilities.
- $8.7 million for continued assistance to counties for training of local correctional and probation personnel.

Department of Justice

The Department of Justice, through the constitutional office of the Attorney General, is responsible for ensuring the uniform interpretation and enforcement of laws and for representing the State in civil and criminal proceedings. The Governor's Budget proposes increases of $8.7 million in new spending and 125.7 new positions to implement programs, expand existing systems, and meet workload increases. Significant budget provisions include:

- $1,847,000 ($295,000 General Fund, $1,552,000 special fund) for expansion of the California Automated Identification System (CAL-ID).

  This system is one of the most modern and sophisticated criminal identification programs in operation in the United States. The system is an integrated plan which includes the automation of the name index file, a register of any person with a record of criminal activity in this State, and automation of the Fingerprint Identification System. CAL-ID will cost an estimated $15.9 million over the next six years and will result in a reduction of 90 positions and savings of $10 million over the same period of time, eventually paying for itself.

  CAL-ID includes several subsystems, such as the Automated Latent Fingerprint system (ALPS). Begun as a pilot program in January 1980, ALPS now provides 38 counties with "cold search" capability. This procedure, used in cases for which there is no known suspect, involves matching a fingerprint taken at the scene of the crime against all prints in the system. The Governor's Budget provides funds to make this criminal identification service available statewide.

- $500,000 General Fund and 11 positions to establish a new program in the Bureau of Narcotic Enforcement to seize those assets of convicted criminals which were derived from the illegal sale of controlled substances. This program, designed to help curb the illegal manufacture and sale of narcotics in California, was authorized by Chapter 948, Statutes of 1983, and eventually will be self-supporting from the assets deposited in the new Narcotic Assistance and Relinquishment by Criminal Offender Fund. In addition, $685,000 General Fund and 10 positions are proposed to increase law enforcement efforts against clandestine laboratories which manufacture illegal drugs.

- Funding for a two-year limited term project (6.1 positions and $209,000 General Fund) to develop an audit program for monitoring felony arrest and disposition data submitted by local agencies. These records will provide timely and accurate criminal history records for use by state and local law enforcement agencies and by the court system in apprehending, charging, prosecuting and sentencing offenders.

- A total of 17 new attorneys and 5.4 paralegals to handle increased workload in the civil and criminal law programs. Additional funding and positions are also provided for forensic laboratory safety equipment, replacement of photo-electronic equipment, continuation of the marijuana record purge program, and staff for the charitable trust registry.

Criminal Justice System

A balanced criminal justice system includes not only the traditional focus of apprehending, prosecuting and incarcerating offenders, but also programs designed to prevent crime and provide relief for victims. The Governor's Budget provides significant increases in funding for assistance to victims of crime pursuant to legislation (AB 1485) which raised penalty surcharges.

The level of grant funding proposed through the budget for victim services, which include victim/witness centers, sexual assault counseling centers, and child sexual abuse counseling centers, is 70 percent ($4.3 million) higher than allocations in the current year budget. A portion of the funds will be used to fund new projects in the high sexual assault crime areas of the State which are currently unserved or underserved, particularly those with high minority population concentration.

This legislation also establishes the Local Public Prosecutor/Public Defender Training Fund which will receive a $495,000 allocation to provide a permanent, stable funding base for training programs for these local criminal justice officials. This training is made available throughout the State at little or no cost to local agencies to provide orientation for new prosecutors and defenders and to give specialized topical training for seasoned professionals.

In a separate legislative initiative, this Administration is proposing a California Major Narcotic Vendors Prosecution Law that will

concentrate prosecutorial resources on major vendors, manufacturers and cultivators of controlled substances. Modeled after the highly successful California Career Criminal Prosecution Law, this law will require District Attorneys to utilize vertical prosecution techniques, and it will preclude plea bargaining and require the prosecution to seek the toughest possible sentence.

Peace Officers

The peace officer's job is one of the most challenging and demanding of all occupations: not only does he have the responsibility of ensuring public safety, but he must do so within an environment of stringent procedural requirements designed to protect citizens' rights. To perform his job competently, the peace officer needs to be selected carefully and trained fully in the techniques and responsibilities of law enforcement.

The Commission on Peace Officer Standards and Training was created to provide local governments and other agencies that use peace officers with the selection standards and training courses needed to ensure the highest level of competence among the State's peace officers.

In 1984–85, the Governor's Budget proposes to increase subventions to local agencies for peace officer training by $6 million which will provide 95 percent reimbursement of agency costs in filling in for officers who are taking training courses. In addition, the commission plans to develop reading and writing proficiency tests to improve the selection criteria for new peace officers and to assist in developing remedial programs for current peace officers. The commission also proposes to test the use of interactive video and other technological training techniques which are less staff-intensive than the traditional classroom setting.

California Highway Patrol

The California Highway Patrol (CHP) is responsible for assuring the safe, convenient, and efficient transportation of people and goods across the State's highway system. The primary objectives are to minimize deaths, injuries, and property losses due to traffic accidents; to minimize traffic delays; and to provide protection and assistance to the motoring public.

The total 1984–85 fiscal year budget for CHP is proposed at $385,079,000 and 7,740.5 personnel years. This budget reflects a commitment to provide the necessary resources for increased law enforcement in California. It includes an increase of 145.5 personnel years and $11,939,000 in new money to provide additional traffic officers for the CHP. This will complete the final phase of Chapter 933, Statutes of 1981 (AB 202), to deploy 670 additional traffic officers on our highways.

These positions will be used to increase the level of service to the public by enabling the CHP to provide 24-hour coverage on *all* interstate routes, U.S. 101 and State Route 99; basic patrol coverage in all field commands, and to allocate coverage geographically on the basis of workload demand indicators.

A serious concern to all Californians is the drinking driver. Although some progress has been made in dealing effectively with the drinking driver, the problem continues at unacceptable levels. Alcohol consumption remains the leading cause of traffic fatalities in California. The cost to the people of this state in terms of deaths, injuries, and property damage continues to be too high.

In an effort to maintain the beneficial effect of recent legislative changes creating stricter penalties for drunk driving, the Governor's Budget proposes the expenditure of an additional $1,000,000 for increased Driving Under the Influence (DUI) enforcement. These funds will provide over 43,000 additional overtime patrol hours to be used exclusively for "on the road" drinking driver enforcement. The goal of this project is to reduce accidents caused by the drinking driver. The CHP estimates that the additional overtime hours should result in approximately 4,000 additional DUI arrests.

Natural Disaster and Emergency Response

The Public Safety function also includes natural disaster response and assistance programs. Because California's geographic, climate, and population characteristics combine to make it susceptible to emergencies, the role of the Office of Emergency Services (OES) is especially critical for assuring public safety through coordination of financial assistance and staff and equipment resources from all levels of government.

A total of $2.5 million and 17 new positions are proposed in the budget for OES to strengthen the State's response capacity. Major system improvements and expansions proposed for 1984–85 include:

- Catastrophic earthquake planning for Northern California (the Southern California plan is largely complete) and extension of the Earthquake Task Force within OES to assure a continued forum for direction and planning assistance from the private sector.
- Installation in Northern California of FIRESCOPE, the computerized firefighting system which is currently operational in Southern California. This system will make the most modern firefighting techniques available to citizens of the northern part of the State and at the same time will provide a back-up system for the southern project.
- Installation of the first phase of an 800 MHz emergency radio system for 12 state agencies which require separate channels for emergency operations. Under the Federal deadline for this project, the system must be installed and the channels loaded by 1986 or Federal authorization to use the channels will be revoked.

Economic Development

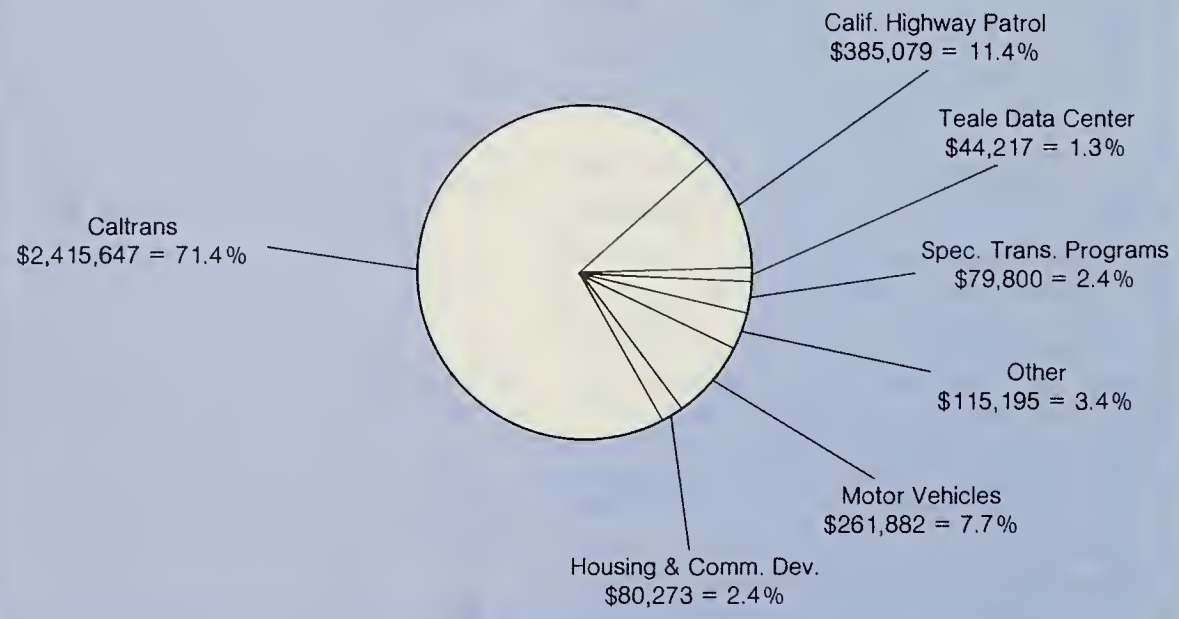
Strengthening California's business climate and, with it, the employment outlook for the people of this state is a key priority of this Administration. The Governor's Budget supports the economic development and new jobs strategy developed by the Administration to retain and attract private investment in California, to encourage new business location as well as business expansion, and to provide for a dynamic business partnership between the public and private sector.

Initiatives to spur economic progress are present throughout the Governor's Budget—from streamlining the regulatory environment to offering high technology education programs to provide a skilled workforce for the industries of the future. However, the Business, Transportation and Housing Agency bears the primary responsibility for economic development programs.

Expenditures in the Governor's Budget for programs under the direction of this agency total $3,382.1 million—an increase of $197.5 million or 6.6 percent, over the 1983–84 budget year. The allocation of these funds is shown in Figure 3.

Some of the important functions and departments which are within the purview of the Business, Transportation and Housing Agency include:

Figure 3
Business, Transportation and Housing
Proposed 1984–85 Expenditures
Amounts in Thousands
(All Funds)



Transportation

The State's transportation system is a vital link in the Administration's economic development goals. Without good transportation, business and commerce will suffer as the distribution of goods to markets becomes increasingly unreliable and the ability of employees to reach the workplace in reasonable commute times diminishes. Recognizing the need for a sound surface transportation system to support growth in industry, tourism, and agriculture, the Governor's Budget calls for the largest highway construction program in state history.

The Department of Transportation (Caltrans) operates an internationally recognized transportation network, which includes more than 48,000 lane miles of highway as well as rail passenger services under contract with AMTRAK and Southern Pacific. The Governor's Budget provides approximately 15,200 personnel years and $2.42 billion to Caltrans. Highlights of the 1984–85 budget are:

- $1.02 billion in total transportation capital outlay. The economic recovery, coupled with last year's increase in State and Federal gas tax levies, resulted in significant increases in funds available for transportation capital projects in California. These increases are reflected in the adopted 1983–84 Five Year State Transportation Improvement Program, which authorizes $6 billion in projects over the five year period.
- $15 million for implementing the computerized "Roadway Design System". In use by eight states, this system will undergo pilot testing in California beginning in April 1984. Successful execution of the pilot project will result in statewide adoption of the system to be supported by Teale Data Center with over $3 million in additional funds. Initial estimates of the savings created by this automation in terms of lowered staff requirements and earlier completion dates are set at almost $90 million over the first five years.
- $8.5 million and more than 50 additional personnel years are provided for highway maintenance improvements, including such safety-related items as signals, guardrails, and raised lanemarkers; for additional snow and ice control; and for equipment maintenance.
- A total increase of $19.7 million in State and Federal funds and other reimbursements to continue major improvements to the Peninsula Commute Rail Service. These improvements include acquisition of new rolling stock, modernization and acquisition of stations, and addition of new parking. Also, planning studies are proposed in 1984–85 for additional stations, a new maintenance facility, and the possible extension of service to downtown San Francisco. Coupled with continued marketing efforts to build ridership, these improvements are expected to help reduce congestion along one of the State's busiest transportation corridors by attracting 6,100,000 passengers in 1984–85.
- $3.2 million is provided for the "San Joaquins" Rail Service and $277,000 in additional funds is proposed for increased marketing for the "San Joaquins" and "San Diegan" passenger trains. In 1983–84 "San Joaquins" ridership is projected to increase 11 percent over 1982–83 levels and to increase another 18 percent in 1984–85. Dependent on continued ridership increases sufficient to meet the statutorily mandated fare box recovery of 55 percent, Caltrans will request approval to continue this rail passenger service into 1984–85.

Business Development

The Department of Economic and Business Development serves as one of the key state organizations in implementing economic and job creation strategies in California.

The first step in the Governor's agenda to reshape California's business climate is to earmark $16.7 million—$8.7 million in new money along with 16.3 additional personnel years—for the Department of Economic and Business Development. Program expenditures include:

- $1.8 million (General Fund) and 5.6 personnel years to fund a business advertising and marketing plan and to establish field offices in Los Angeles and San Jose, both high technology areas. With no major economic downturns, these proposed additional State resources could attract sufficient new business ventures to California to create 19,300 new jobs, generate more than $285 million in payroll, and more than $8.6 million in personal income tax revenue to the State.
- $5.1 million (General Fund) and 2.9 personnel years to implement a State tourism advertising and promotion campaign, which, given a stable economy, could generate $163 million

in travel expenditures, support 3,400 new jobs, and yield $6.4 million in State tax revenue and $2.3 in local tax revenue.

Tourism is one of California's leading industries, generating $27 billion in annual travel-related expenditures. This in turn supports over 500,000 jobs and state and local taxes of approximately $1 billion and $500 million respectively.

- A budget increase of $249,000 and 3.8 personnel years for the Small Business Revitalization Program to enable California to participate in this Federal program established by President Reagan in November 1982. By increasing the State's technical assistance capabilities to small cities and businesses, California will be able to obtain its fair share of Federal Urban Development Action Grant monies, which will help municipalities attract and retain business.

Motor Vehicles

The Department of Motor Vehicles (DMV) is vigorously continuing its efforts to reduce costs, increase productivity, and improve the level of its services through automation. In DMV field offices located throughout the State, businesses and the general public obtain information and certification necessary for the ownership and operation of private and commercial vehicles. To meet the public's needs, the 1984–85 budget proposes expenditures of $243 million and 7,265 personnel years.

Over the next 18 months, computers will be installed in 100 DMV field offices. Vehicle registration transactions will be automated first, followed by drivers license transactions. Full implementation will allow a dramatic reduction in staff and costs. During the next several years an estimated 930 positions will no longer be needed and costs will be reduced by $17 million annually. At the same time the public will experience better service and reduced waiting times at DMV field offices.

Health and Welfare

The Health and Welfare programs presented in the Governor's Budget are directly concerned with the physical, mental, and social well-being of Californians. These programs account for some 31 percent of the budget. For 1984–85, Health and Welfare expenditures total approximately $17.7 billion in combined State and federal funds. The allocation of these funds is shown in Figure 4 on the next page.

The major focus of Health and Welfare programs are the millions of Californians who need assistance in one or several of the program areas listed in the table below.

Except for the services provided through the State hospital system and the Employment Development Department, the primary contact for all the people served in the programs listed in the table below are local agencies. This emphasizes the need to provide as much discretion as possible to the local organizations to enable them to effectively and efficiently assist these people.

Mental Health

Mental health problems are treatable, but, if left untended, they can result in significant losses to society. This Administration believes that strong efforts must be made at both the State and county levels to treat and return mental health clients to useful lives in their communities. The Governor's Budget establishes a Mental Health Initiative to help ensure that California's community-based mental health system provides the range of needed services and that the State hospital system is brought to full accreditation and certification.

Community-Based Mental Health Services. The Governor's Budget proposes to transfer to local governments the control and responsibility for community-based mental health services. The intent of this transfer is to minimize State

Major Health and Welfare Program Caseloads

Program	Average Caseload 1983–84	Average Caseload 1984–85	Change
1. California Children's Services (treatment of physical handicaps)	350,920 [a]	371,840 [a]	20,920 [a]
2. Medi-Cal (provision of medical services to eligible poor)			
a. Certified eligibles	2,799,000	2,796,400	−2,600
b. Average monthly users	1,252,850	1,261,910	9,060
3. AFDC (support for unemployed persons with minor children)	1,660,170	1,661,130	960
4. SSI/SSP (support for aged, blind and disabled)	648,112	645,113	−2,999
5. State Hospitals			
a. Mental health clients	4,947 [b]	5,014 [b]	67 [b]
b. Developmentally disabled clients	7,270 [b]	6,965 [b]	−305 [b]
6. Community Developmentally Disabled Services			
a. Regional centers	65,936	70,516	4,580
b. Work activity program	11,763	12,493	730
7. Vocational Rehabilitation	53,000	54,000	1,000
8. Unemployment Services	256,722	243,000	−13,722
9. Meals for Elderly Citizens	23,500 [c]	23,500 [c]	0 [c]
10. In-Home Supportive Services	101,204	107,756	6,552
11. Food stamps	1,834,500	1,820,000	−14,500
12. Alcohol Programs	20,000 [d]	20,000 [d]	0 [d]
13. Drug Programs	6,700 [d]	6,700 [d]	0 [d]
14. Community Mental Health	450,000	450,000	0

* Includes State Support and Local Assistance.

** Reflects allocations for the Health and Welfare Agency, Department of Aging, Department of Alcohol and Drug Programs, Health and Welfare Consolidated Data Center, Office of Statewide Health Planning and Development, Department of Rehabilitation, Emergency Medical Services Authority, Governor's Advisory Committee on Child Care, State Council and Area Boards on Developmental Disabilities, State support and county administrative costs for the Departments of Social Services and Health Services and Health Facilities Commission.

regulatory and bureaucratic involvement and to maximize the counties' ability to apply these funds to direct treatment services.

This transfer will result in an annualized reduction of the State's administrative operation equal to $3.3 million and 79 personnel years. The Governor's Budget channels these savings, as well as $35 million in new funding to this revised local program. The $35 million augmentation is intended to make up for lost purchasing power due to the inflation level for mental health treatment costs, which has substantially exceeded what has been available for cost-of-living adjustments over the past several years.

State Hospital System. Beginning in the 1984–85 Budget, this Administration is proposing the first phase of a multi-year program which will result in California's having the only fully accredited system of mental hospitals in the nation.

To achieve a level of treatment in line with national and state standards for state hospitals serving mentally ill patients and to accelerate their return to community living, the Governor's Mental Health Initiative proposes an augmentation of 198.5 net authorized positions and approximately $6 million. This augmentation represents the first increment of a three-year implementation of state hospital level-of-care staffing standards.

Also, the Mental Health Initiative proposes an augmentation of $2.6 million and 72 net authorized positions to reduce the budgeted hospital salary savings level from 7.1 to 5.5 percent. This augmentation is intended to curtail the incidences of prolonged position vacancies that are often necessary to meet the high salary savings level that is currently budgeted for the mental hospitals.

In conjunction with the hospital staffing improvements, the Mental Health Initiative proposes $21.7 million in capital outlay improvements for the State hospitals during 1984–85. This augmentation represents the first increment of a five-year capital outlay plan to bring the State hospitals into compliance with fire and life safety requirements and provide environmental and security enhancements for hospital patients. These improvements will better ensure the safety and well being of hospital patients and will increase the State hospitals' opportunities for increased Federal funding through certification and

accreditation. The hospitals affected are:

Atascadero	$1,974,000
Metropolitan	11,147,000
Patton	3,135,000
Camarillo	1,227,000
Napa	4,197,000
	$21,680,000

The principal projects to be funded by the Mental Health Initiative during 1984–85 are fire and life safety and environmental improvements at Metropolitan State Hospital's Chronic Treatment-West Complex Unit and environmental improvements for young acute psychiatric patients at Napa State Hospital. Proposed within these amounts is approximately $1.2 million for resident furnishing for mental health patients.

Transfers to Local Government

This Administration is strongly committed to the position that government services are most effectively delivered if those who are actually providing the services have sufficient flexibility to meet the special needs of recipients in their individual communities. To accomplish this goal those at the State level must become less involved in the day-to-day process of providing services and focus their concerns on assuring that the overall goals of individual programs are met.

As part of this policy, the Administration will be supporting legislation, to be effective January 1, 1985, to transfer basic responsibility for various programs to local government. This transfer will allow local governments more flexibility in meeting their own community's needs and, thereby, increase the effectiveness of these programs. The savings generated by reducing the number of persons involved in these programs at the State level will be made available to local governments.

Specifically, the Governor's Budget proposes to:

- Establish a Public Health Enhancement Program (PHEP). This program is designed to enhance local government's ability to serve individual community public health needs through the transfer of the following five programs from the State to the counties: Dental Disease Prevention, Preventive Health to the Aged, Immunization Assistance, Child Health Disability and Prevention, and specific Maternal and Child Health local assistance programs.

  The $852,000 saved by the elimination of 83 positions in the department overseeing these programs is also proposed to be transferred to local government. In addition the Administration will support, as part of this legislation, an augmentation of $1.25 million to assist in this transfer and to provide local government with the ability to expand in areas of high need.

- Transfer Family Planning to Local Government. An augmentation of $4.75 million to the level of funding contained in this budget will be included in the proposed legislation to assist in transferring Family Planning to local government and to provide local government with the ability to expand in areas of high need. In addition, the $445,000 saved by the elimination of the 27 positions currently administering this program at the State level is proposed for inclusion in the local funds contained in the Governor's Budget.

- Transfer most Alcohol and Drug program activities to Local Government. The Governor's Budget proposes to consolidate the alcohol and drug programs, to reduce the State's administrative involvement, and to provide a greater opportunity for local governmental entities to meet their specific needs. Since through consolidation most State statutory and regulatory requirements will be either lessened substantially or eliminated entirely, both levels of government will be able to reduce administrative activities.

- At the State level, both the General Fund and Federal fund savings will be used to increase the amount of money made available to serve clients at the local level. To assist in this transfer and to provide local government with the ability to expand in areas of high need, an augmentation of $5 million to the level of funding contained in this budget will be included in the proposed legislation.

Other Health and Welfare Provisions

In addition to major policy initiatives raising the level of mental health services and increasing county government autonomy over the administration of health and welfare services in their communities, the Governor's Budget includes the following:

- Continuing the present level of rates paid to medical practitioners and others who provide medical services as well as expanding controls on the utilization of specific medical procedures and services implemented in the

Medi-Cal reform legislation (Chapters 328 and 1594) of the 1982 legislative session.

- Noting that the special appropriation established for nonelective abortions is insufficient for full-year funding of the elective abortions policy mandated by a temporary restraining order issued in 1983–84 by the Court of Appeals. The 1984–85 budget assumes a nonelective abortion policy similar to that adopted by the Legislature in 1983–84. Continued provider payments in 1983–84 will depend on further court action.
- Estimating that accrued savings to the Medi-Cal program will total approximately $235.4 million ($117.7 General Fund) as a result of reimbursing hospitals on a negotiated contract basis. The 1982 Medi-Cal reform legislation (Chapters 328 and 1594) authorized the State to negotiate contracts with private sector providers of health care services for the delivery of hospital inpatient services to Medi-Cal beneficiaries.
- Implementing a new fiscal intermediary contract with private sector accounting institutions to process Medi-Cal claims for payment, beginning in 1984–85 and extending through 1988–89. The anticipated savings commensurate with the provisions of the new contract are estimated to be approximately $41 million ($11.3 million General Fund) over the life of the contract as compared to current contract costs.
- Supporting legislation to repeal the Special Circumstances program for SSI/SSP recipients for a General Fund savings of approximately $3 million. The benefits paid under this program duplicate many which are available under other programs and are provided at a very high administrative cost.
- Adding State funds to enhance Federal funding for the development and installation of on-line Food Stamp issuance systems in Fresno, San Francisco, and Los Angeles Counties. On-line issuance is expected to reduce both administrative costs and the number of unauthorized coupon issuances.
- Allocating $1 million to establish a prevention initiative to reduce the incidence of developmental disabilities in California. The Administration's goal is to reduce the occurrence of developmental disabilities by identifying environmental hazards and high risk groups; providing educational and follow-up services; and developing community prevention services in accordance with long range prevention plans. The funding proposed in 1984–85 will enable regional centers to complete interagency planning, increase awareness and utilization of genetic prevention services, and initiate community prevention programs.
- Proposing $1.4 million for replacement of irreparable equipment and purchase of equipment needed in State hospitals for the health and safety of residents who are developmentally disabled.
- Providing General Fund expenditure to meet the caseload increases in the In-Home Supportive Services and Crippled Children Services programs which were funded in 1983–84 by one-time Federal "Jobs Bill" money.

County Administration

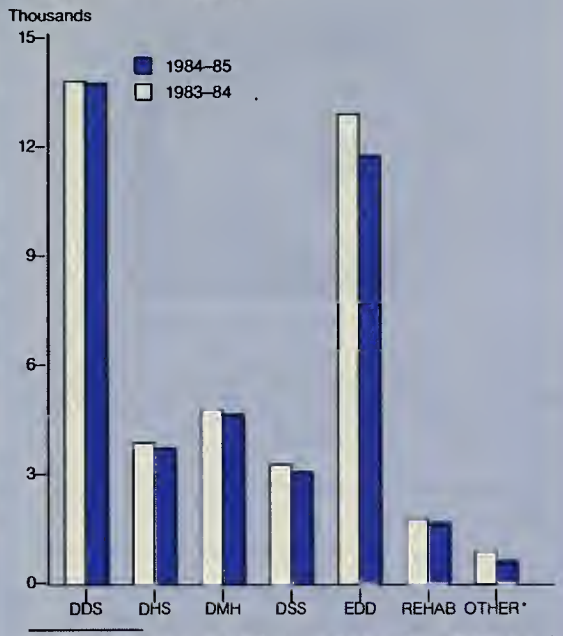
Recognizing local governments' prerogative to establish salary levels they believe sufficient to meet the needs of their individual communities, the budget proposes to augment county administration expenditures for AFDC and Medi-Cal eligibility determination. This $17.7 million in new money is intended to restore State funding of local cost-of-living adjustments (COLAs) which had been granted by the counties over the past three years.

In the past some counties chose to understaff in order to fund salary levels above those which were supported by State funding. This resulted in some counties understaffing the number of eligibility workers and increasing the potential for higher error rates in these programs. General Fund costs for overpayments to ineligible recipients and possible Federal sanctions are significantly more costly than restoring unfunded county salary increases.

State Staffing

All departments in the Health and Welfare Agency have done a major review of their activities with the aim of streamlining and eliminating, where possible, unnecessary and duplicative activities. Figure 5 shows that, when combined with the fluctuations created by changing client workload, this review has succeeded in reducing total personnel years within the Agency by over 1,750 or −4.3 percent from 1983–84.

Figure 5
Health and Welfare Personnel Years



*Reflects allocations for the Health and Welfare Agency, Department of Aging, Department of Alcohol and Drug Programs, Health and Welfare Consolidated Data Center, Office of Statewide Health Planning and Development, Emergency Medical Services Authority, Governor's Advisory Committee on Child Care, State Council and Area Boards on Developmental Disabilities, and Health Facilities Commission.

Inflation Adjustments

Recognizing the considerable lessening of inflation over the last year-and-a-half, the budget proposes a basic two percent inflation adjustment for almost all health and welfare programs. This would entail an approximate $137 million increase in Health and Welfare programs in 1984–85. No additional funds are proposed for the Medically Indigent Adult Program as all indications are that the current level of funding is sufficient to meet the projected demand in 1984–85.

Included in this proposal are the AFDC and SSI/SSP programs. As can be seen in the table below, California has the highest SSI/SSP and AFDC financial aid payments standards in the 10 most populated states. This has contributed to California's having a greater share of the nationwide AFDC and SSI/SSP caseload than is California's percentage of the overall national population. The budget proposes to gradually bring California's levels nearer to that of other states by reducing annual increases for inflation.

Ten Most Populated States
SSI/SSP and AFDC Payments as of July 1, 1983

States[1]	SSI/SSP Payment Standards				AFDC Maximum Aid Payment
	Aged and Disabled		Blind		
	Individuals	Couples	Individuals	Couples	Family of 3
California	461.00	853.00	516.00	1,000.00	526.00

[1] In descending order by state population.
[2] SSI/SSP Grant levels vary regionally within the State.
[3] These states do not supplement SSI.
[4] This state does not have a standard allowance for its SSP. Payments are based upon individual needs and circumstances. The average supplement to the federal payment shown here in July 1983 was $66.85.

Agriculture

Exceeding $14 billion in annual production, California's agricultural industry is the largest in the nation. The Department of Food and Agriculture is charged with protecting, promoting, and regulating this industry. The department's major areas of responsibility include:

Assuring an abundance of California produced food and fiber, developing policy and providing assistance in such areas as marketing and exporting, protecting public and worker health and safety, preventing or eradicating intrusions of harmful plant and animal pests and diseases, developing and enforcing weights and measures standards for all levels of commerce, registering and regulating agricultural chemicals, and inspecting foods and commodities for quality and safety.

The Governor's Budget proposes $118,471,000 for the Department of Food and Agriculture, which is a 3.2 percent increase over 1983–84. This includes $334,000 for the expansion of the Environmental

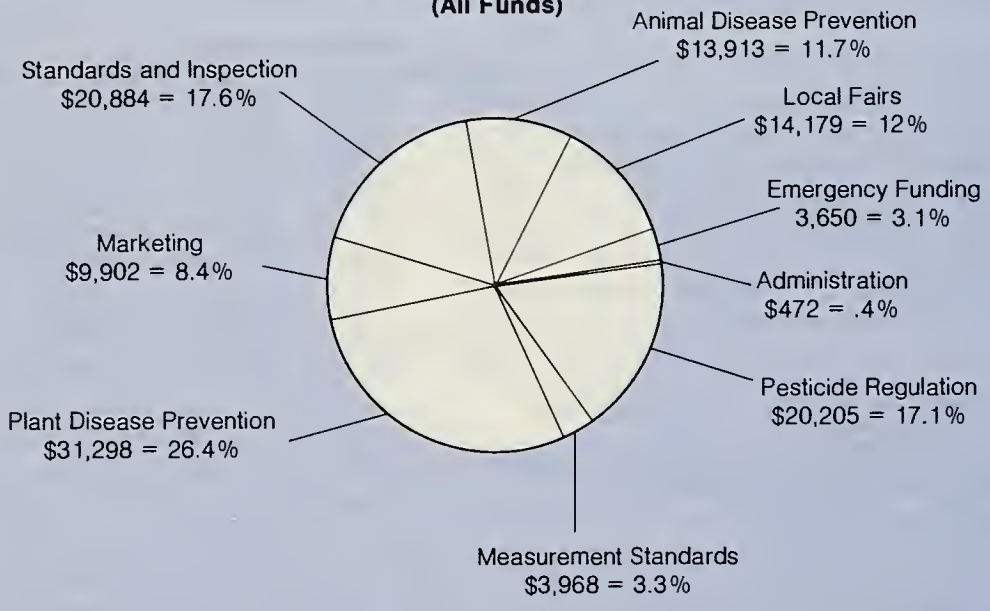
Hazards Assessment Program to perform on-site monitoring of pesticides. The allocation of these funds is shown in Figure 6.

Key expenditure areas in the 1984–85 Budget include:

- Continuing the orderly marketing of agricultural commodities produced in the State through development of a strong export marketing program, and assistance to the

Figure 6
Agriculture
Proposed 1984–85 Expenditures

Amounts in Thousands
(All Funds)



industry in establishing standards for commodities, packaging, and marketing.

- Continued eradication efforts directed at such pest infestations as Mediterranean fruit fly, cotton boll weevil, gypsy moth, Japanese beetle, Mexican fruit fly, oriental fruit fly, and apple maggot. The Department is also planning a major exclusion and detection program to help prevent the introduction of plant and animal pests and diseases resulting from the more than 600,000 anticipated visitors to the 1984 Olympics in Los Angeles.
- Research projects to determine pesticide resistance and residues on cotton; to identify effects of curly top virus disease on field crops and to investigate various other problems severely affecting agriculture today.
- A capital outlay program of $4,537,000 which includes funding for the construction of two additional inspection stations.
- Continued funding for the University of California agricultural research program which is responsible for projects to improve food and fiber productivity, pest management, conservation and management of renewable natural resources, enhancement of the environment, and food product development and marketing. This program is supported by $65 million in State funds, $20 million from Federal sources, and $8 million in special grants, endowments and gifts.

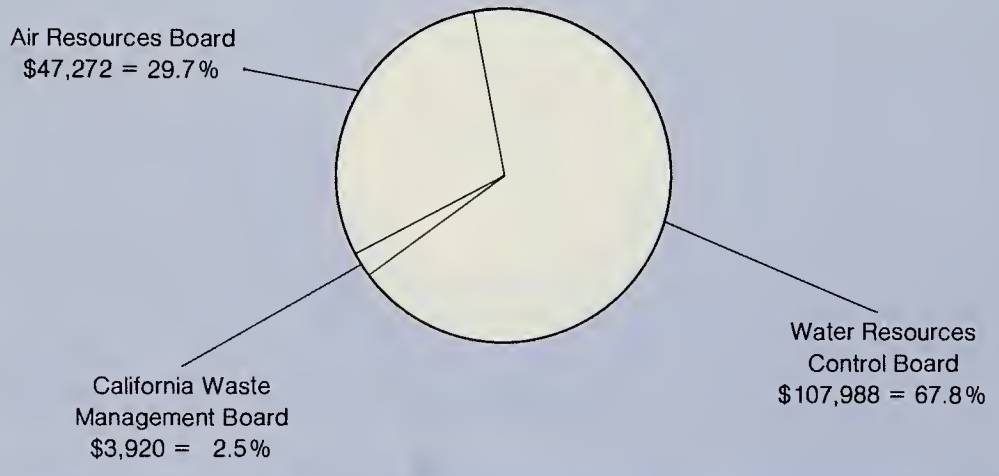
Environmental Quality

California's environmental quality programs are concerned with protecting air and water quality; overseeing the disposal of solid wastes; managing the clean-up, disposal and storage of toxic wastes; and monitoring development of the State's Outer Continental Shelf oil and gas resources. These programs are targeted at ensuring that the laws designed to safeguard the public health are carried out.

In this budget the Administration has proposed major steps to halt environmental degradation in California. The Governor's Budget has substantially increased funding for the Toxic Substances Control Program and for the Air Resources Board. This budget launches a five-year program for the permitting of every hazardous waste facility in the State. In addition the budget increases funding for campaigns to eliminate groundwater contamination from leaking underground tanks and for the Leviathan Mine acid leaks in the Sierra Nevada.

The Environmental Affairs Agency has the major responsibility for these programs. It oversees the Air Resources Board, the State Water Resources Control Board and the California Waste Management Board. The Governor's Budget allocations to these functions are shown in Figure 7.

Figure 7
Environmental Quality
Proposed 1984–85 Expenditures *
Amounts in Thousands
(All Funds)



* Does not include toxic waste management programs.

The funding provided for these three boards totals $159.2 million and 1350.5 personnel years, a reduction of two percent from the 1983–84 budget. This reduction reflects the March 1984 termination of the Vehicle Inspection Program in the South Coast Air Shed which cost $13.9 million. These environmental quality programs represent approximately 0.3 percent of the State budget.

In addition, the Governor's Budget provides $58.1 million for the Toxic Substances Control Program, which is administered by the Health and Welfare Agency, but is discussed in this section of the Budget Summary.

Toxic Substances Control

One of the most serious problems facing California as an industrial society is the enormous quantity of hazardous wastes generated by chemical, petroleum, electronic and other industries. Over the past few years, short and long-term detrimental effects to the health of citizens from this hazardous waste have been documented.

To correct these problems and prevent future ones, the Administration has made toxic waste control a major priority. Therefore, the Governor's Budget augments the Toxic Substances Control Program by 67.5 positions and $2,147,000 to increase permitting, surveillance and enforcement activities.

This augmentation will allow California to institute a five-year program in which, by June 30, 1988, all hazardous waste facilities will have been permitted. The Environmental Protection Agency has indicated that Federal laws will require states to permit all facilities within a seven or ten year-time frame. California, in setting a five-year deadline, will be accelerating those activities which directly enable the State to protect the public health and environment.

At the same time, enforcement of hazardous waste laws will be increased which will enable California to aggressively curtail illegal disposal of hazardous wastes.

It is important to note that the task of managing toxic materials requires the coordinated effort of many departments throughout State government. These various department's may generally be classified into two groups:

- Those which regulate the existence, storage and use of materials which may be considered toxic. Included in this group are: the Department of Health Services, the Department of Food and Agriculture, the Department of Industrial Relations, the State Water Resources Control Board, the California Highway Patrol and the Air Resources Board.
- Those which do not perform regulatory activities, but assist in monitoring and cleaning-up toxic materials. Included in this group are: the Department of General Services, the Department of Fish and Game, the Department of Water Resources, the Department of Transportation and the Office of Emergency Services.

The Governor's Budget includes program expenditures across this broad spectrum of State agencies and departments to focus their attention and activity on the Administration's toxic waste management priority.

Air Quality

The Air Resources Board works closely with local air pollution control districts to curtail air pollution in California. The Board is responsible for the control of motor vehicle emissions statewide and coordinates state and local programs to control stationary sources of emissions.

The Governor's Budget increases Air Resources Board funding by $6.1 million or 15 percent over last year—exclusive of the Motor Vehicle Inspection Program which terminates in March 1984. The Governor's Budget expands the following programs for identification and regulation of air quality problems:

- An additional $2 million and 5.7 personnel years are proposed to double the Acid Rain Program implemented as a result of legislation (Chapter 1473) passed in 1982. This legislation provided for a five-year program to design and implement a comprehensive research and monitoring program to study acid deposition in California.
- An additional $889,000 and 5.7 personnel years are proposed to increase the Board's efforts to determine the health effects of toxic air contaminants. These additional resources will permit the Board to investigate the concentrations and potential effects of 50 identified contaminants.
- An additional $900,000 and 2.4 personnel years are proposed for increasing the $5 million allotted in 1983–84 for research efforts. These additional funds will allow the Board to expand its research efforts in such areas as

blood lead levels in newborn infants, ozone and sulphur dioxide on rice yield, characterization of carcinogens resulting from incineration of municipal refuse, monitoring and survey of sources of benzene emissions, durability of electronic emission control modules for late model year automobiles, aerosol characterization experiment in Southern California, and effects of continuous dynamic fumigation on air quality.

Water Quality

The State Water Resources Control Board and the nine Regional Water Quality Control Boards work to preserve and enhance the quality of California's water resources, ensure that adequate supplies are available, and promote the effective allocation and use of these water resources.

The Governor's Budget proposes to increase funding for the Board's operation by $2.5 million or 2.4 percent over the 1983–84 level. With this increased funding, the Board will be able to respond to the Administration's priority on rectifying situations where toxic substances threaten the water quality of the state by continuing the following two major pollution control programs:

- Elimination of the threat of ground water supply contamination from leaking underground tanks. About one-half of the State's drinking water comes from wells which are less than 1000 feet deep. In March, 1982, industries in the Silicon Valley discovered that some of their underground storage tanks were leaking and contaminating underground drinking water supplies. These industries have looked to the State Water Resources Control Board for guidance in dealing with leaking underground tanks and have worked closely with the Board to develop a program for detecting and mitigating such leaks.

  Recent legislation, Chapters 1045 and 1046, Statutes of 1983, defined and expanded the Board's role concerning the identification and regulation of underground tanks. During the start-up period for the programs established pursuant to Chapters 1045 and 1046, an interim program designed to resolve the immediate threat to ground water by leaking underground tanks is proposed. A total of $2.5 million and 52.2 additional personnel years are proposed for these programs in 1984–85.

- Clean up of acid leaks from the Leviathan Mine. Another major clean-up program involves the Leviathan mine in the Sierra Nevadas which is emitting acid run-off into Leviathan Creek. This open-pit sulphur mine, was abandoned by its owners in the early sixties. Since then acid run-off into Leviathan Creek has killed aquatic and plant life for approximately 13 miles along the creek.

  The budget proposes $1.5 million of State funds to be added to private funds which have also been made available for this project. These moneys are to be used to fund the second-year effort of a three-year plan in which industry and government are working together to correct the situation. The three-year plan will cost an estimated $5.2 million of which $2.9 million will be funded by the State and $2.3 million will be from private sources.

Natural Resources

California's natural resource base is uniquely rich and diverse. It is the responsibility of the Resources Agency to protect this natural resource heritage for the people of California through a wide range of programs to ensure the preservation, sound management, and wise use of the State's water, fish, wildlife, forest, mineral and recreational resources.

The Governor's Budget provides funds for a number of key resource management activities. It responds to the pressing need for flood control projects in the wake of the high precipitation levels of recent years. Funding is also provided for coastal protection and restoration activities and for community water protection and development projects.

Under the Governor's Budget, total program expenditures for State operations and local assistance of $676,273,000 are provided, as shown below. This represents a 13.2 percent reduction over 1983–84—a decrease largely due to smaller bond debt service costs for the State Water Project, completion of several energy development programs, and a reduction in local assistance grants in the Department of Parks and Recreation.

Resources
Proposed 1984–85 Expenditures
In Thousands

Parks and Recreation	108,192	62,711
Santa Monica Mountains Conservancy	530	319
S.F. Bay Conservation and Development Commission	1,242	1,242
Water Resources	159,621	35,398
Total	$676,273	$299,683

Forestry

The Department of Forestry is responsible for the conservation and development of California's forest, watershed and range lands. The department maintains a highly professional and integrated urban and rural fire fighting organization that is designed to meet the high levels of fire hazard that exist within the State. In addition to fire protection, the department is responsible for resource management and regulation of timber harvest practices.

Dutch Elm Disease Program. Dutch Elm Disease is a fungus that is carried by beetles and, if left unattended, can completely destroy the population of California's five to six million elm trees within the next twenty years. The disease containment program was initiated in 1975 and is in effect in seven Bay Area counties. For 1984–85, $834,000 is proposed to expand the program into San Francisco and the remaining portions of three other Bay Area counties where the disease has been discovered. In addition, the department will contract with the California Conservation Corps to perform the survey, detection, sampling and removal work.

Automated Information System. The Department of Forestry responds to over 90,000 emergency incidents annually. This creates a monumental paper logjam. For 1984–85, $598,000 is proposed to implement an automated data gathering and information system. These funds will be used to purchase necessary computer equipment. Not only will this system greatly improve operational efficiency and facilitate the recovery of reimbursable costs, but will also allow the department to redirect substantial staff resources to emergency response activities.

Fire-Fighting Airtanker. In 1983–84, the department will modify one aircraft at a cost of $139,000 for use in fire protection and resource management programs. In 1984–85, the Budget provides $274,000 for modifying two additional aircraft. This will enhance the department's fire fighting capabilities.

Parks and Recreation

The Department of Parks and Recreation is responsible for acquiring, preserving, developing, and managing the natural, cultural, and recreational resources in the State Park System. This system consists of 266 individual units, including 34 units administered by local and regional park agencies. These park units contain approximately 1.2 million acres, with over 240 miles of ocean and bay frontage and 675 miles of lake, reservoir and river frontage. Nearly 64 million visitor-days are expected in 1984–85.

The department's $102 million budget for 1984–85 represents a $46 million decrease from 1983–84. This decline is due primarily to a reduction in local assistance grants funded from Federal Funds, 1980 Bond Funds, and Energy and Resource Funds.

The most significant proposed change in 1984–85 is a $4.4 million fund shift from the State Park and Recreation Fund to the General Fund to make up for an anticipated revenue shortfall. This change will allow full staffing of maintenance and visitor service functions.

The department's 1984–85 capital outlay program is $43.2 million and contains $22.8 million for the development of various state park units, $11 million for acquisition, $5.7 million for the development of off-highway vehicle areas, and $3.7 million for planning.

Fish and Game

Programs for the preservation and enhancement of fish, wildlife and natural habitat are carried out by the Department of Fish and Game. The Governor's Budget provides an increase of $6,254,000 or 8.5 percent over the department's 1983–84 budget. Of this amount, $4.2 million is attributable to the following key programs:

- $2,014,000 for continued restoration and enhancement of the Bolsa Chica and Upper Newport Bay coastal wetlands. These wetlands are an integral part of the Pacific flyway providing valuable food and shelter to the millions of migrating waterfowl which use this route. The restoration of these wetlands is essential to ensure the perpetuation of the fish and wildlife species dependent upon these ecologically important habitats.
- $1,000,000 to continue fish and wildlife habitat improvement on National Forest and Bureau of Land Management lands in California in order to maintain healthy and prosperous populations of fish, wildlife and plants.
- $745,000 to continue a salmon and steelhead restoration program aimed at increasing the State's depleted salmon and steelhead resources.
- $447,000 to intensify existing efforts to rebuild the State's declining striped bass population.

Water Resources

The role of the Department of Water Resources is to protect, develop, and manage California's water. The department has a major responsibility for supplying suitable water for household, agricultural, industrial, recreational and power generation uses as well as for fish and wildlife support. The department also has major responsibilities for flood management and dam safety.

The Governor's Budget assigns approximately 72 percent of the department's state operations and local assistance funding to State Water Project activities. This water project is one of the most massive flood control and water management systems in the world. It collects, stores, and transports water from Northern California to Central and Southern California for agricultural and domestic use.

The Governor's Budget has been reduced by $50 million compared to 1983–84, due primarily to the anticipated commitment of all available Safe Drinking Water Project loan and grant funds during 1983–84.

Major proposals for 1984–85 include legislation, to be introduced in early 1984, to use $22.4 million of the existing $25 million tidelands oil allocation for a local water protection and development program. This program will include $10 million to maintain the Sacramento-San Joaquin Delta levees.

A $9.9 million loan program will also be proposed to alleviate ground water overdraft problems which threaten water supplies and agricultural production. Other elements of the program include $2 million for local planning assistance, and $500,000 for acquisition of riparian vegetation essential to flood control.

The Governor's Budget also proposes using $2.6 million in tidelands oil monies to continue operation of the Los Banos demonstration desalting facility.

In 1984–85, $14,798,000 is provided from the General Fund for floodcontrol projects designed to offset the effects of two consecutive years of record water runoff. Projects include $830,000 to restore the flood carrying capacity of the Sacramento River, and $500,000 to repair a facility which controls water flowing into the Butte Basin and Sutter Bypass. A total of $168,000 is proposed to improve the department's ability to forecast flood emergencies. The remaining $13,200,000 provides for continuation of the State's flood control subventions program.

Boating and Waterways

The Department of Boating and Waterways' objectives are to develop and improve boating facilities throughout the State, to promote boating safety, to license yacht and ship brokers and salespersons, to develop shoreline protection measures, and to conduct a beach erosion control program in cooperation with Federal and local agencies.

The Governor's Budget proposes $25,225,000 for State operations and local assistance. Of this amount, $2,885,000 is provided from the General Fund for two beach erosion control projects:

- The Imperial Beach, San Diego County project involves a combination of shoreline protection measures necessary to preserve the beach, which has receded more than 200 feet in the past four decades, as well as to preserve nearby homes, businesses and roadways. State funding of $1,355,000 represents less than a quarter of the project's total cost of $6,300,000, with the remaining funds coming from Federal ($3,590,000) and local ($1,355,000) agencies.
- The Pacifica Shore project in San Mateo County will make a recreation beach and fishing pier accessible to the public, as well as to emergency vehicles and other city services, during high wave conditions. The project will also protect roadways and other public utilities from further wave damage. State funding of $1,530,000 will be matched by $510,000 in local funds.

Other major programs included in the Governor's Budget are $11,350,000 for development of small craft harbors, $3,933,000 for development of boat launching facilities, and $150,000 to control the water hyacinth, which threatens to clog marinas and navigational channels in the San Joaquin Delta area. These additional programs will be funded from the Harbors and Watercraft Revolving Fund.

State Coastal Conservancy

The State Coastal Conservancy was established within the Resources Agency by Chapter 1441, Statutes of 1976, to develop and implement programs to protect, restore and enhance coastal resources in keeping with the policies established in the California Coastal Act of 1976. Specifically, the policies of the Coastal Act provide for: 1) public access to the coast; 2) preservation of the marine environment; 3) enhancement of coastal land resources; and 4) a balanced coastal development program.

The Governor's Budget proposes a total expenditure of $8,617,000. This amount reflects an increase of $479,000 or 5.9 percent over the Conservancy's 1983–84 budget. Of this amount, $352,000 is proposed as a loan from the State Coastal Conservancy Fund to finance start-up operations associated with the implementation and administration of a new urban waterfront restoration program mandated by Chapter 1264, Statutes of 1983.

This legislation created the California Urban Waterfront Area Restoration Financing Authority, with authorization to issue up to $650 million in tax exempt revenue bonds and to undertake urban waterfront restoration projects upon recommendation by the Conservancy. These projects would not only enhance the State's urban waterfront resources but would provide a means of establishing or expanding businesses, creating more employment opportunities, as well as providing new sources of revenues to enhance the economic base of the involved communities.

Judicial*

Article VI of the Constitution creates the Supreme Court and the Courts of Appeal to exercise the judicial power of the State at the appellate level. In addition, the Article establishes the Judicial Council to oversee and administer the State's judicial system.

The Judicial Branch is proposing a 1984–85 funding level of $51.8 million, a 16.8 percent increase over their 1983–84 budget.

- The 1983–84 budget reduced public defender services available to appellate courts throughout the state. Simultaneously, the Administration reserved $1.5 million for augmentation of the Judiciary's budget for court-appointed counsel to ensure continued legal representation as constitutionally required. To assure adequate counsel for the anticipated 6,000 cases, pilot projects were initiated through contracts with non-profit agencies to provide representation, recruit private counsel, and oversee the quality of representation.
- The 1984–85 budget provides an increase of $2.8 million to extend the court-appointed counsel pilot projects statewide and to compensate counsel.
- The budget also includes $320,000 for Coordination Proceedings, in which judges are assigned to provide effective judicial management of cases which have common issues pending in different trial courts. Additionally, modification of an existing local assistance budget item (0420-101-001) is proposed to permit the use of any savings accruing from superior court judgeship vacancies to help meet future cost increases in Coordination Proceedings.
- The 1984–85 budget includes operating expense increases of $1.2 million for facilities and $183,000 for equipment repair and maintenance.
- To meet workload in the Courts of Appeal, the budget proposes $475,000 for eight central staff attorneys, $373,000 for seven secretaries, $225,000 for clerks' office staffing, $200,000 for five administrative assistants, $74,000 for two

librarian positions, and $114,000 to expand the Expedited Appeal Program which substitutes oral arguments for written briefs whenever feasible. Three positions and $430,000 are proposed for administrative support in the Judicial Council.

* The proposals included in this section are those submitted by the Judicial Branch and do not necessarily reflect the Governor's position on these issues.

General Government

The General Government area of the Budget includes departments which provide a wide range of programs and services to various segments of the public as well as other State agencies. Services and programs include protection of consumer rights; maintenance of high standards of practice in the professions licensed by the State; promoting the welfare and safety of the workforce in California; promoting artistic awareness and expression in California; managing the merit and non-merit aspects of the State's personnel system; administering retirement systems for teachers and public employees; and providing centralized supportive services to other State departments.

Highlights of the Governor's Budget provisions for the departments providing these and other services are discussed below.

Administrative Law

While State government has a critically important responsibility to serve the public interest, it is equally important that the State not infringe unnecessarily on the rights and privacy of citizens, the business community, and local governments.

The Office of Administrative Law was created to monitor and reduce the growth of administrative regulations and to assure the Governor, the Legislature and the public that the State's laws are fairly interpreted by State agencies with a minimum of regulatory red tape. Above all, the office is intended to be the private sector and general public's window on government by providing a forum for their involvement in the formulation of regulations aimed at them.

The Governor's Budget provides the office with an additional $593,000 to establish a legal unit charged with determining if informal agency rules and orders are actually regulations. The new funding will also be used to provide greater public outreach and information, to reformat and upgrade State publications and reference materials used by government and the public to keep track of regulatory actions and rulings, and to recognize workload increases in the office resulting primarily from new legislative requirements for reviewing regulatory impacts.

State and Consumer Services

This Agency oversees the operations of: the California Museum of Science and Industry, the

Department of Consumer Affairs, the Department of Fair Employment and Housing, the Fair Employment and Housing Commission, the Office of the State Fire Marshal, the Franchise Tax Board, the Department of General Services, the State Personnel Board, the Public Employees' Retirement System, the State Teacher's Retirement System, and the Department of Veterans' Affairs.

The Governor's Budget proposes a combined expenditure of $1,530,219,000 for all organizations within the agency. This represents a 4.4 percent increase over 1983–84. Figure 8 presents the proposed expenditure totals for many of these departments.

The Governor's Budget highlights for the State and Consumer Services Agency include:

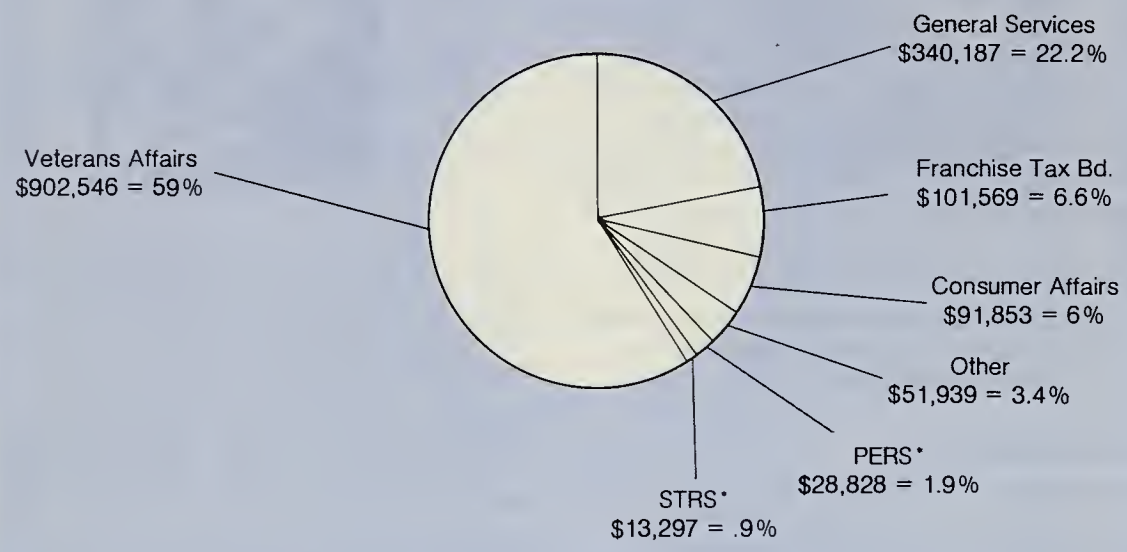
Consumer Affairs

The Department of Consumer Affairs is responsible for protecting and representing consumer rights and interests and for ensuring high standards of practice in the professions licensed through this department by the State of California.

The Governor's Budget provides $91,853,000 to the department. This represents a 10.2 percent increase over 1983–84. The funding augmentation is intended to strengthen the department's programs in licensing and enforcement activities, to assist consumers and consumer groups in handling complaints, to aid consumer co-op development, and to assist senior citizen groups in maintaining and expanding senior citizen discount programs.

The Governor's Budget also proposes full year funding for the biennial vehicle inspection program scheduled to begin in April of 1984. The budget for the Bureau of Automotive Repair has been

Figure 8
State and Consumer Services
Proposed 1984–85 Expenditures*
Amounts in Thousands
(All Funds)



* Includes State Support Expenditures only.

augmented by $6.3 million for the program, which is expected to reduce vehicle-caused pollution by as much as 25 percent by 1987.

General Services

The Department of General Services is responsible for providing centralized support services to other State departments and for increasing effectiveness and economy in the administration of State government. Major activities of the department in the 1984–85 budget year are summarized below:

- Deregulation and divestiture of the Bell Telephone system will significantly impact the workload of California State government. State agencies will no longer be able to rely on the local utility to provide all telephone equipment and related services such as training, consultative services, and total maintenance as in the past. The local utility will furnish only dial tone after January 1, 1984.

  The Administration is approaching this situation as an opportunity to develop a more cost effective and efficient communications system for State government. The following actions have already been taken:

  (1) A Request For Information (RFI) was issued on October 22, 1983, to over 150 vendors of telecommunications goods and services.

  (2) Interagency "review" and "design" teams were directed to develop a telecommunications program, using information from the RFI responses, for California State Government and its political subdivisions by March 31, 1984.

  (3) A fund of $18.2 million has been provided in the Governor's Budget to begin development of a backbone telecommunications network, to carry voice, data, and video communications traffic, in digital format.

- The Department's 1984–85 capital outlay program proposes total expenditures of $22.4 million, including approximately $2.8 million to modify State high-rise buildings to conform to fire and life safety standards; $14.4 million to construct new office buildings; and $3.9 million for continuation of the PCB disposal program.

Veterans' Affairs

The Department of Veterans' Affairs has a three-fold objective: (1) assisting in securing State and Federal benefit entitlements for veterans and their dependents; (2) administering a low interest farm and home loan program which has successfully provided over 359,000 long-term housing and farm loans for California veterans; and (3) operating the Veterans' Home of California, one of the largest geriatric facilities in the country, which provides residential and hospital facilities for approximately 1,400 disabled California veterans.

Governor's Budget highlights include:

- Providing an additional 5,000 housing loans to veterans with the $350 million bond sale proceeds anticipated for 1984–85.
- A $4.3 million capital outlay program for the Veterans' Home to continue progress in relieving fire and life safety deficiencies, as well as meeting licensing and accreditation requirements.

Public Employees' Retirement System

The Public Employees' Retirement System administers retirement, health benefits and social security coverage for State employees and employees of contracting local government entities.

The Budget Act of 1983 provided $500,000 to fund an independent management study of the Public Employees' Retirement System. The preliminary results of this study will be available in mid-February 1984. Those findings will be used to structure and staff an organization that will provide a responsible level of service at the lowest possible cost to members, employers, retirees and beneficiaries.

State Fire Marshal

The State Fire Marshal is responsible for protecting life and property against fire. This goal is met through the development and enforcement of fire safety standards for educational, institutional, public assembly, and high rise facilities. Plan reviews and on-site inspection are conducted by the department. Standards are developed and enforced regarding portable fire extinguishers, explosives, fireworks, fabrics, decorative materials, and wearing apparel.

The Governor's Budget proposes:

- An additional 9.4 personnel years and $427,000 to increase the number of inspections performed in facilities such as state-owned and leased buildings, hotels, motels, and other buildings covered by Titles 19 and 24 of the Administrative Code.
- Fully funding inspection of pipelines carrying hazardous liquid materials—a program which was begun in 1983–84 and will be fully funded in 1984–85. Full staffing of 11.4 personnel years and $588,000 have been provided in 1984–85.

Museum of Science and Industry

The Museum of Science and Industry showcases California's industrial capabilities and accomplishments through a series of exhibits and programs. Approximately three million visitor days are expected in 1984–85. Budget provisions include:

- The opening of the Museum of Aerospace Science and the California Museum of Afro-American History and Culture in July of 1984 which will necessitate the addition of staff to develop and maintain these new exhibits. A total of 22.5 personnel years and $495,000 have been added to the 1984–85 budget to meet this workload.
- The expanded facilities will generate more visitors to the museum and the entire exposition park, requiring security improvements to provide greater protection to the public and the facilities. Funding is being provided to install television cameras and alarm devices to supplement security staff. A contract for State Police protection for outside security for the entire park is being proposed at a cost of $972,000.

California Arts Council

The California Arts Council, established by Chapter 1192, Statutes of 1975, is responsible for promoting artistic awareness and expression in California. The Council makes grants, usually on a matching basis, to arts organizations promoting community-based cultural activities in rural and metropolitan areas.

- The Governor's Budget proposes expenditures of $9,594,000. Included in this amount is an increase in grants of $780,000. This augmentation replaced lost federal funding and is designed to increase the number of awards and the amounts granted to

the Artists in Residence, Artistic and Administrative Development, Support to Prominent Organizations, Arts in Public Buildings, and State-Local Partnership programs. In addition, the budget provides increased support service funding of $157,000 and one position to administer these grants and provide services to grantees and applicants.

Industrial Relations

The Department of Industrial Relations' role in the Administration is to serve as government's balance wheel in addressing and serving the interests of labor—both organized and unorganized, management and the public. As such the Department acts to promote healthy economic development and job creation, to encourage the full utilization of California's human resources, to develop and implement a program of regulatory simplification, to enforce the Labor Code, and to develop a range of enforcement strategies to protect worker health and safety.

The Governor's Budget provides an expenditure level of $110.0 million, an increase of $5.8 million above the 1983–84 base level. The budget proposes:

- To increase the efficiency and productivity of the Department without substantial increases in personnel. One way of accomplishing this is a proposed expenditure of $150,000 for automated equipment in the Divisions of Industrial Accidents and Labor Standards Enforcement.
- To provide funding for legislation affecting the department, including $67,000 for the Labor Commissioner to maintain separate offices for field enforcement activities as required by Chapter 323, Statutes of 1983, and $222,000 and five positions for enforcing the increased penalties for Labor Code violations set forth in Chapter 1096, Statutes of 1983.

Local Government

Local government, being closer to and more responsive to the people, should be restored to at least some measure of the fiscal stability it enjoyed prior to Proposition 13. As a first step this Administration created the New Partnership Task Force charged with reviewing the current relationship and making recommendations leading to increased local fiscal stability.

The Legislative action on the 1983–84 Budget is an example of the uncertainty which has the potential to create havoc with local government. The Governor's Budget had proposed suspension of the AB 8 deflator (the mechanism by which local subventions are reduced if General Fund revenues do not grow at a given rate) and a reduction in subventions to local government. A final decision was not made by the Legislature on these budget proposals until close to the middle of September. This was more than two months after the start of the fiscal year. Local governments were forced to establish contingent budgets based on various options facing the Legislature.

The Governor's New Partnership Task Force made a series of proposals in its Interim Report intended to reduce the problems created by the lack of fiscal certainty. These recommendations were intended to remove local government's basic revenue structure from annual statutory adjustment.

The Administration has reviewed these recommendations along with other considerations and is proposing the following:

Adjustments to AB 8

AB 8 was passed in 1979 to provide a long-term realignment of fiscal responsibilities required because of the passage of Proposition 13. The Act contained provisions linking State and local government financing. This may have been necessary at the time because there were questions about whether the Act would work. Five years have passed and it is time to remove that linkage.

This Administration will support legislation to make the following changes:

- Repeal the AB 8 Deflator.
- Repeal all statutory provisions for determining "bail out" (the current value of the AB 8 property tax shift and the State assumption of certain health and welfare programs).

These adjustments will eliminate statutory linkage of the financing of State and local government.

Long Term Fiscal Stability

In order to guarantee that local governments will receive historically local taxes, the Administration recommends constitutionally guaranteeing the Vehicle License Fee (VLF) and Cigarette Tax Shared Revenues.

Restructuring State and Local Revenues

To more honestly reflect true local government revenues, the Administration recommends:

- Eliminating the State's share of Vehicle License Fees and transferring it to Counties. This realignment will remove the State from receiving Vehicle License Fees which have been a local tax. In addition, this will give recognition to the fact that counties need an additional revenue source.
- Providing sharing of revenues from the Supplemental Property Tax to cities, counties, special districts and community college districts. Under current law, K–12 schools receive all revenues generated from the supplemental roll. This provision should be shared by all local government in accordance with current allocations.
- Repealing the Personal Property Tax (Business Inventory) subvention. The tax on personal property was eliminated in 1980. The current subvention relates to the tax that was in place at that time and does not necessarily relate to current conditions.

State Mandated Programs

Previous Governors' Budgets have not reflected the cost of local mandate claims approved by the Board of Control until a claims bill was approved by the Legislature. This has had the effect of understating reasonably anticipated expenditures and has, more importantly, frequently resulted in deferring those expenditures to future budgets.

The Governor's Budget reflects (1) the cost of all claims approved by the Board of Control (except those which have been approved but do not represent mandates); (2) an amount for claims which are anticipated to be approved by the Board for the remainder of the current year, and (3) the amount currently estimated by the Controller as deficiencies in prior Budget Act appropriations. This increases General Fund costs by more than $135 million in 1983–84 and $29.5 million in 1984–85.

One additional change is needed to strengthen local government's position in the process. Legislation will be proposed which will provide that mandates which are not funded would become permissive on the part of local government.

The current process for reimbursing approved State-mandated local costs requires a substantial amount of financial resources by both the State and local agencies in:

- Preparing a detailed and lengthy package of claiming instructions
- Gathering the information necessary to complete the claim forms
- Reviewing by means of desk audit those claims prior to making payments
- Maintaining necessary supporting documentation in the event the claim is field audited
- Participating in Board of Control hearings over contested reductions by the State Controller in amounts claimed.

In order to reduce unproductive expenditures of this type, the Administration is proposing to provide funding for most ongoing mandate programs which have been in existence for several years on a block grant basis. This will give incentive, which is not now present, to local government to perform the mandates in the most efficient manner since they will be able to retain any savings for other programs.

Other Proposals

Local authority and local flexibility will be promoted by the following Administration proposals:

- Reinstate local government's ability to use the property tax to guarantee General Obligation Bonds with a two/thirds vote of the local electorate:
  This is needed to give local governments the ability to provide capital for infrastructure needs at the lowest cost.
- Subvene $2.1 million to the no property tax cities from the VLF:
  Thirty-one cities do not receive property tax. For the past three years, the Legislature has provided a special appropriation to these cities to replace three subventions eliminated in 1981–82. This proposal would ensure the continuation of this revenue for those cities that are outside of the property tax allocation system.
- County Revenue Raising Authority:
  A necessary component of long-term fiscal stability and accountability for counties is the ability to adjust local revenues to meet local need. In recognition of this, the Administration will work with the Legislature and local government to review such local revenue alternatives.
- Under the Defense of Indigents Program, indigents may request the court for funds to pay for investigators, experts, and others involved in the preparation or presentation of their defense in capital cases. The State reimburses counties for all court-ordered expenditures.

  A similar program reimburses small counties for all costs, above a nominal floor, of conducting homicide trials. The State picks up virtually all costs for both programs, but has no influence on those costs.

  This method of funding has contributed to a rapid escalation of costs for the combined programs of from $1.9 million in 1980–81 to a proposed expenditure level of $5 million in 1984–85. At least part of this increase is because local governments do not participate in the program.

  While local governments cannot (and should not) directly control trial costs anymore than the State can control such costs, we believe that there will be some consideration of costs

if there is 20 percent participation in the program by local government.

Local Revenue

The above proposals meet the basic criteria called for by the New Partnership Task Force. In addition, counties will receive additional revenues over current law.

One measure used in assessing the fiscal condition of cities and counties is the change in general purpose revenues. General purpose revenues include only those revenues which may be expended for any governmental purpose.

Counties administer health and welfare programs for the State and, therefore, have no discretion over certain costs. In recognition of this, costs associated with these programs are used as an offset to county general purpose revenues.

Counties also have limited control over certain court costs. Direct court costs, for example, superior and municipal courts and marshalls, are more controlled by the court than the county. Court-related expenditures, including criminal justice costs, are affected by agencies such as juvenile hall which are not under the control of the county. It is difficult to assess these costs.

SUMMARY OF LOCAL REVENUES
(Dollar amounts in millions and expenditures per ADA in dollars)

Local Agencies	*1981–82*	*1982–83*	*1983–84*	*1984–85*
Counties				
Property Tax [a]	$2,577.0	$2,851.5	$3,043.4	$3,247.4
Sales Tax	310.0	314.0	352.3	393.2
Vehicle License Fees	318.6	307.6	339.0	674.9
Other Revenues	1,315.7	1,249.9	1,223.7	1,249.0
Total	$4,521.3	$4,723.0	$4,958.4	$5,564.5
Less Mandated Health and Welfare Costs	−662.2	−674.5	−709.2	−712.4
Adjusted Total	$3,859.1	$4,048.5	$4,249.2	$4,852.1 [b]
Cities				
Property Tax [a]	$973.3	$1,070.6	$1,113.1	$1,221.3
Sales Tax	1,295.5	1,312.3	1,472.4	1,643.2
Vehicle License Fees	205.8	134.8	160.0	467.0
Other Revenues	2,041.2	2,197.5	2,390.5	2,532.2
Total	$4,515.8	$4,715.2	$5,136.0	$5,863.7 [b]
Special Districts				
Property Tax [a]	$585.4	$647.5	$696.1	$746.3 [b]
Education				
K–12 and County Offices:				
Property Tax [a]	$2,598.7	$2,461.7	$2,719.3	$2,812.2
State Apportionments	5,924.1	6,089.4	6,626.0	7,421.1
Categorical Aid	1,406.8	1,446.2	1,591.3	1,620.1
Total	$9,929.6	$9,997.3	$10,936.6	$11,853.4
ADA	4,211,441	4,235,800	4,259,800	4,308,000
Expenditures per ADA	$2,358	$2,360	$2,567	$2,751
Community Colleges:				
Property Tax [a]	$403.1	$395.4	$396.6	$450.1
Proposed fees	–	–	–	95.0
State Apportionments	1,038.5	1,015.2	973.4	983.4
Categorical Aid	43.9	48.8	51.6	67.2
Total	$1,485.5	$1,459.4	$1,421.6	$1,595.7
ADA	735,154	706,733	662,070	685,531
Expenditures per ADA	$2,021	$2,065	$2,147	$2,328

[a] Property tax revenue includes reimbursement for the Homeowners' and Business Inventory Exemptions. The schools' share of BIE is in the apportionment numbers for 1983–84 and 1984–85. The Special District amount is for general purpose activity only. Debt service and enterprise activities are excluded.

[b] The 1984–85 figures reflect the Administration's New Partnership proposal.

Under the proposal outlined, city and county general purpose revenues would increase 12.4 percent and 14.2 percent respectively. These data are consistent with the economic assumptions used in the development of the State budget.

Local revenues for all jurisdictions are shown in the table entitled "Summary of Local Revenues."

AB 8 Deflator

Even though it is proposed that the AB 8 deflator be repealed, the following table gives an estimate of the effect the deflator would have on local government in 1984–85.

AB 8 DEFLATOR
ESTIMATED IMPACT
1984–85

	(Dollars in millions)
Base Year Amount	$21,500
Compounded Percentage Increase (1983 over 1980)	22.1
Adjusted Base Amount	$26,252
Estimated General Fund Revenues and Transfers	$25,825
Less AB 66 Revenues	249
Less Replacement of Federal Funds	52
TOTAL	$25,524
Amount of Reduction	$728

Half of this amount ($364 million) would be reduced from subventions going to local governments. Chapter 498, Statutes of 1983, repealed the deflator for schools.

Local Assistance

Local assistance expenditures include three major categories:

- assistance to individuals
- payments to service providers
- payments to local government

The payments to local government are divided into general purpose and restricted.

Assistance to individuals includes grants to individuals, for example SSI/SSP or AFDC payments. In addition, several tax relief programs which provide assistance directly to individuals, such as the renters credit program, are included. Also included in this category are indirect payments to individuals for tax relief programs such as the homeowners' exemption. Payments in that program are made to local governments to reimburse them for the property tax loss incurred through the exemption.

Payments to service providers include expenditures for services provided by agencies other than the State. These payments could be to counties or to private contractors.

Payments to local government include expenditures which are sent directly to counties for specific programs or reimbursements for a legislative mandate. There may be only a fine distinction in some programs between payment to service providers and restricted payments to local government.

The general purpose payments to local government category includes payments where the funds can be used for any general government purpose.

The following table shows General Fund expenditures for these categories for past, current and budget years.

LOCAL ASSISTANCE EXPENDITURES
(In Thousands)

	1982–83	1983–84	1984–85
Assistance to Individuals			
Health and Welfare			
SSI/SSP Grants	$1,140,480	$1,097,386	$1,101,124

Proposition 13 Fiscal Relief	–654	2,354	–
Local Agency Reimbursement Fund	2,690	–	–
Total—General Purpose	$7,060,705	$7,173,312	$7,549,850
Total Payments to Local Government	$10,271,211	$10,950,932	$11,940,638
Estimate Unidentifiable Savings	–	–20,000	–75,000
Total, General Fund Local Assistance	$17,485,924[d]	$17,730,929	$18,951,327[E]

[a] Alcohol and Drug Programs combined into one program in 1984–85.
[b] Family Planning and Public Health Enhancement Programs are included in payments to Local Governments—Public Health Services for Local Agencies in 1984–85.
[c] Reflects proposal to eliminate the Personal Property Tax Subvention.
[d] Total differs from Schedule 9 because Student Aid Commission grants are included as State Operations for 1982–83 in Schedule 9.
[E] Does not include the $200 million loan repayment to Los Angeles County.

Infrastructure

An adequate infrastructure is essential to maintaining the quality of life in California. This State has historically had one of the most unique and extensive infrastructure systems in the nation. The system has been in place for many years without a comprehensive review of its adequacy and condition.

The Governor has created the Infrastructure Review Task Force to identify and address issues relating to infrastructure planning, financing, construction, operation, and maintenance needs in California. The review process will include:

- A specific inventory of the most critically needed projects or repairs, and the estimated cost of meeting these needs.
- Recommendations regarding the roles of State Government, local government and the private sector in meeting the needs.
- Recommended options regarding methods by which the costs of needed projects identified by the inventory can be covered.

The task force will complete its deliberations and report findings by April 15, 1984. However, since the report will not be completed until late in the legislative calendar, there are two high priority issues which should be addressed immediately—toxics cleanup and county jail capital expenditures.

Toxics Cleanup

The State currently has an active program of inspection, licensing and enforcement of statutes relating to the handling and disposal of toxic waste. This program is responsible for ensuring that toxic wastes currently being generated are handled in an environmentally safe manner.

While current toxic problems are being addressed, extensive efforts must be made to reverse and, where possible, eliminate environmental and public health damage caused by past improper storage and disposal of toxic waste. Using the funds currently available this work would not be accomplished until well into the next century.

For this reason it is proposed that the Legislature place on the ballot for the next general election a general obligation bond issue to authorize a $300 million Toxic Cleanup Fund. This bond issue would provide up-front funding secured by the full faith and credit of the State and would be available to award contracts to clean up those sites which

have been identified as posing the most serious threat to the public health and environment.

It is expected that the full cost; including principal, interest, and administration of these bonds; would be redeemed from the existing State Hazardous Substances Account. This account is made up of funds available from the Federal Government "Superfund" and the fees assessed to those parties responsible for the creation of the problems. The general obligation bond will assure the most expeditious and lowest cost method of funding clean up of hazardous waste sites.

County Jail Capital Expenditure Program

In November 1982, the voters approved the County Jail Capital Expenditure Bond Act which authorized the issuance of $280 million in bonds to finance the capital outlay needs of local jails. Although these funds may be adequate to meet the most critical local jail problems, they are insufficient to provide the type of renovation and construction needed at the county level.

It is proposed that the Legislature place on the ballot for the next general election a general obligation bond issue to authorize $300 million so that additional funds will be available to address the unmet need.

1984–85 Capital Outlay Program

The Governor's Budget provides nearly $2 billion in capital outlay funds for facilities for transportation, water delivery, education, hospitals, correctional institutions, general office space and other capital needs. Additionally $1.4 billion in local assistance and shared revenues is provided for local streets, schools, and other construction needs. Some of the major program areas include:

- The State Highway System is composed of more than 48,000 lane miles. The present economic recovery, coupled with the high mobility of the State's population, will result in the expanded use of the highway system. To meet this increased demand, the Administration is proposing the largest highway construction program in State history: over $1 billion in 1984–85 to expand the system and to make it safer. Additionally, $774 million will be provided to local governments for street and road repair and construction.
- California is experiencing a serious shortage of space to house convicted criminals. As prison terms are lengthened, this problem will become even more critical. To cope with this situation, the Administration has escalated the prison construction program to provide as much new capacity as possible. The Governor's Budget contains $94.7 million in State funds, and proposes authorization for private sector lease-purchase financing of $514.4 million, for this purpose.
- The Governor's Budget contains $38 million to provide additional fire-life safety modifications for the State hospitals. These modifications will improve living conditions and provide for continued Federal licensure.
- With the improved economy and the continued growth in California's population, more people will visit State parks in 1984–85 than ever before. To meet this increased demand, the Administration is proposing $46 million in 1984–85 for acquisition and development of additional recreational facilities statewide.
- More Californians are attending college classes each year. Anticipating the need for new facilities to meet demands for classes is essential to providing quality education. The high quality of life that California's citizens enjoy is directly linked to the excellence of the State's education system. An essential part of that system is the adequacy of its physical plant. Consequently, the Administration is proposing $265 million for the construction and planning of 42 additional educational facilities statewide.

Additional information is provided in the respective program expenditure sections.

Report on 1984–85 Budget's Compliance with Appropriation Limit Set by Article XIIIB

In 1979 California voters passed Proposition Four imposing limits on certain kinds of appropriations made from tax revenues. This proposition established a limit on the growth of certain appropriations based on changes in the Consumer Price Index and population. In addition, there are provisions to adjust for changes in financial responsibility among levels of government.

The State's appropriation limit is established in Control Section 12.0 of the Budget Act. As required by Article XIIIB, the table below sets forth the appropriation limit adjusted to reflect any shifts in financial responsibility and the estimated appropriations subject to limitation. The 1984–85 appropriation limit is based on the Governor's Budget and will be adjusted to account for legislative changes.

STATE APPROPRIATION LIMIT
(In millions)

	1978–79 Base	*1979–80*	*1980–81 Limit*	*1981–82 Limit*	*1982–83 Limit*	*1983–84 Limit*	*1984–85 Limit*
State Appropriation Limit	$12,564	$14,195	$16,236	$18,028	$19,580	$20,416	$21,967
Appropriations Subject to Limitation	–	–	−15,533	−16,733	−16,268	−17,380	−20,367
Amount Under Limit	–	–	$703	$1,255	$3,312	$3,036	$1,600

Employee Compensation

Management and labor in State Government share a commitment to providing the highest possible degree of service to the public. Within this common goal management and labor have interrelated and compatible responsibilities, which need to be acknowledged and mutually understood.

Management's responsibility is to provide service to the public as economically and efficiently as possible through the employment of trained, dedicated and fairly-paid individuals. Labor's responsibility is to assure its members that they are adequately compensated, have reasonable working hours, and good working conditions.

In addition, the Administration has the responsibility to ensure that the State does not enter into agreements that exceed its ability to finance its programs or that jeopardize State services to the California public. Therefore, 1984–85 contracts must reflect appropriate salary and benefit adjustments as well as productivity and efficiency reforms.

A Two-Year History

Collective bargaining between the State of California and its employees under SEERA and between the University of California and the California State University and their employees under HEERA has been in effect for two years. Management, exclusive representatives, and employees have demonstrated a spirit of cooperation in overcoming the difficulties encountered in making the new employee relations process work—while at the same time maintaining the State's traditionally high level of public service.

In addition to implementing the bargaining process, State Government has had to surmount a severe fiscal crisis which had many adverse impacts, not the least of which involved employee compensation and benefit programs. In 1983–84, even though the fiscal crisis was at its height as this Administration was sworn into office, State management committed additional new spending for State employee salaries and benefits.

Essentially, the employee compensation program provided for the continuation of the State's partial payment of the employee's retirement contribution for the first six months of the fiscal year, State-paid premium increases for health and dental benefits, a six percent general salary increase effective January 1, 1984, and a number of salary inequity adjustments as well as a variety of benefit adjustments agreed to in the memoranda of understanding.

1984–85 Compensation Program

In the Governor's Budget the Administration is including an employee compensation package of up to 10 percent. This increase in combined salaries and benefits reflects, once again, the Administration's commitment to a compensation program which allows the State to attract and retain competent and dedicated employees.

The Administration's proposal is set aside for bargaining purposes. This will maintain priority of these funds for State employees. Final decisions on the ultimate amount of salary and benefit increases will depend upon the negotiation process, including the degree to which management achieves its objectives, such as reforms to improve State operations.

1984–85 Fiscal Summary of Employee Compensation

	General Fund	*Special Funds*	*Other Funds*	*Total*
Civil Service	$204,682	$122,471	$102,083	$429,236
Judiciary.....	1,980	–	–	1,980
Annuitants ..	13,669	–	–	13,669
Total	$220,331	$122,471	$102,083	$444,885

Improving Government

Management

Government must pay attention not only to which public services should be provided, but also to how efficiently those services can be delivered. Economies resulting from efficiency ensure that needed services are provided while reducing the cost and size of government.

Efficient government is the direct result of the labors of efficient and innovative government managers who have the ability, opportunity, and desire to ensure that their area of responsibility provides only those services which are needed, and provides them in the most cost effective manner.

Unfortunately, current State management practices do not encourage or reward those in government for efficient management. Rather, State government follows the traditional bureaucratic principle that rewards a government manager or executive according to the cost and size of the operation, rather than for how efficiently the service is delivered. The result is a disincentive to find ways to reduce costs or personnel.

To deal with this problem, the Governor will establish a task force on Management Operations Reforms. The task force will be charged with studying those factors which currently preclude efficient and effective government management and prevent rewarding reforms undertaken to improve the system.

The task force will include management professionals from private industry and the California universities as well as representatives of the Departments of Finance, Personnel Administration, General Services, the State Personnel Board and various operating departments.

Key management issues to be addressed include:

- Reduction of bureaucratic red tape which acts to inhibit and restrict management performance.
- Implementation of structured evaluations of management to ensure increases in accountability and productivity.
- Implementation of more flexible compensation alternatives for management in relation to their performance.
- Redefinition of tenure rights to provide more flexibility in the appointment of managers and redefinition of classification guidelines to reflect changes in management staffing philosophy.
- Examination of support staffing—analysts, planners, consultants, etc.—who have grown alongside of management in response to the bureaucratic framework that exists in State service.

Automation

From the design of a new telecommunications network in the wake of the AT&T divestiture to installing 100 additional computers in Department of Motor Vehicles field offices, the Governor's Budget provides for and encourages the application of automation to a broad spectrum of State services.

As California's population continues to grow, demands for an expanding variety of government services will increase. If the State is to meet these needs without substantial growth in State employment and program expenditures, government must provide staff access to the modern information and telecommunications technologies. These technologies are capable of significantly improving the quality, increasing the productivity and lowering the costs of government operations.

Recognizing this need, the Administration issued an Executive Order in September 1983 directing the State Office of Information Technology (SOIT) to develop a plan for coordinating the application of information technology throughout State government. SOIT is now working with the individual State agencies, departments and executive offices to develop plans for the automation of their information processing needs within the next three years.

At the same time, the following are examples of electronic and telecommunication applications already being put to work on behalf of the public:

- Automation of field offices avoids duplication of files by permitting access to a single computerized data base. Departments now implementing field offices include the Employment Development Department, Department of Motor Vehicles, and Franchise Tax Board.

- Computer aided design assists Caltrans engineers to design and improve California's highway system.
- Computer output to microfilm saves the State millions of dollars and thousands of trees.
- Optical laser scanners will permit law enforcement agencies to quickly match fingerprints with suspects.
- Computers monitor the development of California's coastal lands, helping to locate rare and endangered plants and animals and providing information to consultants, utility companies, county planners and regulatory agencies.

Tax System

California's tax system has grown increasingly complex over the years. Changes have been enacted piecemeal—without consideration of the overall tax structure or of the socioeconomic effects of the various measures, either singly or in combination. There is no certainty that the tax system as it currently exists meets the criteria of equity, efficiency and ease of administration.

Nor is it certain that the tax structure is relevant to the California economy. It has been 20 years since the last thorough study of the State's tax system was made. During those years California has experienced a significant change in the nature of economic activity within its borders. The current tax system may not be appropriate to the economy of the eighties.

This Administration will be appointing a task force drawn from industry, labor, academia and the public to study the State tax system. The task force members will be knowledgeable about public finance and will be concerned with the necessity of securing a fair, efficient and relevant tax base to provide for the needs of all Californians.

The task force will address such issues as:

- Equities or inequities of the existing tax system
- Progressivity or regressivity of the tax structure
- Adequacy of the tax base over time
- Beneficiaries of individual provisions of the tax code
- Reasons behind the enactment of specific exemptions, deductions and credits, to determine if the provisions should be continued.

Economic Forecast

Work on the Governor's Budget begins in the Department of Finance more than one year before the budget takes effect. Budget decisions are based on a set of assumptions about economic conditions during the next fiscal year.

Accurate economic forecasts are critical to the budget building process, because both state revenues and expenditures are sensitive to the health of the economy. If there is a downturn, the state's tax receipts may fall below estimates at the same time more individuals may need to apply for state services, increasing program caseloads and costs above projections.

The following pages explain the economic assumptions that underlie the Governor's Budget.

National Outlook

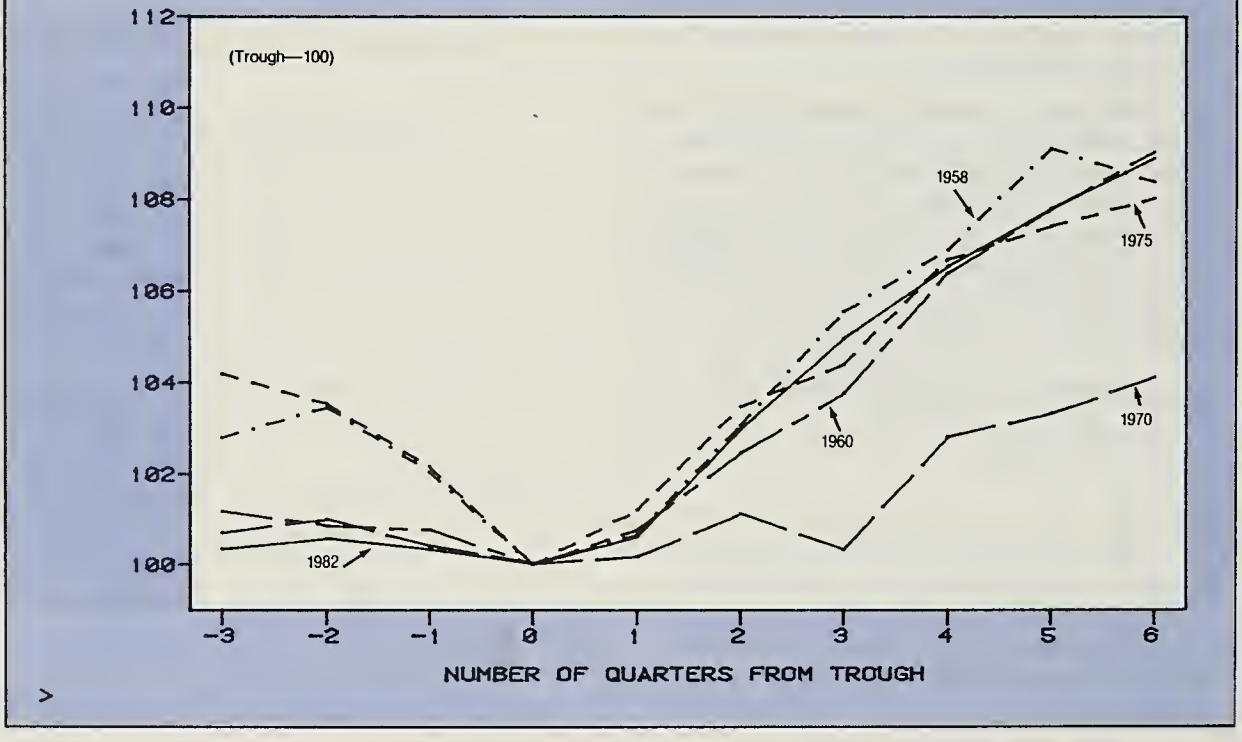
The past year was characterized by a strong recovery which moved the economy off the erratic—and quite lackluster—course it has followed since 1979.

During the past year:

- Spending on consumer durables increased by an estimated 13 percent.
- Housing investment was up 37 percent.
- Investment in plant and equipment started to improve mid-year.
- The inventory decline which began in the first quarter of 1982 was finally reversed as business responded to the sharp upturn in sales.
- The previous high in economic activity, recorded during the July–September 1981 period, was surpassed during the third quarter last year.

Overall, the output of goods and services in the Nation increased by 6.6 percent in real terms

Figure 9
Real GNP Growth
Before and After Recession Trough



during the first four quarters of recovery. The recovery path turned out to be very typical, as illustrated in Figure 9.

The 1984 outlook is dependent to a large extent on interest rates. There is considerable debate on this issue at the present time. The primary concerns relate to the size of the Federal deficit and Treasury borrowing needs, and to policies of the Federal Reserve System.

Interest rates will rise substantially if there is a clash between private and public demands for funds. The role of the Federal Reserve is critical. Slow growth of the money supply could precipitate such a clash. A too-lenient policy, however, could well rekindle inflationary pressures, creating potentially severe problems for 1985.

The budget forecast assumes that a conflict in the credit markets can be avoided. The basic factor leading to this conclusion is the better liquidity situation for business. Sharply improved balance sheets, reflecting in large part the strong recovery in corporate profits, has permitted new investment to be financed internally in many cases, thereby easing pressures on financial markets even as the Treasury has undertaken massive borrowings.

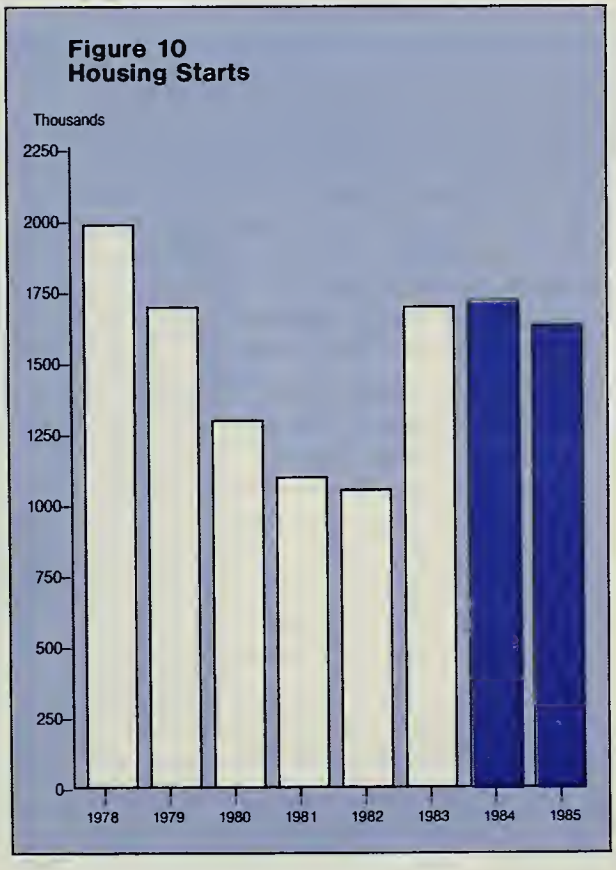
Consumer confidence has already improved dramatically, as evidenced by the surge in retail sales in 1983. A further strengthening should arise from the favorable developments to date:

- The rise in personal income has gained momentum over the past year, with a strong year-end performance in wages and salaries.
- Excluding the impact of the communications workers strike, job levels have been expanding steadily.
- The unemployment rate, which peaked at 10.8 percent in December 1982, was down to an 8.4 percent rate by November 1983.
- Inflation has continued moderate. The consumer price index was up only 2.9 percent between October 1982 and October 1983.

Assuming no external shocks which would throw the recovery off its track, 1984 should be a year of good economic gains.

The outlook beyond 1984 is far less certain. The standard forecast of the Department of Finance calls for further growth, but at a more normal pace.

Figure 10
Housing Starts



Highlights of the 1984 and 1985 National Forecast
($ in billions)

	1984		1985	
	Amount	% Change	Amount	$ Change

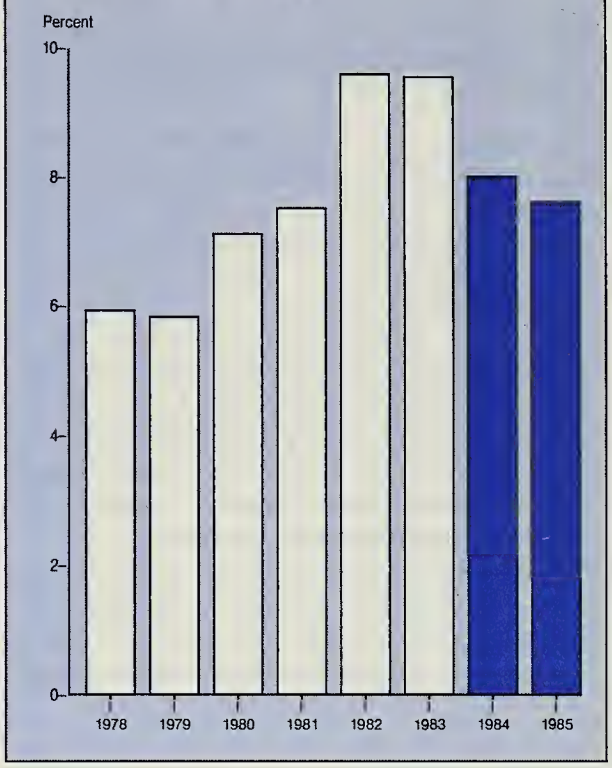

Figure 12
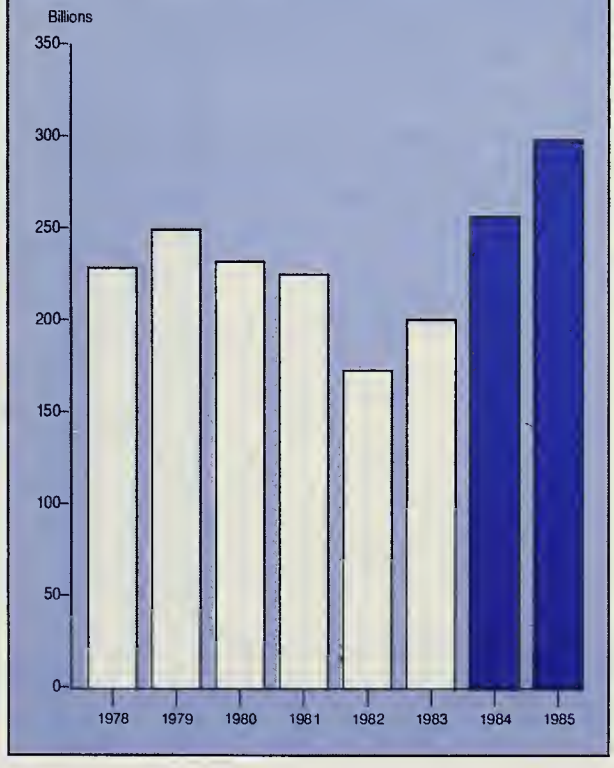
Corporate Profits



Alternative National Forecasts

Two alternative forecasts have been prepared. The high side reflects continued above-average growth for the next eight quarters. In effect, such a pattern would set the Nation on a period of expansion which could continue into the late 1980s before another recession occurred. The downside, in contrast, has the next recession starting in the fourth quarter of 1984, and lasting throughout 1985.

- If inflation heats up, the Federal Reserve is likely to respond with a tighter monetary policy, thereby reducing the availability of credit to keep the expansion going.
- If consumer and business demands for credit surge and Treasury borrowings continue high, there would be a strong upward movement in interest rates. This would stifle both consumption and investment.
- Other events, such as an international financial crisis, a prolonged auto strike, a renewed round of petroleum price increases, or the development of severe inventory imbalances would play important roles in the outlook.

- On the opposite side, continuation of moderate recovery, without the buildup of imbalances, would permit steady monetary expansion, a gradual easing of interest rates, and sustained growth through the year.

Alternative Forecasts Through 1985

(Percent changes except as noted)

		High	*Standard*	*Low*
Real GNP	1984	6.0	5.6	4.7
	1985	5.1	3.2	−0.3
Personal income	1984	9.4	9.2	8.9
	1985	9.5	8.3	6.8
Corporate profits	1984	27.7	27.3	22.8
	1985	19.2	16.4	−19.6
Wage and salary employment	1984	4.1	3.9	3.6
	1985	3.5	2.3	−0.1
Unemployment rate	1984	8.0	8.1	8.4
(Percent)	1985	6.9	7.7	9.4
New car sales	1984	10.5	10.4	10.0
(Millions)	1985	11.6	10.8	8.6
Housing starts	1984	1,780	1,730	1,515
(Thousands)	1985	1,865	1,632	1,260

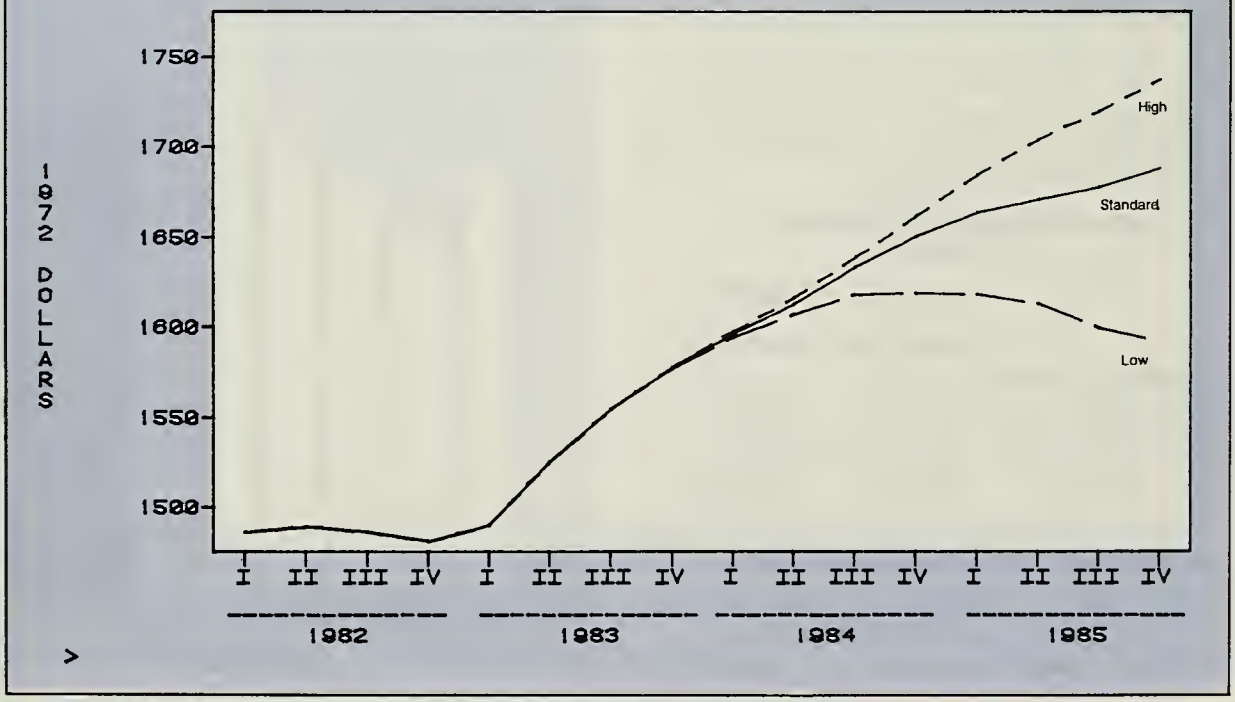
The alternative forecasts summarized above do not differ significantly for 1984. By 1985, however, the spread widens sharply. The annual data shown, in fact, mask the full extent of the differences in the forecasts. The chart below shows the pattern for real GNP under the standard, high, and low forecasts by quarter. It should be noted that the low alternative is only a preliminary assessment of the recession potential. Any downturn during 1985 could well be more severe than indicated here.

California Outlook

During the past year the California economy made major advances following the 1981–82 recession.

- In January the job situation turned around. Nonagricultural employment was up by 0.8 percent after declining in 15 of the 18 previous months.
- By November 1983 employment was up by 321,000 jobs from the December 1982 trough.
- The unemployment rate during the year fell from an all-time high of 11.2 percent in February to near 8 percent at year-end.
- The number of unemployed persons decreased by more than 340,000.
- Housing construction doubled compared to 1982.

Figure 14
Real GNP:
Alternative Forecasts



Economic expansion is expected to continue through 1984. Moderate increases in the labor force and civilian employment will bring the unemployment rate below 8 percent by mid-year.

Nonagricultural employment will be up by over 375,000 jobs, or 3.8 percent, between the fourth quarter 1983 and fourth quarter 1984. The strongest gains will be in durable goods manufacturing, retail trade, construction and services. Government and mining are expected to show little, if any, rise.

Employment gains and an average wage increase of about 5½ percent will lead to a significant gain in wage and salary income. Proprietors' and property income are expected to rebound strongly reflecting improved business conditions. Total personal income is expected to reach $364.4 billion in 1984, up $32 billion, or 9.7 percent from 1983.

While 1984 housing unit authorizations will be below historic levels, the 170,000 units forecast would be the highest total since 1979.

Growth in 1985 is likely to slow moderately. Total nonagricultural employment is expected to rise by 2.6 percent, with the employment increase in most sectors at about 3.0 percent. The lower rate of growth in the total results from virtually no change in the government sector.

The outlook for inflation remains good. The California Consumer Price Index increased an estimated 1.8 percent in 1983. As recovery continues, inflation should stabilize at 6 percent in both 1984 and 1985. Home fuel, transportation, rents and medical care costs are expected to continue to exert upwards pressure on the price index, although the increases will generally be less than those of the late 1970's.

Selected California Indicators
($ in billions)

	1984		1985	
	Amount	% Change	Amount	$ Change
Nonagricultural Employment (000)	10,359	3.9	10,630	2.6
Unemployment Rate (%)	7.9	–	7.6	–

Housing Units (000)	170	4.9	155	−8.8

Alternative California Forecasts

Two alternative forecasts have been prepared for California. The high alternative reflects strong economic growth through both 1984 and 1985. The

Figure 15
California New Housing Units

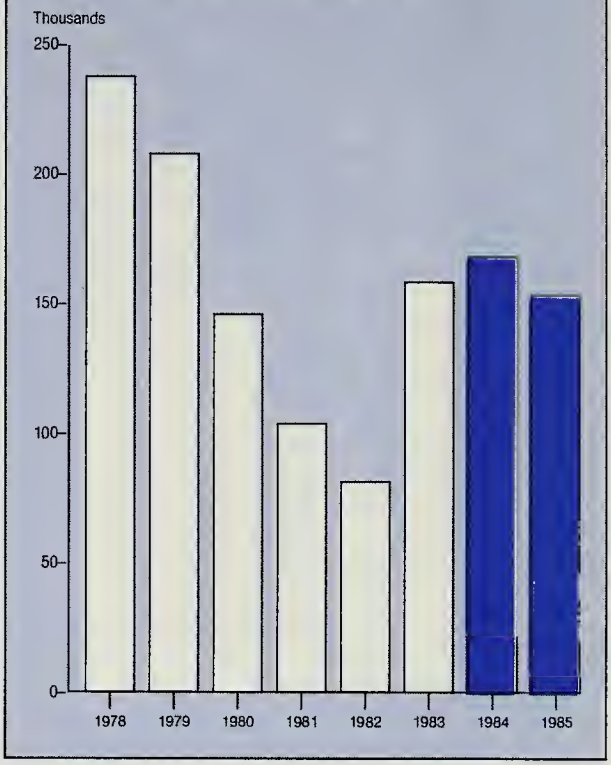

Figure 16
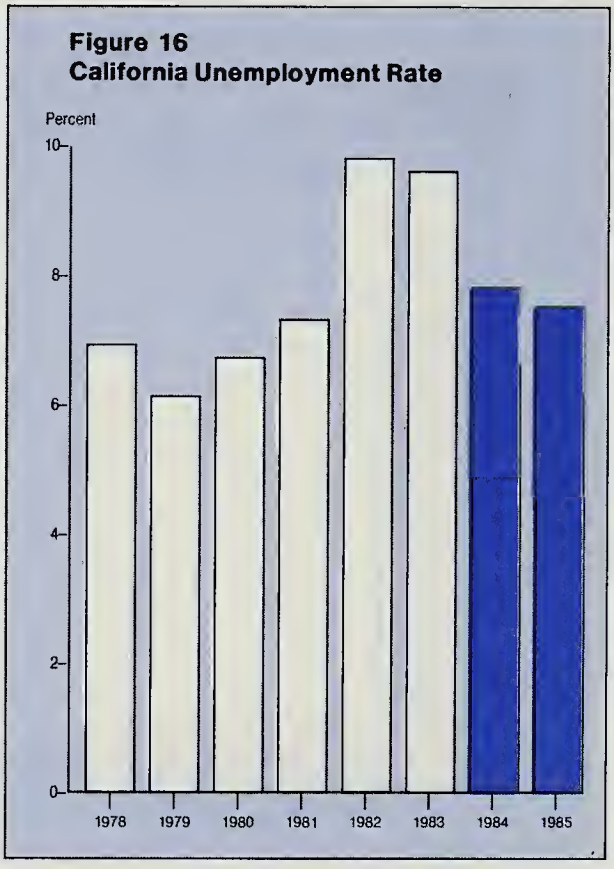
California Unemployment Rate



low alternative assumes only moderate growth in 1984 and a recession in 1985. Figure 17 indicates the trend in employment under the standard and alternative forecasts.

In the high forecast, the pattern and strength of employment growth approaches previous economic recoveries in California. Income increases by nearly 10 percent in both 1984 and 1985. Real income under this alternative grows by about 5 percent each year. Home building activity proceeds at the long-term historic rate of construction for this State.

The low alternative reflects the possibility of a recession beginning in late 1984, and virtually no employment increase in 1985. In fact, employment declines by 0.6 percent between the end of 1984 and the end of 1985 under this scenario. Income growth is expected to fall off in early 1985 as the recession intensifies.

The following table presents key economic indicators under each alternative. It should be noted that the high and low forecasts are not intended to show the extremes of economic activity which are possible. Instead, they illustrate the most likely range of difference from the standard outlook.

NOTE: Percentage changes calculated from unrounded data

Revenue Estimates

The State's revenue outlook has improved markedly over the past year. Economic recovery, high levels of consumer confidence, low inflation rates and a significant upturn in profits have brought about a sustained growth in revenues.

General Fund revenues, which account for 85 percent of all revenues to the State, are expected to be up 12.5 percent in 1984–85, following an 11.9 percent gain in the current year.

The most dramatic increase occurs in the bank and corporation tax, expected to rise by 32 percent. The insurance tax increase of 39 percent is attributable to legislation enacted in 1982 which moved revenues from 1983–84 into 1982–83. Sales and income taxes will also increase substantially—between 10 and 12 percent.

The revenue forecast for 1983–84 includes $50 million attributable to the Olympics and the National Democratic Convention being held in California during the summer of 1984.

Special Fund revenues, which are related to economic conditions to a lesser extent, will rise by 9.9 percent in 1984–85. The gain is primarily attributable to a change in the distribution of revenue from State lands.

	Revenue (in millions)		
Revenues	*1982–83*	*1983–84*	*1984–85*
General Fund	$20,491.1	$22,925.0	$25,796.4
% change	3.0	11.9	12.5
Special Funds	3,721.2	4,223.2	4,642.4
% change	7.6	13.5	9.9
Total	$24,212.3	$27,148.2	$30,438.8
% change	3.7	12.1	12.1

Complete revenue data for Fiscal Years 1982–83 (actual), 1983–84 (estimated) and 1984–85 (estimated) are presented in Schedule 8.

General Fund Revenue

Personal Income Tax—$9,860,000,000. The personal income tax is imposed on net California taxable income (gross income less exclusions and deductions) with tax rates ranging from 1 to 11 percent. Personal, dependent, and other credits are allowed against the gross tax liability. In addition, a tax on preference income is levied at one-half the regular rates. Preference income includes such items as a portion of accelerated depreciation, and the excluded amount of capital gains income.

The personal income tax is adjusted annually for inflation so that taxpayers will not be pushed into higher tax brackets when their real income has not increased. This adjustment for inflation is known as indexing. Since its adoption in 1978, indexing has provided substantial savings to taxpayers.

Amount and Percent of Revenue Reduction Resulting from Indexing

Fiscal Year	*Amount of Income Tax Reduction (in millions)*	*Percent of Total Revenue Before Indexing*
1978–79	$220	4%
1979–80	630	9%
1980–81	1,720	21%
1981–82	2,300	24%
1982–83	2,970	28%
1983–84	2,990	25%
1984–85	3,850	28%
Total	$14,680	

As can be seen from the above table, the tax relief provided from indexing through the budget year will amount to more than $14 billion.

While the inflation adjustment typically reduces the tax due; the adjustment can be negative. This occurred for the first time in 1983 when the consumer price index for June recorded *deflation* of 1.2 percent from the previous year. This decline in the price level caused the inflation adjustments to lower the credits and brackets. However, no declines are expected in the forecast period.

Total personal income tax revenues attributable to income earned during 1983 are expected to grow 9.1 percent from the year earlier. This pace should pick up to 12.1 percent for 1984 as the economy continues to improve.

Chapters 323 (AB 223) and 498 (SB 813) conformed several provisions of the State income tax law to the Federal law. This will increase revenues in 1983–84 by $249 million and increase revenues in 1984–85 by $196 million.

Sales Tax—$9,733,000,000. The sales tax is imposed upon retailers for the privilege of selling tangible personal property in California. Most retail sales and leases are subject to the tax. However, several major exemptions are incorporated which reduce regressivity. These include food for home

consumption; prescription drugs; and gas, electricity, and water. Other exemptions provide relief for a variety of sales ranging from candy to aircraft.

Of the 6 percent rate currently imposed:

- 4¾ percent represents the State tax rate;
- 1 percent is for cities and counties; and
- ¼ percent is for transit systems.

An additional ½ percent rate is levied by some transit districts for the support of mass transit systems.

The sales and use tax forecast is prepared by relating taxable sales by type of sale to various economic factors such as disposable personal income, housing starts, employment and savings.

Growth is strongest in those areas hardest hit by the recession—autos and building. This upturn began in the second quarter of 1983; other sectors accelerated in the third quarter.

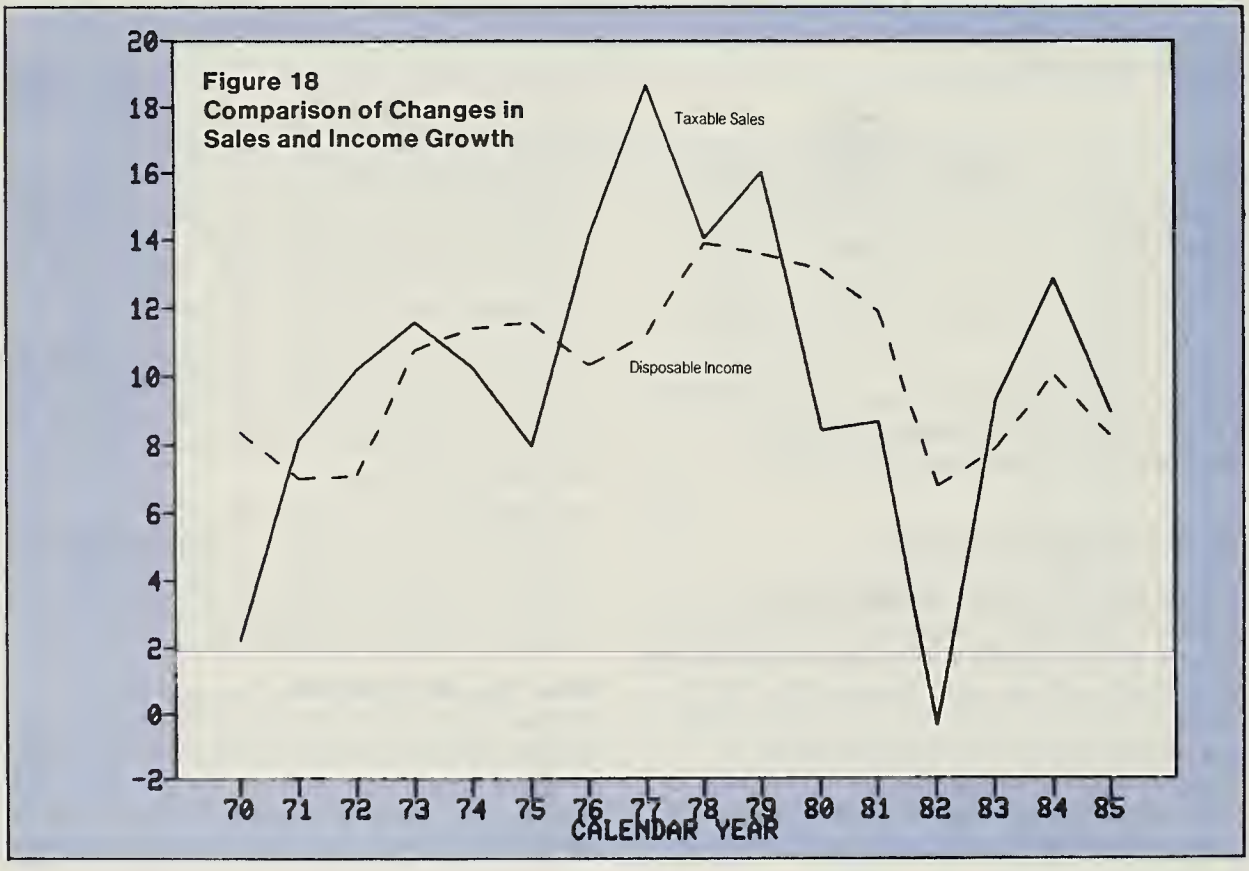
Consumer confidence is evidenced by the fact that taxable sales relative to personal income increased in 1983 after three years of decline. While the growth in sales during this recovery period is expected to be substantial, it will not approach the record increases that occurred during the boom of the late 1970's.

Continued economic expansion will lead to strong sales gains through 1984, with more moderate growth expected during 1985. This pattern will result in substantial revenue gains for both the 1983–84 and 1984–85 fiscal years.

Revenue is transferred from the Retail Sales Tax Fund to the Transportation Planning and Development (TP&D) Account based on a "spillover" formula.

When the gasoline exemption was repealed in 1972, the State sales tax rate was reduced ¼ percent to offset the gains from taxing gasoline. However, price increases in gasoline have caused the sales tax attributable to gasoline to exceed the revenue lost by the ¼ percent rate reduction.

Any additional revenue from taxing gasoline is transferred to the TP&D Account. The 1984–85 transfer is estimated to be $133 million. This estimate includes a $12 million reduction which is expected to result from the partial sales tax exemption for gasohol. It was assumed that the



TAXABLE SALES IN CALIFORNIA
(in millions)

	1982 Actual	1983 Estimated	1984 Estimated	1985 Estimated
Motor vehicle dealers, auto repairs and parts, etc.	$22,922	$27,090	$31,910	$35,750

gasohol exemption will continue and that the TP&D Account will absorb the loss.

Chapter 323 (AB 223) repealed sales tax exemptions for the rental of videotapes and vending machines. This will increase revenues in 1983–84 by $33 million and increase revenues in 1984–85 by $44 million.

	Revenue (In millions)		
	1982–83 Actual	1983–84 Estimated	1984–1985 Estimated
General Fund	$7,643	$8,575	$9,600
TP&D	152	159	133
Total	$7,795	$8,734	$9,733

Bank and Corporation Tax—$4,290,000,000. Bank and corporation tax revenues are actually derived from four taxes:

- The franchise tax and the corporation income tax are levied at the same 9.6 percent rate of profits. The former is imposed on corporations doing business in California while the latter is imposed on corporations which do not do business in the State, but which derive income from California sources. These are primarily firms engaged wholly in interstate commerce and holding companies.
- Banks and other financial corporations pay an additional tax on their net income, in lieu of all State and local taxes except those on real property and motor vehicles. The rate is estimated at 1.5 percent.
- The preference tax is imposed at 2.5 percent on items of preference income: excess deductions over $30,000 for depletion, depreciation and bad debts.

Since the tax is a function of corporate profits, the relationship of California profits to the national corporate profits forecast is important. The relationship is not precise however, because business activity in California may trend somewhat differently than for the nation. Also, State tax law defines profits differently (e.g. the treatment of certain depreciation).

Estimated Growth in National Corporate Profits and California Taxable Corporate Profits

	Annual Percent Change		
	1983	1984	1985
National Corporate Profits	+16.0	+27.3	+16.4
California Taxable Profits	+20.8	+26.4	+17.0

The 1983 forecast of California taxable profits is influenced by actual prepayment revenues and these indicate that California is currently experiencing strong growth. In addition, the Department conducts a survey of banks and corporations to assist in the estimate of profit growth. This survey indicated profit growth of about 19 percent for 1983.

Chapter 498 conformed various provisions of the Bank and Corporation Tax Law to Federal law. This will increase revenues in 1983–84 by $20 million and increase revenues in 1984–85 by $11 million.

Insurance Tax—$615,000,000. Most insurance written is subject to a 2.33 percent gross premiums tax. The premiums tax is in lieu of all other State and local taxes except those on real property and motor vehicles. Exceptions to the 2.33 percent rate are certain pension and profit sharing plans which are taxed at 0.50 percent, surplus lines at 3 percent, and ocean marine

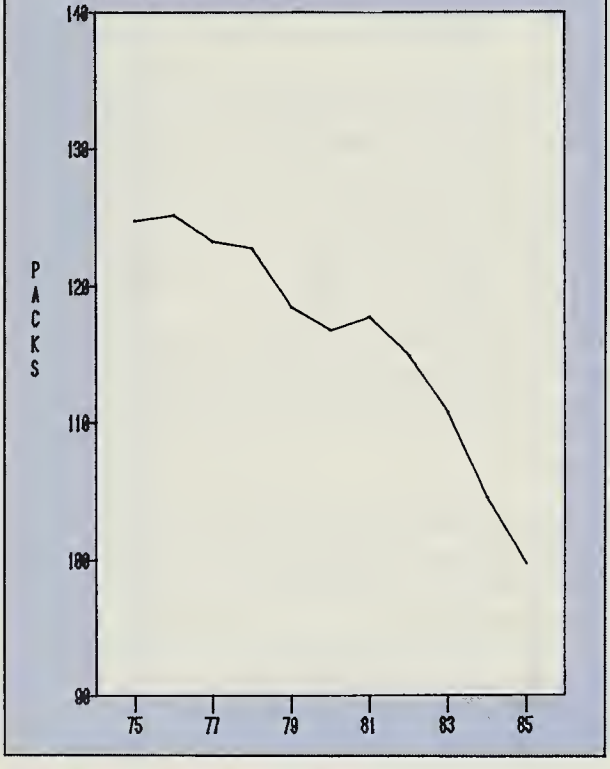
insurers at 5 percent of underwriting profits.

A survey conducted by the Department of Finance was used to project insurance premium growth. Responses were obtained from 145 insurance companies, accounting for 62 percent of the insurance written in California. The results indicate that taxable premiums will total $22.5 billion in 1983 and $24.6 billion in 1984.

The insurance tax forecast is affected by Chapter 327, Statutes of 1982 which not only reduces the gross premiums tax rate from 2.35 to 2.33 percent from 1982 through 1985, but accelerates prepayment collections starting in 1983. This measure increased revenue by $227 million in the past year, is expected to reduce collections by $112 million in the current year and increase revenue by $8 million in the budget year.

Cigarette Tax—$257,000,000. A tax of 10 cents per cigarette package is imposed on distributors selling cigarettes in this State. Thirty percent of the revenue is allocated to local governments with the remaining 70 percent going to the General Fund. Cigars and other tobacco products are not subject to a tobacco tax.

Figure 19
Cigarettes
Per Capita Consumption



Projections of total and per capita distributions of cigarettes provide the basis for the cigarette tax estimate. Consumption has been on the decline in recent years. Per capita consumption in 1983–84 is expected to decrease 5.6 percent from 1982–83 and drop another 4.7 percent in 1984–85.

The Federal cigarette tax was increased from 8 cents to 16 cents per pack effective January 1, 1983. This accelerated the decline in cigarette consumption.

Taxable distributions of cigarettes in 1982–83 amounted to 2.72 billion packs; 2.65 billion packs are projected for 1983–84 and 2.57 billion packs for 1984–85.

	Revenue (in thousands)		
	1982–83 Actual	*1983–84 Estimate*	*1984–85 Estimate*
General Fund	$190,644	$185,500	$180,000
Cigarette Tax Fund	80,977	78,500	77,000
Total	$271,621	$265,000	$257,000

Inheritance/Estate/Gift Taxes—$186,500,000. Proposition 6, adopted by the voters on June 8, 1982, repealed the inheritance and gift taxes and imposed a "pick-up tax", or the Federal credit for State death taxes. This "pick-up tax" is not really a tax at all, but a provision in the Federal law which allows the State to receive a portion of the revenue stemming from the Federal estate tax.

As a result, the tax revenue base is affected by the date of death of the decedent or the date a gift is made. For State tax purposes, the former inheritance and gift taxes apply to deaths and gifts prior to June 9, 1982, whereas transfers attributable to deaths on or after that date would only be subject to the Federal credit. The "pick-up tax" is computed on the basis of the Federal taxable estate. Tax rates range from 0.8 percent to 16.0 percent.

The inheritance/estate and gift revenue forecast has three parts: estate tax, inheritance tax, and gift tax. Estimates of these three components as

well as actual revenue collections are:

	Revenue (in thousands)		
	1982–83 Actual	1983–84 Estimated	1984–85 Estimated
Inheritance tax	$481,287	$105,000	$45,000
Estate tax	28,260	120,000	140,000
Gift tax	8,328	2,500	1,500
Total	$517,876	$227,500	$186,500

Alcoholic Beverage Taxes—$136,800,000. The tax on alcoholic beverages is levied on the sale of distilled spirits, beer, and wine in this State. Tax rates vary with the type of alcoholic beverage:

Beer	$0.04 per gallon
Dry wine	$0.01 per gallon
Sweet wine	$0.02 per gallon
Sparkling wine	$0.30 per gallon
Distilled spirits	$2.00 per gallon

Alcoholic beverage tax estimates are based on projections of total and per capita consumption for each type of beverage.

Over the last five years, total consumption of dry wine and sparkling wine has generally increased. Sweet wine, which had been on a decline, is now increasing. Beer consumption dropped for one year but is now rising. Distilled spirits are continuing the decline that began in 1981.

Apparent Per Capita Consumption (in gallons)

	1982–83 Actual	1983–84 Estimated	1984–85 Estimated
Beer	24.01	24.78	25.36
Dry wine	3.84	4.05	4.13
Sweet wine	.34	.34	.34
Sparkling wine	.36	.42	.44
Distilled spirits	2.18	2.12	2.06

Estimated revenues for the current and budget years, compared with the actual revenue for 1982–83 are:

	Revenue (in thousands)		
	1982–83 Actual	1983–84 Estimated	1984–85 Estimated
Beer and wine	$27,658	$29,500	$30,700
Distilled spirits	108,520	107,750	106,100
Total	$136,168	$137,250	$136,800

Horse Racing Revenue—$133,825,000. Horse racing revenue comes primarily from license fees imposed on the amounts wagered. The license fee revenue is based upon many factors, including type of horse racing, the total amount wagered, the location of the track, and the type of wager. Other revenue sources include breakage (the odd cents not paid to winning ticket holders), unclaimed parimutuel tickets, occupational license fees, fines, and penalties.

A special license fee is being assessed during the current year. Any association conducting a racing meeting between August 1, 1983 and July 1, 1984 must pay an additional license fee equal to 1 percent of total exotic wagers. (Exotic wagers include exactas, daily doubles, pick six, and other special wagers.) This special license fee is expected to generate $8 million in 1983–84.

The following table provides information on total parimutuel pools and receipts from horse racing:

	Revenue (in thousands)		
	1982–83 Actual	1983–84 Estimated	1984–85 Estimated
Total parimutuel pools	$2,053,000	$2,147,000	$2,222,000
Receipts:			
Parimutuel license fees	$113,219	$126,248	$122,485
Breakage	7,400	7,700	8,100
Other revenue	2,779	2,880	3,240
Total	$123,398	$136,828	$133,825

Alternative Estimates

Revenue estimates are subject to changes in the economy. If the recovery now in progress does not continue as forecast, General Fund revenues in 1984–85 could be $1.67 billion below the estimate. On the other hand, a more rapid recovery could lead to revenues $1.7 billion above the forecast.

The following table compares the 1983–84 and 1984–85 General Fund Budget estimate of major taxes and licenses with high and low alternative estimates:

	(In millions)		
	High Alternative	Budget Estimate	Low Alternative
1983–84	$23,525	$22,925	$22,370
1984–85	$27,496	$25,796	$24,126

Special Fund Revenue

The California Constitution, codes and statutes specify the uses of certain revenue. Such receipts are accounted for in various special funds. In

general, Special Fund revenues comprise three categories of income:

- Receipts from tax levies which are allocated to specified functions, such as motor vehicle taxes and fees.
- Charges for special services to specific functions, including such items as business and professions license fees.
- Rental royalties and other receipts earmarked for particular purposes, illustrated by oil and gas royalties.

Motor vehicle related taxes and fees account for 70 percent of all Special Fund revenue. Principal sources of this income are motor vehicle fuel taxes, registration and weight fees, and vehicle license fees. During the 1984–85 fiscal year, $3.2 billion will be derived from the ownership or operation of motor vehicles. Approximately $1.7 billion of this revenue will be returned to local governments. The remainder will be available for various State programs related to transportation and services to vehicle owners.

Thirty percent of cigarette tax revenue is deposited in a special fund for distribution to cities and counties. In 1984–85 receipts for this fund are estimated at $77 million.

Motor Vehicle Fees—$2,134,400,000. Motor vehicle fees consist of vehicle license, registration, weight, and drivers' license fees, and various other charges related to vehicle operation.

The vehicle license fee is imposed for the privilege of operating a vehicle on the public highways in California. It is calculated on the vehicle's "market value"—the cost to the purchaser exclusive of sales tax, adjusted by a depreciation schedule. For motor vehicles, the schedule is based on a 10-year depreciation period; an 18-year depreciation period is used for trailer coaches. A rate of 2 percent is applied to the depreciated value to determine the fee. Revenue from this source is thus contingent on the number of vehicles in the State, the age distribution of those vehicles, and their original base price.

Registration fees are levied at a flat rate on all motor vehicles, trailers, semi-trailers and certain types of dollies. Truck and trailer owners also pay weight fees.

New vehicles sales (autos, trucks, trailers and motorcycles) in California totaled 1,199,229 in 1982 and are estimated to be 1,411,000 units in 1983. In 1984 and 1985 sales are expected to reach 1,570,000 and 1,645,000 units, respectively.

Allowing for scrappage and vehicles entering and leaving the State, total fee-paid registrations at year-end are estimated at 19,543,000 for 1983, 20,048,000 for 1984 and 20,535,000 for 1985.

Chapter 541 of 1981 (SB 215), which implemented substantial fee increases related to vehicle operation beginning in 1982, increases weight fees by an additional 10 percent in January 1985. Chapter 323 of 1983 (AB 223) replaced manufacturer's suggested base price with cost price for determining "market value" of new motor vehicles. This measure also based the vehicle license fee on a 10-year rather than a nine-year depreciation schedule. The combined effect of these measures will increase revenue by an estimated $135 million in the current year and $225 million in the budget year.

Total revenues from motor vehicle fees, including the effects of legislative changes, are:

	Revenue (in thousands)		
	1982–83 Actual	*1983–84 Estimated*	*1984–85 Estimated*
Registration, Weight, & Other Fees	$835,401	$868,000	$910,000
Vehicle License Fees	789,335	1,029,000	1,224,400
Total	$1,624,736	$1,897,000	$2,134,400

Motor Vehicle Fuel Taxes—$1,097,000,000. The motor vehicle fuel license tax and the use fuel (diesel) tax provide the major sources of funds for maintaining, replacing, and constructing State highway and transportation facilities.

The motor vehicle fuel license tax (gas tax) is imposed on the distribution of gasoline and other flammable liquids. Distributions of diesel fuel, liquid petroleum gas (LPG) and kerosene are not included under this tax. The current tax rate for motor vehicle fuel is 9 cents per gallon; aircraft jet fuel is taxed at 2 cents per gallon.

The use fuel tax is imposed on diesel fuel, LPG, and natural gas for use on State highways. The current tax rates are 9 cents per gallon of motor vehicle fuel, 7 cents per 100 cubic feet of compressed natural gas, and 6 cents per gallon of LPG or liquid natural gas. In addition, a person may elect to pay a flat rate fuel tax based on vehicle weight in lieu of the tax on LPG. Local

transit systems and certain common carriers pay 1 cent per gallon.

Gasoline tax revenues are estimated on the basis of average gasoline consumption per vehicle and total vehicle registrations. Consumption per vehicle in 1982–83 amounted to 570 gallons and is projected at 557 gallons for 1983–84 and 545 gallons for 1984–85.

Highway consumption of diesel fuel is estimated by projecting the trend of past distributions with adjustments to reflect changes in the economy. Consumption of diesel fuel is expected to increase 11.0 percent in 1983–84 and to rise by 6.2 percent in 1984–85.

Chapter 541 of 1981 (SB 215) increased the motor vehicle and diesel fuel tax rates from 7 cents to 9 cents per gallon effective January 1983. Chapter 323 of 1983 (AB 223) accelerated the payment of fuel tax revenues, and is expected to result in a one-time revenue increase in 1983–84. The combined impact of these measures increased revenue by about $83 million in 1982–83, and is expected to increase revenue collections by $325 million in 1983–84 and $240 million in 1984–85.

	1982–83 Actual	*1983–84 Estimated*	*1984–85 Estimated*
Gasoline	$835,401	$1,046,000	$970,000
Use Fuel	93,232	128,000	127,000
Totals.....	$928,633	$1,174,000	$1,097,000

Property Tax Growth

The Constitution limits the property tax rate to 1 percent plus an amount for debt approved by the voters prior to June 1978. An inflation factor, not to exceed 2 percent, may be applied to the assessed value of property that has not been newly constructed or changed ownership.

Proceeds from the 1 percent rate are allocated to local jurisdictions. On a statewide basis, the distribution is approximately as follows:

Counties	35.4%
K–12 School Districts	32.0%
Cities	15.1%
Special Districts (includes Redevelopment)	12.5%
Community Colleges	5.0%

K–12 districts receive an estimated $2.4 billion in local property tax. Every 1 percent increase in property tax revenue results in General Fund savings for K–12 apportionments of about $23 million.

Property tax growth is estimated using a biannual (November and April) survey of assessors, requesting estimates of their county's assessed value (AV) growth for the next fiscal year, including a 2 percent inflation factor. The estimates submitted indicate a statewide 1984–85 AV growth of 8.0 percent. Based on the experience of the surveys for the last three years, a factor of 1.5 percent has been added to the AV estimate. The estimated AV growth for 1984–85 is, therefore, 9.5 percent.

Redevelopment agencies are funded through tax increment: revenue generated above the base value in the redevelopment project area goes to the redevelopment agency. Since these funds are diverted from other jurisdictions, it is necessary to adjust the AV growth estimate to reflect this loss. Although redevelopment agencies receive approximately 4 percent of the property tax, they account for 7 percent of the AV growth. This translates into a loss of approximately 1 percent of the AV growth for other jurisdictions. The estimated growth of property tax for 1984–85 is, therefore, 8.5 percent.

Summary of State Tax Collections
(Excludes Departmental, Interest and Miscellaneous Revenue)

	Per Capita Personal income[a]	State Tax Collections (millions)		Taxes per Capita		Taxes per $100 of Personal Income	
		General Fund	Total	General Fund	Total	General Fund	Total
1967–68	$3,689	$3,558	$4,676	$185.53	$243.85	$5.03	$6.61

[1] Includes the corporation income tax.
[2] Proposition 6 repealed the inheritance and gift taxes and imposed an estate tax equal to the maximum allowable Federal estate tax credit, effective for decedents dying on or after June 9, 1982.
[3] Motor vehicle fuel tax (gasoline), use fuel tax (diesel) and liquefied petroleum gas.
[4] Registration and weight fees, motor vehicle license fees and other fees.
† Estimated.

OUTLINE OF STATE TAX SYSTEM AS OF JANUARY 1, 1984

Major Taxes and Fees	Base or Measure	Rate	Administering Agency	Fund
Alcoholic Beverage Excises:				
Beer	Gallon	$0.04	Equalization (1)	General
Distilled spirits	Gallon	2.00	Equalization	General
Wine:				
Dry	Gallon	.01	Equalization	General
Sweet	Gallon	.02	Equalization	General
Sparkling	Gallon	.30	Equalization	General
Sparkling hard cider	Gallon	.02	Equalization	General
Bank and Corporation:				
General corporations	Net income	9.6% (2)	Franchise (3)	General
Banks and financial corporations	Net income	12.0% Max.	Franchise	General
Cigarette	Package	$0.10 (4)	Equalization	Cigarette Tax Fund (5)
Energy Resources Surcharge	Kilowatt hours	$0.0002	Equalization	Energy Resources Surcharge Fund
Horse Racing License	Amt. wagered	1.0–12.78-%	Horse Racing Board	Fair and Expo. (6), Wildlife Restoration and General
	Breakage	0–100%		
Estate	Taxable Federal estate	0.8–16%	Controller	General
Insurance	Gross Premiums	2.33% (7)	Insurance Dept.	General
Liquor license fees	Type of license	Various	Alcohol Beverage Control Dept.	General
Motor Vehicle:				
Vehicle license fees	Market value	2%	Motor Vehicle Dept.	Motor Vehicle License Fee (8)
Fuel—gasoline	Gallon	$0.09	Equalization	Motor Vehicle Fuel (9)
Fuel—diesel	Gallon	.09	Equalization	Motor Vehicle Fuel
Registration fees	Vehicle	$23.00	Motor Vehicle Dept.	Motor Veh. (10)
Weight fees	Unladen weight	Various	Motor Vehicle Dept.	State Highway (11)
Personal Income	Taxable income	1–11%	Franchise	General
Preference Income:				
Bank and corporation	Preference income over $30,000	2.5%	Franchise	General
Personal	Preference income over $4,000 (single), $8,000 (joint, head of household, or surviving spouse)	0.5–5.5%	Franchise	General
Private Railroad Car	Valuation	(12)	Equalization	General
Retail Sales and Use	Receipts from sales or lease of taxable items	4.75%	Equalization	General and State Transportation Fund

(1) State Board of Equalization.
(2) Minimum Tax $200 per year.
(3) Franchise Tax Board.
(4) This tax is levied at the rate of 5 mills per cigarette.
(5) 30 percent of the cigarette tax is remitted to local jurisdictions.
(6) For support of county fairs and other activities.
(7) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. Special rates also apply to certain pension and profit sharing plans and surplus lines.
(8) For return to cities and counties.
(9) For administrative expenses and apportionment to State, counties and cities for highways, airports and small craft harbors.
(10) For support of State Department of Motor Vehicles, California Highway Patrol, other agencies and motor vehicle related programs.
(11) State Department of Motor Vehicles administrative expense.
(12) Average property tax rate in the State during preceding year.

Federal Grants

The Governor's Budget proposes the appropriation of $13.6 billion in Federal funds. Federal funds transferred to State agencies are, for the most part, passed-through to local entities to implement earmarked programs.

Pass-through allocations are made based on caseload, pursuant to formulas or as discretionary grants for specific projects which have been reviewed and approved for funding. The State is generally responsible for providing direction and technical assistance, ensuring compliance with Federal and State requirements, and distributing funds to local agencies.

Major program areas receiving 1984–85 Federal pass-through funding in California are education, health and welfare, and transportation:

- Department of Education pass-through Federal funding proposed for 1984–85 is $888.8 million. K–12 pass-through money supports such programs as the Education Consolidation and Improvement Act, Chapter 1 programs, elementary and secondary education, education for the handicapped, and child nutrition programs.
- Federal pass-through funding to California's health and welfare programs include an estimated $1.96 billion for the medical assistance program for low-income persons (Medi-Cal), $1.51 billion for the Aid to Families with Dependent Children program, $44.3 million to nutrition programs for the elderly, and $159.5 million to In-Home Supportive Services.
- Pass-through funding for local transportation programs totals $335 million to finance mass transit and road repairs and to make operational and safety improvements.

In addition to pass-through funds, the State receives federal money directly to administer and implement certain Federal programs. Major programs in this funding category include transportation programs and projects which will be funded at $975 million (Federal fund) in 1984–85. The University of California budget includes $1.9 billion in Federal funds, most of which finance research projects under contracts with the Federal Department of Energy. Additionally, several health and welfare programs receive significant amounts of Federal funds.

Description of Key Schedules

The Budget includes summary information in various schedules. The following schedules are those which may be the most useful for the public, private sector, or other levels of government. With the exceptions of Schedule 1 and Schedule 4B, these Schedules represent schedules and tables which have been renumbered from presentations in previous Governor's Budgets. The previous numbers are noted in parentheses.

SCHEDULE 1. *General Budget Summary*—Provides for a fund condition statement for the General Fund and the total of the Special funds plus expenditure totals for the Selected Bond funds.

SCHEDULE 2. *Total State Spending Plan* (Formerly Schedule 1C)—Provides in a single schedule the State's total spending plan. In addition to the General Fund, Special funds, and Selected Bond funds, expenditures from Nongovernmental Cost funds and Federal funds are shown.

SCHEDULE 3. *Comparison of California Current and Recommended Fund Structures using 1984–85 Budget Totals* (Formerly Schedule 1D)—Provides a comparison of budget data using generally accepted accounting principles.

SCHEDULE 4. *Personnel Years and Salary Cost Estimates* (Formerly Table 1)—Provides position and personnel year data and corresponding dollar amounts by functional breakdown and position classifications. This schedule reflects net data after salary savings.

SCHEDULE 4A. *Positions and Salary Cost Estimates* (Formerly Table 1A)—Provides position and personnel year data and corresponding dollar amounts by functional breakdown and position classifications. This schedule reflects gross data before salary savings.

SCHEDULE 4B. *Personnel Years and Salary Costs*—Provides expended personnel years and salary costs for fiscal years 1980–81, 1981–82, and 1982–83.

SCHEDULE 5. *Summary of State Population, Employees, and Expenditures* (Formerly Table 2)—Provides historical data of state population, employees and expenditures.

SCHEDULE 6. *General Fund Balances Available for Appropriation* (Formerly Schedule 1A)—Provides a comparison of the 1982–83 and 1983–84 General Fund amounts presented in the 1984–85 Governor's Budget to the amounts presented for those years in the 1983–84 Governor's Budget.

SCHEDULE 7. General Fund: *Statement of Financial Condition* (Formerly Schedule 1B)—Provides the financial condition of the General Fund as of June 30, 1983 from the most recently available information from the State Controller.

SCHEDULE 8. *Comparative Statement of Revenues* (Formerly Schedule 2)—Provides General Fund and Special fund revenue detailed amounts within three main breakdowns of: (1) major taxes and licenses, (2) other revenues, and (3) transfers.

SCHEDULE 9. *Comparative Statement of Expenditures* (Formerly Schedule 3)—Provides a listing of expenditures in the order of printing of individual budgets from the General Fund, Special funds, Selected Bond funds and Federal funds for state operations, local assistance and capital outlay.

SCHEDULE 10. *Summary of Fund Condition Statements* (Formerly Schedule 4)—Provides for the General Fund and each Special fund the beginning reserve, income, expenditures, transfers, and ending reserve for each of the three fiscal years displayed in the Governor's Budget.

SCHEDULE 11. *Statement of Cash and Securities* (Formerly Schedule 5)—Provides a listing of cash, securities and amounts due from the Surplus Money Investment Fund for all funds maintained in the State Treasury.

SCHEDULE 12. *Comparative Statement of Expenditures as Required by Law* (Formerly Schedule 6)—Provides a listing of expenditures authorized by constitutional or statutory appropriation authority. Unless otherwise specified in law, all continuous appropriations for encumbrance will sunset June 30, 1984 pursuant to Section 45.1, Chapter 323, Statutes of 1983. This schedule reflects, among other things, those expenditures included in the Governor's Budget which are proposed on the basis of on-going statutory appropriations. Section 30.00 of the 1984 Budget Bill includes proposed exemptions from sunset, where required, for these appropriations in accordance with the criteria specified in Section 151.4 of Chapter 323, Statutes of 1983.

SCHEDULE 13. *Statement of Bonded Debt* (Formerly Schedule 7)—Provides a listing of all general obligation bonds as of December 31, 1983 including interest rates, maturity dates, authorized amount of bond issues, unsold issues, redemptions, and outstanding issues.

Description of Fund Classifications in the State Treasury

Revenues and expenditures in the program budget and the summary schedules reflect the activities of many separate funds. Schedules 10 and 11 provide a complete list of these funds. The Index lists those funds for which Fund Conditions are included in the budget and references the page number. General Fund and Special Fund expenditures represent the cost of government and are included in budget totals; and along with selected Bond Funds, are included in the overall expenditure totals. The State of California started in 1981–82 to change classification of funds in the state treasury to conform to Generally Accepted Accounting Principles as set forth by the National Council on Governmental Accounting. Schedule 3 in the A-Pages includes a description of these changes and shows their effect on the 1984–85 budget totals.

GENERAL FUND—Used to account for all revenues and activities financed therefrom which are not required by law to be accounted by any other fund. Most state expenditures are financed from the General Fund. Normally, the only difference between the General Fund and the other governmental costs funds is the restriction placed on the use of the other governmental cost funds.

SPECIAL FUNDS—Consists of governmental cost funds used to account for taxes and revenues which are restricted by law for particular functions or activities of government. The funds included in these classifications are primarily for the regulation of businesses, professions and vocations; transportation; law enforcement and capital outlay.

General Fund Special Account—Legislatively created accounts or dedicated revenues within the General Fund. Moneys credited to such accounts may be used only for the purposes specified in the legislation. As a result of Chapter 942, Statutes of 1977, these special accounts are treated as special funds and revenues and expenditures are included in the special funds totals in the summary schedules of the budget. They are therefore excluded from the General Fund unrestricted revenues, expenditures and reserves.

OTHER FUNDS—See Schedule 11 for a list of funds which do not represent a cost of government. Expenditures from these funds are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. Included are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. These funds are segregated into the following classifications:

Working Capital and Revolving Funds—Funds created to finance internal service activities rendered by a state agency to other state agencies or to local governments for which charges are made at cost. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

Public Service Enterprise Funds—Self supporting activities operated by the State for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues.

Bond Funds—Used to account for the receipt and disbursement of proceeds from the sale of bonds and to finance projects for which the bonds were authorized. Expenditures are considered a cost of government at the time interest payments are made and as the bonds are redeemed.

Retirement Funds—Moneys held in trust by the State for retirement benefit payments.

Trust and Agency Funds—Funds holding moneys in trust pending disbursements to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

SELECTED BOND FUNDS—Included in the overall expenditures totals of Schedules 1 and 9 for budget purposes are expenditures from the following funds:

Bond Proceeds Account, State School Building Lease-Purchase Fund.
County Jail Capital Expenditure Fund.
Health Science Facilities Construction Program Fund.
Recreation and Fish and Wildlife Enhancement Fund.
State Beach, Park, Recreational and Historical Facilities Fund (of 1964).
State Beach, Park, Recreational and Historical Facilities Fund (of 1974).
State Clean Water Fund.
State Clean Water and Water Conservation Fund.
State Construction Program Fund.
California Safe Drinking Water Fund.
State, Urban, and Coastal Park Fund (Bond Act of 1976).
Parklands Fund of 1980.
New Prison Construction Funds.

Unencumbered balance of continuing appropriations	*10*	*3,504*	*104,877*			
Reserve for Economic Uncertainties	*10*	*950,704* [c]	*346,002*			

[a] The General Budget Summary includes the revenues and expenditures of all state funds that reflect the cost of State government and selected bond fund expenditures. The transactions involving other nongovernmental cost funds are excluded.

[b] The $69.5 million is the amount reported by departments for inclusion in the Governor's Budget. Preliminary estimates received from the State Controller's Office as of January 5, 1984, however, reflect $87.1 million for continuing appropriations. The Department of Finance and the State Controller are reconciling the differences. Any adjustments to the estimates reflected in the Governor's Budget will be included in the May 1984 revise.

[c] The Reserve for Economic Uncertainties provides a source of funds to meet State General Fund obligations in the event of a decline in revenues or an unanticipated increase in expenditures. Included in this amount is the $100 million reserve for Los Angeles County Medical Assistance Grant Account pursuant to Chapter 1594, Statutes of 1982.

[d] Amounts included in this schedule for expenditures may not agree with those shown in Schedules 9 and 12 due to rounding.

TOTAL STATE SPENDING PLAN

Schedule 2 is included for informational purposes to show in one place the State's total spending plan. It provides a means of comparing the total State resources used on a year-to-year basis. In addition to the General Fund, Special Funds and Selected Bond Funds, Schedule 2 shows expenditures from nongovernmental cost funds and Federal funds. The latter two groupings have not traditionally been included as part of State summary expenditures in Governors' budgets.

A basic premise in such a consolidation as this is that the State is the financial unit and individual funds are subsidiary units to the State. This is similar to financial units in the private sector in which diversified commercial corporations with several subsidiaries report their operation on a consolidated basis—but is a contrast to traditional governmental accounting, which has held that the individual funds are the financial units and should not be consolidated with other funds or types of funds.

The consolidation in Schedule 2 presents some theoretical and practical problems. From a theoretical standpoint, it combines all funds and gives the illusion that spending occurs in the same manner regardless of fund. This is not the case: the General Fund, Special Funds and Bond Funds are accounted for on a modified accrual basis; the Public Service Enterprise Funds, Working Capital and Revolving Funds, Retirement Funds and Trust and Agency Funds are accounted for on an accrual basis; and the Health Care Deposit Fund and General Fund appropriations to Medi-Cal are accounted for on a cash basis.

This combination also may give the illusion that total State spending is authorized and controlled through the annual budget process. This is not the case. Each fund is created for a specific purpose and its spending is dictated based on the provision of the Constitution or Statute under which it was created. In essence, each fund is a separate fiscal and legal entity that operates under the specific legal provisions that created it. Many expenditures from funds are authorized by the Constitution or other statutes besides the Budget Act.

From a practical standpoint, Schedule 2 is only an approximation. For example, it includes some duplicate amounts and does not include reimbursements. Some duplications are spending from the Department of General Services' Service Revolving Fund, which are also included in spending of departments, and from Workers' Compensation, Unemployment Insurance and Nondisability Insurance Benefits, which have been previously collected from State agencies. Another duplication is the expenditure amounts from bond proceeds, which are included both when bond proceeds are spent and when debt service is paid.

Schedule 2 does not include reimbursements received from the public or other levels of government, as these are deducted from State expenditures.

Schedule 2 displays funds in terms of traditional fund classifications. Schedule 3 shows how traditional fund classifications relate to the classifications based on Generally Accepted Accounting principles.

ADOPTION OF GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

With the implementation of the California Fiscal Information System (CFIS), the State of California is committed to the adoption of Generally Accepted Accounting Principles (GAAP). The National Council on Governmental Accounting (NCGA), the Financial Accounting Standards Board and the Council of State Governments are all active in defining GAAP and recommend that state governments adhere to the principles they set forth. The California Fiscal Advisory Board has approved conformance with GAAP as set forth by the NCGA in California beginning in 1981–82 with the following exceptions:

1. General Fund transfers to other funds will continue to be shown as expenditures of the General Fund.
2. Reimbursements will continue to include monies that come from non-State sources, such as from local government or the private sector.
3. The Health Care Deposit Fund will continue to be accounted on a cash basis.

GAAP represents uniform minimum standards and guidelines for financial accounting and reporting. The goal of GAAP is to standardize the accounting and financial reporting of governmental organizations—regardless of jurisdictional legal provisions and customs.

This standardization assures that financial reports of all State and local governments contain the same types of financial statements and disclosures for the same categories and types of funds and account groups, based on the same measurement and classification criteria. It also allows the users of governmental fiscal reports to gain a better understanding of the government's financial condition and facilitates the comparison of operations from year to year within each fund, as well as with the operations of other funds or governmental organizations.

Another important aspect of GAAP as applied to governments is recognition of the variety of legal and contractual considerations typical of the government environment. These considerations underlie and are reflected in the fund structure, basis of accounting, and other principles.

Governmental accounting systems designed in conformity with these principles can readily satisfy most management control and accountability information needs with respect to both GAAP and legal compliance reporting.

Along with other changes in fiscal reporting being implemented by CFIS, some of California's governmental cost funds and many nongovernmental cost funds will be reclassified to conform with GAAP. Schedule 3, based on an assessment of GAAP classifications and using 1984–85 budget totals, shows how California's current fund classifications will translate into GAAP classifications.

TOTALS, ALL GENERAL OBLIGATION BONDS			$13,725,203	$2,280,000	$4,828,994	$6,616,209

[1] The state school building issues debt service payments are partially refinanced with funds of the borrowing school districts over a 30- to 40-year repayment period as prescribed by statutes.
[2] The California Water Resource Development Bond Act, the San Francisco Harbor Improvement Acts, and the Veterans Bond Acts are public service enterprises that have their own revenues to finance their respective debt service expenditures.
[3] Callable on and after July 1, 1951, by lot.
[4] Callable on and after July 2, 1955, by lot.
[5] Callable on and after January 1, 1941, by lot.
[6] Chapter 70, Statutes of 1972, authorizes a reduction in the amount of bonds from $1,000,000 to $853,000, and also authorizes a reduction of the San Francisco Harbor Improvement Act of 1913 bonds from $10,000,000 to $9,450,000 to eliminate the unsold, unissued bonds and thereby report unsold bonds as zero accountability.
[7] The Harbor Development Bond Law of 1958 includes an authorization of $50,000,000 for San Francisco harbor development and $10,000,000 for the development of small craft harbors as provided by Chapter 103, Statutes of 1958, First Extraordinary Session.

Appendix 1

List of Budget Process Documents

The Governor's Budget is the result of a process which begins in the spring, more than one year before the budget is to be effective. Listed below are the key documents used in the budget process and a brief description of their purpose, originator and approximate release date.

Title	Purpose	Prepared/Issued by	When
Budget Letters and Management Memos	Convey Administration guidelines for budget preparation to agencies and departments	Governor/Department of Finance	April through December
Budget Change Proposals	Proposes and documents budget changes to maintain the existing level of service or to change the level of service	Agencies and departments submit to Department of Finance for analysis	July through September
Governor's Budget	Governor's proposed budget for the upcoming fiscal year	Governor/Department of Finance	January 10
Budget Bill	Requests spending authorization to carry out Governor's expenditure plan (Legislative budget decision document)	Department of Finance/ Legislature	January 10
Governor's Budget Summary	A summary of the Governor's Budget	Governor/Department of Finance	Late January
Budget Analysis	Analysis of the budget, including recommendations for changes to the Governor's Budget	Legislative Analyst	February
May Revision of General Fund Revenues and Expenditures	Update of General Fund revenues, expenditures and surplus estimates based on the latest economic forecast	Department of Finance	Mid-May
Budget Act	The primary annual expenditure authorization as approved by the Governor and Legislature, including a listing of Governor's vetoes	Legislature/Governor	Late June
Supplemental Report of the Committee of Conference on the Budget Bill	Contains language on statements of intent and requests for information or studies	Legislative Analyst	Early July
Final Budget Summary	Published, if needed, update of the individual Budget Act items with changes by the Governor's vetoes, including summary budget schedules	Department of Finance	Mid-July
Final Change Book	Update of the changes to the detailed fiscal information in Governor's Budget in accordance with the Budget Act	Department of Finance	Late July
General Fund Update and Financial Legislation Report	Update of revenue and expenditure estimates, including financial legislation	Department of Finance	Early November

Appendix 2

Glossary of Budget Terms

The following budgetary terms are used frequently throughout the Governor's Budget, the Governor's Budget Summary, and the annual Budget (Appropriations) Bill. Definitions are provided for terminology which is common to all activities. For definitions of terms peculiar to a specific program area, please refer to the individual budget presentation of interest.

The definitions of other budget-related terms may be found in the State Administrative Manual and in the annual Budget Bill.

Administration Program: An accounting for departmental central management costs. These include such costs as the Director's Office, Legal Office, Personnel Office, Accounting, and Business Services functions that generally serve the whole department. "Administration-distributed" represents those costs which are more properly distributed to the program activities of an agency as indirect costs.

Allocation: A distribution of funds, or an expenditure limit established for an organization unit.

Allotment: A part of an appropriation, to be expended for a particular purpose during a specified time period. An allotment is generally authorized on a line-item expenditure basis.

Appropriation: An authorization from a specific fund to a specific agency to make expenditures/incur obligations for a specified purpose and period of time. The Budget Act contains many appropriations, or items. These appropriation items are limited to one year, unless otherwise specified. Appropriations are made by the Legislature in the annual Budget Act and in other legislation. Continuing appropriations (which require no subsequent legislative action) are also provided by the California Constitution.

Appropriation Limits: As defined in Section 8 of Article XIIIB of the California Constitution, enacted by the passage of Proposition 4 at the November 6, 1979 general election, the growth in the level of certain appropriations from tax proceeds are generally limited to the level of the prior year's appropriation limit as adjusted for changes in cost of living and population. Other adjustments may be made for such reasons as the transfer of services from one government entity to another. (See A Pages for General Government.)

Augmentation: An increase in an allotment. A control section of the Budget Act authorizes the increase in expenditures for a category or project by transfer from any other category or project within the same schedule. A separate section of the Budget Act authorizes the augmentation of scheduled amounts from other departments, and from the federal government to the extent such funds have not been taken into consideration in the appropriation schedules. Both control sections require the reporting of specified augmentations to the chairperson of the committee in each house which considers appropriations and to the Chairperson of the Joint Legislative Budget Committee.

Authorized Positions: Those ongoing positions approved in the final budget of the preceding year less positions abolished because of continued, extended vacancy. The detail of authorized positions by classification is published in the Salaries and Wages Supplement for each agency. Changes in authorized positions are listed following each agency's budget presentation in the Governor's Budget. (See Proposed New Positions.)

Balance Available: Amount available for appropriation or encumbrance. It is the excess of cash and near-cash assets of a fund over its liabilities and reserves; or commonly called surplus available for appropriation. It is also the unobligated balance of an appropriation which may be encumbered for the purposes of the specific appropriation.

Baseline Budget: A baseline budget reflects the anticipated costs of carrying out the current level of service or activities as authorized by the Legislature. It includes adjustment for cost increases, but does not include changes in level of service over that authorized by the Legislature.

Budget, Program/Traditional: A plan of operation for a specific period of time expressed in

financial terms. A *program budget* expresses the operating plan in terms of the costs of activities to be undertaken to achieve specific goals and objectives.

A *traditional budget* expresses the plan in terms of the costs of the goods or services to be used to perform specific functions.

The Governor's Budget is primarily a program budget. However a summary of proposed expenditures for goods and services (Summary by Object) is included for State Operations, Local Assistance and Capital Outlay for each department, as well.

Budget Bill/Act: The Budget Bill is prepared by the Department of Finance and is submitted to the Legislature in January accompanying the Governor's Budget. The Budget Bill is the Governor's request for spending authorization for the subsequent fiscal year for on-going programs authorized by the Legislature. The Constitution requires the Legislature to pass the Budget Bill and send it by June 15 each year to the Governor for signature. After signature by the Governor, the Budget Bill becomes the Budget Act. (See the Governor's Budget Introduction for a description of the process.)

Budget Change Proposal (BCP): A proposal to change the level of service or funding sources for activities authorized by the Legislature, or propose new program activities not currently authorized.

Budget Year (BY): The next fiscal year beginning July 1 and ending June 30 for which the Governor's Budget is submitted. The year following the current fiscal year (the year we are in now).

Capital Outlay: Expenditures which result in the acquisition of or addition to major fixed assets (e.g., land, buildings and equipment related to construction).

Carryover Appropriations: Appropriations with balances available for expenditure in years subsequent to the year of enactment.

Category: A grouping of related objects of expenditure (goods or services). Such groupings are primarily Personal Services, Operating Expenses and Equipment, and Special Items of Expense.

Category Transfer: A control section of the Budget Act provides that the Department of Finance is authorized to augment any category by transfer from any other category within the same appropriation item schedule. Augmentations of personal services and operating expenses and equipment categories generally cannot exceed, in the aggregate, 20 percent of the amount scheduled. Lower limits exist for support appropriations which exceed $2,000,000. (See Category.)

Changes in Authorized Positions: A statement included in each budget presentation in the Governor's Budget which reflects personnel staffing changes made subsequent to the adoption of the current year budget (transfers, positions established and reclassifications). It also includes proposed new positions for the budget year.

Character of Expenditure: A classification of expenditures. (See State Operations, Local Assistance, or Capital Outlay.)

Codes, Uniform: A set of codes, used in all major fiscal systems of California State government, which has been established to identify organizations, programs, funds, appropriation structures, receipts and line-item objects of expenditure. The Uniform Codes Manual, published by the Department of Finance, lists all such uniform codes. (See Section 1.50 of the Budget Act for an explanation of the codes used for Budget Act appropriation items.)

Continuing Appropriation: Amount, actual or estimated, available each year under a permanent constitutional or statutory expenditure authorization which is automatically renewed each year without further legislative action. The amount available may be a specific, recurring sum each year; all or a specified portion of the proceeds of specified revenues which have been dedicated permanently to a certain purpose; or it may be whatever amount is required for the purpose as determined by formula—such as school apportionments.

Control Sections, Budget Act: The Budget Act is divided into sections. Section 1.00 establishes a citation for the legislation. Section 1.50 provides a description of the format of the act. Section 2.00 contains the itemized appropriations for support of the State of California. Section 3.00 is not currently being used. Sections 4.00 through 36.00 are general sections, also referred to as control sections, which place additional

restrictions on one or more of the itemized appropriations contained in Section 2.00.

Cost of Living Adjustments (COLA's), Statutory/Discretionary: Increases provided in state-funded programs which include periodic adjustments predetermined in state law (statutory), e.g., K–12 education apportionments; and adjustments which may be established at optional levels (discretionary) by the Legislature each year, e.g., Urban Impact Aid. (See the "A Pages" for a description of specific COLA's.)

Current Year (CY): The fiscal year beginning July 1 and ending June 30. The time period we are in now.

Encumbrance: A limitation or reserve placed on an appropriation to pay for goods or services which have been ordered by means of contracts, salary commitments, etc., but not yet received.

Expenditure: Generally, this term designates the amount of an appropriation used for goods and services ordered and received whether paid or unpaid, including expenses, provisions for debt retirement not reported as a liability of the fund from which retired, and capital outlays where the accounts are kept on an accrual basis or a modified accrual basis. Where the accounts are kept on a cash basis, the term designates only actual cash disbursements.

Federal Funds: In state budget usage, this term describes all funds received directly from an agency of the federal government but not those received through another state department. State agencies must initially deposit such federal funds in the Federal Trust Fund, a fund in the State Treasury.

Final Budget: The final budget is the Governor's Budget as amended by action taken on the Budget Bill. A Final Change Book is published by the Department of Finance after enactment of the Budget Act to reflect the changes made by the Legislature in their review of the Budget Bill and by the Governor by power of item veto. It includes a detailed list of changes by item number with a cross reference to the page number of the Governor's Budget.

Finance Letters: Proposals made by the Director of Finance to the chairpersons of the committees in each house which consider appropriations to amend the Budget Bill and Governor's Budget from that submitted January 10 to reflect a revised plan of expenditure for the Budget Year.

Fiscal Year (FY): A 12-month state accounting period which varies from the calendar year and the federal fiscal year. In California State government, it lasts from July 1 through the following June 30. It is the period during which obligations are incurred, encumbrances are made and appropriations are expended. The Governor's Budget presents three years of detailed fiscal data for the past, current and budget years.

The state fiscal year is often referenced by the first calendar year of the fiscal year, e.g., " '81" or "1981" means the 1981–82 fiscal year. By contrast, the federal 1981–82 fiscal year is often referenced as " '82" or "1982", and lasts from October 1 through September 30. (Calendar years are also used in the state for economic, revenue and other program purposes, and are referenced as "1981" or " '81"; thus, it is often difficult to determine whether a calendar, state fiscal or federal fiscal year is being referenced.)

Fund Balance: Excess of the assets of a fund over its liabilities and reserves. (See Balance Available, Reserve for Economic Uncertainties and Surplus.)

Fund Condition Statement: A statement included in the Governor's Budget for each special fund, special accounts in the General Fund, selected bond funds, and Governmental Cost funds to disclose the fund assets, liabilities, reserves and surplus.

Funds: A legal entity that provides for the segregation of moneys or other resources in the State Treasury for specific activities or obligations in accordance with specific restrictions, or limitations. A separate set of accounts must be maintained for each fund to show its assets, liabilities, reserves, and surplus (fund balance), as well as its income and expenditures. The assets of a fund may also be placed into separate accounts to provide for limitations on specified fund income or expenditures. (See Governor's Budget, page B-1 for a description of the types of funds in the State Treasury.)

Item: (See Appropriation.)

Limited-Term Positions: A limited-term position is any position which has been authorized for a specific length of time with a set termination

date. Limited-term positions may be authorized during the budget enactment process or in transactions approved by the Department of Finance.

Line Item: (See Objects.)

Local Assistance: Expenditures made for the support of local government activities.

Local Mandates: (See state-mandated local program.)

Merit Salary Adjustment: A cost factor resulting from the periodic increase in salaries paid to personnel occupying authorized positions. Personnel generally receive a salary adjustment of 5 percent per year to recognize proficiency in the work performed up to the upper salary limit of the work classification.

Minor Capital Outlay: Minor Capital Outlay consists of construction projects or equipment acquired to complete a construction project estimated to cost less than $150,000.

Objects (line items): A subclassification of expenditures based on type of goods or services. For example, the Personal Services Category includes the objects of Salaries and Wages and Staff Benefits. These may be further subdivided into line items as State Employees' Retirement, Workers' Compensation, etc. Objects do not reflect a function or purpose to be served by the expenditure. A Summary by Object is provided for each department's budget in the Governor's Budget for State Operations, Local Assistance and Capital Outlay expenditures. The Department of Finance publishes a Uniform Codes Manual which reflects the standard line-item objects of expenditure.

Past Year: The fiscal year just completed. (See Fiscal Year.)

Personnel Years: The actual or estimated portion of a position expended for the performance of work. For example, a full-time position which was filled by an employee for half of a year would result in an expenditure of 0.5 personnel years.

Positions: (See Authorized Positions.)

Programs: The activities of an organization grouped on the basis of common objectives. Programs are comprised of elements, which can be further divided into components and tasks (the lowest defined program activity).

Proposed New Positions: A request for an authorization to expend funds for the employment of additional people for the performance of work. Proposed new positions may be for limited-time periods (limited term) and for full or less than full-time. Proposed new positions may be for an authorization sufficient to employ one person, or for a sum of funds (blanket) from which several people may be employed.

Reappropriation: The extension of the availability of an appropriation for expenditure beyond its set termination date and/or for a new purpose. Reappropriations are usually authorized by the Legislature for one year extensions at a time.

Receipts: Describes an increase in the assets of a fund including revenues as well as transfers from other funds, federal receipts and fund reimbursements.

Reconciliation With Appropriations: A statement in each budget presentation which sets forth the source and amount of appropriations, by fund, available to the department and the disposition of such appropriated funds. Statements are presented by fund for each character of expenditure, i.e., State Operations, Local Assistance and Capital Outlay.

Reimbursements: Amount received as a repayment of the cost of work, or service performed, or of other expenditures made for or on behalf of another governmental unit or department. Reimbursements represent the recovery of an expenditure. Reimbursements are available for expenditure in accordance with the budgeted amount (scheduled in an appropriation).

Reserve for Economic Uncertainties: Control sections of the Budget Act provide for the establishment of a reserve of funds in the General Fund and in each special fund to provide for emergency situations. The appropriation of such funds from the reserves are not subject to the appropriation limits imposed on other appropriations. (See Appropriation Limits.)

Reserves: An amount set aside in a fund to provide for expenditures from the unencumbered balances of continuing appropriations, economic uncertainties, future apportionments, for pending salary or price

increase appropriations, and appropriation for capital outlay projects.

Revenue: The addition to cash or other current assets of governmental funds (receipts) which do not increase any liability or reserve and do not represent the recovery of an expenditure, i.e., reimbursements. Generally, revenue is derived from taxes, licenses, and fees or investment earnings.

Reversion: The return of the unused portion of an appropriation to the fund from which the appropriation was made. The undisbursed portion of an appropriation reverts two years after the last day of availability for encumbrance. The Budget Act often provides for the reversion of unused portions of appropriations when such reversion is to be made prior to the statutory limit.

Salary Savings: Salary savings reflect personnel cost savings resulting from vacancies and downward reclassifications as a result of turnover of employees. The amount of budgeted salary savings is an estimate generally based on past year experience.

Staff Benefits: The staff benefits object represents the state costs of contributions for employees' retirement, OASDI, health and welfare benefits, workers' compensation, unemployment insurance, industrial disability leave benefits, and nonindustrial disability leave benefits.

State-Mandated Local Program: State reimbursements to local governments for the cost of activities required by legislative and executive acts. This requirement was established by Chapter 1406, Statutes of 1972 (SB 90) and further ratified by the adoption of Proposition 4 (a constitutional amendment) at the November 6, 1979 general election. (See Governor's Budget: 9680 State-Mandated Local Programs.)

State Operations: Expenditures for the support of State government, exclusive of capital investments and expenditures for local government activities.

Summary by Object: A summary of actual past year and estimated current and budget year expenditures for goods and services for each organization presented for State Operations, Capital Outlay and Local Assistance expenditures.

Summary of Program Requirements: At the front of each departmental budget is a Summary of Program Requirements. It presents the various departmental programs by title, dollar totals and source of funds for the past, current and budget years.

Summary Schedules: The "B Pages" of the Governor's Budget include schedules which summarize state revenues and expenditures for the past, current and budget years. (See B Pages.)

Surplus: A surplus is the amount that exceeds liabilities and reserves. This term is no longer favored although still used in many fiscal presentations. (See Fund Balance.)

Tax Expenditures: Subsidies provided through the taxation systems. (See A Pages.)

Transfers: As reflected in fund condition statements, reflects the movement of resources from one fund to another based on statutory authorization or specific legislative transfer appropriation authority.

0150 CONTRIBUTIONS TO LEGISLATORS' RETIREMENT FUND

Program Objectives and Description

Established in 1947, the Legislators' Retirement System provides retirement and death benefits for legislators, constitutional officers and legislative statutory officers. In 1977–78 the Legislature initiated a one-time General Fund augmentation of $27,436,508 to eliminate the unfunded liability of the fund. In addition, Chapter 937, Statutes of 1977 revised the State's contribution rate to 18.81 percent of payroll in order to maintain an actuarially sound system. The system is also financed through member contributions of 4 percent for members enrolled prior to 1972 and 8 percent for members enrolled after 1972 and interest earnings. Administration of the system is provided by the Public Employees' Retirement System.

Retirement benefits paid are based upon age, years of service, and compensation. For members of the Legislature and constitutional officers, benefits are modified according to the actual calendar years that the service was performed. Survivors, death, and disability benefits are also provided for under specific conditions.

0160 LEGISLATIVE COUNSEL BUREAU

Program Objectives and Description

The objective of the Legislative Counsel Bureau is to provide legal assistance to the two houses of the Legislature and their Members and Committees in resolving a large volume of complex legal problems arising in connection with the legislative process, all of which must be resolved within a critical time span. The legal services furnished include rendering opinions, drafting bills, counseling, attendance as Counsel at meetings of legislative committees, and representing the Legislature in litigation. The attorney-client relationship is maintained, and all work is confidential.

In addition, the Bureau prepares and provides necessary indices and appropriate tables necessary to identify legislative measures, and compiles and indexes statutes and codes.

The Bureau operates a data center which is used for the legislative information system, the processing of legislative measures, and payroll, personnel, and accounting systems for both houses of the Legislature and is in the process of extending the utilization of data processing to other operations of the Bureau and the Legislature.

0170 CALIFORNIA LAW REVISION COMMISSION

Program Objectives and Description

The primary objective of the California Law Revision Commission is to study the statutory and decisional law of this state, to discover defects and anachronisms and to recommend legislation to effect needed reforms.

The Commission consists of a member of the Senate appointed by the Committee on Rules, a member of the Assembly appointed by the Speaker, and seven additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel is an ex officio member of the Commission.

The Commission assists the Legislature in keeping the law up to date by intensively studying complex and controversial subjects, identifying major policy questions for legislative attention, gathering the views of interested persons and organizations, and drafting recommended legislation for legislative consideration. The efforts of the Commission permit the Legislature to determine significant policy questions rather than to concern itself with the technical problems in preparing background studies, working out intricate legal problems, and drafting needed legislation. The Commission thus enables the Legislature to accomplish needed reforms that otherwise might not be made because of the heavy demands on legislative time. In some cases, the Commission's study discloses that no new legislation on a particular topic is needed, thus relieving the Legislature of the need to study the topic.

The Commission may study only topics which the Legislature authorizes by concurrent resolution. The Commission now has an agenda of 22 topics. The scope of two topics was expanded by the Legislature in 1983.

In 1983, the Commission recommended 14 bills to the Legislature. Twelve were enacted; one is a two-year bill that will be acted on by the Legislature in 1984. The enacted bills include one that made a comprehensive revision of the law relating to wills, intestate succession, and related matters. Other enacted bills dealt with durable powers of attorney for health care, division of marital property, missing persons, emancipated minors, creditors' remedies, multiple-party accounts with financial institutions, claims against public entities, bonds and undertakings, vacation of streets, highways, and public service easements, and limited conservatorships. The legislation enacted upon Commission recommendation in 1983 affected more than 700 code sections.

Important recommendations will be submitted to the 1984 legislative session as a result of work on the Commission's probate law and family law projects. Enactment of the probate law recommendations would reduce the need for probate of a decedent's estate, would reduce the cost and delay of probate, and would make other improvements in probate law.The family law recommendations are designed to clarify and improve the law in this field. Other recommendations prepared for consideration by the 1984 session deal with the statute of limitations for felonies, dismissal of civil actions for delay in prosecution, and garnishment of amounts payable to trust beneficiaries. During 1984–85, the Commission will work primarily on the probate law and family law projects and will consider other topics to the extent that time and resources permit.

0180 COMMISSION ON UNIFORM STATE LAWS

Program Objectives and Description

In conjunction with other states, the Commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws for adoption by the various states. The Commission is composed of four members appointed by the Governor, one member of each house of the Legislature appointed by the respective houses, and the Legislative Counsel.

0250 JUDICIAL

Article VI of the Constitution creates the Supreme Court of California and the Courts of Appeal to exercise the judicial power of the State at the appellate level, creates the Judicial Council of California to administer the State's judicial system, and creates the Commission on Judicial Performance to consider complaints against judges.

The budget which was adopted for 1983–84 reduced public defender services available to appellate courts throughout the State. The Judiciary's 1983–84 base budget for appointed counsel services was increased to ensure continued legal representation on appeal for indigent criminal defendants. In addition, $1.5 million has been reserved by the Administration for further augmentation of the 1983–84 appointed counsel budget if needed to meet workload resulting from the reduction of public defender services. Pilot projects also were initiated in the Supreme Court and Fourth Appellate District in an effort to improve and oversee the quality of appointed counsel, as well as in response to State Public Defender cutbacks. These projects were designed to create a model for providing improved recruitment and administrative oversight capabilities for appointed counsel services through contracts with non-profit agencies. Funding sufficient to extend these services statewide during 1984–85 is proposed, along with funds to compensate counsel who are appointed to represent indigents in an anticipated 6,000 appeals.

An increase in funding also is proposed to cover the costs associated with judicial assignments in "Coordination Proceedings." Several major cases will be coordinated and tried during 1984–85 by judges assigned under Code of Civil Procedure Sections 404–404.8, and the cost for processing these cases will be at least $500,000. To ensure funding reserves sufficient to cover the full cost of cases that are coordinated and tried by assigned coordination judges, a modification to existing Budget Act language in Item 0420-101-001 is proposed. Currently, funds appropriated under this Item are earmarked to provide local assistance to superior courts for assigned judges; the proposed modification would expand the purpose of this fund to cover costs of cases coordinated and tried by judges assigned under the coordination statutes, to the extent those costs exceed the amount appropriated in the Judiciary's annual budget for "Coordination Proceedings."

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

0250 JUDICIAL—*Continued*

Two general operating expense categories will require increases in funding above the adjusted base budget for 1984–85: a $1.16 million increase will be required to cover the Judiciary's facilities operations costs for the upcoming year, and a $183,000 increase above the adjusted base budget will be needed to repair and maintain inventoried equipment. Increased funding requirements for facilities operations are principally tied to adjusted rental rates in leased offices and to cover the cost of expanded space which has been acquired to house authorized increases in staffing over the past two years. The requested increase in funding for equipment repair and maintenance is based upon an analysis of documented expenditure patterns in this expense category for inventoried data processing, word processing, copier, typewriter, dictation and various other kinds of equipment.

Assorted analyses of staffing requirements in the courts of appeal were completed during 1983–84, and several of those analyses identified a need for increased staff support in various operating areas.

Eight central staff attorney positions are requested to handle additional workload in the courts of appeal. Seven secretary positions also are requested to process additional work which is generated by central attorney staff, writ clerks and assigned judges. Further, five positions are requested to serve as administrative assistants to the administrative presiding justices in the courts of appeal. This request is the result of substantial increases in administrative and business-related activities in the courts. These activities have grown to occupy too large a portion of the time and attention of administrative presiding justices. The requested administrative assistant positions will allow the administrative presiding justices to devote more time to basic judicial responsibilities. The First and Fourth Appellate Districts also have a demonstrated need for additional library staffing: one Assistant Librarian is requested to serve in the First District, and one Senior Librarian is requested to provide full-time staffing in the central library of the Third Division, Fourth District.

Additionally proposed for the 1984–85 year is a continuation of the Expedited Appeal Program in the First and Third Appellate Districts. This program has benefited litigants by reducing the costs associated with processing certain civil appeals.

Since 1981, the Judicial Council's Administrative Office of the Courts has worked to assess areas where data processing capabilities would improve productivity in a variety of judicial operations. These assessments have produced schedules for implementing programs such as PROMIS, which will provide automatic case tracking capabilities in the Supreme Court and Courts of Appeal. Research, design and initial implementation work also has been completed on automated accounting and judicial information systems. Further research and design work is needed on budgeting and personnel programs; on statistical and cost-center tracking for coordination proceedings and appointed counsel cases; and on determinate sentencing, weighted caseload, and various other applications. The current level of staffing in the AOC Data Processing Unit would require in excess of five years to eliminate this backlog of projects. That timetable is three to four years longer than the standard which is recommended by the Department of General Services and generally applied in the industry to determine workload to staffing requirements. To enable the completion of a minimum number of high priority projects during the 1984–85 fiscal year and also begin essential research and development work on the remaining backlog of projects, a combination of two permanent positions and additional funding for consultant contracts is requested. Also tied to this request is funding for equipment which is needed to complete the implementation of PROMIS in the Courts of Appeal and provide the supporting hardware for the automated accounting system in the AOC.

The funding which is proposed in the Judiciary's 1984–85 budget represents a $6.5 million increase above the adjusted base budget. Approximately $4.5 million of the request above the adjusted base is attributable to non-discretionary cost increases for criminal appeal fees, coordination proceedings, facility operation requirements, and equipment repair and maintenance purposes.

0390 CONTRIBUTIONS TO JUDGES' RETIREMENT FUND

Program Objectives and Description

The Judges' Retirement Fund receives contributions from the State in the amount of 8 percent of the salaries for the established judgeships of the justices of the Supreme Court, District Courts of Appeal and the Superior and Municipal Courts. A like amount is deducted from the salaries of active justices and judges and deposited in the fund.

Retirement benefits are based on age, years of service, compensation at time of retirement, and eligibility as determined by specific sections of the Judges' Retirement Law. Survivor, death, and disability benefits are also provided for under specific conditions.

In addition, filing fees of $2 and $3 from specific civil cases, investment income, Budget Act appropriations and emergency fund allocations are used to maintain the solvency of the retirement fund and to pay disbursements annually.

Section 75110 of the Government Code declares that the Judges' Retirement System shall be fully funded and actuarially sound on and after January 1, 2002. An actuarial evaluation completed in March of 1981 indicates an unfunded actuarial liability of almost $450 million. Actuarial evaluations are required at least every four years, and the next evaluation is expected to be available in the Spring of 1984.

The budget provides contributions for the following numbers of judges by type of court:

Type of Court	*Number of Judges*		
	1982–83	*1983–84*	*1984–85*
State Operations:

0420 SALARIES OF SUPERIOR COURT JUDGES

Program Objectives and Description

The purpose of this budget is to provide for the State's share of the salaries and health and dental benefits for 657 superior court judges in 1984–85. The budgeted expenditure for health benefits includes the State's share of expenditures for those superior court judges enrolled in a State health and/or dental plan.

Section 68206 of the Government Code specifies that a county's share of a superior court judge's salary shall be based on the population of the county (see table below) and the remainder shall be paid by the state. As a result of the Olson vs Cory II court decision, superior court judges will be on a two-tier salary system until January 1, 1985. The annual salary of a Group II judge is $69,500, whereas a Group III judge is paid $67,063 annually.

Population of County	*County Share*
250,000 or more	$9,500
40,000 to 249,999	7,500
40,000 or under	5,500

0440 STATE BLOCK GRANTS FOR SUPERIOR COURT JUDGESHIPS

Program Objectives and Description

State policy is to assist local government in financing new superior court judgeships by providing an annual block grant for each new judgeship established since January 1, 1973. Historically, the amount of the block grant has been $60,000 and is in addition to State contributions towards salaries, retirement, and health and dental benefits of superior court judges.

To date, 158 superior court judgeships have been authorized block grants. One judgeship was authorized a block grant in 1973; 15 in 1974; 19 in 1975; 20 in 1976; nine in 1977; 10 in 1978; 21 in 1979; 46 in 1980; 10 in 1981; and seven in 1982. No new superior court judgeships were established in 1983.

0460 NATIONAL CENTER FOR STATE COURTS

The National Center for State Courts was established in 1971 to act as a focal point for judicial reform; to serve as a catalyst for setting standards for fair and expeditious judicial administration; and to find and disseminate answers to the problems of State judicial systems. The National Center consists of a headquarters office which is located in Williamsburg, Virginia and six regional offices (one of which is located in San Francisco, California).

In return for membership fee payment, each state receives basic services provided by the National Center including copies of current publications of its research and study teams; short-term consultative services; responses to requests for information hard to get elsewhere; judicial salary reports; and various states' views on federal legislation and other national programs affecting the judicial system.

Governor's Office

0510 SECRETARY FOR STATE AND CONSUMER SERVICES

The Secretary for State and Consumer Services provides communication, coordination, and policy guidance between the Chief Executive and departments within the State and Consumer Services Agency, the "conglomerate" agency of the executive branch. The Secretary is directly responsible to the Governor and has the authority of general supervision over the operation of: the California Museum of Science and Industry, the Department of Consumer Affairs, the Department of Fair Employment and Housing, the Fair Employment and Housing Commission, the Office of the State Fire Marshal, the Franchise Tax Board, the Department of General Services, the State Personnel Board, the Public Employees' Retirement System, the State Teachers' Retirement System and the Department of Veterans Affairs.

Beyond the supervisory and administrative functions, the Secretary is an advisor to the Governor, a coordinator of the activities of agency departments with other units of government, and a member of the Governor's Cabinet.

In 1983–84 and 1984–85, 6.5 personnel years are being phased out due to the elimination of the Office of Statewide Compliance Coordination. This office, which coordinates State compliance with Federal access for the handicapped requirements, was previously scheduled to be phased out by June 30, 1985. The early phase out is possible because State agencies have been sufficiently trained to perform compliance functions themselves.

Also in 1983–84 one position scheduled for termination on 10/1/83 has been continued to perform consulting work with Office of State Architect and other agencies concerning capital outlay management information.

Governor's Office
0520 SECRETARY FOR BUSINESS, TRANSPORTATION AND HOUSING

Program Objectives and Description

The Secretary of the Business, Transportation and Housing Agency is a member of the Governor's Cabinet and the advisor to the Governor on policies and programs relative to transportation, business regulatory and housing activities. The Agency consists of the following Departments:

The California Highway Patrol
The Department of Motor Vehicles
The Department of Transportation
The Traffic Adjudication Board
The Office of Traffic Safety
The Department of Alcoholic Beverage Control
The Department of Banking
The Department of Corporations
The Department of Housing and Community Development
The Department of Insurance
The Department of Real Estate
The Department of Savings and Loan
The California Housing Finance Agency
The Department of Economic and Business Development
The Stephen P. Teale Consolidated Data Center

A CEA I position is proposed for elimination from the Agency's authorized level beginning in the 1983–84 fiscal year due to a reduction in reimbursements.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands, excluding salary range.

10 SECRETARY FOR HEALTH AND WELFARE

Program Objectives and Description

The Health and Welfare Agency provides the basic human services for the State's health, employment, rehabilitation, and welfare programs. Approximately 39 thousand employees work in the departments and offices administering these programs with a combined total budget in excess of $17.6 billion in State and federal funds.

The Office of Long-Term Care, originally established in the Governor's Office, was transferred to the Secretary for Health and Welfare in 1982–83. The office was established by Chapter 1453, Statutes of 1982 (AB 2860) and was given the responsibility of evaluating how best to deliver long-term care services to the elderly and functionally-impaired adults. Since the office is to complete the evaluation culminating in a Governor's report to the Legislature during the current year, no funding is included for this activity in 1984–85.

Two positions ($105,000) which were established in 1983–84 are proposed to continue in 1984–85 ($112,000) for migration and refugee affair activities.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20 MULTIPURPOSE SENIOR SERVICE PROGRAM (MSSP)

Program Objectives and Description

The Multipurpose Senior Services Program was converted from a limited-term project to an ongoing program during 1983–84, pursuant to Chapters 1453/82 and 306/82 (AB 2860 and SB 722). The program is operating under an approved Federal Medicaid waiver until 1985–86. The purpose of the program is to coordinate and supplement the various categorically funded social and health services available to the elderly. The fundamental goal of the program is to prevent premature disengagement of older persons from their communities by providing that impaired or frail older persons, who have the capacity to live independently, have access to appropriate social and health services to facilitate their continuance in an independent living setting. *The 1984–85 budget proposes a $747,000 (General Fund) and a $575,000 (Reimbursements) augmentation for an anticipated caseload increase from 789 clients in 1983–84 to 1,900 in 1984–85.*

The following display represents the total project cost (actual and estimated expenditures) and funding sources for the Multipurpose Senior Services Project and Program.

Governor's Office
0540 SECRETARY FOR RESOURCES

Program Objectives and Description

The Secretary for Resources assists the Governor in establishing objectives of the administration and in formulating programs and policies governing the acquisition, development, and use of resources to obtain these objectives.

The Resources Agency consists of the Departments of Forestry, Conservation, Fish and Game, Boating and Waterways, Parks and Recreation, and Water Resources, the State Lands Commission, the Colorado River Board, the San Francisco Bay Conservation and Development Commission, the State Reclamation Board, the Energy Resources Conservation and Development Commission, the California Conservation Corps, the California Coastal Commission, the California Coastal Conservancy and Special Resources Programs.

The Secretary for Resources is a voting member of the Coastal Conservancy, the San Francisco Bay Conservation and Development Commission, and the California Tahoe Regional Planning Agency. The Secretary is also an ex-officio, non-voting member of the Energy Resources Conservation and Development Commission and the Coastal Commission. In addition, the Secretary is responsible for administering the Sea Grant Program, the Open Space Subvention Program, and the California Environmental Quality Act.

The Secretary communicates the Governor's policies and program objectives to the organizations within the Resources Agency, and advises the Governor on major policy and program considerations relative to the Resources Agency. The Secretary also represents the Governor in the coordination of Resources Agency programs in relations with other State, federal, and local jurisdictions.

Chapter 1612, Statutes of 1982, designates the Secretary of the Resources Agency as the successor to the powers and duties of the California Tahoe Regional Planning Agency (CTRPA) upon its deactivation, which is scheduled during 1983–84. In 1984–85, $380,000 is proposed from the California Environmental License Plate Fund to administer CTRPA activities. Of this amount, $210,000 is proposed for Attorney General fees and $170,000 for administrative activities.

In 1983–84, and continuing in 1984–85, one personnel year is reduced to reflect administrative efficiencies.

Authority

Government Code Sections 12801 and 12805.

0550 SECRETARY FOR YOUTH AND ADULT CORRECTIONAL AGENCY

Program Objective and Description

The Youth and Adult Correctional Agency includes the Department of Corrections, Department of the Youth Authority, Board of Prison Terms, Youthful Offender Parole Board, Board of Corrections, Prison Industry Board, and the Narcotic Addict Evaluation Authority.

The Agency provides communication, coordination, and budget and policy direction for the departments, boards and commissions.

Governor's Office

0560 OFFICE FOR CITIZEN INITIATIVE AND VOLUNTARY ACTION

The Office for Citizen Initiative and Voluntary Action was created by Chapter 1195, Statutes of 1978, to advocate and encourage citizen initiative and volunteerism in state and local government and in community affairs. Positions and funds to establish the office were transferred from the Governor's Office to create this separate budget.

The primary goals of the office were: (1) to foster the spirit of citizen initiative and voluntary action among businesses, industries and individual citizens in the community; (2) to initiate new programs or improve existing programs for citizen initiative and voluntary action at the local level; and (3) expand volunteerism in community problem solving and in the delivery of governmental services.

In order to streamline government, the functions of the Office for Citizen Initiative and Voluntary Action were transferred to the Governor's Office effective January 1, 1983. The chief executive officer, a private sector executive on loan to the State, receives staff support from the Governor's Office and is continuing to make placements of loaned executives within the State's administrative structure at no cost to the State.

Governor's Office

0565 CALIFORNIA COMMISSION ON INDUSTRIAL INNOVATION

Chapter 1527, Statutes of 1982, established the California Commission on Industrial Innovation as a function under the Governor's Office effective January 1, 1983. Executive Order B-91-81 had previously established the commission as a unit within the Department of Economic and Business Development.

The commission is composed of 25 members: five from the public sector, four from academia, six from labor, and ten from firms known for industrial innovation. Commission appointments are guided by the diversity of regions, needs, and interests which characterize California's industrially innovative firms and by those persons and institutions whose economic well-being may depend upon their success.

Specific functions of the commission include:

(a) developing policies which maintain California's leadership in the national economy;

(b) convening representatives of business, labor, academia, and government to assess the problems inhibiting, and latent opportunities for, industrial innovation throughout the state;

(c) advising in the establishment of programs in scientific and technical education and job training which will prepare Californians for employment in industrially innovative firms and for life in an increasingly technological society;

(d) assessing and evaluating programs which improve productivity while maintaining regard for worker involvement and satisfaction;

(e) identifying means by which industry and universities can cooperate on research and development projects and in the establishment or expansion of cooperative research and development institutes;

(f) identifying means of financing innovative industry such as public and private pension funds and industrial development bonds;

(g) identifying management techniques necessary to successful industrial innovation;

(h) examining and evaluating the effectiveness of any state programs assisting or hindering industrial innovation;

(i) identifying shortcomings in the transportation, sewer, water, energy, and waste disposal systems which inhibit industrial innovation.

Staff support and other direct, minor commission member expenses are provided within the Office of Planning and Research's budget.

Governor's Office

0570 GOVERNOR'S COUNCIL ON WELLNESS AND PHYSICAL FITNESS

Executive Order No. B59-80 established the Governor's Council on Wellness and Physical Fitness in 1980 to promote policy and activities advocating the wellness and physical fitness of all Californians. Chapter 779, Statutes of 1982, subsequently granted statutory authorization to the Council.

In order to streamline governmental activities and eliminate extra layers of bureaucracy, the policy responsibilities of the Governor's Council on Wellness and Physical Fitness were transferred to the Department of Health Services effective January 3, 1983 since this is the agency responsible for activities involving the health issues of all Californians, including state employees.

0580 OFFICE OF CALIFORNIA—MEXICO AFFAIRS

Program Objectives and Description

Chapter 1197, Statutes of 1982, established the Office of California-Mexico Affairs in order to continue the operations of the Commission of the Californias and the California Office of the Southwest Border Regional Conference within one office. Effective January 1, 1983, employees of the two organizations were transferred to the Office of California-Mexico Affairs.

California is continuing its participation in the four-state Southwest Border Regional Conference: the California member of the conference is the Governor of California or his designee. The Commission of the Californias is also a distinct entity within the new office. The Commission consists of the chairman and eighteen commissioners: seven public citizens appointed by the Governor, the Lieutenant-Governor, five Senators appointed by the Senate Committee on Rules, and five Assemblymen appointed by the Speaker of the Assembly. The Governor serves as Chairman with the Lieutenant Governor as Vice-chairman.

The basic functions of the Office of California-Mexico Affairs are:

a) to develop and further favorable economic, educational and cultural relations with the State of Baja California, the State of Baja California Sur, other Mexican states bordering on the United States, and other states and territories of the Republic of Mexico as necessary for the completion of the office's tasks;

b) to cooperate with similar organizations situated within the United States or Mexico, and to avail itself of the services of the San Diego State University, which is engaged in educational, cultural, and economic research;

c) to carry out the ongoing responsibilities of the Commission of the Californias and the Southwest Border Regional Conference and to report to the Governor and the Legislature annually on its plans and programs.

Governor's Office

0585 CALIFORNIA STATE WORLD TRADE COMMISSION

Program Objectives and Description

Chapter 1526, Statutes of 1982, created the California State World Trade Commission under the Governor's Office effective January 1, 1983 as the successor agency to the Office of International Trade which had been within the Department of Economic and Business Development.

The objective of the Commission is to encourage international trade, tourism, and development. The Comission is governed by leading representatives of California government and private industry and is intended to provide research in international trade that can be utilized to develop and implement effective and aggressive marketing strategies. The Commission consists of 15 members with the Secretary of State serving as chairperson and is a corporation subject to the Nonprofit Public Benefit Corporation Law.

The Commission:

a. Serves as the official representative of the State of California to foreign governments and representatives.

b. Conducts research and analysis of foreign commerce, the nature of doing business in foreign marketplaces, methods of stimulating reverse investment, international tourism, and governmental incentives and disincentives for world trade opportunities in California.

c. Serves as a clearinghouse for inquiries from foreign businesses and governments and provides them with introductions to California businesses and agriculture.

d. Coordinates with other governmental agencies, California businesses, agriculture, and individuals on marketing programs and on information about California's economy and the opportunities and advantages of doing business in the state, and publishes reports and other materials to assist in marketing business opportunities.

e. Secures funding of the Commission's programs and activities from federal, local and private sources in addition to state appropriations and to fees charged for services and published materials.

f. Represents or assists in representing the interests of California-based companies in foreign market transactions through trade delegations, missions, marts, seminars, and additionally develops appropriate promotional tools.

g. Recruits foreign capital investment and encourages foreign business development within California.

h. Encourages travel from foreign countries.

i. Proposes legislation which would encourage the state to compete in the world market place.

Governor's Office

0630 GOVERNOR'S OFFICE OF SPECIAL HEALTH CARE NEGOTIATIONS

Program Objectives and Description

This Office was established July 1, 1982 (Chapter 328, Statutes of 1982), to negotiate contracts with health care service providers for the delivery of health care services to Medi-Cal beneficiaries. The goal of this Office was to promote efficiency and cost-effectiveness in the Medi-Cal program through a system of negotiated contracts which fosters competition and organized health systems within the health care industry. The functions of this Office included:

1. Negotiating contracts with hospitals to provide inpatient services for the Medi-Cal population. These negotiated contracts, using the optimum number of hospitals, are the exclusive means of providing Medi-Cal non-emergency inpatient hospital services.
2. Negotiating contracts with those counties and/or regions which desire to provide health care services for Medi-Cal eligibles. Such counties or regions provide health care services through county facilities or indirectly through arrangements with private health care providers, insurance carriers, health maintenance organizations or other entities.
3. Negotiating contracts with health care plans to provide health care services to Medi-Cal beneficiaries. Health care plans that may participate include organized health systems, insurance companies, university medical center systems, independent practice associations and private foundations.
4. Establishing at least two pilot projects, one urban and one rural, to test the cost-effectiveness of delivering services to Medi-Cal eligibles through a variety of health care plans.

On July 1, 1983, the functions of the Office became the responsibility of the California Medical Assistance Commission (included in the Health and Welfare section of the Budget), and the State Medi-Cal Negotiator of this Office became the Executive Director of the Commission.

Governor's Office

0650 OFFICE OF PLANNING AND RESEARCH

The Office of Planning and Research is available to assist the Governor and his Administration in planning, research, and liaison with local government, education and other interests and to facilitate implementation of the decisions made within the Administration. In addition, the office has statutory responsibilities relating to state planning, permit assistance, and environmental and federal project review procedures. In 1983–84, the Office of Planning and Research was restructured into several new components. This new structure provides planning and research services to the Governor in areas that are essential to the operations of state government while continuing to fulfill existing statutory responsibilities. The restructuring of the Office of Planning and Research in 1983–84 created the following new offices and units: Office of Local Government Affairs; Office of Education Planning and Policy; Office of Community Relations; Office of Resources, Energy, and Permit Assistance; Energy Extension Service; and Executive and Support Services.

To facilitate presentation of this budget, 1982–83 expenditures are grouped together under program 11 but are not detailed by element because a different program structure was in use prior to 1983–84.

11.10 OFFICE OF EDUCATION PLANNING AND POLICY

The director of the Office of Education Planning and Policy serves as the Governor's chief advisor on education issues. The primary responsibilities of the office are to develop policy positions for the Governor on Education issues, to track legislation related to education for the Administration and testify as necessary, and to provide coordination and liaison with the education community.

* Dollars in thousands

0650 OFFICE OF PLANNING AND RESEARCH—*Continued*

11.20 OFFICE OF LOCAL GOVERNMENT AFFAIRS

The Office of Local Government Affairs was established in an effort to implement a "new partnership" between state and local government in California. This new partnership will be marked by less intrusion by the state into local affairs, greater local fiscal independence from the State, mutual cooperation in efforts to improve local planning and development practices, and a coordinated liaison role between the Governor and local government in legislation and all other endeavors involving the State and cities and counties. *In 1984–85, the office will continue to carry out statutory responsibilities relating to general plan review and local planning assistance, maintain its liaison role, and assist local government in resolving its problems and concerns.*

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	15	15	–	$762	$762

11.30 OFFICE OF RESOURCES, ENERGY, AND PERMIT ASSISTANCE

The Office of Resources, Energy, and Permit Assistance has assumed the statutory responsibilities associated with providing permit assistance to applicants for major state development permits and operating the State Clearinghouse. The office also provides staff support for administration policy formulation with regard to outercontinental shelf energy development and coastal planning issues and, during 1983–84, provided staff and administrative support to the Hazardous Waste Management Council.

Passage of SB 992 (Chapter 1263, Statutes of 1983) and AB 1823 (Chapter 827, Statutes of 1983) have created significant new responsibilities for the Office of Permit Assistance, while implementation of Presidential Executive Order 12372 will increase workload in the State Clearinghouse. Consequently, one new position is proposed for workload increases for the State Clearinghouse in 1984–85. In addition, 0.3 personnel years of temporary help is added for reimbursable costs pursuant to Chapter 827/83 related to permit processing. The net number of positions drops from the current to the budget year, however, due to the termination of several reimbursable positions associated with the Hazardous Wastes Management Council and to the transfer of reimbursable positions between units.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	29.5	25.8	–	$1,221	$1,116

Environmental License Plant Fund				–	*13*	–
Reimbursements				–	*225*	*5*

11.35 CALIFORNIA ENERGY EXTENSION SERVICE

The California Energy Extension Service (CEES) is a federally-funded program designed to promote awareness of energy conservation, encourage use of solar and other renewable energy sources, and transfer knowledge about conservation methods, materials, techniques, processes, and programs. To accomplish these objectives, CEES employs direct staff outreach efforts, public information methods, and a major community, local government, and small business contracts program.

One position has been eliminated in the budget year as a result of a reduction in federal funds. In addition, a half-time federally supported position is deleted in the budget year due to revised availability of federal funds.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

11.40 OFFICE OF COMMUNITY RELATIONS

The Office of Community Relations serves as a general liaison for the Governor with community representatives, particularly of women's and ethnic minority groups. The office represents the interests of these groups with the Governor, advises the Governor on policies and positions, and serves as the Governor's representative in public meetings and hearings.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Governor's Office

0660 OFFICE OF ECONOMIC OPPORTUNITY

The State Office of Economic Opportunity (OEO) provides a mechanism for assisting the low-income residents and communities of California by administering the following programs: Low-Income Home Energy Assistance Program (LIHEAP), Community Services Block Grant (CSBG) and the Department of Energy Weatherization Program. For 1983–84, OEO has also received $6 million in petroleum violation escrow funds which are being used to supplement the LIHEAP block grant. Services are provided directly by OEO and through a network of approximately 200 community agencies. The goal of the programs is to assist the low-income population of California to become self-sufficient.

Authority

Government Code 12085–12092; Executive Order B-16-76.

10 PROGRAM AND RESOURCE PLANNING

Program Objectives and Description

The Program and Resource Planning program (formerly entitled Economic and Policy Development) identifies resources and negotiates contracts for economic development in low-income communities. It also examines federal and state programs to determine the most efficient use of funds in meeting the needs of low-income residents. The program has two functions:

1) To examine grants and programs for their effectiveness and to provide training and technical assistance to low-income communities to develop short- and long-range strategies for planning and development.

2) To design and implement plans for development in low-income communities using available community resources.

In addition, this unit provides technical assistance to community-based organizations for grant and loan procurement. As a result of the reduction in the office's General Fund appropriation, this program is funded through the CSBG discretionary allocation (5 percent of the block grant) beginning with the current year.

General Fund				*283*	–	–
Federal Trust Fund				–	*385*	*430*

20 ENERGY PROGRAMS

Program Objectives and Description

The principle objective of Energy Programs is to provide grants which assist low-income people to meet the high costs of energy, better use and conserve energy, and learn about and use new sources of energy.

OEO administered the 1980–81 federal Low Income Energy Assistance Program which was designed to provide financial assistance to low-income persons in order to help them meet the increasing costs of home energy. Effective October of 1981, the federal Public Law 97-35 reauthorized LIEAP for three years as one of the block grants and retitled it the Low-Income Home Energy Assistance Program (LIHEAP). Beside providing financial assistance for routine home energy costs, the LIHEAP block grant also incorporates an emergency crisis intervention program (direct assistance to meet emergency situations which are energy related) and a weatherization program (services which result in energy conservation and long-term savings to the State's low-income residents.)

Chapter 228, Statutes of 1982, officially designated OEO as the recipient of the LIHEAP block grant and set forth an allocation of the funds as follows:

- 10% transfer to the Department of Social Services (DSS) for Title XX programs;
- 5% administration expenses, with an additional 2.5% through a Section 28 letter;
- 10% maximum allocation for weatherization;
- 7.5% allocation for ECIP, plus any supplemental funds and funds remaining from direct benefits as a result of undeliverable, returned, or voided warrants. *The provisions of this chapter were superceded by the 1983–84 Budget Act which amended the allowable allocation for ECIP and weatherization by authorizing at least $15 million and $10 million respectively for each program. These allocations are proposed for continuance in the 1984–85 program due to the greater demand for these services.*

Households whose income is at or below 130% of the March, 1981, Office of Management and Budget (OMB) poverty guidelines, and who are recipients of AFDC or SSI will be eligible for direct financial assistance through LIHEAP. Payments for assistance with routine home energy costs are made directly by OEO. Community action agencies and community-based organizations will be providing the energy crisis and weatherization services through subgrants with OEO. The ten percent transfer to Title XX programs is set up as a separate appropriation received under OEO's authority but reported as an expenditure for the Department of Social Services. Funding levels and distribution of the block grant are reported in the table below by federal fiscal year, with a crossover to the state fiscal year.

Beginning in the 1982–83 fiscal year, the office increased its state administrative costs for LIHEAP from 5 percent to an estimated 6.1 percent of the total block grant, pursuant to authority in Chaper 228, Statutes of 1982. This increase was necessary to implement changes in the application process required by the State Controller for proper accountability of direct benefit payments. A Section 28 request approved for the 1983–84 fiscal year extended the majority of these positions from October 31, 1983 through June 30, 1984. The 1984–85 budget proposes to further extend these positions (29.6 personnel years) through June 30, 1985, and to recognize a workload increase of an additional 2.4 personnel years associated primarily with the implementation of a longer (5 month) application period. These changes will result in a state administered cost for LIHEAP of approximately 5.6 percent of the total block grant in 1984–85. (The percentage is lower than the level approved in 1982–83 because of a higher grant base.)

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20.10 Weatherization

The Weatherization Element is designed to reduce energy waste by improving the thermal efficiency of low-income dwellings through insulation and retrofitting. This no-cost service to low-income households is subcontracted to over 64 public and private nonprofit agencies in 57 counties and is funded through a Department of Energy grant and the Department of Health and Human Services as part of the LIHEAP grant. Included in the funding for 1983–84 is $2.0 million from the Petroleum Violation Escrow Fund.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Homes weatherized	9,623	23,000	13,000
Agencies surveyed and assisted	73	73	73
Persons trained	391	391	391

20.30 Energy Crisis Intervention

This element provides emergency assistance and utility payment assistance to low-income persons through community agencies which have contracted with OEO and is funded through the LIHEAP Block Grant. Included in the funds for 1983–84 is $4.0 million from the Petroleum Violation Escrow Fund.

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40 COMMUNITY SERVICES

Program Objectives and Description

Commencing with the 1982–83 block grant, the responsibility for the administration of California's Community Services Program was transferred from the federal government to the State. The program is now administered through OEO.

The objective of the Community Services Program is to provide a wide range of activities designed to assist low-income persons to:

- Secure and retain meaningful employment;
- Attain an adequate education;
- Make better use of available income;
- Obtain and maintain adequate housing and a suitable living environment;
- Remove obstacles and solve problems which block the achievement of self-sufficiency;
- Achieve greater participation in the affairs of the community;
- Provide on an emergency basis supplies and services, nutritious foodstuffs, and related services as may be necessary; and
- Coordinate and establish linkages between governmental and other social services programs.

All 58 counties in California and the low-income populations within them are served equitably through the use of an allocation formula based on the number of low-income persons in the county. Subgrants to community agencies are based on a request for proposal process which insures fairness of competition in applying for funds. Award criteria are developed based on the needs of the low-income populations and on the capability of the applicants to have a major impact on the causes and conditions of poverty.

Administrative funds are budgeted at 5 percent of the grant and are used to establish subgrant award and program monitoring processes and personnel, accounting, and business services activities. Detail of the total block grant and state administered costs is presented below by federal fiscal year, with a crossover to the state fiscal year.

In 1983–84, the Legislature approved the transfer of $466,000 in state administered costs for the office from the General Fund to CSBG discretionary funds. The 1984–85 budget proposes to continue to use a portion of the State's discretionary allocation for the support of 10-Program and Resource Planning and to use the balance of approximately $1.0 million (excluding minor, indirect costs) for state discretionary contracts, in accordance with past practice. Beginning in 1984–85, all CSBG discretionary funds are budgeted within the state operations item, Item 0660-001-890.

50 ADMINISTRATION

Program Objectives and Description

The executive office determines policy directions for OEO, advises the Governor on antipoverty strategies and mobilization of resources, and works with local, state and federal officials on matters of concern to the office and the State. Included in this area is the OEO Advisory Commission whose primary objective is to advise the Director on program development and the estabishment of goals and priorities in combating poverty. The commission also reviews office performance and makes recommendations to the director for improvement.

Administrative Services provides the services necessary for the daily operation of OEO such as personnel, purchasing, mail and reproduction, accounting, budgeting, contracts and federal grant management, central files, and data and information services.

Pursuant to an approved Section 28 application, four positions (2.5 personnel years) have been established administratively in the current year through a transfer of LIHEAP local assistance funds to continue more staff intensive application procedures required for the program by the State Controller. In addition, two positions (one personnel year) have been administratively established in 1983–84 through redirection of administrative costs to provide secretarial support within the division and to strengthen fiscal services. These six positions are all proposed for permanent establishment in the budget year.

Governor's Office
0690 OFFICE OF EMERGENCY SERVICES

The principal objective of the Office of Emergency Services (OES) is the coordination of emergency activities to save lives and reduce property losses during disasters and to expedite recovery from their effects.

On a day-to-day basis, OES provides leadership, assistance and support to state and local agencies in planning and preparing for the most effective use of federal, state, local and private sector resources in emergencies. This emergency planning is based upon a system of mutual aid in which a jurisdiction relies first on its own resources, then calls for assistance from its neighbors. OES plans and programs are coordinated with those of the federal government, other states, and the state agencies and political subdivisions of California.

During an emergency, OES functions as the Governor's immediate staff to coordinate the State's responsibilities under the Emergency Services Act and applicable federal statutes, and it acts as the conduit for federal assistance through natural disaster grants and federal agency support.

10.40	Management and Maintenance of State Resources	15	15.5	17.5	1,074	1,292	1,579

10.10 Provision and Coordination of Mutual Aid

The purpose of this element is to: provide on-scene manpower and equipment in the event of man-made natural disasters, search and rescue operations, or civil disorder; coordinate the involvement and deployment of state manpower and resources; and collect, analyze and disseminate critical information to the Governor and relevant state, federal and local officials.

OES also maintains fallout-protected emergency operating centers at its headquarters and in each of six mutual aid regions. These operating centers are the focal points through which emergency information is disseminated to affected areas, operations are coordinated, mutual aid assistance is provided, and emergency management information is gathered for the Governor and his staff. In addition to various communications facilities, specialized law enforcement and fire services equipment have been positioned in key areas of the State to be made available to local governments when mutual aid agreements are invoked.

This element administers: federal programs that provide funding for disaster relief and contributions for civil defense equipment, personnel, and administrative expenses; fire, law enforcement, and search and rescue mutual aid elements; the Civil Air Patrol maintenance and fuel reimbursement program; and staff suuport to the Natural Disaster Assistance Act. (see program 50)

* Dollars in thousands

Governor's Office

0690 OFFICE OF EMERGENCY SERVICES—*Continued*

SB 78 (Chapter 1064, Statutes of 1983) established the Natural Disasters Loan Program with a $15 million appropriation from the State Transportation Fund. This program will provide loans to local agencies for the repair of street and highway damage experienced during the winter storms of the 1981–82 and 1982–83 fiscal years. For this, and for the Natural Disaster Assistance Program for Coalinga (see program 50), one half-time limited term clerical position is proposed to assist in the processing of loan and grant applications. One full-time coordinator and one half-time limited term clerical position are also being added to assist in processing backlogged claims for federal disaster relief.

In the Law Enforcement Division, two coordinators are proposed in 1984–85 to meet increased mutual aid workload in Southern and Northern California. In the Fire Division, $535,000 is proposed to extend the FIRESCOPE computer-assisted logistics system for firefighting to Northern California. By replicating the highly successful Southern California firefighting program in the northern half of the State, the citizens of Northern California will obtain the benefit of the most modern firefighting technologies, and Southern California can rely on a back-up system in the event that a catastrophic disaster or routine repairs render the southern system inoperable. The budget also includes $31,000 to provide a long-range plan for the agency's telecommunications needs.

Two positions, one coordinator and a secretary, have been added to reestablish mutual aid Region IV in Sacramento. OES has divided the State into six mutual aid regions, but as a result of budget reductions Regions III and IV were combined several years ago. The budget proposes to reestablish Region IV as a separate region to reduce the present 24 county area (Oregon border on the north, Stanislaus and Tuolumne Counties on the south) to a more manageable size.

Consultant and professional services have been augmented by $30,000 to provide the assistance required to allow OES to develop television and radio public service announcements, newsletters, pamphlets and emergency public information plans.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Mutual aid equipment resources dispatched (fire, rescue, and communications)	$2,200	$2,200	$2,200

10.20 Development and Utilization of Emergency Communications Systems

The Federal National Warning System (NAWAS) extends to the California terminal at OES headquarters and to 58 key points throughout the State. During 1982–83, OES installed a communications data system connecting emergency operations centers and regional offices for information retrieval and high speed interchange of emergency management information. Interstate emergency communications are also provided through the Federal Emergency Management Agency's national radio communications equipment.

At the state level, an emergency services system using state microwave facilities provides a communications tie with local governments and selected state agencies for emergency management in disaster situations; a fire services radio network provides an emergency communications system for interdepartmental fire communications during mutual aid operations; the California Law Enforcement Radio System serves as a backup for the NAWAS and for the Department of Justice California Law Enforcement Telecommunications System; a private line teletype system interconnects six of the OES regional operating centers, the Governor's Emergency Operating Center, and OES headquarters.

One coordinator position is proposed in 1984–85 to develop a master plan for participation in and utilization of the Emergency Broadcast System and the amateur radio volunteer program. The budget also proposes to add a relief warning controller to provide minimum coverage required for the emergency operations center which must be staffed 24 hours a day.

Many state agencies play a key role in the mutual aid system and their response in an emergency is critical. Most of the smaller agencies either do not have communications equipment or must share frequencies that are overloaded with larger agencies. The federal government has granted the State authorization to utilize several 800MHZ frequencies, provided that all equipment is in place and fully operational by 1986. Otherwise, that authorization terminates. The budget adds $140,000 to purchase the initial equipment for the system. Participating agencies (12) will be purchasing their portable radio equipment in 1985–86.

10.30 Development and Implementation of Emergency Plans

This element's objective is to develop and implement emergency plans. Activities include: reviewing and recommending revisions to Governor's orders and regulations, the State's emergency plan and supporting plans, and community emergency plans; assisting state agencies and local governments in the prepartion of emergency plans to ensure consistency and continuity in planning at all levels of government; preparing a variety of contingency plans, including catastrophic earthquake planning, volcanic hazards planning, hazardous materials spill planning, and dam failure inundation planning in accordance with the Dam Safety Act, Chapter 780, Statutes of 1972; maintaining and updating emergency operating manuals; and assisting in the preparation of subject matter for training courses and test exercises. OES administers the law enforcement mutual aid plan, updates various law enforcement emergency operations manuals, and provides continuous mutual aid training in each of the mutual aid regions. In addition, OES participates in preparation and refinement of state level disaster medical care plans and public environmental health plans.

Program responsibility and funds ($968,000) for the California Specialized Training Institute will be transferred from the Military Department in the budget year. OES will contract with the Military to operate the program in the 1984–85 transition year. During that time, OES will assess the existing program and develop its own plan for administration of the institute in 1985–86.

A Southern California plan for a major catastrophic earthquake was developed by the Earthquake Task Force with the input and direction of the Office of Emergency Services. This plan is largely complete and OES proposes now to implement the detail of the plan through operational manuals. OES also proposes to develop a Northern California plan for a major catastrophic earthquake. Resources required to implement the Southern California plan and to develop the Northern California plan will include the addition of a coordinator and a secretary and the extension of the Earthquake Task Force in order to secure private sector involvement in planning activities.

One planner position is added to update existing and develop new emergency preparedness plans. In addition, $47,000 in consultant and professional services is provided to review aerial maps of exempt dam inundation areas to determine population changes that may affect evacuation plans.

The budget administratively extends seven federally-funded contractual positions in the current year and proposes that four of the seven be permanently established in the budget year. Two of the proposed new positions are in the Radiological Preparedness Division and two are in the Nuclear Civil Protection Division.

10.40 Management and Maintenance of State Resources

The objective of this element is to maintain the State's emergency equipment in a ready condition. This equipment includes fire pumpers, communications vehicles, portable radio transceivers, police support equipment, portable aluminum water pipe, as well as installed communications equipment. The State also maintains and controls radiation detection and emergency water/power equipment provided by the federal government. Maintaining this equipment in a ready condition requires continuing inspection, inventory, and repair.

The budget adds $71,000 to the Law Enforcement Division to replace and refurbish emergency communications equipment. Equipment and maintenance funds are added to the Fire and Rescue Division to replace communications, fire, and repair shop equipment ($130,000) and to provide adequate maintenance for the vehicle fleet ($30,000).

Performance Measures	1982–83	1983–84	1984–85

20 ADMINISTRATION

Program Objectives and Description

In order to achieve the State's objectives of readiness for and response to emergencies, OES requires a systematic process of program development, management and direction. This includes leadership and policy determination in the conduct of emergency activities throughout the State; internal guidance and control in management of OES's functions; and office services and administrative support for day-to-day operations.

Two organizational units are grouped under this program: 1) the Executive Unit, which is responsible for adoption of departmental policy, direction of ongoing programs, organizational administration, and public information; and 2) the Fiscal and Administration Unit, which is responsible for personnel, fiscal, business and office services.

The 1984–85 budget proposes a Deputy Executive Director and a Secretary to establish Southern California headquarters. Many of the major disasters occur in Southern California and require immediate on-site coordination of emergency relief by management. In addition, the budget adds a clerical position to the headquarter's executive office in Sacramento to meet increased workload.

The 1984–85 budget also proposes a Budget Analyst to establish a budget unit. In addition, an Accounting Technician is proposed to provide for workload increases resulting from existing activities as well as from the new loan programs.

30 FIXED NUCLEAR POWERPLANT PLANNING

Program Objectives and Description

The Office of Emergency Services, as authorized by Section 8610.5 of the Government Code (Chapter 956, Statutes of 1979) and in consultation with the State Department of Health Services and affected counties, is required to investigate the consequences of a serious nuclear powerplant accident for each of the four nuclear powerplants in California with a generating capacity of 50 megawatts or more. A study has been completed which included the preparation of specific site maps showing the areas likely to be affected by such an accident and a corresponding emergency response plan.

Under the original legislation, Section 8610.5 was to expire on December 31, 1982. However, Senate Bill 1473 (Chapter 864, Statutes of 1982) was signed into law extending the expiration date to January 1, 1988. This bill requires ongoing plan revision and maintenance, training, drills and exercises of the emergency plans and preparedness and periodic distribution of public education materials. This program is essential to maintain emergency response and capabilities developed over the past three years. As of January 1, 1983 new funding limits took effect which provide that the maximum assessment upon utilities operating nuclear power plants within the State will not exceed $300,000 annually for state costs (to be equally divided among utilities) and $100,000 per reactor unit annually for local costs. This program is specific to nuclear powerplant accidents, whereas program element 10.30, Development and Implementation of Emergency Plans, includes a general civil defense program in the event of a nuclear attack.

50 NATURAL DISASTER ASSISTANCE

Program Objectives and Description

The objective of this program is to provide aid to local agencies for repair and restoration of public real property in stricken areas in time of disaster and to provide assurance that all public facilities will be restored in order to provide necessary services to the citizens of the affected areas.

The Natural Disaster Assistance Act was established by Senate Bill No. 1614 (Chapter 290) which was approved by the Governor May 31, 1974. This law charged the Director of the Office of Emergency Services with the administration of the program. A local agency is eligible to participate in the program if it declares a local emergency which is found acceptable to the Director of OES.

The Natural Disaster Assistance Fund is made up of two accounts—the Street and Highway Account and the Public Facilities Account. State funding is provided based on a statutory formula for each of these accounts. Funds are made available to a local agency from the Street and Highway Account only after the damage caused by the natural disaster exceeds 3% of the local agency's prior year Highway Users Tax apportionment. Funds are made available to a local agency from the Public Facilities Account when the damage exceeds one-half of one percent of the total revenues of the local agency, less any funds received from a federal or state agency.

Funds in the Public Facilities Account have been made available in past years by appropriation from the General Fund. Chapter 994, Statutes of 1980, appropriated $20,000,000 from the General Fund in augmentation of the Public Facilities Account to provide assistance to local governments to repair damage caused by prior storm and flood conditions and to provide a prudent reserve in the account. Funds in the Street and Highway Account are available as a result of the one cent additional tax collected under the Highway Users Tax during 1969.

AB 1586 (Chapter 1205, Statutes of 1983) appropriated $5 million from the General Fund to the 1983 Natural Disaster Assistance Account, newly created by that statute within the Natural Disaster Assistance Fund. The purpose of the appropriation is to provide relief for public agency losses resulting from the Coalinga earthquake. The Director of Emergency Services will be allocating these funds in the current year to local agencies for personnel overtime costs associated with the disaster and for repair of public streets and facilities. The statute also authorizes funding for local agencies to provide the match requirement (25 percent) for federal disaster relief.

Authority

Item 446.7, Budget Act of 1958; Chapter 20, Statutes of 1965; Chapter 27, Statutes of 1965 as amended by Chapter 131, Statutes of 1966 and Chapter 8, Statutes of 1967; Chapter 52, Statutes 1969; Chapter 10, Statutes 1970; Chapter 8, Statutes 1971; Chapter 1284, Statutes 1972; Chapter 624, Statutes 1973; and Chapter 290, Statutes of 1974.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	$9,947	$13,000	$8,000
General Fund (Local Assistance)	–	*5,000*	–

0730 REQUIREMENTS OF GOVERNOR-ELECT AND THE OUTGOING GOVERNOR

This Budget provides assistance to the Governor-elect and the outgoing Governor, during the transition period following the election, to carry out the duties described under the provisions of Government Code Sections 12015 and 12015.5.

The law provides that State agencies furnish to the Governor-elect any information or assistance necessary in the preparation of the annual State Budget and for the orderly transfer of the executive power. This gives the Governor-elect approximately two months to formulate his policies and to incorporate them in the various programs included in the Budget which he will transmit to the Legislature.

Chapter 1241, Statutes of 1974, added provision for the outgoing Governor to appoint persons to assist in concluding matters arising out of his official duties during his last term of office.

Approximately $97,000 in savings was returned to the General Fund by the Governor-Elect, who did not fully expend the amount allotted for transition purposes. Additionally, an estimated $13,000 was returned to the General Fund by the Outgoing Governor.

10 GENERAL ACTIVITIES

Program Objectives and Description

The Lieutenant Governor chairs the Commission for Economic Development which provides support and guidance for the development of California's economy through advice and recommendations given to the Governor and the Legislature.

He serves on the three-member State Lands Commission which oversees leasing and control of millions of acres of State-owned land, including the vital offshore oil resources.

He also serves on other boards and commissions handling State problems such as land use planning, interstate cooperation and disaster preparation. He serves on the Board of Regents of the University of California and on the Board of Trustees of the State College and University System. He also handles special assignments and special tasks as assigned by the Governor.

0820 DEPARTMENT OF JUSTICE

The constitutional office of the Attorney General, as chief law officer of the State, has the responsibility to see that the laws of California are uniformly and adequately enforced. This responsibility is fulfilled through the diverse programs of the Department of Justice.

The Department of Justice is responsible for providing skillful and efficient legal services on behalf of the people of California. The Attorney General represents the people in all matters before the Appellate and Supreme Courts of California and the United States; serves as legal counsel to state officers, boards, commissions and departments; represents the people in actions to protect the environment and to enforce consumer, antitrust and civil rights laws; and assists district attorneys in the administration of justice. The Department also coordinates efforts to address the statewide narcotic enforcement problem; assists local law enforcement in the investigation and analysis of crimes; provides person and property identification and information services to criminal justice agencies; supports the telecommunications and data processing needs of the California criminal justice community; and pursues projects designed to protect the people of California from fraudulent, unfair and illegal activities such as special efforts to prosecute organized criminal activity conducted in California.

11, 45	Add 11.1 positions to meet workload needs in the Registry of Charitable Trust, Land Law and Consumer Protection. Also fund a shift of $600,000 from the Antitrust Account to General Fund	11.1	347
50	Revise and expand California Automated Identification System to use new computer hardware, to automate the fingerprint file, to go statewide with the Automated Latent Fingerprint System, and to add Digital Image Retrieval and Remote Access Systems	–	1,847
50	Establish a new program to seize those assets of convicted criminals derived from the illegal sale of narcotics	11	500
50	Expand investigations of the illegal manufacturing and sale of narcotics in clandestine laboratories	10	685
50	Establish a two-year limited term pilot project to improve county reporting of arrest and disposition data and the accuracy of the criminal history file data	6.1	209
50	Establish a seven year replacement schedule for photo-electronic criminalistics equipment and install safety equipment in the forensic laboratories	–	243
50	Add seven new positions to handle increased workload in testing blood samples for alcohol and drug content	7	199
50	Reduce ten positions from the California Parent Locator System and one position from the Stolen Vehicle Unit as the result of automation	−11	−80
50	Continue 54 limited-term positions to purge specified marijuana data from the criminal history records	54	975
50	Add one position to the Statutory Compliance Unit to reduce the backlog in processing reports for child abuse cases	1	20
50	Establish two positions to test blood and saliva samples of registered sex offenders upon release from confinement	2	78

11 EXECUTIVE AND ADMINISTRATION

Program Objectives and Description

The Executive and Administration program of the Department of Justice consists of the Attorney General's Executive Office, which maintains overall direction and administration of the diverse programs and projects of the department, and the executive elements of the Civil Law, Criminal Law, Public Rights and Law Enforcement programs (together designated as Executive, 11.01.010). Public Inquiry and Affirmative Action, which are under the direct control of the Attorney General and the Chief Deputy Attorney General, and the Administrative Support activities for the entire department.

The budget year workload adjustments reflect the addition of 0.5 clerical positions for the decentralized testing program and 15.7 clerical positions for the increased legal support needs of Civil Law, Criminal Law and Public Rights. Salary savings adjustments reduce the net personnel years to 9.6.

20 SPECIAL PROGRAMS

Program Objectives and Description

Special Programs of the Department of Justice consist of those activities which are outside the major programs of the Department of Justice and under the direct control of the Attorney General and the Chief Deputy Attorney General. Program elements include Opinions, Crime Prevention Center, Special Prosecutions, Legislation, and Grant Projects.

The current year workload adjustments reflect 0.5 positions for a COD-REHAB contract. The budget year proposes one additional secretarial position and $41,000 for media production costs in the crime prevention program. The budget also includes $123,000 in departmental services and a reduction of 0.3 positions due to termination of a juvenile justice grant.

Authority

20.20 Crime Prevention Center

The Crime Prevention Center (CPC) conducts a public education and local government assistance program to promote effective crime prevention practices throughout California. The mission of the CPC is to contribute to the quality of life in California by reducing the incidence and fear of crime. Working towards the completion of the stated mission, CPC services are categorized into three basic functions: (1) *training*—for local law enforcement and other governmental agencies; community organizations and groups and private organizations; (2) *technical assistance*—crime prevention assistance as requested; and (3) *multimedia promotional and educational assistance/resources*—publications and camera-ready masters for local use; audio-visual and radio public service announcement tapes; films for loan and articles for trade and professional journals.

20.30 Special Prosecutions

An increasing element of criminal activity has an organized, multijurisdictional nature. The statewide responsibility and perspective of the Attorney General make him and the Department of Justice uniquely qualified to bring special investigation and prosecution efforts to bear on these crime problems. Special Prosecutions was established during 1979–80 to fulfill the Attorney General's statutory responsibility (Government Code Section 15025) to prosecute individuals and groups involved in organized criminal activity.

Any criminal activity of an organized, multijurisdictional nature is a potential target for investigation and prosecution by Special Prosecutions. However, the specific objective of Special Prosecutions is to investigate and prosecute criminal acts carried out by recognized, organized crime groups, such as syndicated crime organizations, prison gangs, outlaw motorcycle gangs, and terrorist groups. It also investigates and prosecutes major drug traffickers who are involved in statewide or multijurisdictional criminal activity and individuals and groups engaged in major economic or white collar crime. The Opinion Unit performs the Attorney General's duty under Government Code section 12519 to provide opinions in writing to designated public officers on questions of law relating to their respective offices. This unit drafts all formal opinions issued by the Attorney General, most of which are published.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Cases opened	34	36	38

20.40 Legislation

The Legislation element provides assistance in aggressively pursuing the enactment of laws which protect the interests and safety of the people of California. It coordinates analysis of legislation affecting the department and represents the Attorney General and the Department of Justice in matters before the Legislature. It serves as the liaison between the Department and the criminal justice community regarding legislative matters.

30 CIVIL LAW

Program Objectives and Description

The Civil Law Program is needed to protect and preserve the public interests by providing skilled legal services to all State agencies and Constitutional Officers. The Civil Law Program provides specialized services in the following areas: Government Law; Health, Education and Welfare; Licensing; Business and Tax; and Tort and Condemnation.

The budget year proposes four new attorneys to meet workload increases of the Department of Consumer Affairs, one new attorney in the business and tax program, one attorney to handle tort litigation in San Diego, one attorney to handle litigation resulting from recent winter storms, and the continuation of two attorneys and one paralegal position to handle litigation resulting from Medfly eradication efforts. The funding includes departmental services and $163,000 to help offset the cost of promotions for the department's attorneys.

Authority

The legal authority for this program is found in Article V, Section 13 of the California Constitution, as well as various sections of the Government Code including Section 11042, 11043, 11157, 11522, 12511, 12512, and 12519.

30.10 Licensing

The Licensing element represents the 38 licensing agencies within the Department of Consumer Affairs in their efforts to protect the consuming public from unprofessional or deceptive conduct by various licensed professionals and businesses. Also, the element represents the Department of Health Services when certain licensees abuse the Medi-Cal program.

This representation includes providing informal advice to clients and prosecution of administrative hearings to deny, revoke, or suspend a professional or business license. The work includes legal representation of the client in the federal and state trial courts and appellate courts. This element also seeks injunctions in court to prevent unlicensed activity or repeated illegal acts by a licensee.

30.20 State Government

The State Government element represents six state constitutional officers, the two state control agencies, the two state retirement agencies, the two state police agencies, and in excess of 30 other state agencies. Among its clients are the Governor, Lieutenant Governor, Controller, Treasurer, Secretary of State, Department of Finance, Department of General Services, State Personnel Board, the Public Employees and State Teachers Retirement Systems, California Highway Patrol, Department of Motor Vehicles, Department of Corrections, California Youth Authority, Department of Alcoholic Beverage Control, and California Horse Racing Board. Representation by this element involves client advice and consultation, and appearances before State and Federal administrative and judicial tribunals. Some client agencies have separate legal staffs and, in such cases, representation is limited to litigation.

The State Government element is also responsible for advising all state agencies, except those that are in the Health and Welfare Agency, on personnel matters. This includes representation of those agencies before the State Personnel Board and the Department of Personnel Administration.

In addition, the State Government element carries out the statutory responsibilities of the Office of Attorney General with respect to the preparation of titles and summaries for initiative and ballot measures.

** These two elements were transferred to Public Rights. Prior year statistics are shown in Civil Law, but current and budget year statistics are shown in their new location within Public Rights.

0820 DEPARTMENT OF JUSTICE—*Continued*

30.30 Business and Tax

The Business and Tax element provides legal advice for, and represents in litigation, those state departments administering laws designed to protect the public in their business transactions, safekeeping of their funds and investments. The element advises and represents the California Transportation Commission which has among its responsibilities the programming and authorization of expenditures for highways and mass transit. This element also represents those agencies enforcing laws prescribing order on minimum wages and working conditions.

Business and Tax protects state revenues by representing state taxing agencies in collection actions as well as in refund matters in which the validity or application of a tax statute is challenged. This element is also involved in the property tax field in advising the State Board of Equalization as well as in advising county legal representatives.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

30.40 Health, Education, and Welfare

This element provides legal services to the state agencies concerned with health, education and welfare. Services include extensive litigation in federal and state trial and appellate courts, administrative proceedings, informal advice, and drafting or approving proposed legislation and regulations. Litigation includes complex constitutional issues of national importance.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

0820 DEPARTMENT OF JUSTICE—*Continued*

30.70 Tort and Condemnation

The Tort and Condemnation element assures that the State and its employees receive a proper defense including the ascertainment of damages and also assures that the State recovers costs and damages for torts committed against it. In that regard, the element represents all agencies and departments of the State and their employees except for the Department of Transportation and the University of California and their employees. This element also provides legal defense to the State relating to the acquisition of property and the defense of the State against claims for the taking or damaging of property; this assures that the State pays only just compensation for the taking or damaging of property.

Although most litigation is jury trial work, appellate work also is required. The element also supervises investigations, renders advice to the State Board of Control, and makes appearances before that Board in connection with claims filed against the State. The current year includes three limited term positions to meet tort claim litigation resulting from the state's Medfly eradication program.

40 CRIMINAL LAW

Program Objectives and Description

The Criminal Law program represents the State in all criminal matters before the appellate and supreme courts. This program also fulfills the Attorney General's responsibilities with regard to assisting the district attorneys in cases for which they are disqualified, assisting the Commission on Judicial Performance, enforcing the Political Reform Act, advising the Governor on extradition matters, and prosecuting criminal actions involving Medi-Cal provider fraud.

The current year workload adjustments reflect 0.5 personnel years for a COD-REHAB contract. The budget year proposes six attorneys and 3.4 paralegal positions to handle workload in the Appeals, Writs and Trials program. Additional funding includes departmental services and $174,000 to help offset the cost of promotion for the department's attorneys.

Authority

The legal authority for this program is found in Article V, Section 13 of the California Constitution, in Government Code Section 995, 996, 12511, 12512, 12550, 83116, 91001(a), and 91003, and in Penal Code Sections 1256 and 1548.3.

0820 DEPARTMENT OF JUSTICE—*Continued*

40.10 Appeals, Writs, Trials and Other Constitutional Duties

The Appeals, Writs and Trials element of Criminal Law represents the people on all appeals filed by criminal defendants in the California Courts of Appeal and Supreme Court. This element also represents the State and its officers in actions in both state and federal trial and appellate courts in which writs of habeas corpus, mandate, prohibition and coram nobis are sought by prisoners or defendants in criminal cases. When the United States Supreme Court grants review in any of these cases, division attorneys represent the people and officers of California in the high court. The state attorneys in this element act for district attorneys in cases in which the district attorneys are disqualified or unable to perform their official duties. These lawyers also defend the State and its officers in actions filed by state prisoners under the Federal Civil Rights Act.

This element investigates misconduct by judges at the request of the Commission on Judicial Performance and presents evidence of such misconduct to special masters, the Commission and the California Supreme Court. (A special master is a judge appointed by the Commission to hear allegations and make findings of fact.) Appeals, Writs and Trials attorneys enforce the criminal provisions of the Political Reform Act of 1974 and also review all extradition requests before action is taken by the Governor.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

40.90.020 Computerized Litigation Support

The Criminal Law program developed a computerized litigation support system to upgrade the ability of the Antitrust attorneys to handle complex cases requiring the storage and retrieval of large amounts of information. This component also provided advanced antitrust training to the staff.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (*Federal Trust Fund*)	1.3	–	–	$308	–	–

45 PUBLIC RIGHTS

The Public Rights Program is needed to protect and preserve the public interests by providing skilled legal services to all State agencies and Constitutional Officers. The Public Rights Program provides specialized services in the following areas: Civil Rights and Charitable Trust (including Charitable Trust Registration); Natural Resources, Environmental Law; Antitrust; Land Law; and Consumer Law. *This program was established through a reorganization of the other two legal programs, Civil Law and Criminal Law, effective July, 1983.*

The current year workload adjustments reflect three positions for the Trane Settlement. The budget year proposes to continue these three positions as limited-term to June 30, 1986, and to add three new positions in the Charitable Trust Registry to maintain the capability of desk auditing five percent of the registered charities. Three additional positions also are proposed to handle workload in the land section.

The budget further includes an additional $600,000 General Fund in the Antitrust program with a commensurate decrease in funding from the Antitrust Account. The purpose of the shift is to help stabilize funding for the program since the Antitrust Account periodically falls short in revenue collections. Additional funding includes departmental services and $69,000 to offset the cost of promotions for attorneys.

Authority

The legal authority for this program is found in Article V, Section 13 of the California Constitution, as well as various sections of the Government Code including Section 11042, 11043, 11157, 11522, 12511, 12512, and 12519.

45.10 Charitable Trust/Civil Rights Enforcement

The Charitable Trusts element carries out the Attorney General's statutory and common law duties to correct misuse and diversion of charitable assets, and recovers diverted assets for the benefit of charitable public beneficiaries. The Attorney General operates the Registry of Charitable Trusts which registers and maintains current financial reports for over 50,000 charities operating in California that hold assets exceeding $20 billion. The Attorney General also represents the public interest in escheat matters.

The Civil Rights Enforcement element represents four state agencies whose resources are devoted to the protection and enforcement of civil rights of all persons, including the disadvantaged, minorities and women: Department of Fair Employment and Housing; Commission on Fair Employment and Housing; Commission on Status of Women; and Native American Heritage Commission. Representation of these client agencies includes client advice and consultation, appearances at commission meetings and litigation. The element also represents the Attorney General in carrying out his independent constitutional, common law and statutory duties to protect civil rights; investigations, litigation, legislative work and public information projects are carried out on behalf of the Attorney General for the public interest.

45.20 Natural Resources

The Natural Resources Law element provides legal services to and assures uniform and adequate enforcement of laws administered by the departments and agencies which it represents. These departments and agencies are responsible for enforcing and administering laws and programs for the protection of the state's environment and public resources. These resources include agricultural products, fish, wildlife, water and water quality, air, timberland, and lands owned and used by the public for recreation and wildlife protection purposes. The field of agricultural products includes the administration and enforcement of marketing regulations and protection of these products to assure their wholesomeness and availability to the consuming public. The Natural Resources Law element also represents the Department of Housing and Community Development and the Office of Planning and Research. This element is also responsible for water rights litigation on behalf of all agencies of the state.

Reimbursements				*(1,174)*	*1,187*	*1,359*

45.30 Environment

The Environment element is responsible for implementing the Attorney General's independent program for the protection of the environment. The element relies on the Attorney General's constitutional, statutory and common law authority to represent the People of the State in environmental matters. This program spans the broad spectrum of environmental issues, including areas such as toxic wastes, pesticides, groundwater pollution, air pollution, oil and gas development on the California Outer Continental Shelf, preservation of wilderness lands and other natural resources, mining and land use issues.

0820 DEPARTMENT OF JUSTICE—*Continued*

45.40 Land Law

The Land Law element handles all litigation and other legal services arising from the administration of State-owned lands by the State Lands Commission; from the regulatory activities of the Division of Oil and Gas, the Geothermal Resources Board, the California Coastal Commission, the San Francisco Bay Conservation Commission and California Tahoe Regional Planning Agency; and from the programs of the California Coastal Conservancy, the Santa Monica Mountains Conservancy, Tahoe Area Land Acquisition Commission (TALAC) and California Tahoe Conservancy.

These lands consist of 4,000,000 acres (about 6,400 square miles) of tide and submerged lands and lands underlying navigable rivers and lakes and 600,000 acres (over 900 square miles) of lands in the public domain granted to the State. The value of these lands, including minerals and timber therein, is estimated at $12 billion. Annual revenues therefrom, including the Long Beach Tidelands, aggregate in excess of $369,000,000 annually, and constitute the State's largest source of nontax revenue.

This element additionally handles matters relating to any public rights in lands arising by implied dedication. Especially affected by this doctrine are littoral lands, including 3,400 miles of frontage on tidal waters and 1,400 miles on navigable, nontidal waters. By statutory mandate, the component establishes the criteria for the Department of General Services to determine whether such public rights exist in lands proposed for State acquisition. Over $180,000,000 in appropriations are affected by these criteria and investigations and review by this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

45.50 Consumer Law

Consumer Law files lawsuits against businesses engaged in unlawful, unfair or deceptive practices which adversely affect consumers. In these lawsuits, consumer law attorneys seek injunctive relief, civil penalties, restitution and any other relief appropriate to the particular problem involved.

Consumer Law attorneys actively investigate and obtain prosecutions and injunctions against persons who engage in unlawful and fraudulent practices in the home mortgage and lien foreclosure areas, in multilevel sales, in energy-related deception, and in false advertising. The attorneys draft consumer legislation, give advice on pending consumer legislation, and coordinate with other local, state and federal prosecutorial agencies to help solve consumer problems in the marketplace.

45.60 Antitrust

The Antitrust element enforces the State's antitrust laws in order to foster and protect our free enterprise system. This element is authorized to bring both criminal prosecutions and civil actions before the courts. Antitrust attorneys bring actions to recover treble damages suffered by state, public agencies and the public as a result of price fixing and other anti-competitive activities. In addition to recovery of treble damages, identifiable costs involved in the investigation and prosecution are also obtained. Antitrust attorneys also bring actions on behalf of the people of the State to recover civil penalties for violations of the antitrust laws. It is estimated that during 1983–84, the antitrust recoveries will be in excess of $14 million of which $12 million will be on behalf of California consumers.

50 LAW ENFORCEMENT

Program Objectives and Description

Law Enforcement provides statewide services in the following fields: identification of persons and property, criminalistic services, technical and special investigative training, statistical and communication services, and selected investigation. The program also supresses the traffic in narcotics and dangerous drugs and identifies and prevents infiltration of organized crime.

Law Enforcement is organized into the following elements: Investigation and Enforcement, Criminal Identification and Information, Law Enforcement Data Center, and Grant Projects. Investigations and Enforcement supports other law enforcement agencies through investigative assistance, liaison and training, special investigations, specialized criminalistics and other technical services, and dissemination of information about organized crime. Criminal Identification and Information helps identify individuals and property and provides information, and statistics relative to crime and delinquency. The Law Enforcement Data Center provides data processing services to the program.

Authority

Article V, Section 13 of the California Constitution; Title 2, Div. 3, Part 6 of the Government Code; Part 4, Titles 1–3 of the Penal Code; Government Code Section 11751; Health and Safety Code Sections 11000–11651 and 11590; Business and Professions Code Chapter 9, Section 4; Vehicle Code Sections 10500, 10551, 10652, 22857.2 and 22853; and Welfare and Institutions Code Sections 11478 and 11478.5.

50.10 Investigation and Enforcement

Investigation and Enforcement is composed of four components that seek to ensure uniform enforcement of California laws by providing a broad range of investigative, analytical and forensic services to local law enforcement agencies throughout the State. This element also includes a law enforcement training component which provides training for local criminal justice personnel on the subjects of organized crime and law enforcement practices.

The budget year proposes eleven new positions to audit and seize those assets of convicted criminals which were derived from the illegal sale of narcotics. An additional ten positions are proposed to investigate illegal manufacturing and sale of narcotics in clandestine laboratories.

Additional changes in the budget year include seven new positions to test blood samples for alcohol and drug content and two new positions to test blood and saliva samples of registered sex offenders upon release from custody as required by Chapter 700, Statutes of 1983.

Five positions will be transferred from the criminal identification program to the Automated Latent Print System in order to expand the system statewide.

Adjusted for salary savings and for current year contractual positions not extended into the budget year, the net personnel year increase in 1984–85 is 28.1.

50.10.010 Investigation

The Investigation component conducts criminal investigations for local law enforcement agencies in matters involving a conflict of interest and multijurisdictional cases. Criminal matters of serious or complex nature are expertly investigated by the component's Special Agents. This component is responsible for conducting investigations for the Attorney General's civil and criminal law programs and special investigations as directed by the Attorney General, upon request of the Governor, Legislature, or other State agencies.

50.10.020 Narcotic Enforcement

The Narcotic Enforcement component is responsible for bringing its statewide interjurisdictional capabilities and expertise to bear upon the complex problems of multijurisdictional narcotic dealers, clandestine drug manufacturers, and licentiate violators in the medical and pharmaceutical professions. This is accomplished through the coordination and management of multijurisdictional narcotic enforcement groups, coordination and management of multi-agency investigation; investigation of major conspiracies and intrastate multijurisdictional traffickers; investigation of clandestine laboratories; monitoring and investigation of professionals licensed to dispense drugs; provision of narcotic enforcement training; consultation on specific narcotic enforcement cases; short-term undercover agent support; and the analysis and dissemination of information and intelligence. The Narcotic Enforcement component is also responsible for the administration of the triplicate prescription system which prevents the diversion of licit supplies of narcotics into illicit channels.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Suppression of Illicit Traffic:			
Number of investigations completed	2,865	2,900	2,900

Reimbursements				–	*151*	*152*

50.10.030 Forensic Services

The Forensic Services component provides criminalistics and related forensic science services to sheriff, police, coroner, district attorney, State and local law enforcement departments, and the courts of California. The specialized forensic services furnished include the examination and analysis of physical evidence, questioned documents and latent fingerprints, as well as photography/audio-visual services and polygraph examinations. Full-service regional laboratories operate in Redding, Santa Rosa, Sacramento, Modesto, Stockton, Fresno, Salinas, Santa Barbara and Riverside. These facilities provide examination and analysis of a wide variety of physical evidence, interpret the significance of the scientific findings to law enforcement agencies, and provide expert testimony in the courts. A limited service laboratory program, devoted mainly to blood-breath-alcohol and controlled substances analysis, has facilities in Oroville, San Rafael, San Luis Obispo, West Covina, and Eureka. These facilities also do limited criminalistics cases depending upon the sophistication of their equipment complements. This component helps meet the needs of the California Highway Patrol and other police agencies engaged in the enforcement of traffic laws.

Forensic services, in addition to criminalistics, are provided to the criminal justice system in the fields of toxicology, questioned document analysis, latent fingerprint examination, including the Automated Latent Print System (ALPS), polygraph examination and photographic and audio-visual services.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Reimbursements				*1,662*	*1,962*	*2,268*

50.10.040 Organized Crime and Criminal Intelligence

The Organized Crime and Criminal Intelligence component provides the state level support, leadership and coordination required to develop an effective criminal intelligence system based on mutual cooperation of state, regional, local, and out-of-state law enforcement agencies. This component carries on a continuing program to determine and analyze the nature, characteristics, magnitude, and trends of organized crime in California. In addition, this component offers activities to upgrade the knowledge and capabilities of law enforcement for effectively combatting organized crime and maintains a pool of specialized investigative equipment for loan to local agencies.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

0820 DEPARTMENT OF JUSTICE—*Continued*

50.10.050 Law Enforcement Training

The Law Enforcement Training component provides specialized technical and investigative training to local criminal justice and law enforcement personnel on the subjects of organized crime and law enforcement techniques and practices. It additionally certifies, regulates, and monitors the activities of schools and instructors who provide training to private citizens in the use of tear gas weapons for self-defense.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*589*	*681*	*689*

50.20 Criminal Identification and Information

Criminal Identification and Information has two main components: Criminal Statistics and Special Services, and Criminal Identification. Each serves to provide identification and criminal information services to all law enforcement agencies.

The budget year reflects 6.1 new positions (two-year limited-term) to work with counties in improving arrest and disposition data reported to the department. Improved data will enhance state and local law enforcement efforts. One additional position is proposed as two-year limited-term to process the backlog in reported child abuse cases. Other adjustments include the continuation of 54 positions to purge specified marijuana data from criminal history files, the reduction of one position from the stolen vehicle unit due to automation of the program, the reduction of ten reimbursable positions and the transfer of ten reimbursable positions to the Data Center to implement automation of the California Parent Locater Service, the redirection of three positions to reduce the backlog of disposition documents, and the redirection of five positions for automation of the Latent Fingerprint System. The remaining adjustments reflect the reduction of 81.5 one-year limited-term positions (between Elements 50.20 and 50.30) for the automated name index projects and adjustments for departmental services.

50.20.010 Criminal Statistics and Special Services

The Criminal Statistics and Special Services component is organized into five functions: Administration; Statistical Data Center; Statistical Analysis Center; Command, Communications, and Compliance Program and Automated Systems Program.

Administration directs, plans, and coordinates the activities of this component which include: the development, implementation, and maintenance of criminal justice statistical reporting describing crime and the criminal justice system in the State of California; the operation of four major automated data bases which provide information on wanted persons, stolen vehicles, firearms and property; ensuring compliance with licensing and regulatory services; and maintaining a 24-hour, seven days per week Command and Communications Center.

The Statistical Data Center collects criminal justice data from city, county, and state agencies; compiles, interprets, and reports information in tabular form for the Statistical Analysis Center; and maintains current and previous year data systems.

The Statistical Analysis Center generates and controls the data output in the form of publications, special studies, and special requests. Annual reports and responses to special requests for data are made to the Governor, the Legislature, criminal justice agency administrators, and others concerned with crime, and delinquency and the effectiveness of agencies that administer criminal justice, and develops analyses of the impact of new legislation on the criminal justice system.

Command, Communications, and Compliance processes teletypes and provides record information to authorized agencies; coordinates the National Law Enforcement Telecommunications System (NLETS) for California; and acts as the California control terminal for the National Crime Information Center (NCIC) on a 24-hour, 7 days per week basis. In addition to these round-the-clock services, the program also determines the eligibility of prospective handgun purchasers; issues licenses and permits for possession of tear gas, destructive devices, and dangerous weapons; maintains special files on arsonist releases, sex registrants, narcotic registrants, missing persons, unidentified deceased persons, suspected child abuse, dental charts of missing and unidentified deceased persons, persons who meet the minimum criteria to be licensed by local jurisdictions as secondhand dealers in California; and maintains reports of death in custody.

The Automated Systems function has management control over the Stolen Vehicle System (SVS), Automated Firearm System (AFS), Automated Property System (APS), the Non-Automated Property System, the Automated Boat System (ABS), and the Wanted Persons System (WPS). The Automated Systems Program performs the administrative functions necessary for the Department of Justice to carry out its responsibility as the National Crime Information Center's (NCIC) California control terminal. This function also includes the Communications Administration Section which: coordinates with all federal state, and local law enforcement entities interfacing with the major data systems managed by the department; develops technical guidelines, standards, and long-range and operational plans for the data systems; and provides technical and operational advice, policies, practices and procedures to users and potential users of the data systems.

50.20.020 Criminal Identification

The Criminal Identification component is organized into five major entities: Administration, Fingerprint, Record Analysis and Processing, Record Control, and Special Projects/California Parent Locator Service. However, objectives of this component are accomplished through programs that cross organizational lines. These programs are: Criminal Identification, Noncriminal Identification, On-going Purge, Special Services Support, California Parent Locator Service, Automated Fingerprint Project, and Marijuana Purge Project.

The Fingerprint program classifies, searches, and verifies fingerprints submitted by law enforcement, licensing, and regulatory agencies. Also, the Automated Fingerprint project, which will provide an alternative to the manual processing of fingerprints, is under the direction of the Fingerprint program.

The Record Analysis and Processing program is responsible for the entry and maintenance of arrest, disposition, probation, and applicant information for both the manual and automated files of the criminal history system. This program is also responsible for the entry of data used to develop offender based transaction statistics.

The Record Control program maintains and operates the record folder file which contains the manual master criminal record and supporting documents for the criminal records system. It also maintains and operates a name index which accesses the folder and fingerprint files. The Record Control program reviews records at specified times and purges them in accordance with record retention criteria established by the Attorney General. It also processes dismissals, court orders for sealing records, requests for record deletions, and requests by subjects to review their own record. It scans incoming criminal and applicant fingerprint cards and arrest disposition documents for completeness and errors which must be resolved before these documents are forwarded to the next appropriate section for processing. It is also responsible for the duplication and dissemination of criminal history records to regulatory and criminal justice agencies and provides field training sessions to agencies submitting arrest fingerprint cards, arrest and court disposition reports, and probation flash notices.

Special Projects/Parent Locator Service is responsible for obtaining, compiling, and disseminating information from official records which can be useful in locating absent parents whose whereabouts are unknown. Additionally, this program is responsible for coordinating the activities relating to the new 1100 Automated Criminal History/Adult Criminal Justice Statistical System, coordinating the implementation of an automated name index to both the manual and automated criminal histories, coordinating with local agencies which have or are developing automated systems which interface in some manner with the Automated Criminal History System and providing staff services to Criminal Identification. This component also includes the Criminal Records Security Unit which is responsible for preventing misuse of criminal offender record information and protecting the citizen's right to privacy. The Criminal Records Security Unit performs the following functions: (1) provides legislatively mandated records and security training to user agency personnel; (2) develops, implements, and maintains the California plan for complying with federal security and privacy regulations; (3) audits user agencies for compliance with State and federal privacy and security regulations; and, (4) provides technical assistance in the area of records security to local and state user agencies.

50.30 Law Enforcement Data Center

Chapter 787, Statutes of 1972, established the Law Enforcement Data Center (LEDC) to enhance the ability of criminal justice agencies to combat crime; to reduce the duplication of effort expended to maintain like criminal justice information in many agency files at all levels of government; and to develop a systematic method of providing complete, accurate criminal record information to the user in time to be useful for the critical decisions relating to arrests, prosecution, court proceedings, and detention. LEDC works closely with the Criminal Identification and Information element to implement and maintain the Criminal Justice Information System (CJIS), and to administer the California Law Enforcement Telecommunications Systems (CLETS). LEDC is responsible for all departmental automatic data processing and telecommunications activities related to the statewide CLETS/CJIS systems and internal departmental data processing activities. The major objectives are: to increase the effectiveness of justice administration in California by providing a current, accurate, centralized criminal justice information data base; to provide a telecommunications system adequate to meet the needs of law enforcement agencies throughout the State; to reduce response time to requests for criminal justice information; to provide centralized data processing services to all organized components of the department; to provide ready access to the central information source for all criminal justice agencies (large and small), thereby eliminating the need for duplicate files throughout California; and to protect the rights and privacy of individuals by placing strict security and confidentiality controls on criminal justice information.

LEDC also manages the planning, design, implementation, operation, and enhancement of its automated programs. The performance of this function involves the following activities:

—Operations support provides data processing operation services to all programs, elements and components within the Department of Justice and is responsible for 24 hours-a-day, 7 days-a-week operation of a large multi-computer center and a large data transcription unit. In addition, Operations Support evaluates and makes recommendations regarding data processing equipment and production services, and provides operational liaison with other interfacing computer systems.

—Administrative support provides the administrative, analytical and staff services required in support of LEDC; which includes systems analysis, development of project management procedures, administration of the programmer/analyst resource pool, development of the budget, training coordination, property and supplies control, word processing support and personnel record keeping services.

—Technical support provides highly technical software support services, which includes design, development, implementation and maintenance of the CLETS message switching software and the CJIS control software; maintenance and operation of data management software, operating systems software, and various proprietary software utility systems.

—Applications support sections provide for design, implementation, and maintenance of on-line data base and off-line batch applications; for current fiscal year there are seven on-line data bases and more than 33 major batch systems representing over 600 programs; with several applications under development.

The budget year includes the transfer of ten reimbursable positions from Criminal Identification for the implementation of the California Parent Locator System. Eight positions are transferred to Criminal Identification due to the completion of the Automated Name Index (ANI). The overall reduction in personnel years in the budget year reflects the reduction of 81.5 limited-term ANI positions (between Elements 50.20 and 50.30) and redistribution of departmental services.

70 LEGISLATIVE MANDATES

Program Objectives and Descriptions

Section 2231(a) of the Revenue and Taxation Code requires the State to pay local governmental units the cost of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973.

Marijuana Destruction—Chapter 952/76 relates to the destruction or obliteration of records of courts and public agencies of convictions for possession of marijuana and arrests for possession of marijuana not followed by conviction occurring prior to January 1, 1976. This mandate affects counties and cities. Those entities having law enforcement agencies and courts may incur costs in the destruction or obliteration of records as prescribed in Chapter 952, Statutes of 1976.

Dental Record File—Chapter 462/78 relates to having dental examinations conducted on dead bodies when all other identifying data has failed and with obtaining dental examinations records of all persons missing more than 30 days. This mandate affects cities and counties. Those entities having found dead bodies or reported missing persons may incur costs in the dental examinations of dead bodies and obtaining dental records of missing persons as prescribed in Chapter 462, Statutes of 1978.

Funding for this mandate, beginning in 1983–84, is provided in the budget for "State-Mandated Local Programs" (Department 9680) in the General Government portion of the budget.

0840 STATE CONTROLLER

The State Controller is the elective State fiscal officer. As such the primary objectives of his office are: to provide sound fiscal control over receipt and disbursement of public funds; to report the financial operations and conditions of the State and local government; to assure that money due the State is collected and to provide equitable, effective and economical tax administration; to provide fiscal assistance and guidance to local government; to administer the State's unclaimed property laws; and to serve as a member of fiscally oriented State boards and commissions.

The powers, duties and functions of the State Controller embrace (1) those expressed in the Constitution (Article XVI, Section 7), (2) those inherent in the nature of his office, though not so expressed, (3) those unquestionably essential to the efficient operation of his office, and (4) such additional powers, duties, or functions as the Legislature may confer or impose upon him.

10 FISCAL CONTROL

Program Objectives and Description

The primary objectives are: to maintain an effective system of internal control over the State's financial transactions through effective auditing and disbursing techniques; to report promptly and accurately the State's financial condition and operations to assure the fiscal integrity of State government; and to provide timely financial information to the Legislature and public.

The major activities of the Divisions of Accounting, Audits, Disbursements and Personnel Payroll Services are integrated into a system of internal control over the receipt and use of State, federal and other public moneys in the State Treasury. Agency documents are reviewed to determine the purpose for which the money may be used and to verify the program, fund or account prior to authorizing the deposit or transfer of funds. Agency claims against the Treasury are office audited for legality prior to disbursement, supplemented by field audit where necessary. All deposits, transfers and withdrawals are recorded in EDP control accounts, and a determination is made that there is an available appropriation and sufficient cash in the appropriate fund to pay each claim. The preparation and distribution of warrants to payees is the final link in the integrated claim and warrant process. Reports stating the State's financial operations and condition are issued periodically.

The following changes are proposed for Fiscal Year 1984-85: reestablish one position for cash flow management analysis; reestablish fifteen positions to perform reimbursable Disaster Assistance audits; reestablish six positions for Women, Infants, and Children audits; reestablish thirteen positions for Oil Royalty audits—6.5 of which will be federally funded; reestablish 6.5 positions for Low Income Home Energy Assistance Program warrant production; provide funding for personnel/payroll system update; reduce three positions for expected decrease in reimbursable workload; reduce Personnel/Payroll Systems Division by 12 positions for economies achieved in decentralization.

10.10 Control Accounting

Control accounts are maintained for all funds and appropriations in the State Treasury and for the centralized State treasury trust system. Cash management is performed for all funds investing through the Surplus Money Investment Fund Program including the Local Agency Investment Fund. This unit also initiates the transfers of money for loans to and from the General Fund on the basis of cash needs and loan authorizations. Both control and detailed accounts covering investments made from various State funds and from treasury–pooled money, as well as interest–bearing bank deposits, are maintained. Education Code requirements as to repayments by school districts of State school building aid loans are also administered under this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Receipts issued	42,647	44,800	46,600
Transfers, journals and canceled warrant reports	74,193	76,900	79,200
Claims processed	277,077	290,900	302,600
Treasury trust deposits	237,369	254,800	267,500
Treasury trust account checks	37,677,485	39,475,200	41,646,300

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,909	$1,805	$2,055
Personnel years	55.1	53.1	53.3

10.20 Financial Analysis

Comprehensive fiscal reports, the principal one being the Controller's Annual Report of the State's financial affairs, are issued regularly. Others include the preliminary annual cash and accrual reports, the August governmental cost fund report, the month–end statements showing revenues derived from all major taxes, and the receipts and expenditures of the General Fund, and other periodic special reports. Data is compiled and computations made for apportionments to local agencies, such as highway users' taxes, cigarette taxes, motor vehicle license fees (in–lieu tax), property tax relief, mandated cost claims, timber tax, and federal funds. Estimates of future cash receipts and expenditures are compiled for management of the Pooled Money Investment Program. Interest earnings of the Local Agency Investment Fund and the Surplus Money Investment Fund are distributed quarterly and semi–annually.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Mandated cost:			
Number of claims	16,100	21,000	25,000
Financial reports	27	31	27
Apportionments	126	122	134

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$942	$1,031	$1,082
Personnel years	24.6	26.6	26.7

10.30 Claim Audit

All State expenditures, including contract services, personal services, equipment, materials, travel claims and investments, are audited prior to payment to assure charges are legal, for an authorized purpose and that an appropriation exists from which they can be paid. On-site audits of state agency records and disbursing systems are made when appropriate.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Claim schedules audited	290,812	305,352	317,567
Amount of claims approved (millions)	$189,769	$199,257	$209,220
Amounts questioned (thousands)	$634,951	$679,397	$726,955
Amounts disallowed	$70,813,000	$74,354,000	$78,071,000
Cost benefit ratio (disallowances per $ of cost)	$49.76	$50.73	$53.26

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,423	$1,514	$1,602

0840 STATE CONTROLLER—*Continued*

10.40 Field Audit

The staff conducts field audits of expenditures of State and federal funds subvented, loaned or granted to local jurisdictions under various programs and performs fiscal overview audits on the State Medi-Cal program.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Audits performed	631	826	867
Amounts audited (thousands)	$2,829,022	$3,085,936	$3,240,233
Recoveries (thousands)	$94,039	$117,574	$123,453
Cost benefit ratio (recoveries per $ of cost)	$14.16	$14.36	$14.72

Input	*1982-83**	*1983-84**	*1984-85**
Expenditures	$6,434	$8,185	$8,389
Personnel years	156.6	173.7	178.8

10.50 Disbursements Services

This includes the issuance of all Controller's warrants in payment of the State's obligations including salaries and wages; the preparation and maintenance of warrant registers and an alphabetical warrant index; maintenance of controls over all disbursements, agency trust accounts and fund accounting transactions; and reconciliation of warrants paid by the State Treasurer as well as maintenance of paid warrants. Entries to the central control accounts reflecting disbursement transactions are automatically generated by electronic process. Information returns summarizing reportable tax payments and Forms W-2 are submitted annually in magnetic tape form to the Internal Revenue Service and the State Franchise Tax Board.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Warrants issued	21,228,694	21,806,500	24,049,000
Claim schedules processed	276,845	276,350	276,350

Input	*1982-83**	*1983-84**	*1984-85**
Expenditures	$8,366	$8,358	$9,241
Personnel years	124.3	130.6	128.4

10.60 Technical Services

This element provides key entry computer services, reproduction and mail services to all divisions of the Controller's office.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Pieces mailed	1,448,116	1,500,000	1,545,000

Input	*1982-83**	*1983-84**	*1984-85**
Expenditures:			
Distributed to other programs	($1,480)	($1,250)	($919)
Undistributed	354	106	463
Personnel years	39.6	41.3	40.5

10.70 Personnel Services

The Personnel Services element maintains the Employment History Data Base, which contains the personnel records of all State employees and serves as a basis for Uniform State Payroll System payments. It provides personnel policy and processing training to State Agencies; furnishes to the State Personnel Board, Public Employees Retirement System, California State Universities, and the State Controller's Office, Division of Personnel and Payroll Services, information those agencies need to carry out their program responsibilities; and also provides employee roster information to authorized persons within the legal requirements governing security and confidentiality.

Input	*1982-83**	*1983-84**	*1984-85**
Expenditures	$4,559	$4,789	$5,150
Personnel years	180.8	120.8	115.9

10.80 Payroll Services

The Payroll Services element is responsible for the Uniform State Payroll System. The Uniform State Payroll System was adopted by the Legislature in 1951 to provide an effective, efficient, uniform and controllable payroll system which meets the needs of management and employees.

The Uniform State Payroll System performs all of the standard payroll functions. This includes: reporting of withholding and wages for State and federal taxes, and unemployment insurance for covered classes; deducting and reporting of contributions and other data required by the State retirement systems, such as miscellaneous deductions authorized by employees, and the voluntary reductions of wages for investment in tax sheltered annuities and deferred compensation plans; and maintaining employee accounts for the purchase of U.S. Savings Bonds for which bonds are issued monthly.

Input	*1982-83**	*1983-84**	*1984-85**
Expenditures	$6,563	$7,423	$7,535
Personnel years	114.9	190.1	170.5

* Dollars in thousands

20 TAX ADMINISTRATION

Program Objective and Description

The objectives are to provide equitable, effective and economical administration of inheritance and gift taxes, gasoline tax refunds, and certain minor taxes. Effective 8:00 p.m. June 8, 1982 by voter approval of Proposition 6, the inheritance and gift taxes were repealed and replaced with a California estate (pick-up) tax.

The Division of Tax Administration administers the estate tax and the inheritance tax, representing the State in the court determinations of the tax and supervising the activities of inheritance tax referees and also audits and collects gift taxes. The division also collects certain delinquent taxes and audits and refunds taxes paid on gasoline used off-road.

This budget proposes adding nine positions to handle residual Inheritance and Gift Tax workload. Additional funds ($2,160,000 in 1983–84 and $1,395,000 in 1984–85) are proposed for litigation expenses incurred with respect to the Howard Hughes domicile issue. Legislation will be proposed which would raise the Board of Control write-off limit from $25 to $50. This will reduce the audit effort by 0.5 positions. This budget proposes to raise the threshhold for Gas Tax audits from 3,000 gallons, which has a 1:1 cost/benefit ratio, to 6,000 gallons, which has a 3:1 cost/benefit ratio. This change reduces the audit effort by two positions.

20.50 Estate Tax	3.7	20.8	20.8	–	961	979

20.10 Inheritance Tax

Prior to 8:00 p.m. June 8, 1982, an inheritance tax was levied upon the transfer of property from a decedent, either by will or intestate succession, and certain life-time transfers made in lieu of testamentary disposition. An inheritance tax referee appointed by the court from a panel of prequalified applicants appointed by the Controller appraised the property and prepared the Report of Inheritance Tax Due. The Reports were submitted to the Controller's Office for legal review and audit. They were then filed with the court which made its Order Fixing Tax. The tax was paid to State Controller's Office. Effective as to decedents with a date of death after 8:00 p.m. June 8, 1982, as required by Proposition 6 and Chapter 327, Statutes of 1982 (SB 1326), the inheritance and gift taxes were repealed and replaced with an estate (pick-up) tax which is a self-assessing state tax in an amount equal to the credit allowed against the Federal Estate Tax.

The program also includes handling of litigation with respect to inheritance tax matters.

Measures of Effectiveness	*1982–83*	*1983–84*	*1984–85*
1. Percent of payments made timely	36.56%	–	–
2. Percent of decedent's estates raising legal questions in tax treatment	26.5	32%	35%
3. Percent of examined reports with errors detected in tax computation	8.8	12	12

Program Size Indicators			
1. Net inheritance tax revenue	$479,800,000	$105,000,000	$45,000,000
2. Number of new reports received	26,771	14,000	8,000
3. Number of decedents' estates raising legal questions in tax treatment	7,093	4,200	2,800
4. Accounts receivable at year-end: Amount	$164,200,000	$160,000,000	$150,000,000

0840 STATE CONTROLLER—*Continued*

20.20 Gift Tax

Prior to 8:00 p.m. June 8, 1982, the Gift Tax prevented the circumvention of the inheritance tax by gift-making during life. Legislation in 1971 changed this tax to a quarterly self-assessed tax requiring payment with the return. Subsequent to 8:00 p.m. June 8, 1982, as required by Proposition 6 and Chapter 327, Statutes of 1982 (SB 1326), the Gift Tax was repealed.

Measures of Effectiveness	*1982–83*	*1983–84*	*1984–85*
1. Percent of examined returns found to have tax errors	18%	20%	20%
2. Dollar corrections in Self-Assessments:			
a. Additional assessments	$5,900,000	$3,000,000	$1,000,000
b. Refunds	$82,000	$80,000	$10,000
Program Size Indicators			
1. Net gift tax revenue	$8,200,000	$2,500,000	$1,500,000
2. Increase in revenue resulting from compliance program action	$389,249	$300,000	$100,000
3. Increase in revenue resulting from audit program action	$5,800,000	$3,000,000	$1,000,000
4. Number of returns received	4,101	800	50
5. Number of returns examined	11,463	8,000	4,000
6. Returns submitted after compliance program action	781	700	100
7. Delinquent accounts receivable at fiscal year-end:			
a. Number	2,172	2,000	1,800

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$260	$293	$315
Personnel years	8.2	8.9	9.0

20.40 Gas Tax Refund

The Motor Vehicle Fuel License Tax is levied on the distribution of gasoline to support the construction and maintenance of highways and rapid transit systems. The tax is paid at the time of distribution, regardless of the purpose for which the fuel is being acquired. The tax is then passed on to the ultimate user. Users may file a claim with the Controller and obtain a refund of the tax paid on fuel used for certain non-highway purposes.

Measures of Effectiveness	*1982–83*	*1983–84*	*1984–85*
Percent of proper claims paid within 30 days	92.50%	92.00%	92.00%

30 LOCAL GOVERNMENT FISCAL AFFAIRS

Program Objectives and Description

The objectives are to secure uniform and effective local budgeting, accounting and property tax collection procedures and to report, on a timely basis, meaningful financial local governmental information.

This program includes the prescribing of uniform county budgeting procedures and uniform accounting systems for counties and special districts; collection, compilation and dissemination of comprehensive fiscal data for all local agencies and for Public Retirement Systems: reviewing and reporting on the use of State gas tax funds apportioned to local government contracting with Local Transportation Planning Agencies to conduct reimbursed Transportation Development Act audits as required by the Public Utilities Code and California Administrative Code; reviewing and approving county cost allocation plans; and preservation of the local property tax base by prescribing uniform collection procedures, assuring marketable tax titles and prompt restoration of tax delinquent properties to the local tax rolls; and administering the Senior Citizens Property Tax Postponement Program.

To the fullest extent possible, the Controller involves local governmental officials in these activities through membership on various advisory and coordinative committees.

The following changes are proposed for FY 1984–85: reestablish fourteen positions for reimbursable Transportation Development Act audits; add four positions for Transit Report Audits; redirect one position to become an Actuary; add three positions funded through Indemnity Fund for audit of court fines; add two positions for the development of local tax rate report; reduce two positions for lessened reimbursable audits. Also proposed is the addition of six positions for the Senior Citizen's Property Tax Postponement program for mobilehomes. It is estimated that five percent of eligible seniors will participate in the program. If the workload is greater than estimated, more staff will be required.

30.10 Financial Reporting, Budgeting and Accounting

Local Government financial data are collected, compiled and made available in a number of annual publications. County budgets are reviewed; forms, rules and regulations on the preparation of county budgets are prescribed. Two statutory committees of local government officials who serve without remuneration assist the Controller in these matters. Under Section 7504 of the Government Code the Controller must prescribe uniform reporting procedures for all State and public retirement systems. Under Section 30200 of the Government Code the Controller must devise and supervise the installation of uniform accounting procedures for all counties. Assisting is a ten-person "Controller's Committee on County Accounting Procedures", all representatives of local government who serve without pay. Under Section 53891 of the Government Code, the Controller must prescribe uniform accounting and reporting procedures for all special districts. Under Section 71380 of the Government Code, the Controller must prescribe accounting procedures for the municipal and justice courts.

Performance Measures

Annual Report of Financial Transactions Concerning:	*1982–83*	*1983–84*	*1984–85*
Revenue sharing reports	2,737	2,764	2,788
School and special districts, counties and cities	6,852	6,909	6,965
State and local public retirement systems	102	102	102

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,332	$1,466	$1,664
Personnel years	29.4	31.8	36

30.20 Streets and Roads

Data is collected, reviewed, compiled and published in an annual consolidated report concerning street and road financial transactions. By law the Controller must review and report on the use of State gas tax funds apportioned to local government to insure proper use and accounting.

Performance Measures

Gas Tax Reviews:	*1982–83*	*1983–84*	*1984–85*
Gas tax claimed (thousands)	$711,190	$750,000	$775,000

Personnel years	40	47	48.4

30.30 County Cost Plans

Under Office of Management and Budget Circular A-87 each county prepares a county-wide cost allocation plan each fiscal year to receive federal reimbursements for indirect costs of federally supported programs. The federal Department of Health and Human Services delegated to the Controller the authority to review, negotiate and approve such plans and to issue supplemental instructions and procedures to counties.

Performance Measures

County Cost Plan Reviews:	*1982–83*	*1983–84*	*1984–85*
Provisional approvals	15	48	48
Formal agreements	43	10	10
Audit determination	4	–	–

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$426	$243	$253
Personnel years	10.4	4.3	4.3

30.40 Tax-Deeded Land

Provides technical advice and assistance to county officials and others, including Members of the Legislature, to assure uniform and effective interpretation and application of property tax laws. Exercises general supervision over procedure for collection of property taxes and redemption of tax-delinquent property; authorizes and approves tax sales. This control helps ensure sound, marketable tax titles and prevents continuing delinquencies that otherwise would affect the financial integrity of many county governments.

The State's cost of this element is paid through collection by the counties of a redemption fee, half of which goes to the General Fund. They also transmit $1.50 to the General Fund from the sale of each tax-deeded property.

Performance Measures

	1982–83	*1983–84*	*1984–85*
Sales to State	$335,000	$340,000	$345,000
Deeds to State	4,318	5,000	5,500
Parcels approved for sale	4,331	5,000	5,500
Redemption and sales fees	$631,480	$650,000	$1,000,000

* Dollars in thousands

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$350	$423	$346
Personnel years	9.2	10.2	10.3

30.50 Senior Citizens' Property Tax Postponement

Chapter 1242, Statutes of 1977, enacted the Senior Citizens' Property Tax Postponement Program Act of 1977. This Act authorizes the Legislature to provide for the postponement of property taxes on owner-occupied principal places of residence of persons who are 62 years of age or older. On October 1, 1977, the effective date of the Act, the State Controller established a Bureau within the Local Government Fiscal Affairs Division to administer the Act. Chapter 43, Statutes of 1978, extended the Property Tax Postponement Program to include persons who are tenant-stockholders of property in cooperative housing corporations and who occupy as their principal residence a unit owned by the corporation. Chapter 576, Statutes of 1978, extended the program to persons who hold a possessory interest in real property and who occupy as their principal residence a dwelling on the property.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Certificates issued	9,916	10,412	10,880
Active accounts	12,198	12,810	13,390

Expenditures	$529	$530	$657
Personnel years	14.9	15.3	19.2

40 SYSTEMS DEVELOPMENT

Program Objectives and Description

The primary objectives are to provide EDP analysis and programming support to all divisions of the department and to develop personnel, payroll, and accounting reporting capabilities to support the needs of other State departments, control agencies and the Legislature.

Authority

All activities are within authority of the participating departments.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	111.4	105.3	103.5	$4,930	$5,252	$5,472

Input			
Expenditures	$1,446	$1,492	$1,559
Personnel years	38.1	36.4	36.1

50 UNCLAIMED PROPERTY

Program Objectives and Description

The Unclaimed Property Program's main objective is to restore unclaimed property to its true owners or their heirs. While the property is on deposit with the State Controller, the people of California derive the benefit of its use, with the funds subject to claim indefinitely by the owners or heirs. Efforts are being undertaken to increase compliance by businesses with the Unclaimed Property Law in order to ensure maximum protection in reuniting the owners with their property.

This budget proposes increasing advertising efforts in minority based publications. Legislation will be proposed which would reduce the length of time Estate property is advertised from four to two consecutive weeks. Data supports this reduction since we receive very few responses during the second two week period.

Authority

Code of Civil Procedure, Sections 1300–1615.

* Dollars in thousands

0840 STATE CONTROLLER—*Continued*

50.20 Estates of Deceased Persons	5.1	4.7	4.8	208	170	192

50.10 Abandoned Property

Abandoned property, consisting of unclaimed bank deposits, checks, money orders, life insurance proceeds, safe-deposit box contents, etc., must be turned over to the State after a seven year dormancy period if the owner is unlocatable by the holder of the property. The State Controller attempts to locate owners by mailing notices to their last known addresses, and by advertising their names in local newspapers.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Receipts	$27,933,000	$29,050,000	$30,212,000 [1]

60 REFUNDS OF TAXES, LICENSES, AND OTHER FEES

Program Objectives and Description

This program exists for the purpose of refunding the licenses, taxes and other fees erroneously collected and paid into the General Fund for which no other specific provision of the law exists. Funds are also available for payment of prior judgments, liens or encumbrances as provided in Government Code Section 12516, and to cover refunds of taxes in special situations confronting the Franchise Tax Board in which a court of record orders the refund of taxes collected, withheld or transmitted from persons subject to trial and for which no other provision for refund is made by law.

Funds are appropriated each year to provide for expeditious refunds of noncontroversial amounts paid and deposited in the General Fund. This avoids the necessity of filing claims with the Board of Control and inserting items in a claims bill. This program was incorporated into the Controller's budget in the 1978–79 fiscal year.

This budget proposes to add one position for CFIS workload.

Authority

Section 12516, Government Code.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Refunds of taxes, licenses, and other fees *(General Fund)*	$16	$30	$30

70 ADMINISTRATION

Program Objectives and Description

To provide executive direction, general policy determination and management for all office programs and to coordinate and provide major administrative and business management services to the operating units of the office. In addition, the Controller serves on various fiscal boards and commissions including the Board of Equalization, Franchise Tax Board, State Lands Commission, Pooled Money Investment Board, Board of Control, and various bond finance committees.

Authority

Membership by State Controller on boards and commissions, principally:
State Board of Equalization, Const. Art. 13, 7, and 9.
State Board of Control, Gov. 13901.
Franchise Tax Board, Gov. 15700.
Pooled Money Investment Board, Gov. 16480.1.
State Teachers Retirement Board, Ed. 13851.
Various bond and finance committees, Ed. 19510; M.&V. 991; Ch. 765/27, Ch. 23/63, 1st Ex; Water 12933; H.&N. 3902–3; Gov. 17220.
California Exposition and Fair Executive Committee, Agr. 72.1.
State Lands Commission, Pub. Res. 6101.
Reapportionment Commission, Const. Art. 4,6.
Reciprocity Commission, Veh. 2600.
Interagency Council for Ocean Resources, Gov. 8810–11.
California Commission on Interstate Cooperation, Gov. 8003–4.
Intergovernmental Council on Urban Growth, Gov. 34200.

0860 STATE BOARD OF EQUALIZATION

The State Board of Equalization administers thirteen tax programs for support of State and local government activities, more tax programs than any other State department. It administers State, Local and Transit District Sales and Use Taxes; Motor Vehicle Fuel License Tax; Use Fuel Tax; Alcoholic Beverages Tax; Cigarette Tax; Tax on Insurers; Energy Resources Surcharge; Emergency Telephone Users Surcharge; Hazardous Waste Fees and Assessments; Utility Assessments; Private Railroad Car Tax; Timber Yield Tax; and guides local government in the administration of the property tax. The five-member Board was created and named by the Constitution of 1879. Four members are elected, one from each of four equally populated equalization districts, and a fifth, the State Controller, an ex officio member, is elected at large.

The Board has over 60 offices throughout California as well as offices in New York, Chicago, and Houston. The Board administers taxes exceeding $10.4 billion for the State Treasury, more than $2.6 billion in local sales and use taxes, plus some $486 million in local funds derived from utility rolls prepared by the Board.

The Board, as a policy making body, adopts rules and regulations based upon the Revenue and Taxation Code for the administration of the business taxes programs and for the guidance and direction of the Board's property taxes staff, county assessors, boards of supervisors, and local assessment appeals boards in valuing property.

As an appellate body, the Board hears appeals from taxpayers on business taxes audit findings; from county officials on intracounty and intercounty property tax assessments; from public utilities on utility assessments; and from assessees on privately owned railroad cars. The Board is also the appellate body for contested Franchise Tax Board decisions under the personal income tax laws, bank and corporation tax laws and senior citizens property tax relief laws and from appeals from rulings of the Insurance Tax Commission.

An executive secretary, appointed by the Board, implements the policies and directions of the Board. The Executive Secretary is aided by assistant executive secretaries for administration, property taxes, and business taxes.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

15 COUNTY ASSESSMENT STANDARDS PROGRAM

Program Objectives and Description

Through this program, the Board carries out its constitutional and statutory responsibility of ensuring equity and uniformity relative to the assessment of all properties assessed by the 58 county assessors. The Board is also charged with providing county assessors, their staff, and others involved with the assessing function with consultation and services to aid them in the legal distribution of the property tax burden equitably among property owners. The establishing of standards and the effective administration of legally conforming practices in all property assessments by the individual assessor's office are the primary objectives of the program.

Authority

Constitution—Article XIII; Government Code Sections 15606, 15608, 15611, 15612, 15624, and 15640–15646; Revenue and Taxation Code Sections 64, 218.5, 251, 401.5, 407, 452, 480, 480.1, 482, 601, 602, 670–673, 1153, 1254, 5364, and 5781; California Administrative Code—Rules 101, 171, 202, 252, 282–283, 1045, and 1051.

15.10 County Surveys

California taxpayers will pay almost $12 billion in property taxes during 1984–85 to support various local governmental agencies. Approximately ninety-five percent of these taxes will result from valuations based on ad valorem assessments made by the 58 county assessors. Sixty percent of these revenues go to local agencies other than schools, comprising their largest single source of revenue. Schools receive forty percent of the property tax revenues making up twenty-five percent of the funds within their mandated level of spending. Because of the importance of this revenue source to the State, the schools and local government and to assure equitable treatment of all property taxpayers, both within and between counties, it is necessary that a central agency provide direction, supervision, and review of local assessment practices (administrative oversight). The objective of this element is to bring about and maintain an acceptable degree of both intracounty and intercounty conformity to the law at a reasonable cost.

With the tax limits imposed by Article XIII A, as added to the State's Constitution on June 6, 1978, it is imperative that all counties assess at the maximum allowable full value to maintain revenues for local services. A high degree of assessment conformity in all counties is necessary so that the state does not make up a larger share of funding than is necessary and will not oversubvent to school districts in some counties at the expense of those taxpayers in counties complying more fully with the law. Further, with the revised method of sharing the fiscal support for the state's public school system, the state's general fund must make up any shortfall caused by lower than the maximum allowable level of assessments.

Traditionally, the Board has relied upon a field sampling of a randomly selected group of assessments within each of the 19 to 20 counties sampled each year, repeating each county every three years. With the alterations in the assessment system brought about by Proposition 13, this local assessment review procedure has been altered in at least two aspects. First, the sampling does not result in the annual determination of assessment ratios for each of the 58 counties; rather, the sampling produces examples of nonconformity either in policy or practices that cause the local assessment roll to fall short of its maximum allowable value. Secondly, examples of nonconformity are then used in the assessment practices surveys where the causes of the revenue losses are identified or as a starting point for special surveys on particular problems, usually statewide and of fiscal consequence. Currently counties are surveyed on a five year cycle.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

15.10.025 Special topics surveys	1.9	1.9	1.9	87	91	95

15.10.010 Sample Selection and Evaluation

A large preliminary stratified random sample of properties is selected from the locally assessed roll in one-fifth of the 58 counties each year. The properties are then identified as being in one of five assessor-determined categories: 1) those with 1975 base year properties; 2) those with a subsequent sale or other ownership change; 3) those with new construction; 4) those secured roll properties whose values are not covered by Article XIII A; or 5) those assessments on the unsecured roll.

A smaller final sampling is then randomly selected from the larger sample for investigation to measure the extent to which the assessor is in conformity with the laws and rules of the State. [2] Where a lack of conformity exists, or where there is a difference in the value conclusion, the property will be appraised. Once the appraisals have been completed and the results of the survey discussed with the county assessor, the results are analyzed for the determination of trends or other patterns of assessment practice. Estimates of the problem assessed values involved are prepared for inclusion in the Assessment Practices Survey that will follow.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Preliminary sample (classify roll):			
Secured roll	9,600	13,000	14,400

Final sample (conformity)	2,880	3,300	3,600

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	8.9	8.5	8.5	$338	$380	$400

[1] Los Angeles County Survey scheduled for Fiscal Year 1983–84.

[2] A reservoir of potential sample items is available to increase the sample up to an additional 60 items in each county to further evaluate the local assessment program. This number of sample items is reflected in the workload for the years 1983–84 and 1984–85.

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

15.10.015 Assessment Investigation, Field Inspection, and Appraisal

Staff members review official documents and estimate the taxable values of approximately 3,600 individual properties in one-fifth of California counties annually. Assessors' and recorders' records and building permits will be reviewed for proper evaluation of ownership interests and enrollment of new construction. Appraisers field inspect and analyze transfers of properties in the sample and relate them to sales of comparable properties. New construction is investigated to see if it qualifies for enrollment on the assessment roll and to measure the extent of new construction. The types of property reviewed and field inspected include residences, vacant lots, rural, commercial and industrial enterprises, oil and gas fields, mineral properties, and timberland, as well as unsecured assessments. In all instances where the staff observe nonconforming sample items of practices or values, appraisals are made, reviewed with the county assessor at regular intervals, and reported to the assessment practices survey team. Property that appears to have escaped assessment is brought to the assessor's attention for potential inclusion on the local roll.

Using professional appraisal procedures, certified appraisers will field inspect, analyze, and value those same sample property types as indicated in the preceding paragraph, where the transfer is not the result of a sale or where the sales price is significantly inconsistant with comparable property sales then appraisals are made. New construction, whether partial (additions and renovations) or total (new structures), will be valued to determine their contribution to the total property value of the sample item. Non "13" sample items (timber, open space, personalty, etc.) and those selected from the unsecured roll which require annual reassessment by the county assessor will likewise be appraised, reviewed with the assessor, and included in the final report.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Assessments Investigated:			
Records reviewed	2,880	3,300	3,600
Sample items field reviewed	2,880	2,970	3,240
Field Appraised:			
Nonconforming 75 base year	100	104	114
Nonconforming new construction	300	316	340
Nonconforming transfers	330	344	376
Nonconforming not 13	130	136	150
Nonconforming unsecured	240	250	272

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	26.2	28.5	28.5	$1,191	$1,417	$1,492

15.10.020 Assessment Practices Surveys

At least once each five years, a survey is made of the revenue producing activities of each county assessor's appraising, systems and practices, as well as the handling of property tax exemptions. The results of the field appraisal sample are analyzed to determine the causes for the nonconforming practice. Alternative practices or procedures are formulated to alter the practice or plug loopholes in the existing system. A written report is then prepared containing recommendations for improvement or to bring about conformity, to which the assessor may either respond in the report or separately; but the assessor must respond within a year. Both the report and the assessor's response is required by statute to be distributed to the Governor, the Attorney General, the Assessor, the County Board of Supervisors, the Grand Jury, the Assessment Appeals Board, the Senate, and the Assembly. Within two years of the publication of the report, a post-audit to determine the degree of compliance with the Board's recommendations is to be performed. A report will be prepared to summarize the findings.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of surveys completed	12	11	12

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	17.1	13.2	13.2	$759	$656	$690

15.10.025 Special Topics Surveys

As part of the Board's implementation of its constitutional and legislative mandate to oversee the administration of the property tax, the Board has instituted a series of reports, "Special Topics Surveys." These reports are generally conducted statewide to address a single topic or issue which is of current interest and importance to the Board, the Legislature, or other governmental agency where having timely information is important for fiscal and/or legislative decisions.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	1.9	1.9	1.9	$87	$91	$95

15.20 Property Tax Forms and Rules

Property reporting forms and exemption claim forms must be filed annually with county assessors by hundreds of thousands of taxpayers. The Board designs and prepares these forms for county use with a concern for their adequacy, statewide adaptability, and compliance with the law.

The Board is also responsible for the preparation of rules governing assessors, county assessment appeals board, and county boards of equalization.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Forms			
Number of property statement and exemption claim forms prescribed	49	50	50

0860 STATE BOARD OF EQUALIZATION—*Continued*

15.30 Technical Services

Four technical services sections are organized by major functional categories which include real property, personal property, building cost, and systems design and implementation.

The Board's staff replies to inquiries regarding property tax problems from the Legislature, the Governor, assessors, taxpayers, and other public and private agencies. The staff also researches and writes a continuing series of "Letters to Assessors" on statutory changes, court decisions, Board rules and instructions, and conducts workload and salary studies. These letters have taken on more significance with the passage of Proposition 13 because of the inability to maintain the Assessors' handbooks due to a lack of resources. Field training and assistance are given to assessors in the appraisal of the various types of taxable property including specialized properties such as possessory interests, oil and gas properties, and mineral reserves. The Board also issues and updates the handbooks on assessment and appraisal practices for assessors' use to provide uniformity among the 58 counties. The Board's staff assists assessors in developing both computerized and manual systems to improve efficiency in assessment administration.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of directive and advisory "letter to assessors" transmitted	129	150	150
Number of pages in new handbook sections written	118	100	100
Number of pages in handbook sections revised	647	700	700

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	14.4	13.1	13.1	$570	$568	$600

15.40 Certification and Training

In order to protect the public and maintain a high degree of competency all property tax appraisers must be certified by the Board before serving as county or Board appraisers and must pass examinations, either compiled or approved by the Board, prior to being permanently certified. Certified appraisers must then fulfill statutory annual training requirements. The Board also administers an advanced certification program. A file is maintained on the annual training of approximately 3,000 appraisers. A series of appraisal courses is designed and presented by the Board's staff in various counties and at regional and central schools. Training courses developed by county assessors and those conducted by colleges and appraisal organizations are reviewed and approved to ensure the programs meet reasonable training standards.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of appraisers permanently certified	2,450	2,450	2,450
Number of appraisers on assessor's staffs who are not permanently certified	50	50	50
Number of appraisers attending Board courses	700	750	800
Number of appraisers successfully completing Board courses	623	700	750
Number of course sessions offered	32	32	32
Number of workshops offered	7	30	30
Number of appraisers attending workshops	56	450	450
Number of nonappraisers attending workshops	150	200	200

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	6.2	6	6	$312	$340	$359

15.50 Exemptions

The Board has statutory duties with respect to two categories of exemptions. First, each claim for a welfare or veterans organization exemption is reviewed, and a finding, which cannot be overruled by the assessor if the exemption is denied, is transmitted to the county assessor. Second, an intercounty match of homeowner's exemption claims is made, and lists of duplicates are sent to the county assessors involved for a determination of which claims are valid and which claims are entitled to reimbursement by the Controller. The 7.5 million social security numbers of persons receiving the homeowners exemption are provided on magnetic tape to the Franchise Tax Board for its policing of the renters credit. In 1982 this program saved $956,560 in state subventions.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of veterans organization claims reviewed	76	58	60
Number of welfare exemption claims reviewed	8,015	7,680	7,800
Number of welfare properties in claims	12,800	12,000	12,300
Number of disallowed homeowner exemptions disclosed by match	11,957	12,500	13,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	8.3	7.7	7.7	$310	$317	$335

15.60 Contract Auditing Services

This fully reimbursable service is designed to assist state and local taxing authorities by providing auditor and appraisal personnel, on request, to audit the accounting records of selected taxpayers. The service is used primarily by county assessors to meet the legislative mandate that accounts of $200,000 or more must be audited quadrennially.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of audits performed	60	115	115

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	0.9	1.1	1.1	$33	$57	$60

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

15.70 Legal Entity Ownership

The voter-approved initiative in 1978 (Proposition 13) introduced the concept of "ownership change" to the assessing function. At the time the ownership of real property changes, the real property is reappraised as of the date of the ownership change. The change in ownership is generally accomplished by a deed which is recorded and easily discovered by the county assessor. Ownership can change, however, without the benefit of a deed. This is most prevalent where the real property is owned by a legal entity and "control" of the legal entity changes. Section 64 of the Revenue and Taxation Code prescribes that this change in control constitutes a change in ownership of all real property owned by the legal entity.

Such transactions are not associated with the filing of a deed, nor is there generally any public document recording this change. The Franchise Tax Board inserted two questions on the corporate and partnership tax returns to indicate real property ownership and control changes. With the self-declaration of potential ownership change, the Board of Equalization is required to do the following: make a determination as to whether there was either a change in ownership or control; determine whether there is real property involved, and if so, discover its location and notify the county assessors in affected counties that a reappraisal is needed and notify the county assessor when penalties may be levied or abated.

Six-tenths of a personnel-year is being relinquished due to development of an on-line information system giving the user the capability to inquire and perform all file updating via video terminals.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of Franchise Tax referrals	70,224	50,000	50,000
1. Incomplete or missing (clarifying activity needed)	43,935	32,000	32,000
2. Self-declared (definite change of ownership)	5,563	5,000	5,000
Resolutions:			
1. Number of entities with ownership change	263	500	600
2. Number of parcels	2,954	6,000	7,000
3. Estimated value changes	$177,000,000	$432,000,000	$588,000,000
4. Number of penalties levied	1,525	2,000	2,500

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	8.4	7.7	7.1	$314	$270	$271

20 STATE-ASSESSED PROPERTY PROGRAM

Program Objectives and Description

The nature of some taxable property is such that it cannot be valued piece by piece but requires valuation as a unit by an agency whose jurisdiction is statewide. The California State Constitution mandates the Board to estimate the market value and assess annually intercounty pipelines and all of the taxable tangible properties owned or used by railroads, certain public utilities, and private railroad car companies.

The properties subject to state assessment are valued by the Board using standard appraisal techniques. In the case of public utilities, railroads, and the intercounty pipelines, the values thus determined are allocated among the taxing districts in which the property is located for inclusion on county assessment rolls so that taxes may be levied and collected by local governments. For private railroad car companies (except fixed property) the values are placed on an assessment roll, and taxes are levied and collected by the Board for the State General Fund.

Authority

Constitution—Article 13, Section 19; Revenue and Taxation Code—Division 1, Part 2; Division 2, Part 6.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs *(General Fund)*	91.4	89.3	89.3	$3,577	$3,858	$4,073
Program Elements						
20.10 Assessment of Public Utilities	80.8	79.1	79.1	$3,188	$3,431	$3,623
20.20 Private Railroad Car Tax	10.6	10.2	10.2	389	427	450

20.10 Assessment of Public Utilities

State assessees, annually, file property statements with the Board which list all of their properties by situs with the associated costs and provide accounting and financial information on their properties and operations. From this and other information the Board determines the value of each assessee's 'unitary' property as a whole and the value of each nonunitary property. After values are determined and petitions for reassessment have been decided the values (over $47 billion in 1983) are allocated among taxing districts, using the situs information provided in the property statements. These allocated values are further processed to produce a 'board roll' for each county showing each assessee's assessments in each tax-rate area.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of assessees	178	185	185
Market value of property assessed (thousands)	$47,217,384	$51,467,000	$56,050,000
Number of State Board rolls	58	58	58
Number of reassessment appeals	22	29	30

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing element costs	80.8	79.1	79.1	$3,188	$3,431	$3,623
Element Components						
20.10.005 Derivation of Unit Value Indicators	26	25.9	25.9	$1,126	$1,217	$1,286
20.10.010 Field Appraisals	25.6	24.4	24.4	1,046	1,114	1,176
20.10.015 Allocation of Assessed Values to Taxing Districts	15.8	15.6	15.6	547	602	636

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

20.10.005 Derivation of Unit Value Indicators

Various indicators are used to determine the value of the unitary property. Four of the most important indicators are historical cost less depreciation, reproduction cost new less depreciation, capitalized earnings, and market value of stock and debt. Additionally, audits are made of the assessees' books and records to verify the accuracy of the data used to calculate the value indicators.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of unit value indicators computed	484	560	566
Number of audits completed	32	22	30

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	26	25.9	25.9	$1,126	$1,217	$1,286

20.10.010 Field Appraisals

Field appraisals are made of all land, all nonunitary improvements and personal property of state assessees. Properties owned but not used in the primary function of the company such as lands owned by a railroad but leased out for agricultural purposes and properties held in a lessee capacity by state assessees and possessory interests are considered nonunitary and are separately appraised.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of parcels appraised	15,558	14,700	14,700

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	25.6	24.4	24.4	$1,046	$1,114	$1,176

20.10.015 Allocation of Assessed Values to Taxing Districts

The total assessed value of the unitary property of each assessee is divided among the tax-rate areas in which the property is located, substantially in proportion to the reproduction cost new less depreciation of the properties in the several areas. The assessed value of each nonunitary property is assigned to the tax-rate area in which the property is located. Board rolls are prepared for each county showing assessments by tax-rate area, by assessee, and by class of property. These rolls are used by the county auditors in computing the taxes due local government.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of items assessed	408,429	427,769	450,000
Number of tax-rate areas	35,728	38,255	42,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	15.8	15.6	15.6	$547	$602	$636

20.10.020 Preparation and Maintenance of Tax-Rate Area Maps

Maps identifying the boundaries of all tax-rate areas in the state are prepared and updated to reflect boundary changes, formations of new districts, and dissolutions of districts. A tax-rate area is a geographical area in which a unique combination of tax rates apply for the current fiscal year. In 1981 the Board was designated as the certifying agency to the U.S. Bureau of the Census for boundary changes and local reorganizations.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of filings for changes in boundaries processed	1,643	1,500	1,500
Change in number of tax-rate areas	1,700	1,600	1,600

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	13.4	13.2	13.2	$469	$498	$525

20.20 Private Railroad Car Tax

The value of cars is determined by the Board from information required of private railroad car owners and operators on property statements and from other sources. The number of cars in California is computed by determining the days each car spends in the state. After the value and the number of cars for each assessee are established, assessments are prepared, petitions for reassessment are decided, tax bills issued, and revenue is collected.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of assessees	237	246	261
Market value of property assessed (thousands)	$581,697	$554,613	$576,795

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Element Components						
20.20.005 Car-day count	2.3	1	1	$66	$36	$37
20.20.010 Valuing, Assessing, and Collecting the Tax	8.3	9.2	9.2	323	391	413

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

20.20.005 Car-Day Count

Information is obtained from the records of the railroad companies on the movements of each car in and out of the state. This information is accumulated by assessee and class of car. From this record, the total car–days accumulated for the year by each assessee by class of car are ascertained, and this total is divided by the number of days in the year to determine the number of cars to be assessed.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of movements of cars in and out of the state	953,925	969,444	970,000

Input	*82–83*	*83–84*	*84–85*	*1982–83*	*1983–84*	*1984–85*
Expenditures	2.3	1	1	$66	$36	$37

20.20.010 Valuing, Assessing, and Collecting the Tax

The market value of each assessee's cars is determined, and assessments are enrolled. Taxes are extended on the roll at the statewide average general property tax rate including voter-approved debt service. Billings are then prepared and mailed to the assessees. Tax payments are made directly to the Board.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of cars	18,688	22,596	25,308
Number of tax bills issued	237	246	261
Number of tax bills collected	237	246	261

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	8.3	9.2	9.2	$323	$391	$413

25 TIMBER TAX PROGRAM

Program Objectives and Description

The Timber Tax Division administers the Timber Yield Tax by collecting revenue for the Timber Tax Fund; providing local government with data for the valuation of timberland; establishing timber value areas and the immediate harvest values for species of timber within those areas; developing a standard method of timber measurement and conversion factors where the standard cannot be used; and controling and auditing the reporting and self-assessment of the yield tax liability.

Authority

Government Code Chapter 6.7 of Part 1 of Division 1 of Title 5; Revenue and Taxation Code Article 1.7 of Chapter 3 of Part 2 of Division 1 and Part 18.5 of Division 2.

0860 STATE BOARD OF EQUALIZATION—*Continued*

Program Requirements	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Continuing program costs *(Timber Tax Fund)*	38	37.3	37.3	$1,578	$1,676	$1,763
Program Elements						
25.10 Timber and Land Valuation	15.1	12.9	12.9	$676	$667	$702
25.20 Registration of Taxpayers	5	4.8	4.8	179	179	188
25.30 Processing Tax Returns and Harvest Data	7.7	8.8	8.8	284	347	366
25.40 Auditing Accounts	7.8	8.8	8.8	343	402	422
25.50 Collecting Taxes Receivable	2.4	2	2	96	81	85

25.10 Timber and Land Valuation

Forest property appraisers continually obtain land and timber sales data for the purpose of developing regulations, value schedules, and value areas that are consistent with the market. The resulting value tables are subject to adoption under the Administrative Procedure Act and are used by assessors in valuing timberland and by timber owners in determining tax liability.

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	15.1	12.9	12.9	$676	$667	$702

25.20 Registration of Taxpayers

Registration of timber owners harvesting timber enables the Board to furnish the taxpayers with the proper instructions and tax forms for the purpose of reporting tax and harvest data each quarter. The Board establishes an account for each new taxpayer, maintains the account on a current basis, and closes it out when the owner ceases harvesting.

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	5	4.8	4.8	$179	$179	$188

25.30 Processing Tax Returns and Harvest Data

Upon receipt of a tax return, it is processed by the cashier for deposit of revenue receipts, fund allocation, and fiscal accounting purposes. The harvest data reported are compiled and adjusted quarterly through data processing. A delinquency record is established for taxpayers failing to file timely returns and notices are sent to the respective taxpayers.

The returns and harvest data reports are reviewed for mathematical accuracy, proper preparation, and conformance with the laws. Billings or refunds are prepared to notify the taxpayer of errors in self-declared tax and applicable penalty and interest.

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	7.7	8.8	8.8	$284	$347	$366

25.40 Auditing Accounts

Accounts eligible for audit are selected through a process which assures field audit time is used as productively as possible to promote accurate tax reporting and deter evasion. The primary benefit of these audits is to protect the tax base and assist taxpayers in understanding the law and reporting requirements.

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	7.8	8.8	8.8	$343	$402	$422

25.50 Collecting Taxes Receivable

The headquarters office is primarily responsible for collecting taxes receivable. Field personnel make collections and investigations as directed and when it is necessary, locate assets which may be levied upon or which are subject to lien. Headquarters staff supports the field collection efforts by preparing liens, issuing sheriffs' warrants, and maintaining a taxes receivable ledger.

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	2.4	2	2	$96	$81	$85

30 SALES AND USE TAX PROGRAM

Program Objectives and Description

This program is needed to provide General Fund revenue for the state and for cities, counties, and transit districts. The program objective is to ensure that all sales and use tax revenues are collected in an equitable and effective manner by; effecting timely reporting of tax liability, detecting and correcting errors in self-assessments, and promptly collecting amounts determined to be due and economically recoverable.

The State Board of Equalization administers the state's 4¾ percent Sales and Use Tax Law, the 1¼ percent Bradley-Burns Uniform Local Sales and Use Tax Ordinances of cities and counties, and 0.5 percent transactions (sales) and use tax ordinances for the San Francisco Bay Area Rapid Transit District, the Santa Clara County Transit District, the Santa Cruz Metropolitan Transit District, the Los Angeles County Transportation Commission, and the San Mateo County Transit District.

Authority

Revenue and Taxation Code, Division 2, Parts 1, 1.5 and 1.6.

30.40	Collecting Taxes Receivable	280	290	296.6	8,665	9,843	10,541

30.10 Registration of Taxpayers

Registration of sellers and users enables the Board to furnish them with proper tax forms and instructions for purposes of reporting and allocation of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The Board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	483.6	502.9	502.9	$13,592	$15,204	$16,067

30.20 Processing Tax Returns

After the taxpayer files a return, it is processed through the mail processing, cashier, and data processing units for deposit of revenue receipts and fiscal accounting purposes. This accounting includes the proper distribution of local and transit district taxes. A delinquency record is established for taxpayers failing to file returns, and notices are sent to them. Taxpayers whose accounts remain uncleared after a reasonable period are cited to appear at the local Board office to show cause why their permits should not be revoked for failure to file returns.

Returns are reviewed for mathematical accuracy, proper preparation, and application of the law. Billings or refunds are prepared to notify the taxpayer of errors in self-declared tax and applicable penalty and interest. When questionable deductions are observed, the taxpayer is contacted and asked to explain the deduction.

Ten and six-tenths personnel-years are being relinquished due to completion of one-time workloads associated with administering new transit and redevelopment area taxes. Two and one-half personnel-years are being reallocated to the new Universal Telephone Service Tax Program to process workload mandated by Chapter 1143, Statutes of 1983 (AB 1348, Moore Universal Telephone Service Act). Fourteen and six-tenths personnel-years are proposed to accomodate workload resulting from an increased number of tax returns being processed. Seven and six-tenths personnel-years are proposed to process the increased workload resulting from recently enacted tax legislation affecting prepayment requirements and the rate of interest.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	482.7	519.4	528.5	$18,359	$20,526	$21,848

30.30 Auditing Accounts

This activity is statistically designed to cover the tax base in a manner which will result in audits of accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate self-reporting.

A major objective of the audit selection system, which is based on the principle of marginal analysis, is to audit accounts which will produce tax deficiency in excess of the cost of auditing. Tax deficiency is the difference between self-assessed taxes and the final determination of taxes due after auditing.

To assist the field staff in the selection of accounts to be audited, a list of eligible accounts is furnished to each district annually. Taxpayer accounts with similar audit characteristics are classified into one of 16 separate groups (cells) according to the probability of productive audits and average time expended.

Districts use the cell lists together with information in their files to select specific accounts to be audited within recommended quotas. The final step in the selection process occurs when a supervisor or field auditor determines, after field investigation, that an audit should be completed or that an audit is not warranted.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	1,008.7	1,033.2	1,033.2	$36,805	$40,156	$42,434

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

30.40 Collecting Taxes Receivable

Field offices are primarily responsible for the collection of delinquent amounts. The effort expended on each account is consistent with the amount due. Although efforts are made to accomplish collection through use of the telephone or by correspondence, field calls and the utilization of statutory remedies may be necessary to collect larger amounts when other efforts have not been productive.

Headquarters staff supports field collection efforts with actions such as the preparation of liens, issuance of warrants, demands on sureties and personal guarantors, and processes all claims and documents pertaining to bankruptcies, assignments, and probates and referrals to the Attorney General.

Six and six-tenths personnel-years are proposed to process the increased workload resulting from recently enacted tax legislation affecting prepayment requirements and the rate of interest.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	280	290	296.6	$8,665	$9,843	$10,541

35 HAZARDOUS SUBSTANCES TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Hazardous Waste Control Account and the Hazardous Substances Account in the General Fund. The revenue is derived by collecting monthly fees and an annual "Superfund" tax on the generation and disposal of hazardous wastes. The objectives of this program are to ensure that appropriate returns and reports are filed and prescribed fees are paid and taxes assessed and collected in an equitable and effective manner.

Authority

Sections 25174 and 25345 of the Health and Safety Code and Part 22 of Division 2 of the Revenue and Taxation Code.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs (*Reimbursements*)	6.2	8.1	8.1	$237	$331	$346

35.20 Processing Annual Assessments	4.1	3.9	3.9	155	160	167

35.10 Processing Monthly Fees

The Board collects monthly fees imposed upon operators of dumpsites for disposal and persons who dispose of hazardous waste on property owned or controlled by them. The monthly fee is imposed at a tonnage rate established by law. Field audits and investigations are made to assure proper reporting and deter evasion of fees.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Number of taxpayers	175	190	205
Monthly returns processed	2,357	2,280	2,460

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	2.1	4.2	4.2	$82	$171	$179

35.20 Processing Annual Assessments

Persons generating hazardous wastes and who deliver them to a dump site for disposal or dispose of them on-site are subject to an annual tax. These persons are required to file a report with the Board by March 1 of each year setting forth the quantity of hazardous wastes, in each of four categories, disposed of during the prior calendar year. Based upon this information, and a formula prescribed by law, the Board must compute the tax rates and the tax assessment of each person who files a report and mail tax assessment notices by May 1 of each year. These assessments must be paid by July 1. Tax deficiency notices are prepared and mailed to persons failing to file reports or properly pay assessments. Field audits and investigations are made to assure proper reporting and deter tax evasion.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Annual reports and assessments processed	6,713	6,800	6,900

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	4.1	3.9	3.9	$155	$160	$167

40 ALCOHOLIC BEVERAGE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the state General Fund. The program objective is to insure that all Alcoholic Beverage Tax revenues are collected equitably and effectively by; effecting timely reporting of tax liability, detecting and correcting errors in reporting, and promptly collecting amounts determined to be due and economically recoverable.

Self-assessed state excise taxes imposed on the manufacture, importation, or sale of alcoholic beverages in this state are administered by the Board.

40.40 Collecting Taxes Receivable	0.4	0.3	0.3	13	14	15

40.10 Registration of Taxpayers

Persons subject to the Alcoholic Beverage Taxes are identified through licenses issued by the Department of Alcoholic Beverage Control. The Board registers them as taxpayers and furnishes tax returns for the reporting of tax. Accounts are regularly reviewed to determine security requirements. Nontaxpaying common carriers, customs brokers, and out-of-state beer vendors are also registered and supply necessary information reports.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	2.2	2.2	2.2	$55	$58	$61

40.20 Processing Tax Returns and Reports

Alcoholic Beverage Tax returns are filed directly with the Board's headquarters office. The returns are processed through the cashier and the data processing division for deposit of funds and fiscal accounting purposes. The excise tax unit then verifies reported tax computations, notifies taxpayers of apparent discrepancies on returns, and reviews them for proper preparation and application of the law.

A delinquency is established for taxpayers failing to file returns and notices are sent to them. Billings or refunds are prepared for errors in self-declared tax and applicable penalty and interest.

After reports received from common carriers, customs brokers, and out-of-state beer vendors are coded and processed by the excise tax unit and the data center, they are used to verify amounts reported by taxpayers. These informational reports produce an accountability system which enables the Board to effectively monitor taxable and nontaxable transactions in the state.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	15.1	15.2	15.2	$388	$448	$474

40.30 Auditing Accounts

Due to informational reports received from out-of-state beer vendors, common carriers, customs brokers, and reciprocating states, the excise tax unit is able to effectively select for field auditing those accounts which appear to have understated the tax. In addition, audits are made of accounts selected at random to deter tax evasion and to promote accurate reporting.

During the audit process, taxpayers are assisted in understanding the law, rules, and regulations and the proper filing of tax returns and reports.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	6.7	6.8	6.8	$236	$261	$276

* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

40.40 Collecting Taxes Receivable

The excise tax unit is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	0.4	0.3	0.3	$13	$14	$15

45 CIGARETTE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the state General Fund and for cities and counties. The program objective is to ensure that all cigarette tax revenues are collected equitably and effectively by; effecting timely reporting of tax liability, detecting and correcting errors in reporting, and promptly collecting amounts determined to be due and economically recoverable.

The Cigarette Tax is imposed upon distributors of cigarettes at the rate of one-half cent per cigarette (10 cents per standard package of 20) and upon consumers who acquire untaxed cigarettes which are not otherwise exempt from tax. The tax is paid by distributors through the purchase of stamps or meter register units from commercial banks which contract with the state for the issuance of stamps and indicia.

Authority

Revenue and Taxation Code—Part 13, Division 2.

45.50	Collecting Taxes Receivable	0.1	0.1	0.1	3	4	4

45.10 Registration of Taxpayers

Every person desiring to engage in the sale of cigarettes as a distributor or wholesaler must obtain a license for each location at which he engages in such business. This enables the Board to furnish proper forms for the reporting, processing, allocation, and administration of the tax. Necessary security to assure payment of the tax is obtained from licensed distributors. Taxpayers are advised about reporting requirements, records that must be maintained and the application of tax to specific transactions.

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**
Expenditures	0.5	0.5	0.5	$18	$19	$20

45.20 Processing Tax Returns

Forms and instructions are mailed to licensed distributors and wholesalers to enable them to file monthly reports to account for their purchases and distributions of cigarettes, stamps, and meter units, and to enable cigarette manufacturers (who are all licensed distributors) to report tax on sample cigarettes distributed in California. Other reports relating to the acquisition and sale of stamps and meter units are received from banks. Information reports are received from manufacturers and common carriers. After tax reports, stamp and meter unit sales reports, payments from banks, and various information reports are received in headquarters, they are processed to account for tax payments, verify mathematical accuracy, and assure conformity with the law. This information is also used for audit selection. When a timely report is not filed, the taxpayer is notified. If the delinquency is not cleared, revocation proceedings are instituted.

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**
Expenditures	6.7	6.7	6.7	$1,418	$1,438	$1,572

45.30 Auditing Accounts

Field auditing is essential to assure uniform application of the law, deter tax evasion and carelessness in self-reporting, and identify and correct errors in self-reporting. Reconciliations are made in headquarters using data reported by manufacturers, distributors, wholesalers, banks, and others. Immediate corrective action is taken when underreported tax is indicated. This headquarters function assures payment of the underreported tax on cigarettes received from legitimate sources, however, it does not provide an adequate control of cigarettes obtained from illegal sources. Field audit activities are designed to identify cigarettes from those sources and take appropriate action.

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**
Expenditures	2.8	2.8	2.8	$102	$111	$118

45.40 Enforcement Activities

Enforcement activities are designed to prevent loss of revenue through tax indicia counterfeiting, bootlegging, smuggling and illegal sales of cigarettes.

Field inspections are made of distributors' stamping machines to see that indicia is properly affixed, clear, and legible. Inspections also are made of cigarette stocks in retail stores, and in vending machines to assure that all packages are properly stamped.

Cigarette wrappers bearing indicia are collected on a regular basis throughout the state and sent to laboratories for analysis to verify that they are genuine. Any counterfeit stamp can be traced to the area in which it was collected, and a field investigation initiated to determine the source.

Liaison is maintained with all federal, state, and local law enforcement agencies.

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**
Expenditures	1.8	1.8	1.8	$60	$64	$68

45.50 Collecting Taxes Receivable

The excise tax unit is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien. The headquarters staff supports the field collection efforts with various actions, such as preparing of liens, issuing sheriffs' warrants and maintaining the taxes receivable ledger.

50 MOTOR VEHICLE FUEL LICENSE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Transportation Tax Fund, Aeronautics Fund, Harbor and Watercraft Revolving Fund, Off-Highway Vehicle Fund, and Department of Agriculture Fund. The program objective is to ensure that the Motor Vehicle Fuel License Tax is administered equitably and effectively by: effecting timely reporting of tax liability, and detecting and correcting errors in taxpayers' self-assessments.

The nine cent per gallon gasoline tax is imposed upon refiners, importers, and wholesale distributors on their distributions to retailers. A two cent per gallon tax is imposed on sales of aircraft jet fuel by dealers to certain users. The State Controller shares responsibility with the State Board of Equalization for the administration of this tax by collecting delinquent tax and making refunds to consumers who use gasoline in an exempt manner.

55 USE FUEL TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Transportation Tax Fund. The program objective is to ensure that all Use Fuel Tax revenues are collected in an equitable and effective manner by effecting timely reporting of tax liability, detecting and correcting errors in taxpayer self-assessment and promptly collecting amounts determined to be due and economically recoverable.

The Use Fuel Tax is imposed on users of diesel fuel at nine cents per gallon, liquefied petroleum gas and liquid natural gas at six cents per gallon, and compressed natural gas at seven cents per 100 cubic feet, measured at standard pressure and temperature. The tax applies on use of these fuels in motor vehicles on California highways. An annual flat rate amount may be paid for vehicles using liquefied petroleum gas, liquid natural gas or compressed natural gas. All users must hold permits, file returns, and pay applicable tax. The tax is collected by vendors on that portion of the fuel sold and delivered into the fuel tanks of motor vehicles. These vendors hold permits, file returns, and report the tax.

55.40 Collecting Taxes Receivable	8.9	8.8	8.8	293	316	331

55.10 Registration of Taxpayers

Registration of sellers and users enables the Board to furnish them with proper tax forms and instructions for purposes of reporting and processing of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The Board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	30	29.1	29.1	$919	$980	$1,023

55.20 Processing Tax Returns

After the taxpayer files a return, it is processed through the mail processing, cashier, and data processing units for deposit of revenue receipts and fiscal accounting purposes. Delinquencies are established for taxpayers failing to file returns and notices are sent to them.

Returns are verified for mathematical accuracy and reviewed for proper preparation and application of the law. When questionable deductions are found, the taxpayer is contacted and asked for an explanation. A control system is maintained to assure the accuracy of credits claimed by users for tax paid to vendors.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	33.7	32.8	32.8	$1,017	$1,088	$1,136

55.30 Auditing Accounts

This activity is planned to assure uniform application of the tax by detecting and correcting errors in reporting and is statistically designed to cover the tax base in a manner which will audit accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate reporting. A major objective of the selection system is to audit accounts which will produce tax deficiencies in excess of the cost of auditing. To assist the field staff in selection of accounts to be audited, a list of eligible accounts is furnished to each district yearly. Eligible accounts are grouped into eight tax intervals in descending order according to annual tax reported.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	19	18.6	18.6	$720	$765	$799

[2] Includes Flat Rate Returns and prepayment reports beginning with the 1983–84 fiscal year.
[3] Includes Flat Rate fees.
[4] Includes investigations which resulted in field billing orders.
* Dollars in thousands

0860 STATE BOARD OF EQUALIZATION—*Continued*

55.40 Collecting Taxes Receivable

After the finality date of billings, field offices are primarily responsible for collection action including the use of mail, telephone, and personal contacts. Necessary investigations are made by the field staff to locate assets subject to lien or execution proceedings. Motor vehicles may be seized and thereafter sold when necessary to effect collection of the tax. The object is to bring about payment with the least delay.

In addition to field collection activities, liens are automatically recorded by headquarters seven weeks after the finality date where the amount owed is $100 or more. If the delinquent amount is owed on an active account, a "notice of hearing" preparatory to revocation action is issued simultaneously with the recording of the lien.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	8.9	8.8	8.8	$293	$316	$331

60 ENERGY RESOURCES SURCHARGE PROGRAM

Program Objectives and Description

This program is needed to provide revenues for the state Energy Resources Programs Account, General Fund. The objective is to administer a surcharge on the consumption of electricity.

Administration of this surcharge on consumers of electrical energy includes registration of electric utilities required to collect the surcharge from consumers; registration of consumers purchasing electrical energy from the United States; processing tax returns; auditing accounts; collecting taxes receivable; resolving petitions for redetermination and claims for refund and advising taxpayers regarding the law.

Authority

70 INSURANCE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the state General Fund. It is estimated that this tax will produce $535 million in General Fund revenue in 1984–85. The objective is to assess taxes on insurance premiums and on the ocean marine profits of underwriters and to levy retaliatory assessments against "foreign" insurers.

The program is administered jointly by the Board, the Controller and the Insurance Commissioner. The Board is responsible for assessing the tax and adjudicating petitions for redetermination and claims for refund.

The Board renders an annual assessment against each insurance company based on the net premiums on California business other than ocean marine insurance, and the average annual underwriting profit on ocean marine business. It also imposes a retaliatory tax on any out-of-state company doing business in California whenever that company's home state subjects a California company doing business in that state to a greater burden than California imposes on insurers domiciled in that state. The Board also hears taxpayer appeals and makes decisions to grant or deny petitions for redetermination and claims for refund.

75 UNIVERSAL TELEPHONE SERVICE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Universal Telephone Service Fund. The objective is to administer the collection of a tax from service suppliers that is to provide funding for instituting universal telephone service for eligible residential persons who might otherwise be unable to afford basic minimum telephone service.

Administration of this tax on service suppliers includes their registration; processing tax returns; auditing accounts; collecting taxes receivable; resolving petitions for redetermination and claims for refund; and advising taxpayers regarding the law.

Two and one-half personnel-years are being reallocated from the Return Processing Element of the Sales and Use Tax Program to process the workload generated by Chapter 1143, Statutes of 1983.

Authority

80 APPEALS FROM OTHER GOVERNMENTAL PROGRAMS

Program Objectives and Description

A method of independent review is necessary when a taxpayer disagrees with actions taken by the Franchise Tax Board. The Board of Equalization provides this necessary appellate procedure.

There is also a need for an impartial tribunal that decides disputes between entities of local government relative to assessments and equalization on local rolls of taxable property of a county, city, city and county, or municipal corporation. The objective is to render sound and equitable administrative appellate decisions in an expeditious manner.

In the case of franchise and income tax and senior citizens property tax appeals, a taxpayer files a written notice with the Board to initiate the appeal action.

In the case of intracounty equalization appeals, the review action is initiated when the local public entity which owns taxable property outside its jurisdiction files an application for review, equalization, and adjustment of the assessment with the Board.

Authority

(1) Franchise and Income Tax Appeals: The Revenue and Taxation Code Sections 18593 to 18596, 18621, 18646, 18648, 19057 to 19061.1, 19062.2 to 19062.5, 25666, 25667, 25701, 25701a, 25731a, 25761a, 26075 to 26078 and 26060.1. Procedural regulations regarding appeals from the Franchise Tax Board are contained in Title 18, California Administrative Code, Chapter 2, Subchapter 10, Sections 5021 to 5027 and 5071 to 5080; (2) Senior Citizens Property Tax Assistance: Section 20645 of the Revenue and Taxation Code; and (3) Intracounty Equalization: Section II of Article XIII, California Constitution, and Sections 1840 and 1841 of the Revenue and Taxation Code. The procedural regulations are contained in Sections 451–458, Chapter 1, Title 18, California Administrative Code.

80.10 Franchise and Income Tax Appeals

Action is initiated after a taxpayer files a written notice with the Board of Equalization. The legal staff secures the framing of the issues of law and fact by means of memoranda and stipulations of the parties. After an oral hearing before the Board, the case is referred to the Board's legal staff for review, analysis, and preparation of a written opinion and decision reflecting the views of the Board of Equalization.

80.20 Senior Citizens Property Tax Assistance

A taxpayer files a written notice to initiate action with the Board of Equalization. This appeal is ready for Board decision upon receipt of a re-review statement from the Franchise Tax Board whereupon a framing is secured by the legal staff regarding the issues of law and fact. Upon submission, the Board makes a determination and informs the claimant of its decision.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Expenditures	0.2	0.2	0.2	$10	$11	$11

80.30 Intracounty Equalization

Action is initiated when the local public entity which owns the property files with the State Board of Equalization an application for review, equalization, and adjustment of the assessment imposed by the county or city in which the property is located. The assessor may file an answer. A prehearing conference is conducted by a member of the Board's legal staff to define the issues and arrange for stipulations and exchange of exhibits. A formal hearing is conducted before the Board which renders a written decision with findings of fact, conclusions, and an order.

85 ADMINISTRATION PROGRAM

The objectives of this program are to implement the policies and directives of the elected Board Members, and to provide direction, leadership, planning, and supportive services for all Board programs.

These activities are provided by the executive secretary, assistant executive secretaries, and the chief counsel. It also includes administrative staff services reporting to these positions.

90 LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231 of the Revenue and Taxation Code requires the State to pay local governmental units the cost of any new program or increased level of services of a program mandated by legislation enacted after January 1, 1973. The department has one legislatively mandated program (Chapter 1102/83) which requires counties to establish a supplemental property tax roll. This legislation also appropriates $10 million to reimburse counties for the costs of establishing that roll which exceed the counties' five percent share of the additional revenues generated.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs *(General Fund)* [1]	–	(10,000)	–

[1] Funding for this mandate for 1983–84 is provided in the budget for "State-Mandated Local Programs," (Department 9680) in the General Government portion of the Budget, data shown here is for information purposes only.

0890 SECRETARY OF STATE

The principal objectives of the Secretary of State's Office are to examine numerous types of documents for statutory compliance; to file such documents as a matter of public record; to administer and enforce election laws and procedures; to appoint notaries public and to enforce the laws relating to the conduct of notaries public; to access and preserve records having historical significance and to make such records available for public use.

The office administers seven major programs: Corporate Filing, Limited Partnerships, Elections, Political Reform, Uniform Commercial Code, Notary Public, and Archives.

05 CORPORATE FILING

Program Objectives and Description

The Secretary of State staff examines articles of incorporation and related documents to assure that corporations are formed, merged, dissolved, etc., in compliance with California law. The program provides proprietary control over the formation of corporations which, in turn, allows for the protection of the public interest in such matters. The program also calls for the recording of names and addresses of corporate officers, directors and agents for service of process. Trademarks and service marks are also registered. The program provides for the dissemination of information contained in the filed documents. Filed documents are open to public inspection, and copies are available upon request.

07 LIMITED PARTNERSHIPS

Program Objectives and Description

Limited Partnerships is a new program authorized by Chapter 807, Statutes of 1981 as amended by Chapter 997, Statutes of 1982 and by Chapter 1223, Statutes of 1983. The Secretary of State's staff will examine certificates concerning newly formed limited partnerships to assure that pertinent information concerning the partnerships is documented and filed as a matter of public interest. In addition, existing limited partnerships are required to file Certificates of Limited Partnership. This transition filing will allow for the establishment of a complete central file for California limited partnerships. Related amendments and documents concerning the dissolution of partnerships will also be filed. The documents will be available for public inspection, and copies or information relating to them will be available upon payment of fees.

Limited partnerships have previously filed similar documents with County Recorders. The legal and business communities, as well as the general public, have not been able to obtain information readily concerning limited partnerships because the records have been spread over 58 counties. This program will centralize filings allowing information to be obtained from one source.

Chapter 1223, Statutes of 1983, delayed full implementation of the Limited Partnership Program by six months to July 1, 1984. The legislation also authorized a transition period in the current fiscal year, during which time existing limited partnerships on file with county clerks may file limited partnership papers with the Secretary of State. As a result, 18.1 personnel years in the current year will not be required, and the savings has been redirected to fund workload increases in the Uniform Commercial Code Program, data processing support for that program and for election activities, workload increases in fiscal services, a rental increase, and a cost rise in Teale Data Center charges.

In the budget year, the new version of the program will require four personnel years less than originally scheduled. Savings continue to be redirected to partially offset the costs of extending the current year changes noted above.

Authority

Corporations Code, Title 2, Chapter 2, commencing with Section 15511.

10 ELECTIONS

Program Objectives and Description

The Secretary of State, as California's chief election officer, ensures that the State's election laws are complied with in a uniform manner. Technical information and legal opinions are issued for the public, Legislature, and local election officers regarding election laws and procedures. The continuing complexity of the State's election system requires increased vigilance by the Secretary of State, as well as the promulgation of appropriate rules and regulations to insure that the State's election laws are uniformly and adequately observed. In addition, the Secretary of State certifies to the nomination and election of state candidates, and the office is the central repository for voter registration data and official election results.

Authority

Constitution, Elections Code, Government Code, Federal Voting Rights Act and the Federal Overseas Voting Act.

0890 SECRETARY OF STATE—*Continued*

15 POLITICAL REFORM

Program Objectives and Description

The Secretary of State shares the responsibility for enforcing the California campaign disclosure laws enacted as the Political Reform Act of 1974. Under this law the Secretary of State is charged with reviewing all campaign receipts and expenditure statements from candidates, committees, and ballot measure proponents and opponents and their committees; registering lobbyists and reviewing and publishing lobbyist and lobbyist employer monthly expenditure reports.

Chapter 415, Statutes of 1976, requires the Secretary of State to print and make available to the public all registrations and amendments thereto of persons qualifying as lobbyists under the Political Reform Act of 1974.

Authority

Government Code (Title 9, Political Reform).

Revenue (in thousands)	$69	$40	$60

20 UNIFORM COMMERCIAL CODE

Program Objectives and Description

This program provides for the filing of financing statements and related documents so that a secured creditor may perfect a security interest in personal property covered by a security agreement as against other creditors. Not only does this program afford a secured creditor some protection against debtor bankruptcy, insolvency or default, but it also provides a prospective lender or seller the means to determine if there are any previously perfected security interests involving certain personal property. The division further files notices of federal tax liens against partnerships and corporations, state tax liens and attachment liens against personal property and judgment liens. The Secretary of State's staff examines all documents presented for filing for statutory compliance. The documents are then filed and open to public inspection. Certificates of filing and copies of filed records are available upon request.

Ten positions (5.7 personnel years) for workload increases have been established administratively in the current year from Limited Partnership Program savings and are proposed for permanent establishment (9.8 personnel years) in the budget year, financed partially through other programs' savings and largely through new funds. Overall workload for this program has increased by 26 percent since 1982–83. The objective of funding the ten positions is to assure timely service to the state's financial and business community.

Authority

Uniform Commercial Code, Chapter 4, Division 9 and 10 and 11; Uniform Federal Tax Lien Registration Act; Chapter 14, Division 7 of Title 1 of the Government Code; and Chapter 14.5, Division 7 of Title 1 of the Government Code relating to the registration of State tax liens; Section 488.340 of the Code of Civil Procedure relating to attachment liens; Division 2, Chapter 1, Article 3, Section 697.510 of the Code of Civil Procedure relating to judgment liens.

25 NOTARY PUBLIC

Program Objectives and Description

The business community and general public is served through the appointment of notaries public who perform certain official acts and give official recognition and authenticity to acts and documents executed in their presence. Many documents to be legally or officially acceptable must be notarized. Notary public services are generally related to oaths, affirmations, affidavits, depositions, and acknowledgments. Applications for a notary public commission are reviewed to determine that applicants meet the requirements for appointment. Appointments are for four-year terms and under such an appointment, a notary may render notarial services throughout the State. The Secretary of State further investigates improper conduct on the part of the notaries public and takes appropriate disciplinary measures if warranted.

Authority

Government Code, Chapter 3, Division 1, Title 2.

30 ARCHIVES

Program Objectives and Description

The State Archives collects, catalogs, indexes and preserves historic and otherwise valuable documents from a wide range of origins including county and city records as well as state papers. The Archives serves the public directly and assists state agencies and private and semiprivate institutions by providing an organized record of California history. Without this program for collecting historic documents, many valuable and needed records would be lost or otherwise destroyed, leaving the state with a reference vacuum that could not be filled. The State Archives at 1020 O St., Sacramento, maintains an exhibit hall which is open to the public on a daily basis. Support for the California Heritage Preservation Commission is included in the support for the State Archives.

The 1984–85 budget proposes to add a clerical position to provide secretarial support to the Division Chief.

Authority

Government Code Sections 12153, 12220–12231, California Administrative Code, Title 5, Section 16028.

35 ADMINISTRATION AND STAFF SERVICES

Program Objectives and Description

Management control and staff support are provided to line functions with emphasis on personnel, fiscal, data processing and general administrative services. This provides the office with a means for continuing evaluation of its programs for greater responsiveness to program requirements. Through analytical studies, development of personnel, fiscal and other administrative options developed by administrative staff, the executive staff to the Secretary of State is able to establish policy, plan and direct the various programs administered by the Department. Fiscal, personnel, electronic data processing, system analysis, computer programming and management analysis functions contribute significantly to the executive and administrative direction provided by management.

* Dollars in thousands

0890 SECRETARY OF STATE—*Continued*

The current year budget redirects Limited Partnership program savings to administratively establish: 5 key data operator positions (2.6 personnel years) and 2 additional personnel years in temporary help to assist in the key data entry workload; and an Associate Budget Analyst position to provide budget support for the office. The 1984–85 budget proposes to permanently establish the positions described above as well as to add a Personnel Assistant to address permanent workload increases. Budget year staffing changes, after salary savings, equal 7.8 personnel years.

40 SUBVENTIONS FOR SIGNATURES IN LIEU OF FILING FEES (Local Assistance)

Program Objectives and Description

Section 16100.6 of the Government Code waives the requirement for a filing fee when petitions signed by a specified number of registered voters in the area to be represented are filed by a candidate for public office.

Funding for this mandate is provided in the budget for "State-Mandated Local Programs" (Department 9680). Data shown here in parentheses are for information purposes only.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Totals, Signatures in Lieu of Filing Fees *(General Fund)*	–	–	–	$369	–	–

45 SUBVENTIONS TO COUNTIES FOR VOTER REGISTRATION FILE PURGE (Local Assistance)

Program Objectives and Description

Chapter 1401, Statutes of 1976, Chapter 780, Statutes of 1977, and Chapter 3, Statutes of 1978, amend the procedures for purging nonvoters from the voter registration files. Chapter 1401, Statutes of 1976, and Chapter 780, Statutes of 1977, require that local government be reimbursed for any one time net cost associated with the purge.

It is expected that savings will be realized for general elections because voter files will be more accurate than before. For this reason, appropriations for this program will be for the net primary costs resulting from both the primary and general elections considered together. Funding is required in alternate fiscal years.

Funding for this mandate is provided in the budget for "State-Mandated Local Programs" (Department 9680).

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Voter Registration File Purge *(General Fund)*	$912	–	–

50 SUBVENTIONS TO COUNTIES—REGISTRATION BY MAIL

Program Objectives and Description

Section 304 of the Elections Code requires each county to design and implement a program to identify qualified electors who are not registered to vote and to register said persons to vote. Chapter 704, Statutes of 1975 provides for a voter registration-by-mail program. Section 91 of Chapter 704, Statutes of 1975 provides that counties shall be reimbursed for any net cost associated with the implementation of Chapter 704 including any program required pursuant to Section 304 of the Elections Code.

Funding for this mandate is provided in the budget for State-Mandated Local Programs (Department 9680).

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Registration by Mail *(General Fund)*	$630	–	–

0890 SECRETARY OF STATE—*Continued*

55 LEGISLATIVE MANDATES (Local Assistance)

Program Objectives and Description

Chapter 1001, Statutes of 1974 (AB 2803) appropriated $600,000 to the Controller to reimburse local governments for costs incurred in 1974–75 in carrying out Chapter 1177, Statutes of 1973, which specified the size of all election ballot pamphlets to be 8½" x 11" and specified minimum sizes of type. The Board of Control ruled that local governments be reimbursed by the State for similar costs incurred thereafter.

Funding for this mandate is now provided in the budget for "State-Mandated Local Programs" (Department 9680).

Program Requirements	*1982–83**	*1983–84**	*1984–85**

0910 COMMISSION ON VOTING MACHINES AND VOTE TABULATING DEVICES

Pursuant to Chapter 246, Statutes of 1976, the State Commission on Voting Machines and Vote Tabulating Devices was mandated to study and adopt regulations governing the use of voting machines, voting devices, and vote tabulating devices.

The Secretary of State, as Secretary of the Commission, made all arrangements for the time and place to examine voting equipment proposed to be sold in California. In addition, the Secretary furnished complete reports of the findings of the examining engineers and had the ongoing responsibility for verifying that the equipment used in elections was operable in every election.

Effective January 1, 1983, the duties of the Commission were transferred to the Secretary of State pursuant to Chapter 1190, Statutes of 1982.

0950 STATE TREASURER

The State Treasurer provides banking services for State government with a minimum interest and service cost and with a maximum yield on investments. He is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of temporarily idle State monies; administration of the sale of State bonds, their redemption and interest payments; and payment of warrants drawn by the State Controller and other State agencies. The State Treasurer is also responsible for reviewing the financial soundness of certain local district construction financing proposals.

10 BOND SALES AND SERVICES

Program Objectives and Description

This program element includes the selling, issuing, servicing and redeeming of all State of California general obligation and revenue bonds. Interest costs are minimized through a planned bond marketing program. This includes the offering of complete bond services to present bond holders, including flexible bond registration and maintenance of paying agents in New York and Chicago.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Value of bonds sold (in millions)	$2,595 [1]	$2,585 [1]	$2,790

[1] These figures do not include the sale of short term State revenue notes in the amounts of $1.3 billion sold Feb/Mar 1983 and $2.2 billion sold July/Aug 1983.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20 INVESTMENT SERVICES

Program Objectives and Description

The State Treasurer has the responsibility for investment of State moneys from the day of receipt until the day that warrants issued to expend these receipts are presented to the State Treasurer's Office for redemption. During the 1982–83 fiscal year, this office handled 9,124 security investment transactions totaling $95.6 billion. The Pooled Money Investment Board program accounted for 8,860 of these transactions totaling $94.5 billion. The remaining $1,120 million was distributed among other investment programs such as California Housing Finance Fund, Central Valley Water Project and Construction Fund and Marketing Trust Account. Cash management for these programs includes a comprehensive cash forecasting system which permits the purchase of longer term securities, thus maximizing the return from these funds.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Total revenue (in millions)	$549	$600	$625

General Fund				*558*	*654*	*676*
Reimbursements				–	*10*	*20*

30 PAYING AND RECEIVING

The State Treasurer provides banking services for all State agencies. Included in this element are the deposit of State moneys in the State Treasury and centralized banking system and the redemption of all State warrants.

In the current year, 1.0 clerical position was administratively established and two positions are proposed in 1984–85 for processing the state warrants issued for the In-Home-Supportive-Services Program. As a result of a decrease in the issuance of unemployment insurance warrants, two positions are proposed for reduction in the budget year.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Dollars received (in billions)	$202	$208	$214
Number of warrants paid (in millions)	59	60	61

Reimbursements				*582*	*558*	*600*

40 TRUST SERVICES

The State Treasurer is responsible for the safekeeping of all securities and other personal property owned by or pledged to the State. These securities are held in the Treasurer's vault or in approved depositories such as the Federal Reserve Banks in San Francisco and Los Angeles. As of June 30, 1983, the Treasurer was responsible for over $36 billion in securities. During the past year, 20,065 security receipts and releases were prepared and processed involving 488,658 securities. In addition, 1,615,744 coupons, representing the interest increment on bonds held, were clipped and processed for collection during Fiscal Year 1982–83. *Management responsibilities have been consolidated and reprioritized, resulting in the proposed reduction of 1.0 professional position in the budget year.*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of security receipts and releases	20,065	19,100	18,500

0950 STATE TREASURER—*Continued*

50 DISTRICTS SECURITIES DIVISION

The California Districts Securities Division is charged with the supervision of certain fiscal proposals and physical operations of irrigation districts, water districts, water storage districts and certain other types of districts and local entities of the State of California.

The Districts Securities Commission was established in 1931 as a result of a special investigation by the California Irrigation and Reclamation Financing and Refinancing Commission following the default of many irrigation and other districts in payment of principal and interest due on outstanding bonds. The Districts Securities Commission succeeded the Bond Certification Commission which had been created in 1911. Since the creation of this Commission, there has not been a default in payment of principal or interest due on bonds approved by the Commission.

The Districts Securities Commission became a division in the State Treasurer's Office effective November 10, 1969, in accordance with the Governor's Reorganization Plan No. 1.

Performance Measures	*1982-83*	*1983-84*	*1984-85*

0960 LOCAL AGENCY INDEBTEDNESS FUND LOAN PROGRAM

Pursuant to Chapters 292, Statutes of 1978, and 512, Statutes of 1980, the Pooled Money Investment Board authorizes loans to local agencies out of the Local Agency Indebtedness Fund. These loans are to provide relief from the temporary difficulties brought about by the approval of Proposition 13 in the June 1978 election and were for the purpose of making payments due on certain non-voter approved bonds. These loans have a maximum repayment period of 20 years.

The expenditures displayed below are the costs of administering the loan program.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**

0970 CALIFORNIA DEBT ADVISORY COMMISSION

The California Debt Advisory Commission was created by the enactment of Chapter 1088, Statutes of 1981. The purposes of the Commission are to assist the Housing Bond Credit Committee; to assist, upon request, state or local government units in the planning, preparation, marketing, and sale of new debt issues; to collect and provide information on outstanding debt authorizations; to serve as a statistical center for all state and local debt issues; and to undertake studies on the methods to reduce costs and improve the credit ratings of state and local issues.

The Commission consists of nine members including the Treasurer, who is designated as chairman, the Governor or Director of Finance, the Controller, and two local government finance officers appointed by the Treasurer. Two members of the Assembly and two members of the Senate also serve as members of a joint interim Committee and as advising members of the Commission.

The Commission is authorized to require notification of all debt issues and is authorized to charge fees based upon the size of debt issues, not to exceed one-fortieth of one percent of the principal amount of the issue and not to exceed $5000 for any one issue. This activity involves no General Fund, revenues or expenditures.

STATE AND CONSUMER SERVICES

1100 MUSEUM OF SCIENCE AND INDUSTRY

The Museum of Science and Industry is an educational, scientific and technological center administered by a nine-member board of directors appointed by the Governor. It is located in Exposition Park, a 104-acre tract just south of the central part of Los Angeles, which is owned by the State in the name of the museum.

In a number of State-owned buildings, it presents a series of exhibits and conducts associated programs centering on the scientific and industrial development of the State. In addition, it has responsibility for the operation of parking facilities for visitors to the park, the museum, and the Los Angeles Coliseum and Sports Arena.

10 EDUCATION

Program Objectives and Description

The program performed by the Museum of Science and Industry exhibits man's scientific and industrial capabilities and accomplishments. The director and his staff, in cooperation with the nine-member board of directors, administer the museum operation. They also have responsibility for the security and operation of the museum's buildings and Exposition Park.

The primary purpose of this educational program is to create and stimulate the interest of Californians in the fields of science, industry, and economics. It is particularly geared to reach the largest possible number of the State's young people, with the anticipation that some will pursue scientific, industrial, and economic careers and thereby provide California with needed talent in these fields. The program in addition to permanent, temporary and traveling exhibits, consists of lectures, seminars, films, science workshops and teaching institutes led by eminent scientists from all over the country. A major portion of these latter activities is financed by the Museum Foundation Fund which is supported by private contributions. Admission to the museum's exhibits is free, and attendance records underscore continued public interest.

The program performed by the California Museum of Afro-American History and Culture preserves and displays the contributions of Afro-Americans to the arts, science, religion, education, literature, entertainment, politics, sports, and to the history and culture of California and all countries and peoples. The director and staff, in cooperation with the seven-member advisory board, administer the museum operation.

The purpose of this educational program is to promote awareness and understanding of the accomplishments and contributions of Afro-American culture and heritage. The program consists of permanent, temporary and traveling exhibits, lectures, seminars, films and cultural presentations to young people and adults in the surrounding community, California, and visitors from all over the world. It is anticipated that the Afro-American Museum Foundation will support some of these activities.

The Museum of Aerospace Science will serve as a national educational model filling a gap between the public's growing use of the benefits of space exploration and research, and its limited understanding of the basic use of these achievements in their daily lives. The new building will house exhibits to be provided by private sources and classrooms, an auditorium, offices and workrooms. In addition, an IMAX theater will be built and funded by the California Museum Foundation. This building when completed in June of 1984 will be only the sixth such theater among the museums in the United States.

In order to correct a technical error made when reflecting legislative action in the 1983–84 budget, 15.7 personnel years are reduced in the 1983–84 and 1984–85 fiscal years. This adjustment does not affect funding.

Staffing and operating expenses have been provided in 1984–85 to operate and maintain the Museum of Aerospace Science and the Afro-American Museum which will be completed by July of 1984. This has resulted in an increase of 22.5 personnel years and $495,000.

The 1984–85 fiscal year proposes a net increase of $967,000 for improved security at the Museum. This includes the purchase of equipment, i.e., tv cameras and monitors, security alarms, etc. This proposal will result in the elimination of 19 personnel years in the security area for a savings of $407,000. This savings will be redirected to pay the cost of a contract with the state police to provide outside security to the Museum complex and Exposition Park.

20 ADMINISTRATION

The administrative staff of the Museum of Science and Industry operates under the general direction of the Museum Director and provides personnel, budgeting, planning and clerical services in support of the museum program. This function assures the proper operation and maintenance of all plants and facilities and is responsible for the operation of twenty-six acres of public parking.

The 1984–85 fiscal year reflects a proposed increase of 3.8 personnel years and $159,000 in administration to address the increased workload as a result of the three new buildings.

SUPPLEMENTAL INFORMATION

The expenditures reflected below are being displayed for informational purposes only and are not included in overall budget totals. The California Museum Foundation of Los Angeles is a nonprofit corporation which functions as membership auxiliary to the museum. It was established in 1950 for the purpose of soliciting and providing funds to acquire and maintain exhibits to be displayed at the museum and assisting in the establishment and operation of educational activities of the museum. Due to different fiscal years there is a lag of 9 months.

03 BOARD OF ACCOUNTANCY

A greatly increased percentage of the public and the business structures serving that public are now requiring the services of certified public accountants and public accountants because of the dramatically increased complexity in laws affecting business operations and taxation. This greater degree of sophistication in the practice of accounting makes it mandatory that certified public accountants and public accountants holding themselves out to the public are qualified to render services fully meeting the public's needs and that they maintain such qualification by updating their technical knowledge through required continuing education.

In 1984–85, $114,000 is added for increased enforcement workload and contracts with University of California and private accountants to review audits for identification of substandard practice and review of disciplinary cases.

06 BOARD OF ARCHITECTURAL EXAMINERS

The consuming public is subject to serious injury or death should a structure such as a school, store, office building, or dwelling collapse. To reduce the possibility of such an occurrence resulting from faulty design, it must be required and enforced that those who hold themselves out to the public as skilled in the design of such structures meet the minimum standards established by law. It is also necessary that those who have not proved by education, experience and examination that they meet these minimum standards be prevented from deceiving the public as to their qualifications in the field of architecture.

In 1984–85, 0.5 personnel year is added to implement Chapter 594, Statutes of 1983 which allows architects to form professional corporations.

09 ATHLETIC COMMISSION

Contestants in boxing and full-contact karate matches are subject to serious injury and death through mismatches and lack of proper medical examinations. The public and State government suffer monetary losses due to fraudulent promotional practices and improper collection and verification of attendance and revenue. The Commission sets standards and enforces them through examinations, regulatory inspections and attendance by Commission representatives at all matches, exhibitions and closed circuit events.

12 BUREAU OF AUTOMOTIVE REPAIR

California citizens are dependent upon the automobile. When their automobiles break down they are literally immobilized. They are also, for the most part, dependent upon the service industry for repair and maintenance of their vehicles. The fundamental need is for these service transactions to occur in a market place characterized by full disclosure and fair dealing between buyer and seller. This is not always the case. The Bureau's objective is to reduce the incidence and impact of fraudulent, negligent, and deceptive trade practices by California's auto repair industry against the consuming public.

Chapter 892, Statutes of 1982 (SB 33) requires biennial vehicle emissions inspections of specified vehicles in air basins not meeting federal air quality standards. These inspections will be conducted by individuals and establishments licensed and monitored by the Bureau.

In 1984–85, 44.4 personnel years are eliminated due to the termination of the Vehicle Inspection program which required inspection on change of ownership in the South Coast Air Basin. This program has been superceded by the Biennial Vehicle Inspection Program which will begin in April of 1984. The 1984–85 budget has been augmented by $6.3 million to reflect full year funding for positions added on a phased in basis in 1983–84.

15 STATE BOARD OF BARBER EXAMINERS

Persons receiving barber services are subject to physical injury, disease, mental distress and marring of physical appearance. The objectives of the Board are to: (1) ensure that shops, tools and equipment are safe and sanitary; (2) establish and enforce standards of skill and knowledge for licensees; (3) establish continuing education criteria for instructors; and (4) resolve consumer and industry complaints and eliminate their causes.

18 BOARD OF BEHAVIORAL SCIENCE EXAMINERS

The confidential and sensitive nature of services performed by Licensed Clinical Social Workers, Marriage, Family and Child Counselors, and Educational Psychologists necessitates the development and enforcement of standards of performance and competence consistent with the public welfare. By establishing educational and experience requirements as well as examinations, the Board of Behavioral Science Examiners assures that minimum standards are met. The Board investigates cases of possible violations or unlicensed practice.

In 1984–85, 0.9 personnel year is added, limited term to December 31, 1984, to complete development of new licensing exams. This work was begun on contract with the Central Testing Unit in the Department's Division of Administration. In addition, $99,000 is added to handle increased disciplinary caseload.

21 CEMETERY BOARD

The public needs protection from possible fraud, misrepresentation, or negligency by cemeteries and their representatives. The Cemetery Board's goal is: to protect the consumer from possible fraud, misrepresentation, or negligency by cemeteries and their representatives. To carry out that goal the Cemetery Board's objectives are: to ensure that only qualified applicants receive licenses to operate cemeteries or act as cemetery brokers or salesmen; to ensure that those so licensed comply with applicable rules and regulations; to ensure that all trust funds (revocable or irrevocable) are properly placed in trust, invested, and income used for the purpose intended; and to ensure permanence of mausoleums and columbariums.

24 BUREAU OF COLLECTION AND INVESTIGATIVE SERVICES

There are two elements in the Bureau of Collection and Investigative Services: (1) collection agencies and (2) private investigators.

24.10 Collection Agencies

Debtors and users of collection agency services require that collection agencies and their employees be scrupulously honest in the handling of collected moneys, accountable for actions, and fair in their dealings as required by law. This element consists of two components: The regulatory activities of the bureau and administrative services provided to the private investigators element. These administrative services are funded by a distribution of costs to the private investigators element.

The Board's objectives are to:

1. Guarantee that only those possessing the necessary qualifications be licensed, certified and registered.
2. Enforce standards of conduct required of licensees, certificate holders and registrants by law and by regulation.
3. Police against unlicensed collection activity.

In 1984–85, $67,000 is added for one-time enforcement workload.

24.20 Private Investigators

The public must have the assurance that those persons who offer services as private investigators, repossessors, uniformed security guards, private patrol operators, alarm company operations, and alarm agents are competent, scrupulous and fair in their dealings with their clients. The Bureau ensures that only those persons who can meet the prescribed qualifications be licensed, enforces standards of ethical conduct established for such licensees, and provides mandatory firearms training and testing for guards and patrolmen who carry firearms.

In 1984–85, $16,000 is added for implementation of the requirement in Chapter 916, Statutes of 1983, to send a copy of the Private Investigator Act and related regulations to each licensee. In addition, 2 personnel years are eliminated to reflect reduced administrative workload.

30 CONTRACTORS STATE LICENSE BOARD

The consuming public is subject to personal and financial injury resulting from: (1) unsafe construction and poor workmanship; (2) financially irresponsible contractors; and (3) fraudulent representation relating to home improvement contracts.

The Board's objectives are:

1. To establish construction standards which ensure safe building methods and quality workmanship.
2. To qualify contractors by examination; to establish their construction knowledge and experience; and to ensure fiscal integrity through an independent statement of financial condition and through the bonding process.
3. To establish ethical sales standards to preclude misrepresentation by persons licensed to "sell" home improvement, and to seek injunctive action against fraud when deemed necessary.

In 1983–84, 2 personnel years are added for development and maintenance of 39 licensing exams. In 1984–85, 4.7 personnel years are added for exam development and maintenance. In addition, 2.5 personnel years are added for clerical processing of citations, 2.4 personnel years are added to improve response to telephone inquiries and 3 personnel years are reduced to reflect the termination of the Board's data processing development work and the Board's participation in the department-wide office automation project.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

33 BOARD OF COSMETOLOGY

The Board of Cosmetology helps to protect the public by licensing only those persons who meet prescribed minimum standards of proficiency and by enforcing compliance with the Cosmetology Act (Chapter 10 of Division 3 of the Business and Professions Code) and the rules and regulations of the Board.

The principal objectives of the Board of Cosmetology are as follows:

1. To identify to the consuming public, through licensure, those persons who have demonstrated the skill required to perform cosmetology services with safety.
2. To ensure (through the setting of standards, inspections, and investigations, and enforcement actions) that the various acts of cosmetology are practiced with the degree of skill, proficiency, and sanitation necessary to protect the public health, safety, and welfare.

36 BOARD OF DENTAL EXAMINERS

Dental treatment and care must be performed in a competent and professional manner. To ensure this, the Board of Dental Examiners establishes qualifications for licensure as a dentist, hygienist, assistant, expanded function auxiliary, or professional corporation; administers examination; approves dental schools and training programs; sets requirements for continuing education; receives complaints and investigates possible violations of the Dental Practices Act; and, polices against unlicensed practice.

36.10 Dentistry

In 1984–85, the Board's budget was prepared using a zero-based approach pursuant to Budget Act control language. A net of 1 personnel year is being reduced to reflect the reprioritization of activities.

39 BUREAU OF ELECTRONIC AND APPLIANCE REPAIR

With the continuing increase in complexity of electronic technology and the rapid changes in the repair industry (both home electronic entertainment equipment and major appliances), the consuming public is subjected to fraud, deceit, incompetence, and negligence in repair transactions. The objectives of the Bureau are to register and regulate all persons engaged in major home appliance and electronic equipment repair by imposing specific obligations of ethical conduct, honesty, and full and fair disclosure; providing certain safeguards to California consumers when they need repair services; and ridding the repair industry of unscrupulous repair dealers.

42 BUREAU OF EMPLOYMENT AGENCIES

The Bureau of Employment Agencies Program consists of two elements: 1) regulation of Employment Agencies and 2) regulation of Nurses' Registries.

42.10 Employment Agencies

Many persons who are seeking employment or re-employment will seek the service of a private employment agency. The utilization of private employment agency services may constitute a considerable expenditure of monies for the consuming public, especially for the unemployed and underemployed. The Bureau's objective is to ensure that only those possessing the necessary qualifications be licensed as employment agencies and to enforce standards of legal and ethical conduct established for such licensees.

This element consists of two components: The regulatory activities of the Bureau and administrative services provided to the Nurses' Registry element.

42.20 Nurses' Registry

A segment of the consuming public either contract with an agency to locate nursing positions or contract with an agency to purchase nursing services. The Nurses' Registry protects these segments of the consuming public from fraudulent and unethical practices. The objective of the Nurses' Registry is to ensure that only those possessing the necessary qualifications be licensed as nurses' registries, and to enforce standards of ethical and legal conduct for such licensees.

48 BOARD OF FUNERAL DIRECTORS AND EMBALMERS

Proper handling of human remains is necessary in the interest of public health. The public is also subject to financial loss through fraud or mismanagement of preneed trust accounts. In order to correct potentially hazardous conditions or unlawful practices, the Board licenses only those who demonstrate the necessary skills and knowledge. The Board also polices unlicensed activity, inspects premises and accounts, audits trust funds, approves schools, investigates complaints, and imposes sanctions on those violating code provisions and Board regulations.

In 1983–84, $3,000 is reduced to reflect the reduction in the number of board members made in Chapter 650, Statutes of 1983. In 1984–85, $5,000 is reduced to reflect the reduction in the number of board members.

51 BOARD OF REGISTRATION FOR GEOLOGISTS AND GEOPHYSICISTS

Geological and geophysical investigations relating to: (1) landslides, active faults, earthquakes and land subsidence; (2) ground water and mineral exploration; and (3) planning, design, construction and maintenance of civil engineering projects require degrees of skill and proficiency to avoid death, injury and destruction of property.

The Board:

1. Licenses qualified geologists and geophysicists.
2. Develops policies, rules, regulations and standards for practice, education and administration of the act.
3. Acts on complaints and violations of the law by licensees and nonlicensees.

54 STATE BOARD OF GUIDE DOGS FOR THE BLIND

The primary objectives of the State Board of Guide Dogs for the Blind are to:

1. Protect the safety of blind guide dog users by ensuring that instructors and schools possess minimum qualifications and are licensed.
2. Enforce standards of performance and conduct established for such licenses, and police unlicensed practices.

57 BUREAU OF HOME FURNISHINGS

The sale of upholstered furniture, bedding or waterbeds made with defective, substandard or highly flammable materials poses an unacceptable hazard to consumers. Consumers are also subject to fraud from misrepresentation, misleading product claims or false advertising in the merchandising of goods. The Bureau's objectives are to ensure that fair and reasonable standards are developed, and that those standards are enforced through on-site inspections and investigations and through laboratory testing.

Following instructions set forth by the Bureau, the Division of Investigation conducts periodic inspections of firms and individuals coming under the requirements of the Home Furnishings Act. These inspections include retail stores, warehouses, supply dealers, manufacturers of funiture and bedding and sterilizers. In addition to other inspectional duties, samples of filling materials or complete articles of furniture and bedding, as well as related labeling data, are forwarded to the Bureau's laboratory for testing and analysis to ensure that the products and materials are in conformance with the Act.

60 BOARD OF LANDSCAPE ARCHITECTS

Improper location, arrangement and design of developments, including the preservation of natural land features, endangers the social, environmental, and economic quality of life. In order to assure the consuming public that landscape architects carry on business in a proper manner, the Board's objectives are to establish and enforce levels of professional competence, eliminate unlicensed activity and provide consumer/industry education.

In 1984–85, $3,000 is added for an additional board member added pursuant to Chapter 699, Statutes of 1983.

1110 DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

63.10 Board of Medical Quality Assurance

The people of California are deserving of the best possible medical treatment and healing arts services. They must be protected from the unethical and/or unlicensed individual who can do much harm because of the personal and intimate nature of the services provided. The Board attempts to meet this need through the enforcement of the Medical Practices Act and other related laws under its jurisdiction.

The objectives of the Board are:

1. To protect the consumer from incompetent, grossly negligent, unlicensed or unethical practitioners.
2. To enforce provisions of the Medical Practices Act and other healing arts laws.
3. To educate healing art licensees and the public on health quality issues.

This element includes the regulatory activities of the Board with respect to physicians and surgeons and administrative services provided to the allied health committees funded from distributions from the budgets of the committees.

In 1983–84, $153,000 is added for increased Attorney General and Office of Administrative Hearings services related to recently decertified medical schools. In 1984–85, $142,000 is added for increased Attorney General and Office of Administrative Hearings costs. Also in 1984–85, $428,000 and 1.3 personnel years are added for increased examination costs and 3.8 personnel years are added to reflect increased workload associated with graduates of foreign medical schools.

63.20 Acupuncture Advisory Committee

The practice of acupuncture is a theory and method for treatment of illness and disability and for strengthening and invigorating the body. As such affects the public health, safety and welfare, there is a necessity that individuals practicing acupuncture be subject to regulation and control. A committee exists to advise the Board of Medical Quality Assurance on implementing the provisions of the related laws.

63.30 Hearing Aid Dispensers Examining Committee

It is estimated that one out of every five California citizens has some degree of hearing loss. For those who must wear hearing aid devices, there are dangers from unlicensed or unreputable hearing aid dispensers.

The Board's objectives are:

1. To protect consumers by investigating and examining applicants for hearing aid dispensers licenses and ensuring compliance with all occupational licensing requirements.
2. Discipline those licensed who fail in their public trust.

In 1984–85, the timebase of the committee's executive officer is increased by 0.4 personnel years to handle increased licensing and enforcement workload.

63.40 Physical Therapy Examining Committee

Physical therapists in independent practice treat patients who have disabilities resulting from accidents, congenital defects or illnesses. In order to ensure proper patient evaluation and treatment, those persons skilled in the profession of physical therapy must meet the minimum standards established according to law. This is accomplished by licensing those who possess the necessary qualifications and enforcing standards of ethical conduct established for such licensees and policing against unlicensed practice.

63.50 Physician's Assistant Examining Committee

Concern over the growing shortage and geographic maldistribution of health care services in California has been expressed in both the private and public sector. The physician's assistant is one category of health care manpower that is providing a means by which California can combat this shortage. The effective use of physician's assistants enables the physician to delegate health care tasks where such delegation is consistent with the patient's health and welfare, thereby freeing the physician to concentrate his or her skills on more complex health care services.

The Physician's Assistant Examining Committee facilitates the utilization of physician's assistants by assuring the public that the Committee's licensees and approved programs have met certain minimum requirements. Such minimum licensing requirements attempt to protect the public from inadequately trained, unethical or incompetent practitioners.

66 BOARD OF EXAMINERS OF NURSING HOME ADMINISTRATORS

Patients in skilled nursing facilities and intermediate care facilities have a right to expect quality medical treatment, a sanitary environment, a nutritional diet, and safekeeping of their funds.

The Board of Examiners of Nursing Home Administrators helps to assure that the rights of nursing home patients are safeguarded. In licensing Nursing Home Administrators—as required by Federal statutes—the Board prescribes standards for administrators, provides an administrator-in-training program for would-be licensees, examines applicants, issues licenses, disciplines administrators who violate the laws or rules pertaining to the administration of nursing homes, and handles consumer complaints involving administrators.

The principal objectives of the Board of Examiners of Nursing Home Administrators are as follows:

1. Through a program of examination and licensure, to identify to the consuming public those persons who have demonstrated that they are qualified to function as Nursing Home Administrators.
2. To insure, through the setting of standards and through disciplinary actions, that Nursing Home Administrators provide quality services to their patients, in accordance with the laws and the rules governing nursing homes.
3. To assure that consumers who have legitimate complaints against Nursing Home Administrators receive fair and just treatment.

69 BOARD OF OPTOMETRY

The administration of the Optometry Practice Act includes examining and licensing individuals for the practice of optometry, licensing branch offices, registering optometric corporations, issuing fictitious name permits, issuing statements of licensure, accrediting schools and colleges of optometry, and enforcing the regulatory features of the Act, for the protection of the consumer patient. The Board's objectives are to insure that only those who possess the optometric expertise and knowledge can acquire and hold a license to practice as a licensed optometrist within the provisions of the Optometry Practice Act. The malfeasant practitioner could cause serious eye injury to the consumer patient. In order to reduce the possibility of such occurrence, the Board is required to enforce the optometry legal statutes and to discipline the malfeasant practitioner.

In 1984–85, 0.4 personnel years are added to implement Chapter 870, Statutes of 1983 which provides for the assessment of administrative fines.

72 BOARD OF PHARMACY

The distribution and dispensing of prescription drugs and controlled substances within the legal channels must be regulated to prevent illegal distribution or improper use of these potentially dangerous or harmful substances. Also the patient must be warned regarding the possible harmful effects if the drug is combined with alcohol.

To accomplish this, the Board of Pharmacy sets minimum requirements for licensure of pharmacists, approves professional schools and continuing education programs, receives complaints and investigates possible violations, investigates unlicensed practices and inspects pharmacies and drug wholesalers regularly for compliance with Board rules and regulations.

In 1984–85, 3.9 personnel years are added to implement Chapter 865, Statutes of 1983 which requires an indepth investigation of pharmacy license applications.

78 BOARD OF REGISTERED NURSING

The registered nurse has the responsibility directly and indirectly for administration of safe, effective nursing care to the consumer, including directing and coordinating the activities of ancillary health team members. Failure of the registered nurse to perform in a competent, responsible manner can result in deleterious effects on the health, safety and welfare of the consumer public. It is essential that all registered nurses be well-prepared through basic and on-going education and training to provide quality health care to the consumer public.

In 1984–85, 2 personnel years are reduced to reflect improved efficiency in the conduct of reviews of nursing schools.

84 STRUCTURAL PEST CONTROL BOARD

Scientific and professional standards are necessary to assure the public that persons obtain and maintain the skills and knowledge to: inspect the structural condition of buildings for pest problems, identify pests, apply pest control chemicals, and recommend and implement other means to control structural pests. The Board's objective is to license those persons that possess the necessary qualifications to professionally perform structural pest control work.

90 BOARD OF EXAMINERS IN VETERINARY MEDICINE

The Board of Examiners in Veterinary Medicine Program consists of two elements: (1) the licensing and regulation of Veterinarians and (2) the licensing and regulation of Animal Health Technicians.

90.10 Board of Examiners in Veterinary Medicine

Veterinarians protect the health and welfare of animals and the public through prevention, control and eradication of animal diseases. Examination assures minimum competency through licensure. Enforcement of minimum standards of practice are carried out through unannounced inspections of veterinary hospitals and mobile facilities. The Board further responds to complaints, investigates alleged violations and has the authority to administer fines and suspend or revoke licenses.

This element includes two components: the regulatory activities of the Board and administrative services provided to the Animal Health Technicians Examining Committee. These services are funded by a distribution of costs to the committee.

91 BOARD OF VOCATIONAL NURSE AND PSYCHIATRIC TECHNICIAN EXAMINERS

Inadequately trained personnel may render patients poor quality health care services. Through licensure of vocational nurses and psychiatric technicians, the Board identifies persons who demonstrate the necessary competence. The development and enforcement of standards of conduct helps to meet the need to protect those receiving care. Educational and training program approval by the Board is required. Nursing education consultants assist schools in meeting and maintaining standards.

91.10 Vocational Nurse

This element includes two components: the regulatory activities of the Board and administrative services provided to the Psychiatric Technician Examiners element.

In 1983–84, $125,000 is added for increased enforcement workload. In 1984–85, $140,000 is added for enforcement workload and $39,000 is added for publication of a newsletter containing information regarding board regulations, and disciplinary actions.

92.00 CONSUMER ADVISORY COUNCIL

The Consumer Advisory Council was established pursuant to the Consumer Affairs Act which took effect in 1971. The necessity for a Council is to provide reasoned judgments about consumer issues facing the Department of Consumer Affairs, the Legislature and other public agencies.

The representation on the Council includes two legislative members, two business members, one labor member and four public members, two of which represent consumer groups.

The Council recommends and proposes the enactment of such legislation or regulations as necessary to protect and promote the interests of consumers.

93.00 DIVISION OF CONSUMER SERVICES

The Division seeks to promote the general interests of California consumers and provides complaint resolution for problems not within the jurisdiction of other Federal, State and local agencies. The Division's objectives are:

1. Represent consumer interests at local, state and federal levels in administrative, legislative and judicial proceedings.
2. Institute consumer protection services at local and state levels.
3. Service consumer complaints and reduce complaints at the state level.
4. Educate consumers to protect themselves.
5. Research, analyze and develop systematic solutions to consumer problems.
6. Prevent fraudulent and misleading advertising.
7. Disseminate information to the public regarding departmental activities.
8. Cooperate with consumer groups.

Performance Measures

The Division provides data for sixteen workload measures, three program indicators, and outcome measures in the CFIS' data bank.

* Dollars in thousands

1110 DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

General Description

In order to comply with an Attorney General opinion, General Fund support in an amount equal to approximately 68 percent of the Division's appropriation is proposed for the budget year. The Consumer Affairs Fund appropriation will be funded through surcharge on the Department's pro rata distribution to constituent agencies of administrative costs.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,844	$1,669	$1,675

Executive

The Executive Section is composed of the Chief and Deputy Chief of the Division and clerical support. This section has primary responsibility for the planning and control functions for the division.

	*1982–83**	*1983–84**	*1984–85**
Expenditures	$176	$195	$224
Personnel years	3.8	3.9	3.8

Golden State Senior Discount Program

The Golden State Senior Discount Program is comprised of three major components: identifying local sponsors and soliciting local support for the establishment of programs, training the sponsors and volunteers to establish a local program, and providing discount cards, merchant placards, and advice as requested after a program is established.

In 1984–85, 0.3 personnel years are added for provision of program services in Southern California.

	*1982–83**	*1983–84**	*1984–85**
Expenditures	$82	$86	$101
Personnel years	2.4	1.9	2.2

Complaint Assistance

The Complaint Assistance Unit handles consumer complaints which are not within the jurisdiction of other agencies and do not involve criminal violations. Complaints within the purview of another agency are referred to that agency. The Unit also assists other agencies, consumer groups and organizations in complaint handling.

The Unit has, in addition to its Sacramento Office, a district office in Los Angeles. The district office provides clerical services to the boards and bureaus in addition to responding to consumer complaints and inquiries. The two offices are staffed as follows: Sacramento, 6.4 personnel years; Los Angeles, 4 personnel years.

In 1984–85, 2 personnel years are reduced to reflect the closure of the San Francisco Office which primarily serviced boards and bureaus by referring consumer inquiries to appropriate agencies. These services will be replaced by providing call forwarding to Sacramento from the Bay Area for boards receiving significant numbers of calls.

	*1982–83**	*1983–84**	*1984–85**
Total Expenditures	$366	$352	$311
Less reimbursements	*–69*	*–15*	*–17*
Net Totals, Expenditures	$297	$337	$294
Personnel years	13.4	12.2	10.2

Consumer Liaison Section

The Consumer Liaison Section (a) communicates with the news media, state, local and federal agencies; (b) develops consumer education programs, publications and seminars; and (c) provides information to the general public through press releases, newsletters, public service announcements and consumer protection publications.

In 1984–85, 1.5 personnel years are reduced with funds redirected to contract services for the preparation of some consumer education materials.

	*1982–83**	*1983–84**	*1984–85**
Expenditures	$302	$302	$324
Personnel years	8.8	8.5	7

Legal Services

Made up of attorneys and their support staff, this unit has a judicial and administrative advocacy function, and generally acts as a law reform group by initiating litigation, filing *amicus curiae* briefs, intervening in appropriate lawsuits, testifying in administrative and regulatory proceedings, and participating in Department task forces.

	*1982–83**	*1983–84**	*1984–85**

1110 DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

Research and Special Projects

Given the primary function of staff support, this unit gathers and analyzes data on and proposes solutions to consumer problems in priority issue-areas; provides research assistance to other units within the Department; and assists other State departments and consumer groups with consumer issues. The unit also develops and implements special projects as mandated.

	*1982–83**	*1983–84**	*1984–85**
Expenditures	$164	$79	–
Personnel years	4.4	4.4	–

Co-op Development Program

The primary purpose of the Co-op Development Program is to enable consumers to start and strengthen cooperative self-help enterprises which will meet their needs for goods and services on a non-profit democratic basis.

In 1984–85, 0.3 personnel year are added to reflect use of temporary help shared with the Senior Discount Program.

	*1982–83**	*1983–84**	*1984–85**

94.01 Administrative Services

This element includes three components: the Division of Administration, the Division of Investigation and Building Maintenance and Operation.

94.01.010 Division of Administration

Decentralization of administrative specialities to the constituent agencies is not economically feasible. Therefore, a management and administrative program has been developed which is an integral feature of the total program activity and is designed to meet the overall goals of the Department. Continued management studies and audits of various agencies are improving operational effectiveness.

The costs of administration are distributed to all of the Department's constituent agencies by a pro rata formula based on a ratio of each agency's total budgets to the total expended by administration.

The Division is actively pursuing the following courses:

1. Evaluating the examination processes of the licensing agencies as they relate to prohibitive qualification requirements and restrictive entry.
2. Interviewing prospective board and committee members to ensure greater public and industry representation.
3. Examining the constituent agencies to ensure that they are serving a useful purpose and are responsive to public need.
4. Reviewing and monitoring disciplinary processes deployed, to ensure that they meet the due process requirements of the 14th Amendment.
5. Coordinating and overseeing the Division of Consumer Services operation to effectively implement the mandates of the Consumer Affairs Act.

In 1984–85, 1.9 personnel years are added to handle increased budget office workload and reduce overtime. In addition, 9.5 personnel years are added through redirection from various boards and bureaus, limited to June 30, 1985, to conduct an assessment of needs for office automation in the Department and to assist in the preparation of a feasibility study. A feasibility study for word processing applications has been prepared and is under review. Information on the use of funds appropriated in Item 1655-092-494 will be provided to the Legislature under the provisions of that Item and ongoing funding will be proposed in a Department of Finance augmentation letter.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$5,281	$6,285	$7,114

Reimbursements	*338*	*28*	*30*
Personnel years	140.3	149.9	159.3

94.01.020 Division of Investigation

Objective and independent investigations and inspections by skilled personnel are required to afford the public maximum protection from incompetent, fraudulent and unethical business practices. The Division provides impartial investigative and preventive inspection services and reduces the cost of these services by (1) proper staff training, (2) better use of manpower, and (3) utilization of sound management principles.

1110 DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of cases opened	2,430	2,625	2,725
Number of cases closed	2,549	2,540	2,600
Number of cases pending (at year end)	1,805	1,890	2,015
Number of inspections	24,102	24,000	24,000

General Description

The Division conducts investigations and inspections in accordance with the laws, regulations and policies of the constituent agencies. Based on the Division's findings, agencies may request preparation of documents for administrative or criminal action. The Division is compensated by each using agency for its share of the total hours expended by means of an established rate which encompasses all of the Division's operational costs.

Personnel years	71	74.8	74.8

94.01.030 Building Maintenance and Operation

The occupants of the department-owned Consumer Affairs Building are subject to serious injury should the 47-year-old structure be allowed to deteriorate. The purpose of the maintenance and operational program element is to ensure the safety and welfare of the building's occupants and the visiting public.

General Description

The building is currently occupied by the executive and administrative offices of the Department and 18 of the Department's constituent agencies and by the State Board of Equalization. The costs of the component are offset by rents collected from the occupants.

1700 DEPARTMENT OF FAIR EMPLOYMENT AND HOUSING

Program Objectives and Description

The Department of Fair Employment and Housing administers California's civil rights laws. These laws prohibit discrimination in employment, housing, availability of services, and public accommodations. It also administers civil rights laws pertaining to violence or threat of violence.

The goals of the Department of Fair Employment and Housing are:

1. Prevention and elimination of discrimination in employment and housing.
2. Identification and amelioration of social tensions.
3. Prevention and elimination of arbitrary discrimination.

Authority

Government Code Sections 11135–11139.5, 12900 et seq., 19702.5, 19704, 19705, and 50085.5; Civil Code Sections 51 and 51.7; Education Code Sections 44066 and 87402; Labor Code Section 3096.

1700 DEPARTMENT OF FAIR EMPLOYMENT AND HOUSING—*Continued*

Performance Measures

Discrimimination complaints are filed by the public in eleven field offices throughout the State.

Actual and projected caseloads are reflected in the following tables:

Cases:	*1982–83*	*1983–84*	*1984–85*
Filed	8,166	8,237	8,313
Closed	7,631	7,728	7,728
Active in period	11,919	12,868	13,453
In process	4,288	5,140	5,725

50.10 ENFORCEMENT

The objective of the Enforcement of Anti-Discrimination Laws program is to provide equal opportunity in employment and housing and ameliorate social tensions by preventing and eliminating discrimination based on race, religion, creed, national origin, sex, marital status, physical handicap, medical condition, and age over 40.

A projected increase in the number of discrimination complaints filed will be met through a redirection of management staff to case processing. Efficiencies achieved due to the hiring freeze allow for the reduction of 2.5 personnel years of temporary help and 3 personnel years of administrative staff.

General Fund support has been reduced by $87,000 for 1984–85 due to increased federal funds resulting from a redirection of staff to case processing.

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

1705 FAIR EMPLOYMENT AND HOUSING COMMISSION

The Fair Employment and Housing Commission is a quasi-judicial body responsible for the enforcement of State civil rights laws against discrimination in employment, housing and public accommodations. The seven members of the Commission are appointed by the Governor. The Commission issues decisions on accusations prosecuted before it by the Department of Fair Employment and Housing, interprets civil rights statutes through regulations and provides a forum for civil rights concerns.

The objective of the Commission is to ameliorate social tensions and guarantee equal opportunity in employment, housing and public accommodations by preventing and eliminating discrimination based on race, religious creed, color, national origin, ancestry, sex, marital status, physical handicap, medical condition and age over 40.

1710 OFFICE OF THE STATE FIRE MARSHAL

The objectives of the State Fire Marshal are to reduce the loss of life and property by fire, and to develop and promote ways of protecting life and property against fire and panic.

To accomplish these objectives, the State Fire Marshal aids local and state authorities in the enforcement of all laws and ordinances; prepares, adopts, and enforces minimum statewide fire and panic safety standards applicable to statutorially designated occupancies; prepares, adopts and enforces standards for the use and control of hazardous materials; and disseminates information and material relative to new technological developments in the field of public fire safety.

10 PUBLIC FIRE SAFETY

Program Objectives and Description

The primary responsibility of the State Fire Marshal is the protection of life and property from fire. This responsibility is met through the development, maintenance and enforcement of fire safety standards for all educational and institutional occupancies, public assembly facilities, organized camps, buildings over 75 feet in height and in all State-owned/occupied structures. Provisions relative to the control of portable fire extinguishers, engineered (fixed) fire extinguishing systems, explosives, fireworks, decorative materials and fabrics, building materials and other fire safety products, and wearing apparel are also developed, maintained and enforced on a statewide basis.

The State Fire Marshal also conducts investigations to approve and list products found to be in compliance with the adopted standards; conducts arson investigations; and assembles, tabulates and analyzes reports of all fires occurring in the State. The State Fire Marshal inspects high rise buildings, as well as various local jails and holding facilities, should they not be inspected by a local agency. Training in fire prevention and fire suppression is provided to fire departments in California with special emphasis on training those departments that are volunteer and partly-paid. Training in arson and bomb investigation is provided to fire departments and law enforcement agencies throughout the State.

Although most life and property losses attributable to fire involve singular or minor incidents, the potential of a catastrophic occurrence is always present. It is the lack of these major occurrences which principally marks the effectiveness of the efforts expended.

The 1983–84 fiscal year reflects state recognition of the role of the State Fire Marshal in coordinating and approving curricula for fire training certification courses offered by community colleges. This program is funded through fees paid by participants in the training programs.

Implementation of the Hazardous Liquid Pipeline Safety Program has been proposed for 1983–84 and 1984–85. This has resulted in an increase in 1983–84 of 6 personnel years and $173,000 and in 1984–85 11.4 personnel years and $800,000 for Enforcement. In addition $1,002,000 has been proposed for expansion of the Facilities Inspection, Flame Retardant, Fireworks, and Building Materials Listing (BML) programs in 1984–85. The development of standards and testing of materials required for the BML will be accomplished through contracting at a savings of 2.9 personnel years. These positions will be redirected to the inspection of facilities function and funded from the General Fund. An increase of 21.8 personnel years is reflected in 1984–85 as a result of these new and expanded functions. This includes 1 personnel year for updating of the California Fire Incident Reporting System, and 1.8 personnel years limited term to June 30, 1986 to inspect state-owned and leased buildings.

Provisions will be included in the trailer bill to make inspection of residential facilities (e.g. hotels and motels) the responsibility of local entities. Authority to charge a fee for this inspection will be provided. If the local entity elects not to inspect these buildings, then the State Fire Marshal will conduct the inspection and be reimbursed through any state subvention funds to which the local entity is entitled. This program would be similar to the high-rise building inspection program currently being developed. The workload to be undertaken for the high-rise inspection program is being determined through a survey of local entities. This workload may result in a future budget adjustment.

1710 OFFICE OF THE STATE FIRE MARSHAL—*Continued*

10.10 Enforcement

Enforcement of adopted standards is conducted through plan reviews of new construction and field or on-site inspections. Basically, the prime responsibility for enforcement rests with local fire authorities. Where there are no such authorities, and in all State-owned/occupied buildings, as well as hospitals, the State Fire Marshal is charged with direct enforcement responsibilities. In addition, the Department of Health Services has contracted with the State Fire Marshal for special fire safety inspections and surveys of health care facilities which have entered into provider agreements in conjunction with Medicare/Medi-Cal Programs.

10.20 Analysis and Development

This element is divided into these six components: approval and listing services, fireworks/explosives, portable fire extinguishers, fixed, or engineered, fire extinguishing systems, flammable fabrics and pipeline safety. These components provide the technical support to the enforcement element in the areas of interpretation, development, and review of regulations within the State Fire Marshal's authority. This technical assistance further extends to consumer product review, approval and listing, and California fire incident reporting system.

Performance Measures

Output consists mainly of evaluations, licensing, registrations and tests. In total, these activities numbered approximately 150,000 during Fiscal Year 1982–83.

20 ADMINISTRATION

Program Objectives and Description

This program consists of executive and support services. These elements are structured to provide executive leadership; and staff support services to Program 10.

1730 FRANCHISE TAX BOARD

The Board consists of the State Controller, the Chairman of the State Board of Equalization, and the Director of Finance. An Executive Officer, appointed by the Board, implements the policies and performs such duties as are delegated by the Board.

The objective of the Franchise Tax Board is to fairly, effectively and efficiently administer those programs and functions delegated to the Board by the Administration and mandated by law, including self-assessed income tax programs, programs to distribute benefits to the public and functions that contribute to the State's operational effectiveness.

The Franchise Tax Board administers the Personal Income Tax and Bank and Corporation Tax Laws through programs which include self-assessment, audit, collection, and filing enforcement activities. In 1984–85, these tax programs will contribute a significant percent of the General Fund revenue.

As part of the Homeowners and Renters Assistance program, the Board will authorize about $40.6 million in disbursements to Assistance claimants in 1984–85 (see 9100 Tax Relief). The Board also provides processing services through contracts with other governmental entities and performs audits and field investigations of campaign statements and lobbyist reports authorized by the Political Reform Act of 1974.

10 PERSONAL INCOME TAX

Program Objectives and Description

The program objectives are to provide a sound revenue base for the General Fund. These objectives are attained through the development and maintenance of an effective and even-handed tax system that encourages individuals to voluntarily comply with filing, reporting, and payment requirements and to accurately determine their tax assessments.

The Personal Income Tax Law provides the second largest source of General Fund revenue. The use of withholding-at-source method of collection provides revenue receipts to the State evenly distributed throughout the tax year as well as maximum interest earnings. In 1984–85, approximately 12 million individuals, partnerships, trusts, and estates will be assessed net taxes representing about 38.2 percent of General Fund revenues.

Authority

Government Code Sections 15700–15702.1; Revenue and Taxation Code Sections 17001–19500; Fish and Game Code 1770; Elections Code Sections 32000–32004.

10.90	Voluntary Contributions	1.9	3.9	3.6	48	115	70

10.10 Self-Assessment and Prepayment

The objective is to attain an increasing level of voluntary filing of timely and accurate returns and prepayment declarations. This is accomplished through participation in the development of legislation that affects the law; constant efforts to improve assistance activities including advisory services, the design, preparation, and distribution of forms and instructions; and the effective processing of returns, claims, and documents resulting in timely issuance of refunds and/or notification of additional liabilities. The Employment Development Department within the (20) Tax Collections and Benefits Payments Program administers the withholding program which is responsible for collecting about 80 percent of Personal Income Tax revenues.

In 1983–84, 0.3 personnel year has been eliminated for the purchase of data processing terminals.

In 1983–84 and 1984–85, (due to declining workloads and improved productivity in return processing) 4.7 personnel years have been redirected to Personal Income Tax Audit—Mathematical Verification, 7.3 personnel years have been redirected to Personal Income Tax—Filing Enforcement, 20.3 personnel years have been redirected to Personal Income Tax—Collections, 20.3 personnel years have been redirected to Bank & Corporation Tax—Self-Assessment and 3.5 personnel years have been redirected to Bank & Corporation Tax Audit—Mathematical Verification. In addition, 14.3 personnel years have been redirected from Personal Income Tax—Self-Assessment Claims to Personal Income Tax—Filing Enforcement and 1.2 personnel years have been redirected to more productive Personal Income Tax audits.

In 1984–85, 11.2 personnel years have been eliminated because positions previously established for the Bank Tax Rate Recomputation, which had previously been redirected to Personal Income Tax Return Processing, had a limited term of June 30, 1984. In addition, a redirection of 5.4 personnel years from Homeowners and Renters Assistance and an additional 24.9 personnel years are proposed to cover increases in tax returns, estimated tax payments and related taxpayer assistance.

10.20 Filing Enforcement

The objective is to protect the revenue base through the identification of entities who have filing requirements but have not filed returns, and the pursuit of reasonable and effective courses of actions which will secure these returns. Field audits are performed to determine residency status and special investigations are made when it appears that there have been fraud or other criminal violations. In 1984–85 these activities will produce additional tax assessment of $220 million and will correct overassessments of self-assessed tax by −$5 million for a total tax change of approximately $225 million.

In 1983–84, 0.2 personnel years have been eliminated for the purchase of data processing terminals.

In 1983–84 and 1984–85, 7.3 personnel years have been redirected from Personal Income Tax—Self-Assessment Return Processing and 14.3 personnel years have been redirected from Personal Income Tax—Self-Assessment Claims to cover increased workloads.

In 1983–84 and 1984–85, 1.3 personnel years are proposed for workload growth.

[1] Service provided by Volunteer Tax Assistance Program (VTAP) and Volunteer Income Tax Assistance (VITA) at no cost to the State.

* Dollars in thousands

General Fund				*5,283*	*5,612*	*6,056*

10.30 Audit

The objective is to protect the revenue base by conducting audits that assure equity for the taxpayer and encourage accurate self-assessment and compliance with reporting requirements. The mathematical verification of most returns and the audit of selected returns will produce additional tax assessment of $208 million and will correct overassessments of self-assessed tax by —$34 million for a total tax change of approximately $242 million.

In 1983–84 and 1984–85, 4.7 personnel years have been redirected to Mathematical Verification from Personal Income Tax—Self-Assessment Claims to cover increased workloads. In addition, 1.2 personnel years have been redirected from Personal Income Tax—Self-Assessment Claims and 2.7 personnel years from Bank & Corporation Audit and 1.9 personnel years from Bank and Corporation—Exempts to more productive Personal Income Tax audits. In addition, audits and resulting revenues will be reduced so that funds can be redirected to in higher priority activities.

In 1984–85, 2.7 personnel years have been eliminated because positions previously established for the Bank Tax Rate Recomputation, which had previously been redirected to Personal Income Tax—Audit—Mathematical Verification, had a limited term of June 30, 1984. And 3.7 personnel years have been proposed to cover workload growth in Math Verification. In addition, 34.2 personnel years are proposed for elimination in order to redirect savings to other personal services costs.

1730 FRANCHISE TAX BOARD—*Continued*

10.40 Collections

The objective is to protect the revenue base through reasonable and effective collection processes which will promote maximum future voluntary compliance with payment requirements and extend to each individual due process of law and equitable treatment. Of the total tax liabilities established by self-assessment, audit, and filing enforcement activities $1.6 billion will require collection action in 1984–85.

In 1983–84, 0.7 personnel years have been eliminated for the purchase of data processing terminals.

In 1983–84 and 1984–85, 20.3 personnel years have been redirected from Personal Income Tax—Self-Assessment Return Processing and an additional 5.3 personnel years are proposed in 1984–85 to cover increased workloads.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

General Fund				*13,407*	*14,203*	*15,715*

10.90 Voluntary Contributions

The objective is to process voluntary contributions as designated on tax returns and to report to the State Controller the number of returns, dollars contributed, and provide a funding source for the administrative costs incurred pursuant to Chapter 1188, Statutes of 1982 and to Chapters 1039, 1058, 1082, and 1278, Statutes of 1983.

In 1983–84, 0.1 personnel year has been eliminated due to the decline in workloads.

In 1984–85, 4 personnel years have been eliminated because positions previously established for the California Election Campaign Fund had a limited term of June 30, 1984. Instead, 3.6 personnel years are proposed to cover workloads for all of the voluntary contributions.

1730 FRANCHISE TAX BOARD—*Continued*

20 BANK AND CORPORATION TAX

Program Objectives and Descriptions

The program objectives are to provide a sound revenue base for the General Fund. These objectives are attained through the development and maintenance of an effective and even-handed tax system that encourages corporations to voluntarily comply with filing, reporting, and payment requirements and to accurately determine their tax assessments.

The Bank and Corporation Tax Law provides the third largest source of General Fund revenue to the State. The Bank and Corporation tax contributes approximately 16.6 percent of General Fund revenue. In 1984–85, an estimated 520,000 banks and corporations will be subject to franchise or income taxes on business conducted in California.

Authority

Government Code Sections 15700–15702, Revenue and Taxation Code Sections 23001–26481, 38001–38013.

20.10 Self-Assessment and Prepayment

The objective is to attain an increasing level of voluntary filing of timely and accurate returns and prepayment declarations. This is accomplished through participation in the development of legislation that affects the law; constant efforts to improve assistance activities including advisory services, the design, preparation, and distribution of forms and instructions; and the effective processing of returns, claims, and documents resulting in timely issuance of refunds and/or notification of additional liabilities.

In 1983–84 and 1984–85, 20.3 personnel years have been redirected from Personal Income Tax—Self-Assessment Return Processing to cover increases in tax returns and related activities. In addition, 8.4 personnel years have been redirected from Bank & Corporation Tax—Exempts to more productive audits of claims.

In 1984–85, 5.6 personnel years are proposed to cover increases in tax returns, estimated tax payments and related taxpayer assistance.

General Fund				*4,745*	*5,937*	*6,416*

20.20 Filing Enforcement

The objective is to protect the revenue base by encouraging self-compliance with the tax laws through the identification of entities who have filing requirements but have not filed returns, and the pursuit of reasonable and effective courses of action to secure these returns. In 1984–85 these activities will produce additional tax assessment of $11.1 million and will correct overassessments of self-assessed tax by −$.1 million for a total tax change of approximately $11.2 million.

In 1983–84 18.9 personnel years and in 1984–85 a net of 18.4 personnel years have been redirected to Bank & Corporation—Collections to reflect changes in reporting program costs and a decrease in workload.

Performance Measures

	1982–83	*1983–84*	*1984–85*

General Fund				*509*	*532*	*589*

20.30 Audit

The objective is to protect the revenue base by conducting audits that assure equity for the taxpayer and encourage accurate self-assessment and compliance with reporting requirements. The mathematical verification of most returns and the audit of selected returns will produce additional tax assessment of $386 million and will correct over assessments of self-assessed tax by −$39 million for a total tax change of approximately $425 million.

In 1983–84 and 1984–85, 3.5 personnel years have been redirected from Personal Income Tax—Self-Assessment Return Processing and 1.1 personnel years have been redirected from Homeowners and Renters Assistance to cover increased workloads in Mathematical Verification. In addition, 2.7 personnel years have been redirected to more productive Personal Income Tax audits.

In 1984–85, 1.9 personnel years have been proposed to cover increases in workloads.

20.40 Collections

The objective is to protect the revenue base through reasonable and effective collection processes which will promote maximum future voluntary compliance with payment requirements and extend to each entity due process of law and equal treatment. Of the total tax liabilities established by self-assessment, audit, and filing enforcement activities $400 million will require collection action in 1984–85.

In 1983–84 and 1984–85, 18.9 personnel years have been redirected from Bank & Corporation Tax—Filing Enforcement and 3.8 personnel years have been redirected from Homeowners and Renters Assistance to reflect changes in reporting program costs and to cover increases in workloads.

In 1984–85, 1.4 personnel years have been proposed to cover workload growth.

30 HOMEOWNERS AND RENTERS ASSISTANCE

Program Objectives and Description

The program objective is to authorize partial repayment of property taxes or rent paid by eligible senior citizens, disabled, or blind individuals as authorized under the Senior Citizens Property Tax Assistance Law on a timely basis. The principal program activities include: design and distribution of claim forms and instructions; providing advisory services to claimants; processing claims.

The law requires the submission of assistance claims after May 15 and before August 31 of each year, while payment of those claims shall be made after June 30 and before October 31 of each year.

In 1983–84 and 1984–85, 3.8 personnel years have been redirected to Bank & Corporation Tax—Collections and 1.1 personnel years have been redirected to Bank & Corporation Tax Audit—Mathematical Verification due to decreases in workloads.

In 1984–85, 5.4 personnel years are redirected to Personal Income Tax—Self-Assessment due to decreases in workloads.

Authority

Government Code Sections 15700–15702; Revenue and Taxation Code Sections 20501–20646.

[1] Program is not intended to be revenue producing, but is a check to see that exempt corporations are entitled to that status.

40 POLITICAL REFORM AUDIT

Program Objectives and Description

The program objective is to determine the accuracy and completeness of statements and reports as required under the Political Reform Act of 1974. This is accomplished by conducting audits and field investigations in an objective manner and reporting the results, in detail, to the Fair Political Practices Commission.

The Political Reform Act of 1974 requires the staff to make audits and field investigations of randomly selected campaign statements and lobbyist reports filed with the Secretary of State except for campaign statements filed by candidates for federal or local offices, the Controller, and the Board of Equalization. The department must also audit statements filed by: committees supporting or opposing the above candidates; committees supporting or opposing statewide measures; and any state or county central committee or independent committee which spends $10,000 or more.

In 1984-85, 1.9 personnel years are proposed for elimination due to processing efficiencies and consolidation of staff.

Authority

Government Code Sections 90000–90006.

70 CONTRACT WORK

Program Objectives and Description

The program objective is to provide effective and efficient services to other governmental entities through performance of contracted activities.

The availability of sophisticated data processing equipment and skilled personnel enables other departments to obtain high quality processing services. All costs relating to these services are reimbursed to the department. The program allows fixed departmental costs to be allocated to a wider base of program activities thereby reducing the costs charged to each of the department's other programs.

In 1984-85, 24.7 personnel years are proposed for elimination due to decreases in contract work.

[1] Service provided by volunteers at no cost to State.

80 ADMINISTRATION

Program Objectives and Description

The program objectives are to assure that the Personal Income Tax Law, the Bank and Corporation Tax Law, the Senior Citizens Property Tax Assistance Law, and the Political Reform Act of 1974 (Chapter 10) are administered in accordance with the policies and directives of the Franchise Tax Board.

Administration provides overall leadership, planning, and support to the programs through the Executive Officer, management, fiscal and personnel administration, statistical research and reporting, program planning, and supply and maintenance services.

In 1984–85, 1.4 personnel years are proposed for elimination in order to fund higher priority activities.

90 LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231 of the Revenue and Taxation Code requires the State to pay local governmental units the cost of any new program or increased level of services of a program mandated by legislation enacted after January 1, 1973. The department has one legislatively mandated program which requires local agencies to report owners of substandard rental dwellings to the Franchise Tax Board if violations have not been corrected within the allowed time. The department will disallow certain expenses derived from rental of defined substandard housing, for purposes of determining the liability pursuant to the Personal Income Tax Law and the Bank and Corporation Tax Law.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs *(General Fund)*	$5	($5) [1]	($5) [1]

[1] Funding for this mandate for 1983–84 is provided in the budget for "State-Mandated Local Programs," (Department 9680) in the General Government portion of the Budget, data shown here is for information purposes only.

1760 DEPARTMENT OF GENERAL SERVICES

The objectives of the Department of General Services are to: (a) meet the varied responsibilities for management review, control and support assigned to it by the Governor and by statute; (b) provide support services to operating departments with greater efficiency and economy than they can individually provide for themselves; (c) increase effectiveness and economy in the administration of state government by establishing and improving statewide policies and guidelines.

Program performance data for this department may be retrieved from the California Fiscal Information system.

10 PROPERTY MANAGEMENT SERVICES

Program Objectives and Description

With a multimillion dollar investment in facilities for state offices and employees, centralized responsibilities for planning, acquisition, design, construction, maintenance and operation are needed to avoid duplication of effort and uncontrolled investment in office space. This is achieved in the following ways: (a) Providing adequate space for state operations at a cost below that which each agency could provide for itself; (b) Assuring protection of lives and property in public buildings and hospitals through design and construction supervision; (c) Insuring that facilities constructed with state funds are accessible to the physically handicapped; (d) Establishing uniform public health and safety regulations for building construction; (e) Providing impartial hearings for the general public and construction industry in their interactions with state agencies; (f) Acquiring, managing and disposing of real property (except leases) for state agencies, and providing public service facilities with economy of operations and uniform practices for protecting the public's interests and insuring equitable treatment of private property owners; (g) Preserving the state's capital investments in buildings, grounds, and equipment through an efficient and effective centralized maintenance and operation program; (h) administering the State's School Building Aid law, which provides financial assistance to school districts for the development of school sites, construction, and reconstruction of school buildings and purchase of furniture and equipment.

Authority

a. State Architect: Government Code Sections 4454, 14250–14404, 14600, 14650, 14651, 14679–14682, 14838, 14950–14962, 15800; Education Code Sections 15002.1, 15451–15465, Health and Safety Code Sections 15000–15023.
b. Buildings and grounds: Government Code Sections 14600, 14685–14687, 14700.
c. Facilities planning and development: Government Code Sections 8160, 14600.
d. Local assistance: Government Code Section 15500; Education Code, 19551–19689.
e. Real estate: Government Code Sections 11005, 11011, 14654, 14660–14670, 14820, 14821, 15800, 15850, 15862, 15863.
f. Space management: Government Code Sections 14678, 15800, 15817, 15862.
g. Building Rental: Government Code Sections 14660, 14670, 15850, 15862.
h. Buildings Standards: Government Code Sections 11343, 11346.1, 11346.2, 11349.1, 11446.

10.10 Architectural Consulting and Construction Services

Architectural Consulting and Construction Services is comprised of three components: Architectural and engineering services, structural safety plan checking and physically handicapped plan checking. The architectural and engineering services component consists of the design, construction, and inspection of major State office buildings, other new facilities and alterations of existing facilities. Some design work is contracted out to private architectural and engineering firms, as warranted by the workload. The structural safety plan checking component consists of reviewing public school and hospital plans and the supervision of the construction of these facilities to ensure the protection of life and property from seismic occurrences. The physically handicapped plan checking component consists of reviewing plans and specifications for any public funded building to ensure compliance with physically handicapped accessibility requirements.

10.20 Buildings and Grounds

The Office of Buildings and Grounds maintains and operates State office buildings, grounds and surplus property. The division also coordinates and inspects building alterations, utilizing private contractors.

In 1984–85, 10.9 personnel years have been added to maintain buildings and grounds in the Van Nuys area. Also, 26.6 janitorial personnel years have been reduced in the current year and 33.6 in the budget year to reflect efficiencies gained from the shift from night to day cleaning.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Capitol complex—buildings and grounds maintenance (direct hours)	188,937	188,937	188,937

Personnel years	1,211.9	1,284.8	1,288.2

10.30 Facilities Planning and Development

The Office of Facilities Planning and Development formulates and maintains the development of office facilities in both major (over 250,000 population) and minor metropolitan areas within the State. In so doing it is necessary for this office to develop data and information which enables it to forecast future agency space requirements in these same areas. In response to these plans this office then initiates through the Department of General Services the first steps which lead to the construction, financing and/or purchasing of a facility. This is accomplished through the capital outlay and legislative processes.

An increasingly important function of this office is to perform environmental studies on behalf of the Department. The office also performs site feasibility and location studies, economic analyses and energy related studies.

The Office of Facilities Planning and Development also is responsible for the review of space requests to ensure their compliance with long range plans in effect in a given area. Other responsibilities include the review and maintenance of the Capitol Area Plan, performance of parking studies, and development of the five-year Capital Outlay Program. In addition, many special projects and studies on related subjects are undertaken for the legislative and executive branches of government. This office provides environmental review services to all departments and performs environmental studies and reports as required by the California Environmental Quality Act.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Major metropolitan area plan revisions	4	4	4
Minor metropolitan area plan revisions	1	2	3

Intrafund	*417*	*201*	*212*
Personnel years	13.2	13.2	13.2

10.40 Local Assistance

The Office of Local Assistance administers four major programs including State School Building Aid, Portable Classroom, Deferred Maintenance, and Lease-Purchase. These programs provide funding for the acquisition and development of school sites, construction or reconstruction of school buildings, maintenance of existing facilities, and the placement of portable classrooms where necessary. This assistance is provided to districts experiencing significant growth as well as those having buildings which do not meet earthquake safety requirements.

Other activities include: (1) partial reimbursement to counties for expenditures made in providing legal counsel for indigents, (2) investigation of unused school sites to determine whether a district will make payments to the state for nonuse, (3) administration of other programs of financial assistance to local agencies as assigned, and (4) monitoring the disposition of school surplus properties.

Four personnel years have been added in 1983–84 and 1984–85 to handle additional workload related to administering the State School Building Lease Purchase Program.

10.50 Real Estate

The Office of Real Estate is comprised of two components: real estate services and property acquisition act. Real estate services includes acquisition, property management and sales. The acquisition function consists of site selection, appraisal, appraisal review, negotiation and relocation services. Site selection involves providing real estate expertise to agencies in helping select the best site available. Appraisal involves collecting and analyzing data required to estimate market value. Appraisal reviews are made to ensure that the State pays, and the property owner receives, fair market value. Negotiations are conducted with property owners on the basis of the approved appraised value. Relocation services are provided to owners and tenants to ensure they receive the advice and/or funds to relocate as provided under law. Property management involves the management of state-owned properties acquired but not yet occupied by the purchasing agency, and evaluating the leasing of state-owned property not under the jurisdiction of the Department of General Services. Real estate sales is responsible for the disposal or transfer of state property no longer needed for state use.

The Property Acquisition Act provides the Department of General Services the authority to acquire and hold property until it is needed for its intended purpose. Income derived from such property holdings during this period are deposited in a special account in the General Fund for use in offsetting costs of property management and maintenance.

10.60 Space Management

The Office of Space Management is responsible for providing well planned, functional and economical quarters to accommodate the non-institutional office and warehouse needs of agencies in State-owned and leased facilities, including modular and relocatable buildings and trailers. Major areas of responsibility include the allocation of space in State-owned or leased buildings, programming space requirements for proposed new buildings, space planning, leasing and lease management operations. When authorized specifically by budget language, Space Management Division is responsible for the development of alternative financial plans for proposed state buildings by means of long term lease purchase agreements or by leases with options to purchase.

20 STATEWIDE SUPPORT SERVICES

Program Objectives and Description

To fulfill their program responsibilities, state agencies require support services for business transactions and activities which are basic to their organizational functions. These operational requirements include procurement of materials, data processing services, communication, transportation, printing, security, and related business and office services.

Other State agency support requirements, on a periodic basis, include consulting services for legal contracts and insurance management. Additionally, licensing agencies require services of hearing officers for alleged violations by license holders.

These diverse services are more effectively and economically provided under a consolidated program which centralizes resources, capabilities, talents, and facilities for efficient response to support requirements of client state agencies.

Authority

a. Administrative hearings: Administrative Procedure Act, and Government Code Sections 11370–11370.5, 11371–11374, 11380, 11409, 11502, and 500–11528.
b. Communications: Government Code Section 14931.
c. Fleet administration: Government Code Sections 13950–13956, 14615, 14621, 14669, and 14675–14678; Board of Control Rules and Regulations, Articles 8 and 15; and State Administrative Manual Sections 4100–4300.
d. Insurance: Government Code Sections 11007.5, 11007.7, 11290, 14848, 16378, 16379 and 18310; State Administrative Manual Sections 0480–0484, 2500–2520, 2530, 2541, 2560, 2581–2582.1, 8576, and 8776–77.
e. Legal services: Government Code Sections 14610 and 14780.
f. Management services: Government Code Sections 11152, 14600, 14607, 14615.
g. Office services: State Administrative Manual Sections 1252, 1253, 2121–2122.26 and 2880–2883.
h. Procurement: Government Code Sections 14780–14814, 14860 and 14880–14922.
i. Records management: Government Code Sections 14740–14755, 14760, 14765–14768, 14770–14774; State Administrative Manual Sections 1600–1653.
j. State Police: Government Code Section 14613, Penal Code Sections 830.2 and 830.4, and State Administrative Manual Sections 2600–2677.
k. State printing: Government Code Sections 9700–9768 and 14850–14877 and State Administrative Manual Sections 2802–2840 and 3122.2.
l. Small and minority business procurement assistance: Government Code Sections 14835–14842.

20.10 Administrative Hearings

The Office of Administrative Hearings conducts quasi-judicial hearings for various state or public agencies in connection with the issuance, renewal, suspension or revocation of licenses. Hearing reporters/monitors record verbatim accounts of proceedings conducted by the administrative law judges, and when called upon provide for verbatim transcripts of the hearings. The office also conducts studies in administrative law and procedure.

Increased requests for arbitration of public works contract disputes, have necessitated the addition of $362,000 in 1983–84 and $226,000 in 1984–85 to contract with arbitrators. In addition, 3.8 personnel years were reduced in 1984–85 due to reduced hearing reporter workload and reduced special education hearing workload.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Hearings scheduled (excluding categorical aid hearings)	4,995	5,000	5,000

Service Revolving Fund	*3,913*	*4,600*	*4,544*
Personnel years	70.9	71.1	67.4

20.15 Telecommunications

The Office of Telecommunications is responsible for providing telecommunications services to all state agencies to meet their operational requirements. Services are provided for radio, telephone, teletype, closed circuit TV, data transmission facilities, and any special telecommunications facilities. Service includes consulting, engineering, installation, maintenance, specifications, Federal Communications Commission license applications, equipment reviews, special studies and management of state telecommunications facilities and equipment.

The division also administers the Warren "911" Emergency Assistance Act. This includes insuring that the local entities are reimbursed for all initial and ongoing costs incurred while meeting the mandate of the law.

The 1984–85 budget reflects a net increase of 2.9 personnel years to accomplish additional workload being generated in the Emergency Telephone Program. The 1984–85 budget also reflects the addition of one personnel year to assume telecommunications workload being transferred from the Department of Transportation, a $1,053,000 augmentation to the equipment budget to fund the purchase of microwave equipment for the CHP and a $384,000 augmentation to the rent line item, to fund the relocation to a new facility. The Emergency Telephone Program's local assistance budget reflects an increase of $11,269,000 in the current year and $9,694,000 in the budget year to reflect the increasing number of emergency telephone number systems being installed.

20.20 Fleet Administration

The Office of Fleet Administration establishes policies and procedures on all aspects of state-owned vehicles. Inspectors of automotive equipment are available for consultation to all agencies for determination of required repairs, periodic safety checks, replacement reviews, considerations of agency vehicle needs, proper utilization and other automotive management problems.

Garage operations at 10 locations provide some or all of the following services in support of state agencies: tripper pools for short-term assignment of passenger cars to state employees, long-term rental of vehicles to agencies, preventive maintenance, gas, oil and car wash, and auction of used vehicles. Parking services for state employees and the public in major urban areas are also administered by the division.

The division also administers the construction, operation and maintenance of motor vehicle parking facilities for State offices and employees.

Three personnel years were added in 1984–85 to operate a tripper pool at the new Van Nuys State Building.

20.25 Insurance and Risk Management

The Office of Insurance and Risk Management provides centralized management of State insurance and risk management requirements. Services include analyzing insurance needs of State and local agencies as well as negotiating for insurance procurement necessitated by such analysis. Services also include consulting and advising agencies on risk management problems, administering a comprehensive program for recovery of damages to state-owned vehicles and administering the Defensive Driver Training Program, the Motor Vehicle Liability Self-Insurance Program, and the State Workers' Compensation and Safety Program.

In 1984–85, an increase in Service Revolving Fund expenditures of $707,000 is included to reflect the cost of contracts for insurance benefits for State managers. Also, in 1984–85, a total of $707,000 is added for allocation to departments from the appropriate funds to pay the Department of General Services for these benefit costs. In 1985–86 and subsequent years, funding for this benefit will be included in departmental support budgets. Department of General Services will continue to provide statewide contract negotiation and management services.

Personnel years	19.2	19.2	19.2

20.35 Management Services

The Office of Management Services provides a variety of support services as follows:

1. Accounting and financial services to the department, smaller state organizations, and various boards and commissions.
2. Data processing services including a full-range of personnel and data entry services related to electronic data processing support.
3. EDP education including courses for both EDP technical and 'user' operations and management personnel.

13.1 personnel years were reduced in 1984–85 reflecting a reduction in data processing workload and reduced administrative workload.

Performance Measures

Personnel years	241.2	252.6	239.3

20.40 Support Services

The Office of Support Services provides state agencies with supportive services, office machine repair, reproduction, and business equipment management services. Supportive services include: (a) Mail centers in Office Building Nos. 1, 8, 9 and the Bateson Building which distribute U.S. and interagency mail to the building tenants, provide for external building messenger service, prepare freight and mail for shipment, and also receive and deliver supplies, materials, and equipment; (b) The Interagency Mail and Messenger Unit which distributes mail between state agencies.

The Office Machine Repair Unit provides for the rental, maintenance, and repair of office machines and also advises and aids in evaluations provided by the Office of Procurement. The Reproduction Unit provides "job-shop printing", addressograph and reproduction services to client agencies. It also advises agencies on reproduction equipment and methods.

The Business Equipment Management Unit contributes to the reduction of the State's total copying and business communication costs through analysis of client copier requirements and machine capabilities.

3.7 personnel years were reduced in 1984–85 due to decreased interagency mail workload and decreased temporary help requirements.

20.45 Procurement

The procurement element includes three components: purchasing, material services, and traffic management.

Purchasing processes requisitions of state and local agencies including developing and circulating bid invitations, awarding bids, and issuing purchase orders. It also provides overall direction and review of purchasing methods and techniques, establishes product standards, tests for compliance with standards, coordinates consolidated purchase projects and programs, and conducts training programs for agency receiving personnel.

Material Services buys operating supplies in large quantities at maximum discounts for resale to state agencies, provides for sale and distribution of state publications, and reviews equipment disposed of by state agencies and selectively obtains, refurbishes, and resells such used equipment to other state agencies. In addition, this component provides for the centralized purchase, storage, and distribution of canned fruits and vegetables to support the institutional feeding programs of the Departments of Health, Corrections, and Youth Authority.

Traffic management provides traffic management services including the review of state shipping and freight receipt practices.

The Federal Surplus Personal Property Program is proposed to be transferred from the Department of Education, increasing the budget in 1984–85 by 54.9 personnel years and $2,491,000.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Purchase volume	$395,769,792	$424,397,000	$453,575,050

1760 DEPARTMENT OF GENERAL SERVICES—*Continued*

20.55 State Police

The Office of California State Police is assigned the responsibility to protect employees and members of the public while on State property and to safeguard State facilities and grounds. Maximum demands for police services arise during that period of the day when State government is providing services to the public. The greatest need for security services occurs at those times when occupancy of buildings or facilities is at a minimum. Protective services for constitutional officers and members of the Legislature is based on need but is usually provided on a continuous basis. A full range of police service is provided including criminal and background investigations; crowd control; air, motor, bicycle, and foot patrol; electronic countermeasures detection; and explosive ordnance disposal. The Division provides security surveys, facility inspection, protection of state and personal property, employee protection, technical planning assistance, and first aid, including CPR training through the Employee Protection and Crime Prevention Programs. Where special needs have been demonstrated, regular police or security is augmented by contractual service.

In 1984–85, two personnel years have been added in the budget year to meet the additional workload demands in the Executive Protection Bureau, and 22 personnel years are added to provide security services to the Museum of Science and Industry and Exposition Park by contract.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of contracts	46	48	50
Number of work orders	153	160	170
Crimes (felonies, misdemeanors)	5,785	6,364	7,000

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$12,603	$14,623	$16,463
Service Revolving Fund	*9,474*	*10,751*	*12,344*
General Fund	*2,903*	*3,653*	*3,889*
Intrafund	*226*	*219*	*230*
Personnel years	324.4	417.3	441.3

20.60 State Printing

The Office of State Printing provides printing services for the Legislature and for all state agencies except the University of California that include: 1) Legislative printing—printing of bills, records, documents and reports necessary to conduct the business of the Legislature; 2) Operation of the Legislative Bill Room which distributes legislative printed material to the Legislature and the general public; 3) State agency printing—printing of forms, records, reports and publications necessary to agency operations, including distribution of state materials printed under the Library Distribution Act; 4) Elementary school textbook printing—textbooks ordered by the Department of Education for distribution to local school districts; 5) Hand bound library and legislative publications.

The 1984–85 budget reflects a reduction 28.6 personnel years due to the implementation of the PRINT project, the purchase of labor saving equipment and a general workload decline.

For the 1984–85 fiscal year the costs of printing the Governor's Budget are being reflected in the budget of the State Printing Plant as a direct General Fund expense.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of measures and resolutions printed	12,641	12,000	12,000
Printing orders (total)	14,190	14,400	14,400
Textbook printing (number of completed textbooks—reprints and new)	467,470	420,000	420,000

Input	*1982–83**	*1983–84**	*1984–85**

Personnel years	485.6	515	486.2

20.65 Small and Minority Business

This office helps facilitate small and minority business participation in State procurements, construction contracts, and service contracts. This goal is accomplished through seminars and workshops in prequalification and bidding; coordination with federal, state, and private organizations; and compilation of various small and minority business listings.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of existing small business prequalifications	5,930	6,472	6,794
Number of new small business prequalifications	542	322	326

30 ADMINISTRATION

The department's administrative program consists of executive, staff support and program evaluation elements that include the Executive Office. Administrative Services Division and Program and Compliance Evaluation Division. Together these elements provide fiscal, personnel, training and management advice and services to the department's line programs. In addition, the administration is responsible for implementation of the department's Equal Employment Opportunity, Affirmative Action and the Statewide Energy Assessment Programs.

The Consulting Services Unit within the Program and Compliance Evaluation Division provides consulting services to other state agencies on a reimbursable basis.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.30 Program and Compliance Evaluation	32.8	33.6	33.6	1,385	1,440	1,496

30.10 Executive

The executive program consists of the Director's office and, until 1983–84, the Energy Assessments Unit. The Director's office provides the executive leadership for the department by directing departmental operations, setting policy, making decisions concerning program operations and insuring that departmental programs and services are carried out in accordance with legislative intent as codified in the State Constitution, the Government Code, the Administrative Procedures Act and the State Administrative Manual.

30.20 Administrative Services

The Office of Administrative Services program provides the department with the necessary budgeting personnel administration, and training services necessary to insure smooth and efficient operating of the line functions of the department. Personnel Services are also provided for various boards and commissions.

The Intermittent Pool has been reduced by 9.5 personnel years to reflect a reduced demand for services.

1880 STATE PERSONNEL BOARD

The State Personnel Board is responsible for serving the personnel needs of State agencies in the improvement of personnel practices and procedures. The Board's authority to conduct central personnel management functions for State Government derives from Article VII of the State Constitution and from provisions of the Government Code.

The State Personnel Board, within the framework of a merit system, maintains the civil service classification system, conducts the majority of the State's recruitment efforts, develops examining techniques to select and rank qualified applicants, receives and resolves appeals on medical claims, discrimination complaints, and punitive action; and provides leadership in personnel management, practices, and procedures. The Personnel Board also has the responsibility for coordination and evaluation of affirmative action/equal employment opportunity efforts within State departments and local agencies as required by State policy, Federal law and in conjunction with the Jobs Program. The Board also provides, under contract and on a fully reimbursable basis, technical personnel services to political subdivisions on request and administers a federally required merit system for some local governmental employees.

Through the Welfare Reform Act of 1971, the State Personnel Board was assigned the responsibility of the Career Opportunities Development Program including the development, implementation, and operation of the Jobs Program for welfare recipients, and technical assistance to the State and local jurisdictions.

SUMMARY OF PROGRAM REQUIREMENTS

		*1982–83**	*1983–84**	*1984–85**
10	Merit System Administration	$20,162	$21,304	$21,737

20	Increased workload in appeals and hearings	7.9	344
40	Reduced workload and funding	−17.9	−460
50	Reduced workload	−1.5	−30
50.01	Reduced workload in administration, word processing center	−1.6	−25

10 MERIT SYSTEM ADMINISTRATION

Program Objectives and Description

This program provides the full range of personnel services necessary to administer the merit system for State Government. These services include maintenance of the classification plan, examination of applicants for State employment to ensure that all potential employees are qualified, development and adoption of personnel management policy, administration of the State's affirmative action program, and development of employment opportunities under the Welfare Reform Act of 1971.

A reduction of 4 personnel years in 1983–84 and 7.8 personnel years and $314,000 in 1984–85 is proposed from this program for redirection to Program 20—Appeals. This is possible because of reduced testing activities due to reduced hiring and a decline in the number of persons in state employment. One of the positions and its incumbent will come from the Affirmative Action for the Disabled Unit to deal specifically with appeals related to disabled issues.

10.50	Career Opportunities Development	10.5	8.1	8.1	7,144	8,478	8,676

10.10 Personnel Services

This element is responsible for all classification matters; determines the need, and develops the plans for state service examinations. These activities are conducted under agreements with State agencies called performance contracts.

The performance contract is an agreement between the Board and a department that identifies the specific work to be performed for that department. The contracts specify priorities, allocate resources, specify responsibilities of the department and the Board; and establish agreed upon timetables for completion of the work.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

Reimbursements				*30*	*25*	*25*

10.20 List Establishment

List establishment includes all activities directly connected with placing persons on eligible lists for regular civil service positions. This begins with the contracting process and the agreement between the requesting department and the State Personnel Board staff that there is a need for an examination, and continues until the eligible list is actually established. This element provides for the planning of individual selection efforts to meet departmental needs and involves the application of validation techniques and research development to specific examining situations. Major activities of this element are test planning and management, recruitment and publicity, test construction, test administration, conducting qualifications appraisal panels and employee development appraisals, and certification. Focused affirmative action recruitment projects are carried out in order to increase minority, female and disabled representation in State Government. Examination processing may be coordinated with line departments operating delegated or decentralized selection programs.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Applications received for centralized testing	137,495	125,000	125,000

General Fund				*1,877*	*1,190*	*1,207*
Reimbursements				*7*	*2*	*2*

10.40 Affirmative Action

A comprehensive affirmative action program was established by the State Personnel Board in order to achieve a fully balanced work force by ethnic, sex and disabled representation. Information developed by this program enables the staff to concentrate on removing the underlying causes of low representation of minorities, women and the disabled in State and local work forces. The staff consults with departments in the preparation of affirmative action plans and policies, and reviews and approves those plans and policies. Program staff also monitors statewide progress toward affirmative action goals and prepare an annual report on each State agency's progress toward achieving a balanced work force.

While continuing affirmative action efforts to achieve a fully representative work force, specific focus is given to increasing the representation of Hispanic persons, implementing affirmative action hiring programs for the disabled, achieving distributional representation of women, and providing career opportunities for all underutilized employees through upward mobility programs. Enforcement actions are taken against departments which do not show affirmative action progress.

10.50 Career Opportunities Development

The Career Opportunities Development (COD) element, authorized by the Welfare Reform Act of 1971, provides subsidized jobs, ultimately leading to unsubsidized jobs for welfare recipients, disabled and other disadvantaged persons thus reducing welfare costs. This is accomplished through the matching of State with Federal funds in the development of on-the-job training (OJT) projects, and providing technical assistance and coordination with local and State units of government.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20 APPEALS

Program Objectives and Description

The Appeals Division, established February 1, 1978, investigates appeals to the State Personnel Board relating to complaints of discrimination, grievances, examination appeals, Medical Officer decisions, and other appeals resulting from State Personnel Board or departmental action. It provides recommendations for the disposition of such cases to the State Personnel Board's Executive Officer, and provides staff assistance to the State Personnel Board when such cases are appealed to the Board.

It conducts hearings in accordance with the provisions of Government Code Section 11513 and recommends proposed decisions to the State Personnel Board in connection with appeals from punitive or disciplinary actions, or other matters as assigned by the Executive Officer.

An increase of 3.7 personnel years in 1983–84 and 7.9 personnel years and $344,000 in 1984–85 is proposed. The resources will be obtained through redirection from programs 10—Merit System Administration and 50—Administrative Services. The increase is necessary because of an ever increasing workload in both the appeal and administrative hearing processes. The workload cannot be processed with the current level of authorized positions.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40 LOCAL GOVERNMENT SERVICES

Program Objectives and Description

The Local Government Services Division provides two programs: Cooperative Personnel Services (CPS) and Merit System Services (MSS). This Division develops reliable, job-related selection processes, tests, and services which minimize or eliminate adverse effect, provides them on a timely basis, and administers or insures that local agencies administer them in accordance with SPB policy direction.

The Division provides training and consultation to local agencies, where needed, that improve the effectiveness of their personnel management programs.

Local Government Services Division also provides direction and assistance to grant-aided agencies to attain, at all occupational levels, a work force which reflects the proportion of ethnic groups and women in the appropriate labor market; and provides direction and assistance to grant-aided agencies to improve the representation of disabled persons in their work force; and maintains the capacity to provide these services to local agencies on their request.

A reduction of 15.9 personnel years in 1983–84 and 17.9 personnel years and $460,000 in 1984–85 is proposed. The reduction is the result of reduced demand for recruitment, examining, classification and other personnel-related activities.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40.10 Contract Personnel Services

Complete recruitment and selection services are provided upon the request of local agencies for use in accordance with standards set by the State Personnel Board. Written and performance-type examinations are provided, interviews are conducted, and advice and assistance are given on any phase of recruitment and selection. Developmental projects are conducted to improve selection systems and techniques. Selection training is available to improve local agency technical expertise.

Continuing emphasis is being given to the improvement of written test materials, especially with regard to establishing validity and developing test methods to provide fairness to candidates from all cultural groups and backgrounds, and to the development of job-related alternatives to written tests.

40.20 Merit System Services—Approved Local Merit Systems

The Approved Local Merit System Services Unit reviews and approves for compliance merit systems and personnel standards (including affirmative action) established by local agencies for their welfare, health and emergency services departments. Audits are conducted to ensure continuing compliance with Federal and State requirements. Consultation on a variety of personnel management subjects is available to assist local agencies to meet the established standards.

50 ADMINISTRATIVE SERVICES

Program Objectives and Description

A Constitutional Board of five members is appointed by the Governor to ten-year terms. The Board provides direction to the State civil service system through its authority to adopt rules and promulgate policy in the area of Personnel Management. Public hearings are held by the Board for the purpose of maintaining an effective and responsive merit system which satisfies the need of State Government and serves the interests of the public.

Ongoing program management is provided through the Executive Officer who is appointed by the Board. Legislative liaison is also provided through the Executive Office.

A variety of services are centralized in this Division to enable the Personnel Board to use its personnel and resources in the most cost-effective mode possible. Administrative Services monitors divisional operations and expenditures to assure that the Board properly discharges its duties and responsibilities and promotes an organizational climate whereby staff expertise is developed, communication channels are open, program objectives, policies, and procedures are understood, and deficiencies are identified and corrected on a timely basis.

These are accomplished through the following areas of support: Fiscal, Resource Allocation, Planning, Management Analysis, Organization Review and Administrative Assistance, Staff Selection and Affirmative Action, Training and Staff Development, Personnel Services and Transactions, Employer-Employee Relations, Internal Communications, Facilities Management, Business Services, Data Processing, Management Information Coordination, Mail and Duplicating Services, General Files, Word Processing, Graphic Arts, Forms Management, and Paperwork Management.

A reduction of 0.8 personnel year is proposed in 1983–84. In 1984–85, 1.6 personnel years due to efficiencies resulting from the freeze and a reduction of 1.5 personnel years and $30,000 are proposed because of a decrease in workload. Of these reductions, 0.1 of a personnel year will be redirected to Program 20—Appeals to meet workload increases. A proposed technical change would increase initial expenditure authority by $225,000. This change causes no increase in total budget dollars, but permits better utilization of the CALSTARS system and more accurately distributes administrative services.

1900 PUBLIC EMPLOYEES' RETIREMENT SYSTEM

The system administers a group of separate, but related, benefits for more than 800,000 past and present public employees within the State of California. This grouping consists of retirement and death benefits; the extension of social security coverage to public employees; and the development, negotiation and administration of contracts with a number of health maintenance organizations, group hospital, and medical insurance plans. The system is managed by a Board of Administration whose members consist of six individuals elected by specified membership groups, two individuals appointed by the Governor, one individual appointed jointly by the Speaker of the Assembly and the Senate Rules Committee, one individual each designated by the State Personnel Board, the Director of the Department of Personnel Administration, the State Treasurer and the State Controller.

Participants in the system's programs include constitutional officers of the State, members of the Legislature, judges, volunteer firefighters, state employees, most school employees who are not teachers, and any other public employees whose employer has contracted for benefits offered by the system.

In the 1983–84 fiscal year the Legislature appropriated $500,000 for securing the services of a consultant to review the program, managerial, organizational and staffing needs of the system. A preliminary report is due in March, 1984. Decisions on the 1984–85 budget have been deferred pending the outcome of the study. Only those workload increases resulting from legislative or judicial mandates have been addressed in this budget.

10 RETIREMENT

Program Objectives and Description

This program provides a retirement and death benefit program for California public employers and their employees which will provide for the orderly and systematic retirement of employees and encourage career employment in the public service.

Beginning in 1932, the State provided a series of retirement and death benefits for its employees, other than teachers. In 1939, coverage was extended to employees of those political subdivisions of the State who wished to contract with the State retirement system. Today the system offers benefits based on service or disability to all covered employees; death benefits for employees and annuitants; survivors' benefits to members not covered by social security; and, to members in certain occupations, special benefits based on death or disability incurred in the line of duty.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.
* Dollars in thousands

1900 PUBLIC EMPLOYEES' RETIREMENT SYSTEM—*Continued*

Retirement benefits are based upon age, years of service, and the employee's final compensation. Benefits are modified by the selection of one of several options and/or by the employee's membership category of miscellaneous, safety, or state industrial members. Survivor, death, and disability benefits are also provided for under specific conditions.

The unfunded actuarial liability of the State's portion of the system as of June 30, 1982 was $6,097,415,003. If the State contribution rates remain in effect, the unfunded actuarial liability would be eliminated by June 30, 2012 based on current actuarial assumptions.

The unfunded liabilities for public agencies are funded in accordance with the terms of each agency's contract.

The Legislators' and Judges' Retirement and Volunteer Firefighters' Systems are also administered by the Public Employees' Retirement System.

In 1984–85 funds have been added for actuarial valuations of the Legislators' Retirement System ($50,000), the Judges' Retirement System ($50,000), and the Volunteer Firefighters' System ($5,000); $413 for increased Teale expenses; $70,000 for new duplicating equipment; $63,000 for a board member election; and $70,000 for new publications and increased printing costs. Also, 8.5 personnel years have been added to meet workload increases and 1 personnel year has been allocated from the Administration Program.

20 SOCIAL SECURITY

Program Objectives and Description

The purpose of this program is to provide a means whereby employees of public agencies may obtain coverage under the Old-Age, Survivors, Disability and Health Insurance provisions of the federal Social Security Act. The function administers the coverage and reporting phases of the Social Security Program for California public agencies.

30 HEALTH BENEFITS

Program Objectives and Description

This program provides medical and hospital insurance plans with private carriers and health maintenance organizations for State and other public agency employees, annuitants and their families. Primary activities are to negotiate contracts and to provide standards for health maintenance, basic, major medical, and supplemental to Medicare health plans; to conduct open enrollment periods, providing information to employees and annuitants; and to mediate service and claim disputes.

Total premium costs for the 1982–83 fiscal year were $300.8 million.

40 PERS SYSTEM REDESIGN PROJECT

Program Objectives and Description

The PERS System Redesign Project was undertaken in 1976 as a long-term solution to the ever-increasing pressure placed on the old EDP system and programs as a result of legislative changes, system growth, and computer hardware and software changes.

Several systems have been completed and implemented. Those currently scheduled for startup or design activities during the budget year include Contribution Reporting, Benefits and Investments.

50 ADMINISTRATION

Program Objectives and Description

This program provides the leadership and support services required to achieve the objectives of the system's programs.

Activities include the actuarial investigation into mortality and experience factors to establish appropriate benefit discounts, premiums and rates of contribution; determination of costs of proposed benefit changes; development of legislation desired by the System or other interested parties; analysis of all legislation affecting the System; prediction of future market trends; purchase and/or sale of securities resulting from analysis and comparison of current offerings; and provision of data processing, legal, personnel and fiscal services.

In 1983–84 $190,000 and 0.7 personnel year has been added to conduct a board member election. In 1984–85 1 personnel year has been added to meet workload increases.

60 LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the State to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Public Employees' Retirement System there are several legislative mandates. These are:

Chapter 1170, Statutes of 1978 (AB 2545) provides that certain school members will receive increases in their retirement allowances.

Chapter 1398, Statutes of 1974 (AB 2926) authorizes credit for unused sick leave for retirement credits for school district employees.

* Dollars in thousands

1900 PUBLIC EMPLOYEES' RETIREMENT SYSTEM—*Continued*

Chapter 1036, Statutes of 1979 (SB 629) provides cost-of-living adjustments to retired school members of PERS equal to those received by retired state members.

Chapter 799, Statutes of 1980 (SB 162) provided an increase in the lump sum death benefit payment to a surviving spouse or beneficiary of a deceased PERS member.

Chapter 1090, Statutes of 1981 (SB 1261) provided funding for a Board of Control claim related to Chapter 1170, Statutes of 1978 (AB 2545).

1920 STATE TEACHERS' RETIREMENT SYSTEM

The system was established in 1913 as the Public School Teachers' Retirement Salary Fund and Permanent Fund. It became the State Teachers' Retirement System in 1944. The Teachers' Retirement Board was formed in 1963 when the system became a state department, formerly it was a unit of the Department of Education.

The Board, by statute, has exclusive control over the investment and administration of the Teachers' Retirement Fund, makes rules, sets policies, and has the power and authority to hear and determine all facts pertaining to application for benefits under the retirement system. The Board is composed of the Superintendent of Public Instruction, the State Treasurer and the State Controller, who are ex-officio members of the board. The Governor-appointed members of the board include four members of the system, one retirant of the system and three from the public. The staff and the Teachers' Retirement Board manage the largest teachers' retirement system in the United States, having 301,028 members on June 30, 1983, and 94,983 persons on the benefit roll for a total of 396,011.

SIGNIFICANT PROGRAM CHANGES

Program	*Description*	*Personnel Years*	*Dollars*
10	Staff reduction resulting from further implementation of the on-line system	−2	–
	Positions abolished resulting from participation in SB 307, the early retirement program	−6	−$104
	75% purchasing power protection for retirees	5	193
	Reduced support expenditures for facilities operations due to purchase of new headquarters building as an investment	–	−457
	Discontinuance of contract with PERS for investment services	–	−594
	Reduction for expenditures now charged to continuing appropriation	–	−211

The System is developing an on-line computerized information system which is scheduled to be fully operational in fiscal year 1985–86. Funding for the implementation, including equipment acquisition, system design and development, and required reorganization is obtained through resource accruals (savings from presently budgeted resources). The majority of resource accruals are anticipated in the category of personal services. The system will, with the approval of the Department of Finance, transfer resource accruals from personal services into operating expenses and equipment. Documents will be processed to maintain control and visability of all resource accruals. Resource accruals will remain in the departmental budget to be used for continuing implementation. When the on-line computerized system is fully implemented and backlogs are eliminated, the resource accruals not required for ongoing operations will be deleted from the departmental budget. The following table indicates resources and expenditures associated with the implementation.

Resources	*1980–81**	*1981–82**	*1982–83**	*1983–84**	*1984–85**	*1985–86**	*1986–87**

Chapter 1429/82 authorized STRS to purchase and equip, as an investment, a building to be used as its headquarters. This was accomplished during the 1983–84 fiscal year. Commencing with the 1984–85 fiscal year, rent for the headquarters facility will be recognized by an accounting entry to preserve the investment return calculation. This eliminates the need to appropriate funds in the Governor's Budget for this item.

10 Service to Members and Employers

Program Objectives and Description

The objectives of the Teachers' Retirement Program are as follows:

1. To provide a financially sound plan for the funding of all approved benefits.
2. To provide adequate benefits on a timely basis for members of the State Teachers' Retirement System and their beneficiaries.
3. To develop and maintain a system, structured to aid in the maintenance of a qualified body of career teachers in the California public schools who intend to retire from the system.
4. To develop and maintain a comprehensive information program that will fully inform members, retirants, beneficiaries, the Administration, the Legislature and employers about the plan and meet Federal standards.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

1920 STATE TEACHERS' RETIREMENT SYSTEM—*Continued*

5. Provide progressive leadership, management, program development and support to insure that the other objectives are reached at the lowest possible cost at the approved level of service.

Contributions to the Teachers' Retirement Fund are derived from member contributions, employing school district contributions, appropriations from the General Fund and investment earnings (see Department of Education item 6300-101-001 for state contribution for benefits prior to 1972 and local assistance and state mandated local costs item 9680-101-001 for contributions for sick leave service credit and ad hoc benefit increases). The cost of administration is paid from the Teachers' Retirement Fund as provided in Section 22003 of the Education Code. The fund is reimbursed for administrative costs associated with the Tax Sheltered Annuity program and for processing refunds to former members.

The system is responsible for the determination, computation and payment of benefits to members, retirants, and beneficiaries, and for the distribution of information to all members, employers and other interested groups. Generally, payment of an estimated service retirement allowance is made 45 days after date of retirement or receipt of application, whichever is later. Every effort is made to pay refunds 45 days following receipt of application. Family and death benefits are paid within 75 days after report of death. Disability benefits are paid approximately 45 days after proof of disability is established.

The basic retirement allowance is calculated upon a member's age, years of service, and final compensation. The member may modify the basic allowance by selecting an option to provide for a beneficiary. The system also provides for survivor, disability and death benefits under specific conditions.

In 1983–84, 8.7 personnel years have been added, for six month limited term, as interim staff for the STRS newly established investment program. The 1984–85 Budget provides for a continuation of the $2 million appropriation which was provided in 1983–84 for staff and operating expenses for the investment function. STRS will submit a proposed plan for administration of their investment portfolio to the Legislature in January, and funds will be allocated when a final plan is approved by the Legislature and the Governor. In addition, adjustments have been made in 1984–85 to provide: 4.7 personnel years due to workload requirements in recently enacted legislation which provides purchasing power protection for retirees (Ch. 1606/1982 and Ch. 1213/1983); $236,000 for staff benefits which were underbudgeted; $125,000 for preparation and mailing of brochures and retirement information to retirees; a reduction of $1,262,000 in support funding resulting from reduced expenditures in contractual services and facilities operations; a reduction of 2 personnel years resulting from further implementation of the on-line system; and a reduction of 5.7 personnel years due to participation in the early retirement program (SB 307).

1950 DEPARTMENT OF VETERANS AFFAIRS

The Department of Veterans Affairs has a threefold overall objective: (1) provide comprehensive assistance to veterans and dependents of veterans in obtaining benefits and rights to which they may be entitled under State and federal laws; (2) afford California veterans the opportunity of becoming homeowners through the medium of long-term low-interest loans available to them under the Cal-Vet farm and home loan program; and (3) provide support for the Veterans Home of California where eligible veterans may live in a retirement community and where complete nursing care and hospitalization are provided.

10 FARM AND HOME LOANS TO VETERANS

Program Objectives and Description

Since 1921, the Cal-Vet loan program has successfully served the needs of over 359,000 World War I, World War II, Korean, and Vietnam veterans for long-term housing and farm loans at low interest rates. General Obligation Veterans Bonds and Revenue Veterans Bonds have been sold at intervals to provide funding for the program.

California veterans, except those who were wounded or are disabled from war service or were prisoners of war, have 25 years following their release from active military service to qualify and apply for loan benefits. Lending is directed primarily to the Vietnam veterans. Per Chapter 146, Statutes of 1983 (SB 75), maximum loans are: homes $75,000, homes with solar equipment, $80,000, mobile homes in parks $55,000, and farms $200,000.

Veteran purchasers are charged interest on their loans at the lowest rate which will cover all costs of the program. The interest rates charged have provided for redemption of the bonds, debt service, and all program administrative charges, without any cost to the California taxpayer.

In the past several years the State has experienced fluctuations in the amount of bond funds available for home or farm loans. The recent change in the maximum loan amount has resulted in an increase in the number of new loan applications. To meet this increased demand the Department held a $100 million Revenue Bond Sale in December 1983. Chapter 554 Statutes of 1983 (AB 1347) required the Department to set aside $10 million for making home improvement loans.

Future bond sales will not be as high as in previous years. Consequently, in 1984–85, staffing is being reduced by 13.8 personnel-years to reflect the reduction in workload and the reorganization and consolidation of district offices.

Authority

Article 3, Chapter 6, Division 4 of the California Military and Veterans Code.

10.10 Property Acquisition

This element encompasses the collection and evaluation of data regarding the applicant and his property selection. Loan decisions must protect the interest of both the veteran and the Cal-Vet loan program.

The military service documents of veterans, the records of veterans' widows, wives of prisoners of war, or persons missing in action, are inspected to determine the applicant's qualifications for a loan under the statute. This examination is integrated into the application process.

10.20 Loan Service

Four interrelated task efforts combine to assure fulfillment of the obligations of the contracting parties: mortgage loan accounting, insurance and property damage claims adjustment and services, loan contract alterations, and contract performance services.

Mortgage loan accounting consists of routine billing, cashiering, account computation, and recording of each borrower's payments.

Insurance services consist of determination and application of minimum coverages required for fire and hazard insurance and adjustment of disaster indemnity claims. When damage occurs, rapid repair and restoration of the contract property is arranged to assure satisfaction of the borrower and to protect the Department's interest.

The contract enumerates certain contract alterations to which the Department may consent. Among these are assignment of contract interest, rental, permission for secondary financing, change in legal description of property, and installment changes.

Contract performance services are those functions which logically occur in the course of the contract. Loans are paid in full by installments or are prepaid in advance. On fulfillment of the contract, the property is deeded and the account record is closed. During the life of the contract certain breaches of terms or conditions may occur. There is an element of risk in any loan and not all borrowers perform as agreed. Should a borrower become unwilling or unable to comply with the contract terms, it may be necessary to cancel the contract and either force a sale of the property or to repossess it. Repossessed properties are rehabilitated and sold.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of delinquent accounts [1]	12,614	13,153	13,714

Taxes and insurance				*(74,100)*	*(78,000)*	*(83,800)*

10.30 Loan Funding

Funds for Cal-Vet loans are derived from the sale of both general obligation and revenue bonds. Activities related to loan funding include sale, payment of interest, and redemption of Veterans Bonds. They are performed by the Veterans Finance Committee and the State Treasurer's Office in accordance with statutory provisions. All costs of such services are paid by the program. Proceeds from bond sales accrue to the Farm and Home Building Fund. These funds, together with prepayment of outstanding loans, are invested until required for authorized purposes. The differential between the interest earned on outstanding Cal-Vet loans and the average net interest cost on all outstanding bonds provides the total operating costs of the program. Work involved is in projecting the program's financial status at points in time to enable economic fund management to meet four annual bond redemption payments and to schedule bond sales annually at the most favorable interest rates to meet program needs.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20 VETERANS CLAIMS AND RIGHTS

Program Objectives and Description

California has the largest veteran population at 3 million or 10 percent of the nationwide veterans population of over 30 million. Federal and State laws relative to the health and financial care of veterans and dependents are varied and complex. The primary objectives of this program are to provide technical support to veterans, dependents, and County Veteran Service Offices when claiming entitlements from the Federal Veterans Administration (VA) and other federal agencies.

Entitlements from the VA include inpatient, extended and ambulatory care, compensation, pension, insurance, and burial allowance. A total of $1.1 billion in VA compensation and pension was paid to veterans and dependents in the state during FY 1982–83. of this amount, the Department and the County Veteran Service Offices were responsible for bringing in $50 million from new claims and the servicing of old claims.

[1] These figures represent the total number of accounts showing a delinquent balance for any three-month period during entire fiscal year and for which a "Notice of Intent to Cancel Contract" is issued.

[2] These figures represent the number of properties actually repossessed or estimated to be repossessed during the fiscal year.

20.10 Claims Representation

Veterans and their dependents seeking benefits from the Federal Veterans Administration file claims with the Veterans Administration Regional office in San Francisco, Los Angeles or San Diego. Claims representatives, through Power-of-Attorney, represent claimants before the Veterans Administration rating board to insure that maximum benefits are awarded. Claims Representatives analyze claims adjudicated by the rating board, these include the establishing or changing of ratings of service-connected disabilities pension, burial expenses and other Veteran Administration benefits.

Nationally, the number of enlisted personnel returning to civilian life has declined by one-tenth of one percent while the number of WWI and WWII veterans and dependents requiring assistance in obtaining benefits has increased. There is also an increasing number of federal programs designed to benefit Vietnam-era veterans which will inevitably result in increased demands on personnel in this program to assist these veterans in claiming benefits.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20.30 County Subvention

Fifty counties have established Veteran Service offices to assist veterans and their dependents at the local level and provide information on veterans benefits and through Power-of-Attorney file for VA and federal entitlements for the veteran and dependent. These entitlements include medical and dental out-patient treatment, compensation and pension for the veteran or the dependent. Many veterans who are County Welfare recipients are not aware of federal benefits to which they may be entitled. Through a referral system developed with the Department of Social Services, welfare applicants or recipients identified as veterans or dependents are directed to the County Veteran Service Office for determination of VA benefit eligibility. This system is designed to maximize federal benefits for veterans and dependents in lieu of State welfare benefits. In return for service performed, these offices receive partial reimbursement for their operating expenses.

The Department of Veterans Affairs staff monitors and reviews reports submitted by these local offices to ascertain that these services are being provided to the veterans.

20.40 Educational Assistance

The Stipend program is offered to spouses and children of veterans who died while in military service or incurred a minimum service connected disability rating of 50%, and to veterans declared to be Prisoners-Of-War or Missing-In-Action. This benefit is restricted to dependents not qualified to receive federal VA educational benefits under Chapter 35, Title 38, U.S. Code, or who receive a full scholarship from other institutions. Full time high school students receive $20.00 monthly maintenance payments and college level students receive $50.00 monthly maintenance payments, plus waiver of tuition and certain fees while attending a California state-owned college or university. Under the Education Code Fee Waiver Program, college students that meet the mandated income requirements may qualify for waiver of tuition and certain fees while attending a California state-owned college or university.

30 CARE OF SICK AND DISABLED VETERANS

Program Objectives and Description

The Veterans Home maintains an 837-bed medical and nursing facility (including 66 acute and intensive care beds, 291 skilled nursing beds, and 480 intermediate care nursing beds) and domiciliary structures with a bed capacity of 749. It is one of the largest geriatric facilities in the country and has full support facilities, including consultation services of medical experts and of a number of Veterans Administration hospitals in northern California.

The purpose of the Veterans Home has been defined as, ". . . to provide a community of services for disabled California veterans that will improve overall health, reduce the incidence and severity of disabilities, and increase social interaction in an environment which promotes self-reliance and self-worth. . . ." The hospital and nursing units are licensed by the State Department of Health Services under Title 22, California Administrative Code, and are accredited by the Joint Commission on Accreditation of Hospitals. Federal funds to partially offset the cost of providing care are received from the Veterans Administration and from Medicare.

The programs and services for residents of the Veterans Home are developed in cooperation with the Veterans Administration, other state agencies, local government, private organizations, and educational facilities.

In 1984–85, fire protection services are to be obtained from the Department of Forestry with a redirection of funds from 2.9 personnel-years deleted for 1984–85. Home health care services authorized in 1982 are deleted for 1984–85 since the 14.2 personnel-years were not staffed due to lack of certification. An additional 10.5 personnel-years for assistance to mentally disordered patients are added for 1984–85. Various licensure requirements are being met by the addition of 5.7 personnel-years for 1984–85.

Improvements in billing procedures have increased federal fund recoveries for 1983–84 beyond initial estimates, as a result a General Fund savings of $608,000 is projected.

30.10 Acute Care

This level of care requires continuous life saving services on a 24-hour, in-patient care basis which includes the basic services of: medical, nursing, surgical, anesthesia, laboratory, radiology, pharmacy and an organized medical staff. Intensive and coronary care are included.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Average acute beds filled	33	33	34

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**

Reimbursements to General Fund				*79*	*80*	*85*

30.20 Skilled Nursing Care

This level of care provides 24-hour in-patient care less intense than Acute Care and provides skilled nursing on an extended basis. As a minimum, rehabilitation, nursing, dietary, pharmaceutical and activity programs are provided. The degree of need for care may vary from moderate to total, because the patients are generally not able to perform daily living activities independently.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Average skilled nursing beds filled	252	255	260

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**

Reimbursements to General Fund				*1,102*	*1,123*	*1,150*

30.40 Residential Care

This level is for veterans who are able to perform daily living activities, although they may have a handicap and require supportive measures for mobility. There is a 24-hour availability of personal services, protection, supervision, assistance and a minimum level of nursing care.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Average residential population	110	111	112

Input	*82-83*	*83-84*	*84-85*	*1982-83**	*1983-84**	*1984-85**

* Dollars in thousands

1950 DEPARTMENT OF VETERANS AFFAIRS—*Continued*

30.50 Domiciliary Care

This level is for aged or disabled veterans who are self-sufficient and able to perform daily living activities adequately. They require a minimum of personal care, and supervision is provided by non-nursing personnel. They have immediate access to other levels of care and out-patient care as necessary.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

40 FARM AND HOME LOANS TO NATIONAL GUARD MEMBERS

Program Objectives and Description

The California National Guard Members Farm and Home Purchase Act of 1978 became effective January 1, 1979, and authorized the Military Department to sell revenue bonds to provide low interest loans to National Guard members for the purchase of farms and homes. The loan provisions of this new program are similar to those of the Cal-Vet Loan Program.

Pursuant to the enabling legislation, the Military Department assigned the responsibility of administering the new loan program to the Department of Veterans Affairs. The responsibility for determining National Guard member eligibility and for selling bonds was retained by the Military Department.

Proceeds of $25 million were received in 1980 and 1981 from the sale of revenue bonds. An additional $15 million sale of revenue bonds was held in December 1983. Section 481 of the Military and Veterans Code limits the sale of revenue bonds for home loans to $25 million in any 12-month period.

BUSINESS, TRANSPORTATION AND HOUSING

2060 SOLARCAL OFFICE

Program Objectives and Description

This office was created by Executive Order to advise the Governor regarding the development of solar energy, and to promote public awareness of its uses.

The SolarCal Office was eliminated on June 30, 1983. An allocation of $16,873 was made from the Reserve for Contingencies or Emergencies to provide for separation payments and unemployment benefits. BTH 1

2080 SOLAR AND ENERGY CONSERVATION MORTGAGE CORPORATION

Program Objectives and Description

Chapter 1033, Statutes of 1981 created the Solar and Energy Conservation Mortgage Corporation, to be known as "Sunny Mac".

Sunny Mac is authorized to purchase, sell, lend on the security of, and deal in loans or advances of credit made by a financial institution for financing the purchase and installation of energy conservation measures.

Sunny Mac was authorized to issue common stock to be held by member financial institutions. Enabling legislation provided for a seven-member board of directors, four directors to be elected by the stockholders, and with one member to be appointed by each of the following: the Governor, the State Treasurer, and the Secretary of the Business, Transportation and Housing Agency. In 1982–83, the Legislature appropriated $240,000 from the General Fund as a loan to provide funds for start up operations of Sunny Mac. The loan was to be repaid, with interest, to the General Fund.

In October 1983, the Board of Directors of the Solar and Energy Conservation Mortgage Corporation (Sunny Mac) voted to suspend operations of the corporation as of October 15, 1983. The board determined that the chance for success of the planned 1983 offering of Sunny Mac common shares was doubtful, and that the best course was to preserve remaining State funds by liquidating the corporation. Of the $240,000 and accrued interest owed by Sunny Mac to the General Fund for the loan authorized in the Budget Act of 1982, $80,000 was repaid on November 15, 1983, leaving a balance due of approximately $178,000. The Business, Transportation and Housing Agency anticipates initiating a Board of Control claim in the current year to retire the remaining unpaid balance of the loan.

Authority

Part 7 (commencing with Section 53000), Division 31 of the Health and Safety Code.

2100 DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL

The principal objective of the Department of Alcoholic Beverage Control is to administer the provisions of the Alcoholic Beverage Control Act, which vests in the department the exclusive right and power to license and regulate the manufacture, sale, purchase, possession and transportation of alcoholic beverages within the State, and subject to certain laws of the United States, to regulate the importation and exportation of alcoholic beverages into and from the State.

The workload is divided into the three elements: licensing, compliance, and administration.

Program performance data for this department may be retrieved from the California Fiscal Information System.

10.10 Licensing

Objectives and Description

There are three objectives of the licensing function. One is to license only qualified persons who apply to sell, produce or distribute alcoholic beverages. The qualifications are set forth in the Constitution and statutes and are interpreted by regulations and policy statements. The second objective is to issue licenses at appropriate locations. The third objective is to allow legitimate community protests (by public agencies and/or private parties) against the issuance of a license to be heard by an administrative law judge. Based on the validity of the evidence presented, a license will be issued or denied.

Annual fees vary with the type of license and range from $27.10 a year for an off-sale beer and wine license to $655.40 a year for an on-sale general license. There are also original fees for new licenses or transfer fees for moving from one location to another or for transferring from one entity to another. General licenses are limited in number, one on-sale for each 2,000 inhabitants of a county and one off-sale for each 2,500 inhabitants.

In 1984–85, four personnel years and $137,000 are proposed to be eliminated in this program to reflect increased efficiencies.

10.20 Compliance

Objectives and Description

The objective of the compliance element is to require adherence to the laws and regulations by persons licensed to sell, manufacture or otherwise deal in alcoholic beverages. The department focuses its attention on those violations which have an adverse effect on the community, such as serving obviously intoxicated patrons, minors, or those premises which foster or permit conditions of drug trafficking, prostitution, gambling, etc. Following original issuance or transfer of a license, other investigations are necessary to make certain that unqualified persons do not obtain control of the business through unreported changes in the ownership of licensed businesses.

Department investigations also involve the violation of business practices such as commercial bribery, illegal importation, tied-house restrictions, advertising limitations, and prohibitions against the giving of free goods in connection with sales of alcoholic beverages. Additional fees are assessed off-sale general retail licenses and some wholesale and manufacturing licensees for support of these investigations by the Department.

2100 DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL—*Continued*

10.30 Administration

Objectives and Description

General administration of the Department's program is carried out through a line organization consisting of the director, chief deputy director, assistant directors and district administrators. A staff organization, principally located in Sacramento, performs administrative and legal duties for the Department. For administrative purposes, the State is divided into two divisions with assistant directors in charge. The State is further subdivided into twenty-one districts with two districts maintaining branch offices. A district administrator or a supervising special investigator directs the work of the Department in each district.

The administrative staff at headquarters is responsible for the final review of license transactions, issuance and annual renewal of licenses, maintaining the official files of the Department and for performing the major part of financial management, personnel, training, support services and business practices activities for the Department.

The legal staff advises the Director on legal matters, drafts legislation believed necessary to more effectively regulate the alcohol beverage industries, submits requests for departmental regulations, represents the Department at disciplinary hearings, represents the Department before legislative committees and answers inquiries from the public and from members of the Legislature.

Decisions of the Department concerning licensing or compliance matters may be appealed by means of a procedure that begins with an administrative hearing and which may be carried to the Alcoholic Beverage Control Appeals Board (a constitutionally separate body) and on through the appellate court system.

In 1984–85, 2.3 personnel years and $38,000 are proposed to be eliminated in this program to reflect increased efficiencies.

2120 ALCOHOLIC BEVERAGE CONTROL APPEALS BOARD

Program Objectives and Description

The objective of the Alcoholic Beverage Control Appeals Board is to provide a remedy of appeal to people who are dissatisfied with a decision of the Department of Alcoholic Beverage Control ordering any penalty or issuing, denying, transferring, suspending or revoking any alcoholic beverage license. Following the filing of an appeal, receipt of the record on appeal and submission of written briefs, the Board hears oral argument on the appropriateness of the Department's decision. Thereafter, the Board prepares, publishes and distributes a formal written opinion on all cases. A party seeking review of an Appeals Board decision must file a Petition for Writ of Review with the Courts of Appeal.

The 1983–84 Omnibus Bill enacted a small surcharge to be applied to each liquor license and the proceeds be used to fund the Appeals Board. In addition, Chapter 803, Statutes of 1983 amended Section 23075 of the Business and Professions Code to provide that members of the board shall serve without salary, but shall receive per diem of $100 per day and necessary travel expenses.

Authority

Authority for the Alcoholic Beverage Control Appeals Board, which consists of three members appointed by the Governor, stems from Article XX, Section 22, of the California Constitution and Division 9, Business and Professions Code.

10 ADMINISTRATIVE REVIEW

Program Objectives and Description

During Fiscal Year 1982–83 the Department of Alcoholic Beverage Control received 20,601 applications for liquor licenses and conducted 7,438 investigations on complaints and referrals. As a result of enforcement and investigatory actions taken by the Department and other policing agencies, 2,347 accusations were filed. 340 administrative hearings were held. 77 appeals were filed with the Alcoholic Beverage Control Appeals Board. 74 decisions and orders on motions were issued by the Appeals Board. Judicial review was requested of a District Court of Appeals and the California Supreme Court on 66 occasions. Of these, only 12 petitions were granted. (6 of which pertained to filing fees)

2140 STATE BANKING DEPARTMENT

The State Banking Department's primary objective is to protect the public from economic loss resulting from bank and trust company failures. In addition to encouraging observance of sound banking practices, the Department regulates transmitters of money abroad and certifies securities for the State of California and municipalities and other government agencies within the State of California as legal investments. The Superintendent of Banks is the administrator of local agency securities. The programs of the Department are supported by an annual assessment of banks and issuers of money orders and travelers checks, trust companies, license and application fees, and charges for specific services. Chapter 1411, Statutes of 1982 (AB 2162) allows cross industry mergers between savings and loans and banks. Chapter 1196, Statutes of 1982 (AB 3469) increases the investments by banks in real estate activities.

10 LICENSING AND SUPERVISION OF BANKS AND TRUST COMPANIES

Program Objectives and Description

To protect the public from economic losses that often result from failure of banks and trust companies, without depriving the public of reasonably priced, convenient banking and trust services and to guard against the damaging ripple effect on the smaller financial institutions that is often associated with the failure of a bank or trust company. *The 1984–85 budget proposes a workload reduction of one clerical and $15,000 due to increased efficiencies in low priority activities within this program. Further, the 1984–85 budget proposes to add $10,000 to meet increased rent costs due to renegotiating the expired lease for the San Diego office.*

Authority

California Financial Code, Division 1, Chapters 3, 4, 12, 14, 16, 17, and 19 (Banking Laws).

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

10.30	Continuing Supervision of Trust Activities	3.2	5	5	139	217	239

10.10 Investigation of Applications for New Facilities

Since the establishment of new banks, new trust companies, branches of existing banks, branches of foreign banks, trust departments of existing banks and title companies and other new facilities increases the potential risk of loss for the organization involved and, therefore, the public, the prior approval of the Superintendent of Banks is required. In each case, the application requesting the approval is investigated to determine whether statutory and administrative requirements are satisfied.

2140 STATE BANKING DEPARTMENT—*Continued*

10.20 Continuing Supervision of Existing Banking Facilities

Periodic examinations of all banking institutions are necessary to protect depositors and assure a sound banking system. Each bank under State jurisdiction is required by statute to be examined at least once every two years; with problem institutions subject to more frequent examination. The Department overseer program utilizes examination results as well as additional data derived from ongoing monitoring of the banks to achieve early solutions to problems that might escalate if left unattended. An expanded electronic data processing and statistical analysis capability has been implemented in support of both the overseer and examination functions.

An important part of the supervisory function is the investigation of complaints received from the general public and cooperation with law enforcement agencies in connection with crimes affecting banks.

Performance Measures	*1982-83*	*1983-84*	*1984-85*

10.30 Continuing Supervision of Trust Facilities

Annual examinations of trust companies and trust departments of banks and title insurance companies form the basis of supervision of the trust business. Trust examining is highly specialized and includes verification of trust assets, the reconciliation of accounts, a review of the legal aspects of transactions, a study of the administration of trust accounts, and an evaluation of the ability and capacity of the senior trust officers. Reports are rendered to the trust company or trust department with recommendations for corrective action.

Performance Measures	*1982-83*	*1983-84*	*1984-85*

20 PAYMENT INSTRUMENTS

Program Objectives and Description

To protect the public from economic loss resulting from the failure of a Company engaging in the business of selling money orders and travelers checks either for domestic use or for purposes of transmitting money abroad. Periodic reports and examinations are utilized to ensure that these businesses are conducted in a financially sound manner.

Authority

California Financial Code, Division 1, Chapter 15 (Banking Law).

2140 STATE BANKING DEPARTMENT—*Continued*

30 CERTIFICATION OF SECURITIES

Program Objectives and Description

The Department issues certificates of eligibility for obligations of the State of California and its subdivisions. The program also includes determination of the legality of bank investments and overseeing the pledging of securities for faithful performance of fiduciary and other activities of banks and foreign agencies.

Authority

California Financial Code, Division 1, Chapter 11 (Banking Law).

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40 ADMINISTRATION OF LOCAL AGENCY SECURITY

Program Objectives and Description

The Superintendent of Banks is the administrator of local agency security, who, utilizing a pool concept acts as an agent for approximately sixteen hundred local treasurers in verifying the amount and quality of collateral pledged to secure deposits of public funds made by local agencies. The Superintendent also has the responsibility of administering local agency security for savings and loans.

Authority

California Government Code, Title 5, Division 2, Part 1, Chapter 4, Article 2.

50 SUPERVISION OF CALIFORNIA BUSINESS AND INDUSTRIAL DEVELOPMENT CORPORATIONS

Program Objectives and Description

Certain Federal agencies, most notably, the Small Business Administration's Section 7A Loan Guarantee Program, require a lender to be a "Licensed and regulated financial institution", to qualify for guarantees. The statute authorizes the Department to regulate non-fiduciary BIDCO's to better utilize Federal guarantee programs in California.

Authority

Corporations Code, Division 3 of Title 1, Part 6.

2180 DEPARTMENT OF CORPORATIONS

Program Objectives

The principal objectives of the Department of Corporations are:

To provide, through the Investment Program, appropriate controls over the solicitation, marketing and sale of securities and franchises to California residents; to install and maintain adequate deterrents and safeguards against unfair or unscrupulous promotional schemes; to take suitable enforcement action when dishonest and questionable practices occur in such sales.

To fulfill, through the Lender-Fiduciary Program, statutory demands to provide regulatory surveillance over companies engaged in the business of lending money or receiving funds from the public in a fiduciary capacity.

To fulfill, through the Health Care Service Plan Program, statutory requirements to provide regulatory surveillance over companies engaged in the business of providing health care to plan enrollees.

To provide, through the Administration Program, service functions essential to the operation of the department.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**
10 Investment Program	$6,725	$7,264	$7,658

10.30 and 10.50	Reduced staff needs due to efficiencies	−5	−$128,000
10.30	Audits and examination, workload increases	10.3	253,000

10 INVESTMENT PROGRAM

Securities worth billions of dollars are sold to residents of the State of California annually. The Corporate Securities Law requires that the Commissioner find that the sale of securities is not unfair, unjust or inequitable. Full disclosure of relevant financial and legal information is generally considered essential in public offerings so that all investors, especially those who are less sophisticated, may learn the risks inherent in investments of this type. The Franchise Investment Law requires the franchisor to give full disclosure to the would-be purchaser.

Over 30,000 broker-dealers, agents, and investment advisors are authorized to recommend securities transactions to, and to deal in securities with, the general public. This department is the agency through which the public may address and pursue its grievances against those whom it feels have made improper sales and issuance of securities, or have otherwise violated the corporate securities law.

For Fiscal Year 1984–85, three Office Assistant II's and one Mining and Petroleum Engineer and $95,000 are proposed to be eliminated from this program to increase efficiencies in low priority activities. Also, two Corporation Examiner II's and $58,000 in reimbursements are proposed in the Department's Broker-Dealer and Investment Advisor Examination Program and $25,000 is proposed for access to LEXIS, a computerized legal research system.

10.30 Regulation and Enforcement (Corporate Securities Law)	80.8	74.4	74.9	3,594	3,510	3,766

10.10 Qualifications

The sale and issuance of nonexempt securities in the State of California must be qualified pursuant to the Corporate Securities Law through the filing of an application, including current financial statements and other relevent exhibits.

Specific conditions may be imposed on the qualification if it is found that otherwise the sale of securities could be unfair, unjust and inequitable. Qualification can be by coordination, notification or permit.

Performance Measures (Issued, Denied, Abandoned, or Withdrawn)	*1982–83*	*1983–84*	*1984–85*

Expenditures	78.4	84.4	81.8	$2,852	$3,468	$3,590

10.20 Franchises

No franchise may be offered or sold in the State of California unless the offer has been registered or exempted from registration. In order to register, an application must be filed disclosing certain relevant information. Under certain circumstances defined in the Franchise Investment Law, the Commissioner may summarily issue a stop order denying the effectiveness of or suspending or revoking the effectiveness of any registration.

2180 DEPARTMENT OF CORPORATIONS—*Continued*

10.30 Regulation and Enforcement—Corporate Securities Law

Prospective broker-dealers, and investment advisers must file applications for certificates to operate in California. Evaluation of the applicant's background, business experience, and financial condition is made before a certificate is issued or denied.

Complaints filed by the general public, as well as possible infractions noted by the staff or members of other regulatory agencies are thoroughly investigated. As a result of the department's findings, one of the following steps is taken: no further action may be deemed necessary; punitive action including suspension or revocation of a certificate, license, or permit may be taken and/or criminal proceedings may be instituted by other enforcement agencies.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20 LENDER-FIDUCIARY PROGRAM

Program Objectives and Description

Check sellers and cashers, credit unions, escrow agents, industrial loan companies, personal property brokers, consumer finance lenders, commercial finance lenders, and trading stamp companies render services to California residents, providing them with assistance in financial and fiduciary matters. Over 8,500 licensees serve Californians in this manner under the several laws covered by this program.

Periodic regulatory examinations of the books and records of licensees are conducted for the purpose of discovering and correcting errors of interpretation and procedure; determining and evaluating the financial condition of certain licensees; and detecting breaches of financial trust and other violations of the laws and regulations.

Complaints filed by the public and potential violations of the law under this program are thoroughly investigated. If warranted by the findings, punitive action including suspension or revocation of a license or permit may be taken. The matter may be referred for criminal or civil proceedings.

For fiscal year 1984–85, an increase of 8.3 Auditor I's and $195,000 in reimbursements are proposed for workload increases related to conducting regulatory examinations of persons licensed under the Consumer Finance Lenders Law and the Commercial Finance Lenders Law.

20.10 Check Sellers and Cashers Law

Check sellers and cashers sell money orders, cash checks and accept money to be transmitted to others in payment of utility bills. Such services are utilized primarily by those unable or unwilling, for financial reasons, to maintain a checking account at a bank.

Proraters receive money from their debtor-clients and distribute it, according to a predetermined plan, to the creditors of the debtor-clients.

20.30 Escrow Law

Escrow agents act as disinterested third parties to a transaction between two parties generally involving real property. They maintain possession of documents and money to be transferred in such a transaction until it is consummated or cancelled. All money received must be segregated and deposited into a trust fund; disbursements from this fund may be made only upon written instructions of the parties to the escrow.

Authority

Financial Code: Section 17000 et seq.; California Administrative Code, Title 10: Sections 1700–1753.

30.40 Enforcement	6.9	7.6	7.6	307	382	397

30.10 Licensing

This element involves review of license applications for health care service plans which include information concerning the applicants' background, experience, method of proposed operation, financial statements, and other pertinent documents which will enable the commissioner to make a knowledgeable decision on whether or not the license should be issued.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
License issued:			
Health care service plans	4	20	25
Material modification filed	21	40	45
Plan contracts reviewed	383	400	425
Advertisements reviewed	114	125	150

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	16.4	18.4	18.4	$735	$914	$950

30.20 Financial and Administrative Examinations

Each plan shall have the organizational and administrative capacity to provide marketed health care services to enrollees. The Commissioner must determine that each plan is financially stable and that medical decisions are made unhindered by fiscal and management constraints. This element will monitor the plans' financial solvency through periodic examinations and review of required financial and statistical reports.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Plan examinations conducted	10	10	12

Expenditures	5.6	6.3	6.3	251	312	324

30.30 Medical Survey

The Commissioner is required to conduct onsite medical surveys of the health delivery system of each plan at least once every five years. Surveys conducted by this element will review internal procedures for assuring quality of care, and the overall performance of the plan in providing health care benefits and meeting the health needs of the subscribers and enrollees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

40 LEGISLATIVE MANDATES

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local government units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Corporations there is one legislative mandate. Chapter 941/75 Knox-Keene Health Care Service Plan Act of 1975.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program requirements *(General Fund)*	$3	($4) [1]	($4) [1]

50 ADMINISTRATION

The Administrative Services Division is charged with preparing the budget and supportive materials, negotiating leases and contracts, maintaining financial records, and providing central personnel services.

In an effort to increase efficiencies in low priority program activities in 1984–85, one personnel year and $33,000 is proposed to be eliminated from this program. In addition, an increase in overtime of $10,000 is proposed in fiscal year 1984–85 to allow the Department's Accounting Office to deal with increased administrative workload resulting from various statutory changes and an increase in licensees.

2200 DEPARTMENT OF ECONOMIC AND BUSINESS DEVELOPMENT

The Department of Economic and Business Development was established in January 1978 to serve as the primary State agency for assisting economic development and job creation efforts in California. Under the provisions of State law, the Department carries out a wide range of activities designed to stimulate the State's economy. These activities include: (1) assisting business and industry in locating or expanding in California; (2) stimulating the export of California products; (3) assisting in the growth of the tourist and visitor industries; (4) providing assistance and services for small and minority business operations; (5) assisting local agencies in formulating economic development programs; and (6) assisting in the analysis of the impact of various programs that affect the economy of the State.

The Department receives counsel and guidance in accomplishing the above responsibilities from a 21-member advisory council which is representative of the many socioeconomic groups comprising the California economy.

An additional $8.7 million ($8.1 million General Funds) and 16.3 personnel years are proposed in 1984–85. The majority of these increases reflect the first step of the Governor's agenda to improve California's business climate and to stimulate economic expansion and job creation.

10 OFFICE OF BUSINESS AND INDUSTRIAL DEVELOPMENT

Program Objectives and Description

The principal responsibility of the Office is to assist in attracting new business and industry to California and to assist and encourage businesses presently located within the State to grow and expand. Major activities of the Office of Business and Industrial Development include: (1) providing market services and economic data to assist businesses seeking to expand or establish new facilities; (2) identifying types of industries with greatest potential for growth; (3) identifying obstacles to business and industrial growth and recommending solutions; (4) developing a statewide strategy and promotional program for industry location based on regional needs and resources; (5) serving as a liaison between the business community and government; and (6) providing assistance to businesses in expediting necessary permits and approvals.

In the 1983–84 budget, 4.4 personnel years were administratively established, limited term to June 30, 1984, with $125,000 in federal grant funds and $42,000 in reimbursements for plant closure assistance efforts. The 1984–85 budget proposes to add $1.8 million and 5.6 personnel years to 1) develop a marketing and advertising program to retain and attract business, 2) establish two field offices, one in Los Angeles and one in San Jose, and 3) create a Director of External Affairs position.

In addition, the 1984–85 budget proposes to eliminate 0.8 temporary help personnel years and $9,000 as a result of increased efficiencies in low priority activities within this program.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20 OFFICE OF INTERNATIONAL TRADE

Program Objectives and Description

The primary responsibility of the Office is to stimulate increases in the export of California products by making California manufacturers, processors and growers aware of the opportunities of, and assisting them in entering international business. Major activities of the Office of International Trade include: (1) bringing California producers into contact with foreign buyers; (2) assisting California manufacturers and growers with export procedures; (3) identifying obstacles to exporting and assisting in their removal; (4) conducting seminars to encourage California producers to export their products; (5) publishing a directory of prominent businesses and organizations in California's foreign trade, including a product and process guide; and (6) serving as a clearinghouse for inquiries from persons seeking information about international trade. Per Chapter 1526, Statutes of 1982, the Office of International Trade was transferred to the Governor's Office as the California State World Trade Commission effective January 1, 1983.

Authority

Part 6.7, Chapter 1, Article 3, Section 15335 of the Government Code.

30 OFFICE OF TOURISM

Program Objectives and Description

The major responsibility of the Office is to help increase the number of tourists and visitors to California in order to expand job opportunities and generate additional revenue for the State and local governments. Principal activities of the Office of Tourism include: (1) conducting research on the number of visitors to California, expenditures by visitors, points of origin and destination, and other relevant information that will facilitate decision-making affecting the expansion of visitor services; (2) providing technical assistance and referrals to regional, county and city tourism development organizations and similar private organizations that are engaged in programs to attract visitors to California; (3) in conjunction with other public and private tourism organizations, developing programs to attract foreign and business travelers to California; (4) responding to inquiries from prospective visitors to California.

Chapter 1289, Statutes of 1983, appropriated $200,000 to the program for the promotion of tourism in conjunction with the 1984 Olympic games. To accomplish this statutory mandate, in 1983–84, 1.4 personnel years were administratively established, limited term to June 30, 1984, with $175,000. In 1984–85, 0.9 personnel years and $25,000 are proposed to complete the program. The 1984–85 budget proposes to add $5.1 million and 2.9 personnel years to develop a marketing and advertising program to promote tourism in California.

40 OFFICE OF LOCAL ECONOMIC DEVELOPMENT

Program Objectives and Description

The principal responsibility of the Office is to stimulate economic development as an ongoing function of local government. Major activities of the Office of Local Economic Development include: (1) providing on site assistance to local governments to help assess local economic needs, develop strategies, implement economic plans, and set-up and administer economic development programs; (2) disseminating information to local governments on economic development programs and case studies of these programs; and (3) conducting training workshops and seminars to assist local governments in establishing programs to improve their local economies.

In the 1983–84 budget 0.8 personnel years are administratively established, limited term to June 30, 1984, with $1,167,000 in federal grant funds and 0.3 personnel years and $456,000 are proposed in 1984–85 to make predevelopment grants and loans in designated Sudden and Severe Economic Dislocation areas. In addition, the 1984–85 budget proposes to eliminate 0.6 temporary help personnel years and $7,000 as a result of increased efficiencies in low priority activities within this program.The 1984–85 budget proposes to add 1.9 personnel years and $125,000 in General Funds and 1.9 personnel years and $124,000 in reimbursements to participate in the federal Small Business Revitalization Program for the purpose of assisting California's cities in obtaining federal Urban Development Action Grant monies.

50 OFFICE OF SMALL BUSINESS DEVELOPMENT

Program Objectives and Description

The primary responsibility of the Office is to aid in the economic development of small businesses by making available capital, management assistance and other resources, including loan services, personnel and business education to small business entrepreneurs. The Office assists in the creation of employment opportunities for the economically disadvantaged, youth and the handicapped through the establishment and expansion of small business and through the provision of financial assistance to small businesses, with priority to those of economically disadvantaged ownership or those seeking to locate in economically disadvantaged areas. Major activities include: (1) Development finance, which includes (a) administering a program of direct loans to encourage business expansion and the creation of new jobs; and (b) administering the State Loan Guarantee Program which permits banks and other financial institutions to make loans to businesses which are unable to obtain loans through traditional channels; and (2) Information, technical assistance and advocacy for small businesses, which includes (a) providing information about regulations, licenses, and procedures to start a small business; (b) publication and distribution of guidebooks, manuals and other materials which relate to small business issues, and (c) general assistance to small businesses that are experiencing problems with State agencies.

Authority

50.20 Small Business Development Center

Chapter 1154, Statutes of 1983, established a Small Business Development Center (SBDC) program. This element provides small business with a focal point for accessing a comprehensive network of management and technical services and business information.

In the 1983–84 budget, 0.5 personnel years are administratively established with redirected funds of $6,000 to initially implement the SBDC program. The 1984–85 budget proposes one personnel year and $400,000, of which, $100,000 is redirected funds to support four local centers and maintain a central administrative staff. These funds will be matched by federal Small Business Administration funds.

60 OFFICE OF ECONOMIC PLANNING, POLICY AND RESEARCH DEVELOPMENT

Program Objectives and Description

The primary responsibility of the Office is to provide centralized planning, analysis, research, and other support activities that are necessary to achieve the overall economic roadmap for the department. Major activities include: (1) gathering, analyzing, interpreting, and publishing information on the economy; (2) preparing studies on the economic potential of various types of business, commercial, or industrial development in improving the economy of the State, the creation of job opportunities and the effect on resources and environment of the State; (3) advising the Governor and the Legislature on the economic impact of government policies and regulations; (4) providing technical assistance to other state agencies in the development of economic data; and (5) responding to inquiries from the public concerning California's economy. These activities will supplement the work of existing State agencies.

Chapter 1212, Statutes of 1983, appropriated $18,000 in 1983–84 to administratively establish 0.5 personnel years for a research analyst from January 1 to June 30, 1984 for the development of methodological guidelines to be used in preparing economic impact statements on proposed state regulations.

The 1984–85 budget proposes to add $320,000 and two personnel years to expand the program's data acquisition and research activities in support of the department's advertising and marketing programs and to establish a library of economic research source materials.

In addition the 1984–85 budget proposes a reduction of 0.5 temporary help personnel years and $6,000 as a result of increased efficiencies in low priority activities within this program.

65 CALIFORNIA COMMISSION ON INDUSTRIAL INNOVATION

Program Objectives and Description

The Commission provides a forum for discussion, debate and policy guidance for the Governor and the Legislature on the role of technological innovation in maintaining California's leadership in the national economy and in retaining its international competitive position. The Commission identifies priorities for research grants and other state government-supported economic initiatives designed to spur industrial innovation. *Pursuant to administrative directive, this program was transferred to the Governor's Office of Planning and Research, effective with the 1983–84 fiscal year.*

Authority

Executive Order B-9181.

70 ADMINISTRATION

Program Objectives and Description

The principal responsibilities of Administration are to provide active leadership in designing and implementing economic development programs and to coordinate and provide administrative services to all programs of the Department.

The 1984–85 budget proposes to add $210,000 and one personnel year to implement office automation for the purpose of increasing productivity and efficiency. In addition, $51,000 and one personnel year is proposed to establish a fiscal support position and to provide sufficient funding for the CALSTARS automated accounting system.

Further, the 1984–85 budget proposes to eliminate 0.1 temporary help personnel years and $1,000 as a result of increased efficiencies in low priority activities within this program.

2230 CALIFORNIA INDUSTRIAL DEVELOPMENT FINANCING ADVISORY COMMISSION

The California Industrial Development Financing Advisory Commission was created by the provisions of the California Industrial Development Financing Act (Chapter 1358, Statutes of 1980). The legislation became effective January 1, 1981. The commission consists of the State Treasurer, who is chairperson, the State Controller, the Director of Finance, the Director of Economic and Business Development, and the Commissioner of Corporations.

The act provides cities and counties with authority to pass an ordinance establishing industrial development authorities which are empowered to issue industrial development revenue bonds under terms and conditions specified in the act. The proceeds of the bonds may be used to finance those qualified industrial capital projects of private enterprise which promote and enhance the economic development and increase employment opportunities. The bonds carry interest which is exempt from income taxes, as provided for in Section 103 of the Internal Revenue Service Regulations. This method of financing, because of the interest tax exemptions, should result in annual financing rates which are from 2 to 5 percent below comparable conventional financing. Bonds issued under this program are not a debt, liability or a pledge of the faith and credit nor the taxing power of the State of California.

The program is intended to benefit economically distressed areas within the state and is also to provide industry with an alternative method of financing capital outlays required to acquire, construct, or rehabilitate facilities which will increase employment or otherwise contribute to economic development.

Administration expenses of Industrial Development Authorities are funded by fees collected from applicants for financing under this act. Direct expenses of the commission and those of the office of State Treasurer are also funded by fees collected from applicants and bond proceeds. Fees are deposited in the Industrial Development Fund, created by the act, and are to be available when appropriated, for the expenses of the commission.

A total of $200,000,000 of bonds was authorized to be issued under the act as of December 1, 1981. Chapter 1605, Statutes of 1982 (SB 1526), provided that the aggregate amount of bonds shall not exceed $250,000,000 per calendar year, commencing January 1, 1983. Applications totaling approximately $150,000,000 have been received requesting financing under the act. Additional applications are being processed by city and/or county industrial development authorities which will increase total application requests to over $150,000,000.

The 1983–84 budget includes a reduction of 3.2 personnel years to reflect a shift of $93,000 from personal services to consultant and professional services-external to allow the Commission to contract for reviewing the fiscal statements of all proposed Industrial Development Bond issues. For 1984–85, the budget proposes a total of two personnel years to split this function between hired staff and contract services.

10 CODES AND STANDARDS PROGRAM

Program Objectives and Description

The program's objectives are to develop and enforce adequate building and housing standards to protect the public from unsafe and unsanitary living conditions, to administer the registration and titling requirements of mobilehomes and commercial coaches, and to regulate the licensing of manufactured housing related occupations. *A reduction of 10 PYs and $246,000 is proposed in the budget year to reflect increased operating efficiencies in the program.*

Authority

10.10 State Housing and Earthquake Protection Standards

This element reviews building code requirements and proposes amendments to reduce housing costs and conserve existing housing stock. The State Housing Law establishes minimum standards for the design and construction, maintenance, use, and occupancy of buildings used for human habitation. The Earthquake Protection Law establishes minimum standards for the design and construction of buildings to resist lateral forces such as earthquakes.

Local agencies enforce the standards. In the event of nonenforcement by local authorities the enforcement responsibilities would be relinquished to the Department.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

Expenditures *(General Fund)*	5.3	5.2	4.2	$201	$347	$333

10.20 Employee Housing

This element enforces construction, maintenance, use, and occupancy standards for labor camps, labor supply camps, and employee housing. It is the designated enforcement agency except where a city or county has assumed the responsibility. Activities include the annual evaluation of the performance of local enforcement agencies and determining the qualifications of each agency's inspection personnel.

Operators of labor camps are required to obtain permits-to-operate or an exemption from the enforcement agency. Prior to issuance of a permit-to-operate, labor camps are required to have preoccupancy inspection and to comply with maintenance, use, and occupancy requirements.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Registered camps under State jurisdiction	686	625	625
Exempt camps under State jurisdiction	17,700	17,200	17,200

Reimbursements				*68*	*107*	*107*

10.30 Mobilehome Parks and Accessory Structures

This element has responsibility for administration and enforcement of the Mobilehome Parks Act, except where a city or county has assumed responsibility. Uniform standards are necessary to permit moving mobilehomes and their accessory structures from one locality to another.

There are approximately 5,900 mobilehome parks in California and approximately 55% are under State jurisdiction. This element enforces statewide regulations related to mobilehome parks, provides assistance to local jurisdictions, mobilehome owners, and park owners, and monitors local enforcement activities to assure uniform interpretation and compliance with State law.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Parks under State jurisdiction	3,300	3,300	3,300
Spaces in parks under State jurisdiction	210,000	210,000	210,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Mobilehome Park Revolving Fund)*	44.7	45.2	45.2	$1,570	$1,771	$1,927

10.40 Mobilehomes

This element is the exclusive enforcement agency for mobilehome construction and safety, and has the authority to correct violations of mobilehome construction and warranty laws. In addition, it has the responsibility for developing and enforcing regulations regarding commercial coaches and recreational vehicles.

Activities performed within this element include: enforcement of Federal or State standards and regulations relating to the construction and safety of mobilehomes, recreational vehicles and commercial coaches; development and enforcement of regulations relating to licensing and regulating business and sales activities of mobilehome and commercial coach manufacturers, dealers, distributors, transporters, and salespersons; and investigation of consumer complaints relating to all of these activities including action to obtain corrections and compliance with laws and regulations.

In addition, the Manufactured Housing Registration and Titling Program is administered through this element. It includes the following activities: development and enforcement of regulations for the annual registration and titling of mobilehomes and commercial coaches; processing mobilehome registration renewals as well as changes in registration and legal ownership; and dissemination of registration and titling information to county assessors, other state agencies and the public.

Chapter 1051, Statutes of 1983, appropriated $10,000 to implement the Senior Citizens Mobilehome Property Tax Postponement program. Chapter 1124, Statutes of 1983, appropriated $107,000 to modify the existing data processing system to accommodate revisions in the Registration and Titling program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of units manufactured	11,000	11,000	11,000
Number of units registered	590,000	590,000	590,000

* Dollars in thousands

2240 DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—*Continued*

10.50 Factory-Built Housing

The Factory-Built Housing Law is required to regulate the design, manufacture, and inspection of factory-built housing units. Upon inspection and approval by the department, an insignia is affixed on the units which allows those units to be installed in any locality subject to local use, zoning and other site requirements.

Chapter 706, Statutes of 1983, requires factory-built housing inspection fees to be deposited into the Mobilehome-Manufactured Housing Revolving Fund.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Dwellings manufactured	216	800	800
Building components	22,000	24,500	24,500

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

General Fund				*131*	*58*	*61*
Mobilehome-Manufactured Housing Revolving Fund				–	*140*	*132*

10.60 Special Projects

Special project activities are varying and generally of limited duration; they include:

1. Membership on the Coordinating Council consisting of state agencies concerned with building standards relating to all building occupancies.
2. State disaster response activities.
3. Consultative assistance to the State Energy Commission.
4. Technical assistance and plan checking service to local government in the areas of Energy Conservation and Solar programs.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Reimbursements)*	1.3	1.4	1.4	$42	$210	$240

20 COMMUNITY AFFAIRS PROGRAM

Program Objectives and Description

The program's objective is to assist in providing access to safe, sanitary, and affordable housing. The Division provides grants, deferred loans, conventional loans, and technical assistance to support the legislative mandate of a decent home and suitable living environment for every Californian. *A reduction of 4 personnel years and $85,000 is proposed in the budget year to reflect the phasing-out of the Route 2 program which will be completed during 1984–85. A reduction of 3 personnel years and $39,000 is proposed in the budget year to reflect increased operating efficiencies in the program. The Community Development Program is also proposed to increase by 4 personnel years, as explained in Element 20.50.*

20.10 Rehabilitation and Housing Assistance

The Rehabilitation and Housing Assistance element is composed of technical assistance activities, deferred loans, grants, supportive services and training workshops with emphasis on housing assistance and rehabilitation. These include deferred rehabilitation loans, programs for rental assistance to the very low income disabled, elderly and families, and the coordination and development of federally funded housing programs responsive to the needs of the disabled.

Chapter 682, Statutes of 1983, established the Special User Housing Rehabilitation Program and appropriated $5 million for the purposes of acquisition and rehabilitation of residential hotels.

20.20 Migrant and Indian Housing Services

The Migrant and Indian Housing Services element administers two programs which provide housing and support services including rehabilitation, new construction, economic development, and technical assistance to meet the housing needs of California's seasonal agricultural workers and Native Americans. Through the Office of Migrant Services, decent, safe, affordable housing and supportive services are provided to migrants and their families during the principal harvesting season. The California Indian Assistance program concentrates on the housing and related needs of Native Americans utilizing available resources at the Federal, State and local government levels.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Migrant centers maintained	25	25	26
Native Americans households assisted	400	400	400

Reimbursements				*13*	*21*	*25*

20.30 Predevelopment and Farmworker Housing Assistance

The Predevelopment and Farmworker Housing Assistance element provides loans, grants and technical assistance during the preconstruction phases of housing development. This assistance includes: predevelopment loans in urban and rural areas for the acquisition of land; architectural, engineering and consulting fees, and other predevelopment expenses; loans for land purchase in rural areas; the identification and acquisition of federal, State and local surplus lands; grants for the development of farmworker housing in California and technical assistance in the development of all low-income housing, particularly cooperatives and multifamily rental units. The California Housing Advisory Service is also administered under this element.

Chapter 1307, Statutes of 1983, continued the Senior Citizens Shared Housing Program and appropriated $300,000 to assist these persons in obtaining housing.

Chapter 1089, Statutes of 1983, established the Emergency Housing and Assistance Program and appropriated $2,700,000 to local agencies for emergency housing.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20.40 Housing Construction Finance

The Housing Construction Finance element administers two major housing finance assistance programs which provide long-term deferred payment loans or grants, operating subsidy payments and supportive services to ensure required performance under State regulatory agreements/loans. The Rental Housing Construction program provides development payments during construction and operating subsidy for 30 years on a monthly basis to newly constructed rental housing developments with at least 30 percent of the units affordable to very low and low income households. A management reserve fund and an annuity fund are required by statute to assure affordability of assisted units for 30 year terms.

The California Homeownership Assistance program, through local government agencies and approved lenders, provides equity sharing mortgages to eligible apartment or mobilehome park tenants who otherwise would be displaced by conversion of their unit or park space to condominiums or stock cooperatives and to eligible buyers of mobilehomes and lots where the units are being placed on permanent foundations.

Chapter 1097, Statutes of 1983, transferred $5,200,000 into the Rental Housing Construction Fund to provide for new construction or rehabilitation of housing units for low-income residents in rural areas.

20.50 Community Development

The Community Development element provides technical and funding assistance through various State and Federal programs directed primarily to small jurisdictions. The funds are used for land acquisition, water and sewer facility construction and improvement, housing finance and rehabilitation, economic development and other community development purposes.

Through the Rural Development Assistance Program, communities, local agencies and private developers are assisted with development and implementation of Federal, State and private financing programs for housing, economic development and public works activities. The counties currently being served are Imperial, Riverside, Humboldt, Trinity and Del Norte.

The Community Development program administers the Federal Small Cities Community Development Block Grant Program (CDBG) for cities under 50,000 population and counties under 200,000 population. This activity includes: assistance in determining local needs and preparation of applications for funding; selection of grantees; award of grant funds and disbursements; and the monitoring, evaluation and auditing of local program accomplishments. The budget includes an anticipated $27 million in federal funds to be directed to small cities and counties.

Chapter 1152, Statutes of 1983, transferred $500,000 into the newly created Community Facilities Grant Fund to provide funds for waste water systems in rural counties.

The 1984–85 budget proposes to add $152,000 and 4 positions for increased workload in the State Small Cities Community Development Block Grant Program. This program includes a newly introduced economic development component.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20.60 Housing Replacement Program

Two offices in Los Angeles administer and operate housing replacement and relocation programs in highway rescinded or proposed corridors. These offices also provide assistance to local governments and housing organizations in housing development activities.

The Century Freeway Replacement Program administers the Federal Court Consent Decree which requires relocation, rehabilitation or replacement of over 3,700 housing units due to the construction of the Century Freeway in Los Angeles. It is estimated that 1,874 units will have been provided by June 30, 1985.

The Surplus Lands Disposition/Housing Development Program in the Route 2 corridor of Los Angeles is designed to provide expanded housing opportunities and community services to households in the rescinded freeway corridor as mandated by Chapter 1116 (SB 86), Statutes of 1979. This program will be completed during 1984–85.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30 RESEARCH AND POLICY DEVELOPMENT PROGRAM

Program Objectives and Description

This program identifies housing and community development needs and problems and develops recommendations for ways in which to meet those needs. The objectives of this program are carried out through the evaluation of housing market conditions; research into specific issues; the fulfillment of statutory mandates, such as the preparation and updating of the California Statewide Housing Plan; evaluation of public and private sector programs designed to increase the availability of affordable housing; the development of legislation to meet housing needs and the maintenance of data resources.

Authority

30.20 Research and Statistics

The Research and Statistics element is responsible for the development, collection and maintenance of statistics and reference materials on housing and community development needs. It prepares data on housing costs, market conditions, construction trends, and the impact of such trends and conditions on California citizens. It provides data for establishing statewide goals for new construction, rehabilitation, and housing assistance deemed necessary to meet California's housing needs.

50 ADMINISTRATION PROGRAM

Program Objectives and Description

The program includes the Directorate, Legal Affairs Office and the Administration Division. The Directorate provides policy and management direction to the Department. The Legal Affairs Office provides the legal expertise and support needed to carry out programs. The Administration Division provides services in the areas of personnel, budget, data processing, contract management, audits, accounting, business services, and training. The data processing function has been centralized in the Administration Division. Data processing costs are charged directly to the user. All other costs are allocated on the basis of direct personal services costs.

Proposed for inclusion in the 1984–85 budget is the continuation of $193,000 and 5 positions in the Data Processing Office for ongoing workload and $865,000 to fund 15 new positions to develop, design, and implement a new data processing system through the Teale Data Center for the registration and titling of mobilehomes. Eleven of these 15 positions are administratively established in the current year to accelerate the completion of this system. When operational, this new system will result in annual savings of $160,000.

2260 CALIFORNIA HOUSING FINANCE AGENCY

Program Objectives and Description

Legislation establishing the California Housing Finance Agency became effective on September 26, 1975, with the enactment of Chapter 1, Statutes of 1975, First Extraordinary Session. The Agency's primary purpose is to meet the housing needs of persons and families of low and moderate income. The primary function of the Agency is to sell tax-exempt bonds and use the proceeds to finance housing at below market interest rates by:

(1) making construction loans and mortgage loans to qualified borrowers to finance housing developments, or purchasing such loans from qualified mortgage lenders; and

(2) purchasing loans in neighborhood preservation areas on mortgages originated and serviced by qualified mortgage lenders.

Specific priority considerations for the Agency's programs include: providing housing for very low, low and moderate income individuals and families, including elderly and handicapped; stimulating the reinvestment of capital into mortgage deficient areas; encouraging rehabilitation of substandard housing; and achieving high design and quality standards.

As of the end of Fiscal Year 1982–83, the Agency had made or purchased loans for approximately 22,000 housing units for low and moderate income families and elderly persons. Another 7,000 units are planned in 1983–84 and another 12,000 units are planned for financing in Fiscal Year 1984–85.

Effective January 1, 1984, the Agency was authorized to have $2,350,000,000 of bonds or notes outstanding at any one time. It is estimated that by June 30, 1984, the Agency will have issued approximately $1,900,000,000 of authorized revenue bonds or notes.

The Agency is authorized to insure mortgage loans made by the Agency and others, and to insure bonds issued by local public bodies that will provide financing for low and moderate income housing. A Housing Insurance Fund has been established to provide loan and bond insurance, and has been funded by a $10,000,000 General Fund appropriation.

Pursuant to Section 51368 of the Health and Safety Code, the State has appropriated General Funds in the amount of $20,000,000 to the Agency for the Supplementary Bond Security Account, which may be utilized to secure the Agency's bonds and notes.

The Agency may also provide technical services in connection with the financing of housing developments; may act as a State representative in receiving and allocating federal housing subsidies; and may under certain circumstances make grants to housing sponsors, provided that grants are not made with the proceeds of the sale of bonds or notes.

The Agency does not receive annual operating appropriations from the General Fund. It operates like a bank, meeting its operating expenses by marking up interest rates on loans and charging fees for specific services.

The Agency is administered by an eleven-person Board of Directors representing various segments of the housing industry and State government officials. Ex-officio members include the State Treasurer, the Secretary of Business, Transportation, and Housing and the Director of the Department of Housing and Community Development. The Board of Directors adopts an annual budget for the ensuing fiscal year by January 10 of each year which is presented for review to the Secretary of the Business and Transportation Agency, the Director of Finance, and the Joint Legislative Budget Committee.

7.5 positions have been administratively established in the 1983–84 budget ($375,000) to reflect the final budget adopted by the Agency. These positions are carried forward into the budget year. In addition, 3.5 positions have been eliminated in the budget year as a reflection of increased efficiencies in the activities of the Agency.

Prior to the receipt of the final 1984–85 budget from the Board of Directors, this budget reflects a continuation of the 1983–84 level adjusted for normal price increases. It is anticipated that a Department of Finance letter will be submitted to the Legislature addressing the Agency's 1984–85 budget needs prior to the legislative budget hearings.

Housing Assistance Trust Fund

Chapter 1450, Statutes of 1982, authorized the California Housing Finance Agency (CHFA) to administer a homeowner's interest reduction program. The program provides for eventual reimbursements to builders for advances they have made to lenders to reduce borrower's interest payments on mortgages on newly constructed homes. Chapter 1450 also authorizes the Public Employees' Retirement System (PERS) and the State Teachers' Retirement System (STRS) to invest in mortgage loans under this program.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

2270 CALIFORNIA MORTGAGE BOND ALLOCATION COMMITTEE

Program Objectives and Description

The Federal Mortgage Subsidy Bond Tax Act of 1980, with certain exceptions, limits the amount of public bonds, interest upon which is exempt from Federal income taxation, that may be issued annually in any State to finance loans for owner-occupied residences, as specified. This Federal act also prescribes a formula for dividing such quota among State housing finance agencies and other issuers, but permits State governors (on an interim basis) and State legislatures to provide for reallocation.

Chapter 1097, Statutes of 1981, established the California Mortgage Bond Allocation Committee for the purpose of approving mortgage revenue bond allocation for qualified cities, counties and State agencies. The committee also has the responsibility to certify specific census tracts as areas of chronic economic distress.

For Calendar Year 1983, the U.S. Treasury established a ceiling for California of $1.451 billion. One third or $451 million was allocated to State agencies using revenue bonds for low income housing and two thirds or one billion dollars was allocated to 49 qualified cities and counties. The program for 1984 is uncertain since the Federal Act sunsetted on December 31, 1983. It is expected that Congress will act early in 1984 to continue the use of tax exempt mortgage revenue bonds.

The Committee consists of seven members including the Treasurer, who is designated as the Chairman, the Governor or Director of Finance, the State Controller, the Director of the Department of Housing and Community Development, the Executive Director of the California Housing Finance Agency and two local government representatives.

2290 DEPARTMENT OF INSURANCE

The principal objective of the Department of Insurance is to protect insurance policyholders in the State. The Department is organized into ten divisions: legal, actuarial, conservation and liquidation, rate regulation, administration, financial analysis, field examination, enforcement, consumer affairs and information and technology management.

Chapter 722, Statutes of 1982, effective July 1, 1983, resulted in the Department of Insurance becoming entirely supported by special funds. This statute created the Insurance Fund and stipulated that all receipts would be deposited in that fund and be available for expenditure upon appropriation by the Legislature. In addition, any surplus in the Insurance Fund would be transferred to the General Fund.

Authority

10 REGULATION OF INSURANCE COMPANIES AND INSURANCE PRODUCERS

Program Objectives and Description

The objective of this program is to prevent losses to policyholders, beneficiaries or the public due to the insolvency of insurers and to prevent unlawful or unfair practices by insurers as defined by the Insurance Code, and also to prevent the general public and policyholders from discriminatory, unlawful or fraudulent practices as well as incompetence relating to the sale of insurance. To accomplish the objectives of this program, the Department conducts field examinations, regulates rates, maintains solvency surveillance, regulates proxy solicitations, manages financially distressed companies, admits qualified companies, maintains surveillance of admitted companies, reviews policy forms, investigates consumer complaints, and assures that producers are properly qualified and licensed.

The 1984–85 budget proposes 3 Senior Insurance Examiners and 4 Associate Insurance examiners and $293,000 to allow the department to address an increase in the number of financial statements and the resulting backlog. In addition, 2 legal assistants and $41,000 are proposed to address an increasing backlog in reviewing applications for certificates of authorities. Further, $98,000 is proposed for out-of-state travel due to an increase in the number of examinations.

40 ADMINISTRATION

Program Objectives and Description

This program provides the overall policy direction of the Department from the Commissioner's Office as well as supporting services such as Accounting, Personnel, Budget Management, EDP, Actuarial, and the Executive Office.

The 1984–85 budget proposes to add 3 insurance examiner I's and $84,000 to allow the department to conduct increased actuarial analyses of life insurance and annuity contracts for unusual plans. In order to achieve low priority program efficiencies, the 1984–85 budget proposes to reduce one staff services manager I, one word processing technician, and one office assistant II and $73,000.

2320 DEPARTMENT OF REAL ESTATE

Program Objectives and Description

The Department of Real Estate's objective is to protect the public in offerings of subdivided property, real property securities, and in real estate transactions handled through agents. To accomplish this, a minimum level of competence is established for the licensing of real estate agents, and disclosure and affirmative standards are set for subdivision offerings.

Prevention of fraud, deceit and misrepresentation in the real estate marketplace is a departmental responsibility. The Department of Real Estate takes disciplinary, civil and criminal action against licensees and others who have violated the real estate law and the Subdivided Lands Act.

In addition, the Department assists in the advancement of education and research to aid the consumer in understanding real estate and to encourage a professional orientation of those in the real estate business. Nonlicensees constitute over 50 percent of those currently enrolled in college-level real estate courses. All activities of the Department are supported by fees from licensees, subdividers and applicants for license or permit.

SUMMARY OF PROGRAM REQUIREMENTS		*1982–83**	*1983–84**	*1984–85**
10	Licensing and Education	$2,895	$4,100	$4,256

10 LICENSING AND EDUCATION

Program Objectives and Description

The consumer is relatively uninformed of the technicalities associated with real estate transactions. Since dealing in real property is often a once-in-a-lifetime activity for a large segment of the public, it is in the public interest that the State should license and regulate only qualified persons to competently and honestly transact real estate business between buyers, sellers and renters of real estate and business opportunities.

Authority

Business and Professions Code, Division 4, Part 1.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

10.20 Education	6.6	7.4	7.4	440	972	981

10.10 Licensing

The examination section prepares questions for prospective real estate licensees. The approved questions are placed in a questions library which contains approximately 2,800 questions and requires continual updating. The examination section draws on these questions to prepare examination booklets which are supplied to all offices where examinations are given throughout the State. All examinations are scored and notices of test results are sent to applicants. *In 1984–85, four staff support positions and $61,000 are proposed to be reduced from this program to reflect increased operational efficiencies.*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Total licenses	322,000	324,800	338,000

Expenditures	63.7	79.3	75.4	$2,455	$3,128	$3,275

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

2320 DEPARTMENT OF REAL ESTATE—*Continued*

10.20 Education

The education, research, continuing education and course approval activities are directed toward developing, reviewing, coordinating and overseeing public and private offering entities to maintain uniformity of study programs, curricula, seminars, conference and workshop offerings in real estate subjects required by law. The research portion is directed to all phases of real estate activity, including study of the needs of real estate education, marketing, financing and land use, urban problems and other factors of real estate economics that benefit the general public as well as real estate licensees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Real estate broker course approval applications	46	75	100
Real estate broker course approval renewals	142	175	200
Continuing education applications	1,251	1,900	2,100
Continuing education renewals	513	825	950

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	6.6	7.4	7.4	$440	$972	$981

20 REGULATORY AND RECOVERY

Complaints received from the public and inquiries initiated by the Department itself are the basis for investigations. If the investigation proves a violation of the Real Estate Law, formal proceedings usually result, leading to disciplining of licensees following administrative hearings or criminal proceedings. Stop orders may be issued or injunctive proceedings initiated to protect the public from further illegal operations and to require compliance with the Real Estate Law.

Whenever a person obtains a fraud judgment based upon a loss suffered because of fraud committed by a licensee while performing licensed acts and the licensee named in the judgment is unable fully to satisfy the judgment, the victim may claim against the Real Estate Recovery Fund up to the maximum allowed by law. Such claims are investigated by Department staff, a hearing on the claim is held in Superior Court, and the court finds for or against the claimant. When claims are paid out of the Fund, the licenses of the real estate agents involved are suspended until they have repaid the Fund in full plus interest.

Anyone who sells notes secured by trust deeds to the public must make application for a permit when the notes are classed as real property securities. Applications are screened, appraisals are required, and a determination is made that the sale of the securities will be fair, just and equitable.

In 1984–85, projected reductions in time share investigations work result in a proposed reduction of 3 professional and 1 clerical support staff and $83,000.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Desist and refrain orders	104	115	125
Compliance activities	1,238	1,358	1,493

30 SUBDIVISIONS

Program Objectives and Description

The purchase of real property is the largest investment made by most families. The subdivision laws are designed to assure that developers will do what they promise and that purchasers will get that for which they bargained. Completion of projects or adequate financial arrangements to assure completion is required before the developer can offer subdivided real property for sale. Since condominiums and planned development subdivisions involve the complexities of common ownership of land, a "reasonableness" test is applied in qualifying such offerings. Because sales of out-of-state land are often made sight unseen, a regulatory test of fairness is applied to such offerings.

Authority

Business and Professions Code, Division 4, Parts 1 and 2.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Totals, Subdivisions	114.5	116.5	106.2	$4,572	$5,448	$5,455

30.20 Subdivisions Out-of-State	5	5	5	225	258	280

30.10 Subdivisions In-State

Subdividers of in-state lands are required to obtain a public report before the subdivided land may be offered for sale. The public report discloses facts concerning each subdivision which are of fundamental interest to a prospective buyer. Before a public report is issued, the subdivider must file an application and documentation in proof of statements made therein, and in some cases, he must demonstrate that adequate financial arrangements have been made for the completion of improvements. The application and documents are reviewed, the subdivision is inspected, and a determination is made that the offering is not fraudulent before a final public report is issued. In subdivisions which have a common facility, a determination is made that the offering is reasonable. In land projects advertising is screened and purchasers have rescission rights for 14 days. Time-share subdivision purchasers have recission rights for 3 days. Seventeen limited term positions are authorized for program workload in 1983–84 and are reflected as abolished effective July 1, 1984. *In 1984–85, it is proposed to reduce two professional, one clerical support and one clerical equivalent in the temporary help blanket in the amount of $101,000 to reflect operational efficiencies captured in the merger of the San Francisco Subdivision Office with Sacramento. Continuation of 10 of the 17 limited term positions and $295,000 is proposed to meet increased workload in the Budget year.*

* Dollars in thousands

2320 DEPARTMENT OF REAL ESTATE—*Continued*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Subdivision filings	1,966	3,000	4,202
Standard reports issued	407	520	703
Reports issued for subdivisions with common facilities	1,375	2,100	3,202

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	109.5	111.5	101.2	$4,347	$5,190	$5,175

30.20 Subdivisions Out-of-State

The regulation of subdivisions of land located outside of California is rigorous. In addition to the in-state requirements, a determination must be made that the offering of the subdivided land is fair, just and equitable. To assist in this determination, an appraisal of the property is required before a public report and permit can be issued. The cost of appraisal, report and permit is paid by the subdivider.

Public reports and permits expire at the end of one year and generally are renewed for at least one more year. The file and public report and permit are brought up-to-date. Approximately five renewal permits are now issued each year for each original permit that has been issued, reflecting the continuing work generated by old but still active subdivisions that were first issued permits up to ten years earlier.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Out-of-State subdivision filings	19	20	22
Time share reports issued	5	6	8

Expenditures	5	5	5	$225	$258	$280

40 ADMINISTRATION

Program Objectives and Description

Central leadership and nontechnical support is provided by the Real Estate Commissioner, chief executive of the Department. The Commissioner is charged with conducting the affairs of the Department, interpreting and applying the policies of the Governor, making policy, controlling the operations of the Department's offices, and the activities of the staff and acting as official spokesperson for the Department. In carrying out these responsibilities, the Commissioner must rely on his staff for legal and administrative assistance.

The central services provided include central personnel, business, administrative and accounting. The Sacramento principal office processes all mail received by the Department in Sacramento, maintains the public counter, provides the central statewide personnel function, maintains accounting records, and prepares financial reports and annual closing statements. This section prepares service contracts and the annual budget and maintains inventories of equipment, forms, supplies and publications.

Authority

Business and Professions Code, Division 4, Part 1 and 2.

2340 DEPARTMENT OF SAVINGS AND LOAN

The principal objectives of the Department of Savings and Loan are to protect the public's savings and investment funds held by State-licensed associations, to assure compliance by associations with laws and regulations including those involving consumer protection and anti-discrimination, and to assure the continued financial growth of these associations consistent with public need and convenience.

The Department's program titled Supervision and Regulation consists of these elements: examination, appraisal, facilities licensing and legal assistance, and administration.

Chapter 1091, Statutes of 1983 (AB 1434), effective January 1, 1984, is significant deregulation legislation affecting California's Savings and Loan industry. It recodifies Savings and Loan law, and expands the investment opportunities for associations, their holding companies, and their subsidieries. In addition, it changes the method by which the Commissioner assesses associations to cover departmental administrative costs, and renames the existing Savings and Loan Inspection Fund the Savings Association Special Regulatory Fund.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**

10 SUPERVISION AND REGULATION

Program Objectives and Description

There are in excess of 4.2 million savings and share accounts in State-licensed associations. Associations convert these public funds into residential, consumer and commercial building development and construction loans. To protect these funds and to assure that the saving and borrowing public is properly and legally served, supervision and regulation activities are directed at the prevention of conditions or practices which would threaten the safety and solvency of associations or which would be detrimental to public need and convenience.

Authority

California Financial Code, Sections 5000 through 11709.

10.10 Examination

This element verifies compliance with law, regulations and directives, evaluates the soundness of operating policies and procedures and ascertains the financial conditions and solvency of the association. The information is obtained from examination of assets and activities as reflected in books, records, and securities of the association, its holding company, service corporations and other related entities. Chapter 845, Statutes of 1982, (AB 2574), removes the requirement that associations must be examined at lease once in a two year period and leaves to the Department's discretion when an examination should be conducted. It is estimated that 47 new associations will be licensed for business in 1983–84 and 162 new associations will be opened in 1984–85 including conversions by federal chartered associations. *In 1983–84, five personnel years ($248,000) are being established and sixteen personnel years ($734,000) are proposed in 1984–85 to conduct examinations on 212 new savings and loan associations which have filed applications to do business in California.*

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Expenditures	29.1	35	46	$1,507	$1,873	$2,379

10.20 Appraisal

This element provides real estate analysis support on examinations by performing appraisals and analysis of real estate transactions which: require prior approval, exceed limitations, involve insiders, involve stock exchanged for real estate, and when high risk is suspected. The function is performed by physical inspection of the subject real estate and field verification of related information. *Commencing in January 1984 and proposed to continue in 1984–85, is one senior appraiser and $63,000 for appraiser workload related to the increase in new associations. Also commencing in 1983–84 and proposed to continue in 1984–85, the budget proposes to eliminate 22 appraiser positions and $961,000 in reimbursements due to the termination of an interagency agreement with the Department of Transportation.*

2340 DEPARTMENT OF SAVINGS AND LOAN—*Continued*

10.30 Facilities Licensing and Legal Assistance

This element certifies corporations to conduct a savings and loan business in California, to license association branches and service offices, to approve mergers and acquisitions of existing associations, to approve change of locations of association branches and association name changes. It also is responsible for legal assistance in promulgating, amending, and revising administrative regulations, in proposing and drafting new legislation, in analyzing other proposed legislation and in providing interpretation of existing laws and regulations. *The 1984–85 budget proposes to add one Staff Counsel I and $53,000 to address legal activities associated with the increase in new association applications.*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Branch licensing hearings		3	12

Expenditures	2.8	3	4	$205	$257	$316

10.60 Administration

This element provides policy direction and administrative and clerical support to the other program elements. It has not been distributed among the other elements. *The 1984–85 budget proposes to add one Office Assistant II and $31,000 to address administrative workload due to the increase in new associations. In addition, the 1984–85 budget proposes to reduce one Administrative Assistant and one Office Technician and $46,000 as a result of increased efficiencies. A technical reduction of one personnel year has been made in this program in 1984–85 to reflect an adjustment to estimated salary savings.*

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

2600 CALIFORNIA TRANSPORTATION COMMISSION

The California Transportation Commission was established in 1978 by Assembly Bill 402 (Chapter 1106, Statutes of 1977). The Commission replaced and assumed the responsibilities of four independent bodies: the California Highway Commission, the State Transportation Board, the State Aeronautics Board, and the California Toll Bridge Authority. The Commission consists of: eight members appointed by the Governor, a ninth who represents the California Public Utilities Commission (selected by the Governor from among its members), all appointed to staggered, four-year terms, and two non-voting ex officio members from the State Senate and State Assembly.

The California Transportation Commission:

—adopts a State Transportation Improvement Program, which includes an estimate of State funds over a five-year period for transportation projects and an allocation of these funds to projects prioritized in keeping with statewide interests;

—allocates State funds for capital improvements to specific highway and public mass transportation projects in the State;

—recommends to the Legislature priorities among the various elements of the State's Mass Transportation program, including State Transit Assistance, Rail Passenger Service, and Transit Capital Improvements;

—prepares a Biennial Report to the Legislature, which identifies significant transportation issues and necessary future investments, and recommends legislative and administrative actions to meet California's emerging transportation needs;

—submits to the Legislature an evaluation of the proposed budget of the California Department of Transportation and the adequacy of current state transportation revenue, including gasoline tax rates and driver licensing, vehicle registration, and weight fees.

The Commission advises and assists the Secretary of the Business, Transportation and Housing Agency and the Legislature in formulating and evaluating State policies and plans for California's transportation programs.

State Highway Account, State Transportation Fund	*70*	*110*	*117*
Personnel years	11.8	12	12

Program Objectives and Description

Since its creation, the Commission has made several important contributions toward providing more balanced transportation policies and programs in California. Each year since 1979, the Commission has adopted a five-year State Transportation Improvement Program, Biennial Reports to the California Legislature on transportation financing in 1979, 1981, and 1983, and an evaluation of the Department of Transportation's proposed budget for each upcoming fiscal year.

The State Transportation Improvement Program (STIP) is a five-year expenditure program for State-funded transportation projects that is updated and adopted annually. The STIP also sets aside funding during the period for maintenance, operations, and engineering functions of the Department. It is developed using the Commission's adopted fund estimate methodology, agreed upon by State, regional, and local agencies; the Department's proposal; and the regional transportation improvement programs.

The 1981 five-year STIP was limited to only one year of capital projects due to the immediacy of revenue shortages. Passage of SB 215 in 1981 permitted the Commission to reestablish in 1982 a five-year construction program in the 1982 STIP. The 1983 STIP reflects the significant increase in Federal Funding resulting from the passage of the 1982 Federal Surface Transportation Assistance Act.

The California Transportation Commission's 1979 and 1981 Biennial Reports to the Legislature examined and made legislative recommendations on future financial investments for transportation in California and allocation formulas for State highway funds. The latter report helped to clarify the immediacy of the funding shortfall and contributed to the successful legislative adoption of increased revenue. The 1983 Biennial Report examined California's system of airports and recommended funding reforms for the system's protection.

The Commission has emphasized mass transportation projects which lead promptly to improvements in public guideways, and has allocated State funds to construct the light rail system in San Diego, which is now in operation, and to major safety and operational improvements to commuter rail and public guideway services in other parts of the State.

The Commission has also worked with the Department and regional agencies to improve the State's ability to evaluate and monitor the development of public guideway projects in the State. The 1982 STIP was the first to program guideway projects for the full five years of the program. The Commission seeks the maximum federal funds available for guideway projects. This early State commitment of funds helped local agencies to secure the pending Federal commitments for construction of light rail systems in Sacramento and Santa Clara counties, for construction of the Los Angeles Metro Rail system, and for major federal capital projects to improve existing mass transit systems in the San Francisco area.

Other accomplishments of the Commission include annual reports and testimony to the Legislature on the Department's proposed budgets; several important recycling studies of freeway routes through the State; computerization of the STIP process; special hearings on transportation financing in California; and active participation in the legislative process on selected transportation-related bills. The Commission has planned the following activities during 1984–85.

• *Highways.* The Commission will complete a study conducted pursuant to Senate Concurrent Resolution 46 (1982) to identify high priority highway projects that have not been funded.

• *Mass Transportation.* The Commission will allocate funds in the near future involving major new guideway projects in urban areas. (With the enactment of AB 1010, Chapter 1183, Statutes of 1981, the Commission assumed new oversight responsibilities for the State's Rail Program.) In addition, the Commission will continue to develop improved projects and work with local agencies and the Department of Transportation to secure the federal discretionary transit grants needed to complete the most promising new transit systems in the State.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands, excluding salary range.

2600 CALIFORNIA TRANSPORTATION COMMISSION—*Continued*

In addition, the Commission will complete work in the current fiscal year on a listing of high priority mass transit projects and their cost. The study was mandated by Senate Concurrent Resolution 46 of the 1983 Session and will provide the State with its first comprehensive analysis of the different mass transit projects competing for State funding.

- *Toll Bridges.* The Commission will continue to allocate toll and highway funds for projects on the nine State-owned toll bridges and their approaches, including the annual allocation of toll funds to the Metropolitan Transportation Commission for funding transit capital projects in the Bay Area.
- *Legislation.* The Commission will work closely with other states and local agencies on the major federal transportation revenue issues that the Congress will take up in 1984.

10 STATE TRANSPORTATION ASSISTANCE

Program Objectives and Description

This program provides funds to local agencies for the operation of public mass transit systems and for street and road purposes in rural areas. The funds are appropriated to the Secretary of the Business, Transportation and Housing Agency, who has delegated the responsibility for administering the program to the Department of Transportation.

Chapter 322, Statutes of 1982, provided that 60 percent of the amount of funds transferred from the Retail Sales Tax Fund to the Transportation Planning and Development Account of the State Transportation Fund be appropriated for this program. However, $90 million and $103 million for FY 1982–83 and FY 1983–84, respectively, were appropriated specifically by this statute. These amounts were reduced to $70 million for FY 1982–83 by Chapter 10X, Statutes of 1983, and $88 million for FY 1983–84 by Chapter 323, Statutes of 1983. It is proposed to fund the State Transportation Assistance (STA) program according to statute, or $79,800,000, in FY 1984–85.

Authority

Local Assistance	$70,000	$88,000	$79,800
Transportation Planning and Development Account, State Transportation Fund	*70,000*	*88,000*	*79,800*

50 RIDESHARING AND ALTERNATIVE TRANSPORTATION

Program Objectives and Description

This program provides for the establishment and support of ridesharing programs in both urbanized and nonurbanized areas throughout the state. Funding for this program is from the Ridesharing and Alternative Transportation Fund to the Secretary of the Business, Transportation and Housing Agency for allocation to the Department of Transportation and to transportation planning agencies, county transportation commissions, and the San Diego Metropolitan Transit Development Board.

Chapter 502, Statutes of 1982, provided for the transfer of $6 million during FY 1982–83, on July 1, 1983, and every July 1, through 1987 from the General Fund to the newly created Ridesharing and Alternative Transportation Fund. These transfers of funds were eliminated for FY 1982–83 by Chapter 10X, Statutes of 1983 and for FY 1983–84 by Chapter 323, Statutes of 1983 due to the critical needs of the General Fund. As a partial offset, a one-time amount of $1.5 million for FY 1983–84 was added to the Ridesharing Program of the Department of Transportation, and local agencies increased their funding for ridesharing by $937,000 in 1983–84.

In 1984–85, it is proposed to continue the current year level of $1.5 million for the Ridesharing Program in the Department of Transportation's Mass Transit Program. Combined with continued local agency support of the Department's ridesharing program through an estimated $900,000 in reimbursements, this amount will provide for a cost-effective program in areas where public interest and participation levels are high. Consistent with this proposal, funding for support of ridesharing activities within Special Transportation Programs will be proposed for suspension for 1984–85 in the Budget trailer bill.

2650 TRANSPORTATION SERVICES FOR SOCIAL SERVICE RECIPIENTS

The Social Service Transportation Improvement Act (Chapter 1120, Statutes of 1979) was enacted with the intent to improve transportation services required by social service recipients by promoting the consolidation of social service transportation services so that the following benefits may accrue:

- Combined purchasing of necessary equipment so that some cost savings through larger number of unit purchases can be realized.
- Adequate training of vehicle drivers to insure the safe operation of vehicles.
- Centralized dispatching of vehicles so that efficient use of vehicles results.
- Centralized maintenance of vehicles so that adequate and routine vehicle maintenance scheduling is possible.
- Centralized administration of various social service transportation programs so that elimination of numerous duplicative and costly administrative organizations can occur.
- Identification and consolidation of all existing sources of funding for social service transportation services so more effective and cost efficient use of scarce resource dollars can occur.

The Act specified that the following were to be exempt from consolidation considerations:

- Vehicles owned and operated by school districts.
- Employees of school districts.
- Individual transportation allowances and recipients of such allowances, as defined in Chapter 2 (commencing with Section 11200) of Part 3 of Division 9 of the Welfare and Institutions Code. (Aid for children whose dependency is caused by (1) death, incapacity, or incarceration of a parent, (2) divorce, separation, or desertion of a parent or parents, or (3) the unemployment of a parent or parents.)
- Individual transportation allowances and recipients of such allowances, as defined in Article 3 (commencing with Section 17000) of Division 9 of the Welfare and Institutions Code. (Relief and support of incompetent poor, indigent persons, and those incapacitated by age, disease, or accident when such persons are not supported and relieved by their relatives or friends, by their own means, or by State hospitals or other State or private institutions.)
- Individual transportation allowances and recipients of such allowances, as defined in Article 3 (commencing with Section 12550) of Chapter 4 of Part 3 of the Welfare and Institutions Code. (Special circumstances which are not common to all aged, blind, and disabled recipients which arise out of a need for certain goods or services, and physical infirmities or other conditions peculiar on a nonrecurring basis to the individual's situation.)
- Individual transportation allowances and recipients of such allowances, as provided under Title XX of the Social Security Act. (Grants to states for achieving or maintaining economic self-support of individuals to prevent, reduce or eliminate dependency.)

The following display reflects, by activity, program transportation services currently provided by state departments and organizations to five major recipient groups. An asterisk (*) indicates which group(s) are recipients of the programs listed. A double asterisk (**) indicates which group(s), if any, are the primary recipient of the individual program.

To date, there is no central data collection system that is operational which can provide detailed expenditure or funding source information for each of these particular programs. In this display, an attempt has been made to identify estimated program expenditures through a cooperative effort with each department.

[1] The Department does not budget funds specifically for client transportation costs. During FY 1984–85 approximately $48 million will be subvented to counties and private providers. The funds are subvented through the Short-Doyle system or via contract. The Department does not have line item control over specifically identified transportation services, but only controls the program total.

[2] The Department does not budget funds specifically for client transportation costs. During FY 1984–85 approximately $41 million will be subvented to the counties which in turn contract with private providers for treatment services. The Department does not have line item control over transportation services but only controls the program total.

2660 DEPARTMENT OF TRANSPORTATION

The four primary programs of the Department of Transportation (Caltrans) are: Highway Transportation, Aeronautics, Mass Transportation, and Transportation Planning.

The Highway Transportation program follows the priorities set forth in Chapter 541, Statutes of 1981 (SB 215), by emphasizing maintenance and rehabilitation of existing road and highway systems, and by implementing the adopted 1983 State Transportation Improvement Program (STIP) which includes over 1900 projects and many "Fast Tracked" projects. To accomplish this increased program level, improvements in operating procedures and computer technology have been implemented. The proposed Highways budget contains a major commitment of resources to provide for early completion of the Interstate System and continues to maximize the use of available Federal funds, both in State construction and in aid to local governments.

The Aeronautics program emphasis is on airport and heliport safety, improvement in ground access to airports, airport local assistance funding and noise control. The program also provides assistance to small and medium sized communities in maintaining or obtaining needed air services.

The Mass Transportation program provides cost effective public transportation services, equipment, and facilities within a balanced transportation system. The proposed budget includes funding for commuter and intercity rail services and development of local transit guideways.

The Transportation Planning program ensures a continuing systems planning process that works towards the effective integration of the various modes of transportation. This budget includes resources to analyze transportation issues and problems, develop traffic forecasts and other data and technical assistance.

General Caltrans program proposals in 1984–85 include an increase in computer services, particularly in the use of computer hardware for engineering design and drafting. These technological enhancements will improve project delivery capabilities and avoid future costs. The department is also requesting additional resources for maintenance inventories and support services to maintenance and construction. In the Transportation Planning program the department is initiating long-range planning which will strengthen the statewide highway transportation planning process. In the Mass Transportation program, the department is proposing to increase resources to improve the Penninsula Commute Rail Passenger Service.

A Finance Letter detailing program change proposals to the capital outlay program will be submitted in the spring after the State Transportation Improvement Program (STIP) has been updated.

10 AERONAUTICS

Program Objectives and Description

California aeronautical activity is among the highest in the United States. The air transportation corridor between San Francisco and Los Angeles is the country's most heavily used. Six of the nation's ten busiest airports are located in this state. Such aviation activity creates problems of airborne traffic congestion, aircraft noise and airport terminal congestion, affecting pilots, passengers and the general public. These problems are complicated by the fact that in urban areas, where the problems are most acute, new airport construction often is not feasible. The Aeronautics program supports California's aviation activities by promoting the optimum use of existing airports, with special emphasis on assuring adequate air service for small and medium-sized communities because of rapidly changing conditions caused by the Airline Deregulation Act.

Administrative efficiencies have been recognized by reducing the 1984–85 program by one personnel year.

Authority

Public Utilities Code, Division 9.

20 HIGHWAY TRANSPORTATION

Program Objectives and Descriptions

At the present time, California's road network serves the vast majority of all travel in the State, including both person and commodity travel. In the passenger area, roads provide not only for the movement of people in private automobiles, but also in buses, vans and on motorcycles and bicycles. Trucks also carry the bulk of freight moved. The State Highway System, which comprises less than nine percent of total roadway mileage in California, handles fifty-seven percent of the miles traveled.

In the current year only, an increase of 244 personnel years and $9,802,000 has been administratively authorized to provide the necessary staffing to implement the adopted 1983 State Transportation Improvement Program (STIP). This increase is necessary to accomplish planned right-of-way acquisition, design, and construction activities. Budget year staff needs to implement the STIP will be addressed by Finance letter in the spring.

Administrative efficiencies of 146.4 personnel years and $2,918,000 have been recognized in a proposed net reduction to the 1984–85 program. The nature of these reductions is explained in each of the affected elements.

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

20.10 Rehabilitation

The purpose of this program element is to maintain the existing system in a safe and usable condition. Included is the purchase, construction or improvement of lands, buildings, and facilities such as offices, shops, and maintenance yards used for the support of the Department's activities, restoring highway facilities damaged or deteriorated by usage, weathering or natural disasters, and constructing protective improvements such as rock slopes, culverts, underdrains or earthquake restrainers are important measures utilized.

In the current year only, 123.5 personnel years and $2,147,000 are administratively reduced for redirection within the Highway Transportation program, including the New Facilities element. For 1984–85, it is proposed to reduce 10.6 personnel years currently dedicated to pavement striping in favor of contract services for this activity.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Facility contracts awarded	141	136	133
Rest area deficiencies corrected	12	17	27

20.20 Operational Improvements

Projects in this element are designed to reduce the number and severity of highway accidents. Improvements may be at spots of accident concentrations and include signals, warning signs, lighting or curve corrections, or they may be systemwide improvements and include such projects as adding median barriers, crash cushions, breakaway signs, raised pavement markers and removal of roadside obstacles.

Other improvements which contribute to a pleasing and environmentally compatible highway transportation system include: noise attenuation near communities and schools, highway planting, roadside rests, vista points, historical markers, junkyard screening, billboard removal, scenic easements, fish and wildlife preservation, information centers and ecological viewing areas.

Included in this element are projects which improve traffic flow by increasing the capacity of existing facilities. This includes ramp meters, changeable signs, truck climbing lanes, adding lanes through bottlenecks, exclusive multi-occupancy vehicle lanes, modifying roadway geometrics, lane delineation, channelization and installing traffic signals.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Safety improvements, spot locations	55	44	49
Est. fatal accidents prevented	50	51	62

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

20.30 Local Assistance

This element provides for the administration, coordination and control required by federal and State law for implementing transportation projects and furnishing financial assistance to city and county transportation programs. The purpose is to ensure that the expenditures of all apportioned funds is consistent with federal and State guidelines and is administered at the lowest departmental expense.

This element also provides assistance at the request of other public agencies that have agreed to fully reimburse Caltrans for the full cost of the effort when the provisions of such assistance fulfills an essential public purpose which will be impaired without Caltrans' participation.

For 1984–85, a reduction of $47 million is proposed, which reflects a lower level of Federal funds for local assistance.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.40 Program Development

Activities in this element determine the public need for highway transportation facilities and services and result in the development of programs which provide an effective response to public transportation needs.

Research provides an effective response to the need for safe, efficient and environmentally compatible highway transportation service. It includes theoretical and applied research, development, testing and evaluation, and demonstration projects. This element includes resource conservation research which seeks the most efficient utilization of nonrenewable resources.

The System Management component of this element provides for the collection and analysis of factual data as a basis for recommendations and reports to top management, the California Transportation Commission and the Legislature. Specific activities include mapping and inventorying road systems, monitoring performance and monitoring construction progress in order to prepare the various reports required by State statute.

For 1984–85 an increase of 2 personnel years and $2,031,000 is proposed for additional consultant-performed research, contract work and equipment purchase in the traffic census program, additional consultant-performed Geodetic Surveys, information services for the library; and long-range planning to develop State Transportation Improvement Program (STIP) projects. Administrative efficiencies reducing 5 personnel years and redirecting the funds will be realized through increased reliance on contract research services.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Traffic census vehicle counts	11,036	9,980	9,980

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.40.030 Programming	46.8	49.9	51.9	2,241	2,552	2,722

20.50 New Facilities

This element will furnish new or improved service on the State Highway System where rehabilitation or operational improvements are determined to be inadequate or inappropriate to meet Highway Transportation needs. Projects will also include qualifying bicycle facilities used in conjunction with the project.

Projects provide new or improved access to the State highway system, provide separations that improve cross traffic serving new developments, improve alignment or grade on existing facilities, add new through lanes to existing facilities and upgrade width. New highways that serve new areas and assist in the appropriate regional development of the State are also included within this element.

Projects also provide new or expanded toll bridge facilities by adding lanes, constructing new bridges or replacing existing bridges.

In the current year, 244 personnel years are administratively established and 95.9 personnel years are redirected ($9,655,000) to implement the approved State Transportation Improvement Program (STIP). Continuation of these positions in 1984–85 will be addressed in a Finance Letter which will reflect modifications to new construction schedules incorporated in the proposed 1984 STIP, currently in preparation by the department. In addition, for 1984–85, it is proposed to reduce 16.4 personnel years for pavement striping in favor of contract services and 3 personnel years for archaeological services, for a total reduction of $591,000.

For 1984–85, an increase of $221 million, principally Federal funds for capital outlay, is proposed. This adjustment reflects the expenditure level for 1984–85 in the adopted 1983 STIP.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20.70 Operations

This element provides for the management of traffic through a systemwide surveillance and analysis effort. It includes the design and installation of traffic control devices such as signals, signs, striping, and ramp controls. It also includes the issuance of transportation and encroachment permits.

Other activities are the operation of toll bridges including toll collection and other toll-related services, and the operation of ferries.

Within the real property services area, activities include property management, airspace leasing, sales of excess land, the travelers information program, and the motorist services informational signing program.

For 1984–85, increases of 7 personnel years and $473,000 are proposed for replacement of obsolete manual toll collection machines with a new system that is designed to provide toll accounting and management reports on a timely basis. It will also provide for installation of automatic toll collection machines.

20.80 Maintenance

The purpose of this program element is to preserve and repair the highway system in a safe and usable condition.

System elements include traveled-way surfaces, shoulders, roadsides, drainage facilities, bridges, tunnels, ferries, landscape planting, signs, pavement markings, etc. In addition to physical maintenance, this element provides for operational activities such as operating lights and signals, snow and ice removal, and staffing of roadside rest areas.

For 1984–85, increases of 44.6 personnel years and $4,888,000 are proposed for maintenance of additional inventory, repair of loop detectors, correction of guardrail alignment, replacement of pavement markers, and the filling of pavement cracks. Increased roadside rest usage and expansion require additional maintenance; in addition, the budgeted snow and ice allocation is proposed to be augmented by $3,191,000 to reflect increased activity based on the heavy snows of the last several winters. In addition, the department proposes to achieve greater efficiency in operations, which will be achieved through a reduction of 165 personnel years and $1,996,000 through increased use of WIN/COD program participants and increased use of contracted services.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Roadway surface maintained (lane-miles)	48,250	48,285	48,346

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

30 MASS TRANSPORTATION

Program Objectives

The Mass Transportation program addresses the public's concern for improved air quality, environmental protection, conservation of energy resources, the transportation needs of low-mobility persons, improved rail commuter services, and the need for safe, effective public transportation. The program supports the California Transportation Program by encouraging, and implementing urban, rural and interregional public transportation and innovative transit research and development to provide efficient, safe and cost-effective transit services, equipment and facilities.

In 1984–85, 54.7 personnel years funded from reimbursements are proposed for reduction as explained in each of the affected elements. An increase of $1,776,000 for State Operations is proposed for 1984–85, which reflects the increased level of support for State-supported rail operations. In addition, a $43 million reduction in capital outlay funding is proposed which reflects the expenditure level for 1984–85 contained in the adopted 1983 STIP.

Authority

Article XIX, California State Constitution.

Chapter 1400, Statutes of 1971; Chapter 1253, Statutes of 1972; Chapters 773, 781, 807, 1143, 1427 and 1470 of 1974; Chapter 1130 and 1139 of 1975; Chapters 1270, 1333, 1348, and 1349 of 1976; Chapters 227, 819, 1015, 1043, 1067, 1098, 1106, and 1216 of 1977; Chapters 460, 669, 694, 791, and 1415 of 1978; Chapters 161, 579, 782, 898, 921, 1002, 1079, 1095, and 1120 of 1979; Chapter 899 of 1980, and Chapters 262, 321, and 322 of 1982.

30.10 Full Mobility Transportation

This element provides improved transportation services and facilities necessary for transit dependent people, including elderly, disabled and disadvantaged persons. Activities include planning, initiating, administering and coordinating programs to increase public transportation services for dependent persons and low mobility groups now restricted by cost, availability of service, or design of facilities and equipment. These programs provide assistance to public and private organizations in order to make more effective and efficient use of resources and develop and improve specialized equipment used in public transit service for low mobility people.

For 1984–85, an increase of 3 personnel years and $105,000 is proposed to administer new federal requirements related to the acquisition of paratransit vehicles.

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

30.20 Transit Operator Assistance

This element provides technical and financial assistance to local transit operators in order to increase their ability to make most efficient use of available resources. Activities include: provision of short-term management, technical and planning assistance to local agencies and transit managers, and review and approval of transit guideway project proposals to ensure effective and efficient utilization and distribution of available funds.

For 1984–85, an increase of 2 personnel years and $76,000 is proposed to meet increased workload and federal administrative requirements related to the Urban Mass Transportation Act (UMTA) Section 18 program which provides funds for transit operating and capital expenditures in nonurbanized areas. In addition, funding for Transit Capital Improvement projects and Article XIX Guideway projects has been proposed to conform to the 1983 STIP for fiscal year 1984–85, including a $9,700,000 million increase in State-funded local assistance.

30.30 Interregional and Intercity Public Transportation

Projects in this element improve interregional public ground transportation throughout the State, offer alternatives to the automobile and provide mobility for those who cannot afford, or are physically unable, to use the private automobile. These programs include identification and support of necessary interregional bus services and activities to improve intercity and passenger rail transportation, including freight service and facilities.

State funds of $142,000 will be replaced by Federal funds to update the State Intercity Bus Plan. Also proposed for 1984–85 are an additional 6 personnel years and a net reduction of $705,000 to accommodate workload adjustments for planning, management and capital improvements on the Peninsula Commute Service. These adjustments are partially offset by a reduction in the rail service operating contract. For 1984–85, $277,000 for increased rail service marketing is proposed. In addition, an increase of $5,000,000 for capital improvements to the Peninsula Commute Service is proposed.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

30.40 Transfer Facilities and Services

This element provides for development and implementation of statewide plans to enhance the transfer capability between modes of transportation. Program activities provide new or improve existing intermodal transfer facilities by development of a statewide plan, administration of funds, and management and operation of state-owned intermodal transfer facilities.

For 1984–85, an increase of 6 personnel years and $2,155,000 are proposed to acquire, rehabilitate and operate rail passenger stations on the Peninsula Commute Service between San Jose and San Francisco. Also proposed is an additional $8,000,000 for capital outlay for the Peninsula Commute Service.

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

30.50 Transportation Demonstration Projects

This element undertakes research, development and demonstration projects to advance the state-of-the-art of public transit equipment and services through improved or innovative equipment, facilities and operating methods. Program activities include selection, implementation and evaluation of research and demonstration projects to improve transit vehicles, facilities, and equipment; and, participation in technical studies aimed at improving transit management and planning techniques.

For 1984–85, an increase of $100,000 in Federal funds is proposed for transit technical studies.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.50.020 Transit Technical Studies	2.3	2.4	2.4	187	158	264

30.70 Work for Others

This element provides assistance at the request of other public agencies that have agreed to reimburse Caltrans for the full cost of the effort when such assistance fulfills an essential public purpose. In this capacity the department provides services related to Mass Transportation which are not the mandated responsibility of this program.

For 1984–85, a decrease of 64.8 personnel years, and $2,767,000 is proposed to reflect a reduction in Caltrans' reimbursed light rail design and construction and commuter rail planning studies. The remaining work to meet local agency needs, other than Caltrans' effort, will be performed by direct contract.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	120.8	97.8	33	$8,643	$78,752	$28,203

Capital Outlay:						
Reimbursements				*2,509*	*47,850*	–

30.80 Ridesharing

This element responds to public needs for conservation of fuel, improved air quality, mitigation of traffic congestion, prolonged highway life, alleviation of parking problems, and reduced transportation costs by motivating people to travel in groups rather than driving alone. Program activities encouraged the use of carpools, vanpools, buspools, and transit by providing ridesharing services and support necessary to inform and motivate the public in regard to the opportunities available through ridesharing.

For 1984–85, it is proposed to continue the current year use of federal funds and reimbursements from local agencies to support ridesharing activities in metropolitan areas. A reduction of $50,000 is proposed that would eliminate subsidies to displaced workers; however, regular ridesharing services will continue to be provided to displaced workers. It is also proposed to reduce 7 personnel years for ridesharing staff services in favor of contract services. No reduction in overall effort is proposed and expenditures for this program are anticipated to increase by $1.2 million, due primarily to increased local reimbursements.

Performance Measures	*1982–83 Actual*	*1983–84 Estimated*	*1984–85 Proposed*
Persons placed in ridesharing pools	47,600	57,300	58,800

40 TRANSPORTATION PLANNING

Program Objectives and Description

The Transportation Planning Program is designed to oversee implementation of statewide transportation policy through coordination and development of transportation plans and resulting projects. It provides overall development of the State Transportation Improvement Program (STIP). Federally-required Transportation Improvement Programs (TIPs) are reviewed and comparisons made between regional transportation plans and programs and the Department's proposed STIP. The program provides analyses and recommendations regarding current transportation issues.

In addition, technical assistance, traffic forecasts and other transportation data are provided to Department districts and modal divisions, regional agencies, and others. Departmental applications and funding from Federal, State and discretionary grant sources are integrated. Management of planning activities on modal transportation plans, air quality plans and alternative energy sources for transportation is provided. Further, through the areawide clearing house/environmental review process, an evaluation is made of the potential impact on the State transportation system of proposed local development projects.

The Transportation Planning Program assures that the requirements of new legislation and Departmental policy are evaluated and changes integrated into the various modal and intermodal programs of the Department.

40.10 Statewide Planning

This element identifies the best transportation methods within transportation corridors, and evaluates and forecasts the impact of transportation on the environment.

An increase of 25.2 personnel years and $960,000 is proposed for 1984–85 to initiate long-range planning which will strengthen the statewide transportation planning process and improve the reliability of information contained in the State Transportation Improvement Plan (STIP).

Performance Measures	*1982–83 Actual*	*1983–84 Estimated*	*1984–85 Proposed*

40.20 Regional Planning

The regional planning element provides resources for technical support of Regional Transportation Planning, including funds which are allocated to regional planning agencies based upon review and approval of overall regional work programs.

Increases in Federal funds are proposed in local assistance to be allocated to Metropolitan Planning Organizations (MPOs) for their local transportation planning activities.

For 1984–85, an increase of 4 personnel years and $164,000 in reimbursements is proposed to review private sector proposals for rapid rail transit.

40.40 Work for Others

This element provides staff and technical assistance to regional planning agencies to ensure coordination of regional and State planning activities. This also includes providing support for regional activities which require planning expertise, and other staff support which may not be readily available within the local agency.

For 1984–85, a reduction of 5 personnel years and $219,000 is proposed to reflect reduced demand for contracted transportation studies.

2660 DEPARTMENT OF TRANSPORTATION—*Continued*

50 ADMINISTRATION

Program Objective and Description

The Department of Transportation's activities require overall policy direction, coordination and staff support services to achieve departmental goals and objectives. This program includes the following activities:

1) Leadership, coordination, and management consultation for departmental programs,

2) Administrative, business, legal and other services necessary for the efficient operation of the department's programs, including personnel, affirmative action, employee relations, training, legislative affairs, public information, budgeting, accounting, evaluation and review, management and systems analysis, safety, program management and professional and technical support services.

Increases of 40.1 personnel years and $24,973,000 for 1984–85 are proposed to provide equipment services for the Caltrans fleet (10 personnel years, $5,221,000) and technical support for the increase in project-related engineering effort (24.4 personnel years, $1,163,000), including accounting, personnel and safety functions. Also proposed for 1984–85 within this increase is 5.7 personnel years and $18,501,000 for implementation of a computerized "Roadway Design System" and related expansion of EDP efforts, including increased support from Teale Data Center. This new system is expected to be operational in 1984–85. The department estimates that avoided costs in the range of $90 million over the next five years are possible due to reduced personnel effort for engineering and cost reductions resulting from earlier construction.

For the budget year, administrative efficiencies are proposed which will result in a reduction of 29 personnel years and $88,000. To accomplish this objective through the redirection of funds, office automation is proposed (a saving of 20 personnel years), along with a consolidation of administrative functions (a saving of 6 personnel years), and a reduction in services to programs (a saving of 3 personnel years). Approximately $1,000,000 of the savings associated with these efficiencies is proposed for redirection toward the purchase of office automation equipment.

2700 OFFICE OF TRAFFIC SAFETY

The principal objective of this office is to coordinate an effective attack on the problem of traffic safety, and to assist in assuring that the limited resources available are used most efficiently. This is accomplished through implementation of an annually updated California Highway Safety Plan to assist the activities of the approximately 3,100 public agencies and private organizations, now spending over $1 billion per year on traffic safety.

Participating traffic safety grants to State agencies and local governmental entities are reviewed, approved and monitored by this office. The administrative costs of the Office of Traffic Safety are reimbursed from federal funds using the applicable "Sliding Scale Rate" developed and published annually by the Federal Government. The remainder is funded from the State Transportation Fund, Motor Vehicle Account.

Chapter 1339, Statutes of 1982, directs the Office of Traffic Safety to administer a three year evaluation of first offender "Driving Under the Influence" (DUI) programs being provided by the counties in this State. The evaluation is to be funded by a fee not to exceed $5 assessed on each participant in such programs. A final evaluation report is due to the Legislature by December 30, 1985.

Approximately 56 of the State's 58 counties offer first offender programs. The Office of Traffic Safety estimates court convictions of approximately 160,000 drivers annually of a first offense of the DUI laws. Of those, approximately 25 percent will participate in the programs to be evaluated. Estimated annual fee revenue will be approximately $300,000, which should be adequate to fund the cost of evaluating the various programs.

10 TRAFFIC MANAGEMENT

Program Objectives and Description

The objectives of the Traffic Management Program are to minimize deaths, injuries, and property losses due to traffic accidents; to minimize traffic delays to the motoring public; and to provide protection and assistance to the motoring public.

The Department is proposing the following budget adjustments for the 1984–85 fiscal year:

1. *The addition of $11,939,000 which will provide funding of 145.5 State Traffic Officer personnel years and overtime and related expense as a result of Chapter 933, Statutes of 1981 (AB 202), which authorized and directed the Department to employ additional State Traffic Officers. Funding for this increase is from the additional $1 dollar registration fee for motor vehicles effective from January 1, 1982 to December 31, 1985.*
2. *Funding of $1,000,000 for uniformed overtime to implement the Driving Under the Influence Program.*
3. *Additional telecommunications equipment and operating expenses in the amount of $7,062,000.*
4. *Addition of 10.5 Communications Operators ($208,000) at specifically identified Dispatch Centers.*
5. *The addition of $260,000 to provide updating of the computer system at the Los Angeles Communications Center for increased workload.*
6. *Due to the receipt of Federal funds, for increased public safety efforts, 8.1 personnel years ($218,000) are being administratively established in 1983–84 and 6.6 personnel years ($170,000) are proposed to be continued in 1984–85.*
7. *The addition of 10 clerical positions ($187,000) to staff area offices.*
8. *The addition of reimbursements for funding uniformed overtime funding ($614,000) to provide for the 55 M.P.H. Program.*
9. *The addition of nonuniformed overtime ($114,000) for increased workload.*
10. *The major non-personnel items proposed include equipment items such as vehicle replacement ($712,000); replacement of 2 fixed wing aircraft ($320,000); word processing equipment ($392,000); copier replacement ($77,000), and facilities rental increases ($733,000).*
11. *Due to operating efficiencies, 51 personnel years and $1,567,000 are proposed for*

10.10 Ground Operations

The California Highway Patrol (CHP) patrols 14,500 miles of State highways and 81,500 miles of county roads. Allocation of personnel is based upon: analysis of motor vehicle traffic collision data; Vehicle Miles of Travel (VMT) within CHP jurisdiction; the motoring public's need for accident investigation and off-highway services; and emergency services generated from natural and man-made disasters and from other agencies. In order to provide services, the CHP maintains one or more facilities in each of the 58 counties in California.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
1. Collisions per 100 million miles traveled:			
a. Fatal collision rate	1.9	1.7	1.6
b. Non-fatal collision rate	52.3	49.4	47.0
c. Property damage only rate	69.4	65.7	62.7

2720 DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—*Continued*

10.20 Flight Operations

The CHP deploys four airplanes in the Coalinga (two), Barstow (one), and El Centro (one) Areas to extend patrol coverage on major and ancillary highways which carry moderate traffic flows, but receive minimal or no ground unit patrol coverage. Three airplanes (Redding, Sacramento and King City Areas) had been deployed in a two year, federally funded project (3-1-81 to 3-31-83) to determine whether airplanes can impact motorist compliance with the 55 mph national maximum speed limit. Additional Federal Funding has been made available through the end of the 1983–84 fiscal year. A request is being made for an additional year of federal funding in 1984–85.

Six helicopters are deployed statewide (Redding, Sacramento, Napa, Fresno, Van Nuys and Barstow) as patrol units capable of handling assigned or detected calls/incidents to completion without ground unit assistance. Services included are traffic management, crime control, search and rescue, emergency medical and fire detection.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
CHP patrol airplanes:			
Total patrol hours	2,558	2,609	2,661
Total calls/incidents handled	76,110	77,632	79,184
Number of enforcement contacts	52,574	53,625	54,697

20 REGULATION AND INSPECTION

Program Objectives and Description

The major objectives of the program are: to reduce the incidence of truck and bus accidents attributable to defective vehicle equipment, improper maintenance, loading or securement of cargo, or disqualified drivers; to protect the public from spills of hazardous materials or specially regulated loads and from the improper operation of specified vehicles such as ambulances, armored cars; to protect farm workers transported in farm labor vehicles and children transported in school buses; to ensure that proper registration fees are paid; and that highways are protected from excessive weights. Goals are to inspect as many vehicles, loads, hazardous materials shipping facilities, and vehicle maintenance facilities as can be accomplished with the resources available.

The Department is proposing the following budget adjustments for the 1984–85 fiscal year:

1. *Additional truck scale facilities located in Fremont to be staffed with an additional 2.3 uniformed personnel years and 3.3 nonuniformed personnel years ($190,000).*
2. *Additional truck scale facilities located in Gilroy to be staffed with an additional 5.3 uniformed personnel years and 8.3 nonuniformed personnel years ($367,000).*
3. *Additional truck scale facilities located at Mission Grade to be staffed with an additional 5.4 uniformed personnel years and 7.8 nonuniformed personnel years ($376,000).*
4. *An additional 1.3 uniformed personnel years ($55,000) for the Fremont platform scale.*
5. *An additional four Commercial Vehicle Inspection Specialist I's ($86,000) to be located at the following scale facilities; Los Banos (1 position), North Sacramento (1 position), and South Los Angeles (2 positions).*
6. Due to operating efficiencies, 2.5 personnel years ($102,000) are proposed for reduction.

Authority

The multiple mandates for the program are stated within the elements.

20.05 School Pupil Transportation Safety

The objectives of this element are to minimize to the greatest extent possible schoolbus accidents caused by mechanical defects or caused by the schoolbus driver.

The inspection and certification of schoolbuses on an annual basis and periodic inspection of schoolbuses and schoolbus maintenance facilities are accomplished to ensure the vehicles are properly maintained. Testing and certification of schoolbus drivers, periodic monitoring of schoolbus drivers to ensure compliance with applicable laws and regulation, and the investigation of all schoolbus accidents are activities of this element.

Authority

Vehicle Code, Sections 2807, 2807.1, and 12522; Education Code, Section 39831; Administrative Code, Section 14204.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of school bus miles	239,224,779	247,637,633	260,019,514

20.10 Regulated Special Purpose Vehicles

The purpose of this element is to protect the public from improper operation of emergency ambulances, armored cars and certain other authorized emergency vehicles.

This program element functions by adopting and enforcing regulations regarding the operation, equipment, and certification of drivers of emergency ambulances, by licensing the operation of armored cars and privately owned emergency ambulances, and by issuing permits for certain specified vehicles to be equipped and operated as authorized emergency vehicles.

Authority

Vehicle Code, Sections 2416, 2417, 2501, 2510, and 2512.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of license permits by type:			
Number of license permits outstanding/ambulance	245	250	255
Number of license permits outstanding/armored car	18	20	20
Number of license permits outstanding/emergency vehicle	267	270	275
Number of license permits issued/ambulance	237	250	255
Number of license permits issued/armored car	18	20	20
Number of license permits issued/emergency vehicle	116	155	120
Number of public agen ambulance operations	188	185	185
Number of ID cards outstanding by type:			
Number of ambulance	1,292	1,310	1,320
Number of armored car	506	515	520
Number of emergency vehicle	267	270	275
Number of vehicle inspections by type: [1]			
Number of ambulance	1,569	1,325	1,330
Number of armored car	72	35	20
Number of emergency vehicles	116	155	120
Number of ambulance services granted exemption	18	16	18
Number of vehicles approved after correction:			
Number of ambulance	188	150	158
Number of armored car	10	5	2
Number of emergency vehicle	–	5	2

[1] Ambulance inspections reduced to initial and annual reinspections. Armored car inspections reduced to the initial inspection and random inspections in lieu of annual inspections of each vehicle. Annual ambulance inspections will be done and certified as to compliance by the licensees.

20.20 Farm Labor Transportation Safety

The purpose of this element is to reduce the incidence of accidents involving vehicles transporting farm laborers.

Program staff function in a two part effort to: (1) ensure farm labor transportation vehicles are in proper mechanical order, and (2) determine that farm labor vehicle drivers are qualified to properly operate a farm labor transportation vehicle.

Authority

Vehicle Code, Sections 12519 and 31401.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

20.25 Commercial Vehicle Inspection and Enforcement

The purpose of this element is to protect the public from potential hazards of trucks and truck-trailer combinations which are unsafe due to an unqualified driver, hazardous loads or faulty equipment, protect the public highway investment by mitigating or eliminating truck overload, and ensure proper registration fees are paid to provide funds for highway maintenance and construction.

Program staff operate a combination of truck scales, truck inspection facilities, and portable inspection and scale units, in addition to routine road patrol units. These officers and inspection specialists are responsible for inspecting commercial vehicles for mechanical defects, failure to comply with weight, load, size, tie-down, registration and driver qualification requirements. Imminently hazardous vehicles are placed out of service, weight excesses are removed or adjusted and citations issued for violations. Spot checks of trucks are also performed as part of either weighing operations or stops for other possible violations.

Authority

Vehicle Code, Sections 2802, 2804, 2805, and 2813.

20.45 Motor Carrier Safety Operations

The purpose of this element is to protect the public from personal injury, loss of life and loss of property resulting from "mechanical defect caused" and "driver fatigue caused" heavy duty commercial vehicle accidents.

Program staff routinely visit motor carrier terminals (truck/bus) to inspect drivers' records for violations of driving time, and to inspect vehicle maintenance records for compliance, and the vehicles for mechanical defects. Vehicles included in this program are buses, trucks with three or more axles, and construction vehicles, etc. See Vehicle Code Section 34500 for complete list.

2720 DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—*Continued*

30 VEHICLE OWNERSHIP SECURITY

Program Objectives and Description

The objective of the Department's Vehicle Ownership Security Program is to protect the public from economic losses as a result of vehicle theft. This objective is accomplished by: 1) investigation and prosecution of the professional vehicle thief; 2) assistance and training of CHP and allied agency personnel; 3) prevention of vehicle theft through public awareness and coordination with industry. The objective also includes a program to insure vehicles registered in California have an appropriate vehicle identification number attached.

Authority

Vehicle Code, Sections 2400 and 2805.

30.10 Vehicle Theft Control

The purpose of this element is to impact the State's vehicle theft problem to the greatest extent possible through: (1) investigation and prosecution of the professional vehicle thief, (2) assistance and training of CHP and allied agency personnel, (3) prevention of vehicle theft through public awareness and coordination with industry.

Under this program, the Department has Officers assigned fulltime to investigate vehicle theft and theft rings.

Officers attack the vehicle theft problem through statewide coordination of investigations with other agencies; development, analysis and dissemination of vehicle theft information; selective inspection of vehicles and business establishments; titling and licensing improvements; and training education programs.

40 ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide executive and administrative staff services to assure the overall success of the constituent departmental programs.

For 1984–85, this program proposes a net reduction of 63.5 personnel years and a net decrease of $1,461,000 which reflects the addition of 4 new personnel years for accounting and communication services and the reduction of 67.5 personnel years due to program efficiencies. The budget adjustments for the 1984–85 fiscal year include:

1. *An additional Accounting Officer II and Office Assistant II ($47,000) for CALSTARS system requirements.*
2. *An additional Accountant I ($21,000) for assignment to the Travel/Relocation Unit.*
3. *An additional Office Assistant II ($17,000) for assignment to the Property Control Unit.*
4. *Reroof the Headquarters Building ($250,000).*
5. *Resurface the Academy's asphalt high speed track ($160,000).*
6. *Installation of a word processing system located at various Headquarters Sections and Field Divisions ($236,000).*
7. *Due to operating efficiencies, 67.5 administrative personnel years ($2,363,000) are proposed for reduction.*
8. *Additional nonuniformed overtime ($23,000) at the Academy for increased workload.*

* Dollars in thousands

40.01.010 Management and Command

This element contains those functions and activities directly concerned with determining the purpose, establishing the methods, and controlling the execution of the department's role in state government. The following organizational units, together with directly related staff services, are included:

1. Office of the Commissioner;
2. Office of the Assistant Commissioner—field;
3. Office of the Assistant Commissioner—staff;
4. Offices of Division Commanders;
5. Offices of the Area Commanders.

The functions performed by this element are policy formulation, direction, and coordination.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed expenditures	282.9	271.9	267.7	$12,382	$13,015	$13,341

40.01.020 Budget and Fiscal Management

The various operations involved in fiscal management are divided between two organizational units—the Accounting Section and the Budget Section.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed expenditures	65.8	57.7	58.7	$2,281	$2,161	$2,286

40.01.030 Planning and Analysis

This element contains the necessary resources for analysis of the traffic environment and the preparation of plans for the use of uniformed personnel, equipment, and facilities.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed expenditures	55.7	56.2	53.3	$1,993	$2,081	$2,037

40.01.040 Training

The basic training courses given to personnel enable them to provide protection of life and property through application of appropriate traffic enforcement laws and safety services. Additionally, the departmental management training program enhances the capabilities of first line supervisors, middle managers and the top management of the department.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed expenditures	293.3	429.6	420.3	$13,083	$18,732	$18,964

40.01.050 Administrative Services

This element contains auxiliary and specialized services essential to the administration and operation of the Department, including automotive management; electronic communications; public information; material and supply management; facilities development and maintenance; records management; central files; and duplicating, mail, and messenger services.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed expenditures	565.3	580.4	528.5	$33,504	$37,439	$39,870

* Dollars in thousands

2720 DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—*Continued*

40.60 Statewide Integrated Traffic Records System (SWITRS)

This system is the recordkeeping network for departmental operations and is the only source of certain operational data for the California Department of Transportation and the Department of Motor Vehicles.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

2740 DEPARTMENT OF MOTOR VEHICLES

The Department of Motor Vehicles' objectives are:

a. To protect the public interest in vehicle and vessel ownership, to provide various revenue collection services for state and local agencies and to provide miscellaneous registration-related services through the vehicle and vessel registration and titling process.

b. To promote highway safety and financial responsibility by licensing and/or controlling drivers and to provide personal identification services to drivers and nondrivers.

c. To provide public protection by licensing and regulating occupations and businesses related to the manufacture, transport, sale and disposal of vehicles and occupations and businesses related to the instruction of drivers in the safe operation of vehicles on the highways.

Authority

The Vehicle Code, Division 2, Chapters 1 and 6.

11 VEHICLE AND VESSEL REGISTRATION AND TITLING

Program Objectives and Description

The primary objectives of the Vehicle and Vessel Registration and Titling program are to establish identification for vehicles, vessels and off-highway vehicles owned and/or operated by California residents and to protect the public in the ownership of their vehicles and vessels. Through the Vehicle and Vessel Registration and Titling program, the department identifies and issues indicia to vehicles and undocumented vessels owned and/or operated in California, and determines and issues evidence of ownership. The program also provides various revenue collection services for state and local agencies. Fees are collected for services rendered and for authority to operate vehicles and vessels annually. Information from vehicle and vessel records and miscellaneous registration related services are also provided.

In the current year, a reduction of 4 personnel years and $2,215,000 will occur as a result of workload adjustments and efficiencies due to DMV automation.

The 1984–85 fiscal year budget proposes: an increase of 110.7 personnel years and $2,394,000 for increased registration and titling workload; a decrease of 398.5 personnel years and $2,327,000 due to continued implementation of DMV Automation; an increase of 44 personnel years and $1,044,000 to implement the Biennial Motor Vehicle Inspection Program; an increase of 16.7 personnel years and $666,000 to effect an enhanced dishonored check collection process; a reduction of 36.4 personnel years through the utilization of micrographics in the registration file system at a cost of $1,352,000; an increase of $160,000 for office automation; and an increase of 10.6 personnel years and $216,000 to implement new legislation.

11.10 Vehicle and Vessel Registration and Titling Services

Through the registration and titling process, the department establishes identification for vehicles, vessels and off-highway vehicles; provides documentation of ownership to protect the interests of the public; and collects various fees and revenue. Major activities related to the registration and titling process include the identification and issuance of registration indicia, the determination and issuance of evidence of ownership and the collection of various fees and revenue for state and local government. Ownership protection services are provided for regular vehicles, off-highway vehicles and vessels. Major revenue collection activities include the collection of vehicle and vessel registration fees, motor vehicle license fees, environmental license plate fees, unpaid parking violation fees and use tax.

In the current year, due to a 12 percent increase in the volume of materials requested by local governments for bicycle registration activities, an increase of $5,000 over the 1983–84 appropriation from the State Bicycle License and Registration Fund will be necessary.

11.10.010 Vehicles

This component provides vehicle registration and ownership documentation to owners of approximately 19.5 million motor vehicles to protect the equity interest of vehicle owners and the security interest of lending institutions. Registration is required for newly purchased vehicles, vehicles being brought into California for use from out of state, commercial vehicles operating under reciprocal agreements, and annually for vehicles continuing operation in the state. Owners are required to maintain evidence of their ownership and registration status and to record changes when the vehicles are sold. Information from ownership records is used by the department for registration billing and is available for use by law enforcement and other interested parties. Through the registration and titling process, fees and revenue are collected for various state and local agencies. Revenues are also collected for special funds, such as the California Environmental License Plate Fund through the personalized license plate program.

11.10.020 Vessels

This component provides vessel registration and ownership documentation to owners of approximately 600,000 motorcrafts and sailboats over eight feet in length to protect the equity interest of vessel owners and the security interest of lending institutions. Owners are required to maintain evidence of their ownership and registration status, to renew registration annually and to record changes when the vessels are sold. Information from ownership records is used by the department for registration billing and is available for use by law enforcement and other interested parties. Through the registration and titling process, fees and revenue are collected for various state agencies.

11.10.030 Off-Highway Vehicles

This component provides off-highway vehicle registration and ownership documentation to owners of approximately 130,000 off-highway vehicles to protect the equity interest of off-highway vehicle owners and the security interest of lending institutions. Owners are required to maintain evidence of their ownership and registration status, to renew registration every two years and to record changes when the off-highway vehicles are sold. Information from ownership or registration records is used by the department for registration billing and is available for use by law enforcement and other interested parties. Through the registration and titling process, fees and revenue are collected for state and local agencies for recreational vehicle areas.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

11.20 Information Services

The department provides vehicle or vessel ownership information to governmental agencies, law enforcement agencies and the public. Requests are made by telephone, by writing or by computer tape for information from the department's registration records. Responses are furnished in a similar manner. Government and law enforcement agencies are not required to pay for this information. However, the public pays a charge equivalent to the cost of producing the information.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

21 DRIVER LICENSING AND CONTROL AND PERSONAL IDENTIFICATION

Program Objectives and Description

The primary objectives of this program are to promote highway safety by licensing eligible drivers and limiting or withholding the driving privilege of unsafe drivers. The program also promotes the financial responsibility of vehicle operators by suspending the driving privilege of individuals who are unable to show proof of financial responsibility following an accident. This program also provides personal identification services for all drivers and nondrivers in the state.

In the current year, a reduction of 132.7 personnel years and $3,171,000 will occur as a result of workload adjustments and DMV Automation. The 1984–85 fiscal year budget proposes: a reduction of 99.8 personnel years and $1,404,000 for reduced workload; a decrease of 35.3 personnel years and $207,000 due to continued implementation of DMV automation; an increase of $129,000 for office automation; and an increase of 18.8 personnel years and $466,000 to implement new legislation.

21.10 Driver Licensing and Personal Identification Services

This element promotes highway safety by screening and licensing motorists who demonstrate the ability to drive within reasonably safe standards. Applicants for a driver's license or special certificate are screened for knowledge of vehicle laws, ability to drive and potential physical disabilities before issuance. License terms can be extended for drivers under age 70 with good driving records. Personal identification services are provided to drivers via the driver's license and to nondrivers via an identification card.

2740 DEPARTMENT OF MOTOR VEHICLES—*Continued*

21.20.010 Post Licensing Control

The department takes various driver control actions (e.g., license suspensions and revocations) for drivers who have not demonstrated the ability to drive safely. Post licensing control programs can be classified on the basis of whether driver control actions are mandated by statute or are administratively determined. Failure to submit to a blood alcohol test (Implied Consent) and driving while under the influence of alcohol are examples where driver control actions are mandated by statutes. Post licensing control actions which are administratively determined generally require an assessment of the driver's ability to drive safely (e.g., drivers who experience lapses of consciousness, repeat traffic violators, drivers with multiple accidents, etc.).

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Reexaminations	27,600	29,000	30,500
Interviews	15,100	15,500	16,000
Hearings	58,400	80,100	84,100

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	494.7	596.4	603.1	$15,705	$19,376	$20,960
Motor Vehicle Account, State Transportation Fund				*15,186*	*18,542*	*20,498*
Reimbursements				*519*	*834*	*462*

21.20.020 Financial Responsibility

Financial responsibility of the motorist is maintained by regulating and controlling those who are unable to demonstrate proof of financial responsibility coverage following a traffic accident. Accident reports are used to confirm that drivers involved are adequately covered. If not covered, the driver is required to submit proof of coverage for three years or the license is suspended.

For 1984–85, an increase of 18.2 personnel years and $455,000 is proposed to implement Chapter 1252, Statutes of 1983, which requires a one year driver license suspension when financial responsibility is not in effect at the time of an accident. An additional increase of 1.4 personnel years is proposed for workload as described under Program 21.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Accident reports (SR 1) received	600,000	612,000	624,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	128.3	142.3	161.9	$3,384	$3,995	$4,683
Motor Vehicle Account, State Transportation Fund				*3,384*	*3,995*	*4,683*

21.30 Information Services

The department provides various driver's license information to governmental agencies without charge, and to private citizens and companies for a charge equivalent to the cost of producing the information.

For 1984–85, an increase of 0.6 personnel years and $10,000 is proposed to implement Chapter 399, Statutes of 1983, which restricts the availability of personal police officer information relative to vehicle registrations.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Fee requests	9,680,300	9,832,500	9,990,800

Reimbursements				*7,209*	*8,519*	*9,241*

31 OCCUPATIONAL LICENSING AND REGULATION

Program Objectives and Description

The primary objective of this program is to provide protection to the consumer by reducing public injury, both civil and criminal, through the licensing and regulation of firms and individuals doing business in the principal segments of the motor vehicle industry. This is accomplished by licensing firms and individuals in accordance with occupational licensing statutes and regulations, by enforcing these regulations and by initiating appropriate actions against persons engaged in fraudulent, deceptive or otherwise unlawful practices.

Beginning in 1983–84, the New Motor Vehicle Board appears separately as program 35. Because 1982–83 costs and performance measures for that activity were formerly displayed within program 31, Occupational Licensing and Regulation, the remaining costs and performance measures associated with program 31 for fiscal years 1983–84 and 1984–85 appear separately as program 32.

Authority

The Vehicle Code, Division 5.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

32 OCCUPATIONAL LICENSING AND REGULATION

Program Objectives and Description

The primary objective of this program is to provide protection to the consumer by reducing public injury, both civil and criminal, through the licensing and regulation of firms and individuals doing business in the principal segments of the motor vehicle industry. This is accomplished by licensing firms and individuals in accordance with occupational licensing statutes and regulations, by enforcing these regulations and by initiating appropriate actions against persons engaged in fraudulent, deceptive or otherwise unlawful practices.

This program display does not include activities of the New Motor Vehicle Board, which was formerly reflected in this program, but now appears separately as program 35.

The 1984–85 fiscal year budget proposes an increase of $396,000 for increased distributed administration costs, a reduction of 8.9 personnel years and $52,000 due to continued implementation of DMV automation, and an increase of $22,000 for office automation.

Authority

The Vehicle Code, Division 5.

35 NEW MOTOR VEHICLE BOARD

Program Objectives and Description

The primary objective of this program is to prohibit manufacturers from adding, withdrawing or relocating automobile dealerships in market areas of existing franchisees, where such effect would be injurious to the existing franchisees and to the public interest and to protect members of the public from the activities of dishonest or unqualified motor vehicle licensees. This is accomplished by hearing and considering: 1) protests filed by any applicant for a license or any franchisee pursuant to Vehicle Code Sections 3060, 3062, 3064, 3065; 2) petitions filed by any resident of California concerning the activities or practices of any person applying for or holding a license under the jurisdiction of the New Motor Vehicle Board (manufacturers, distributors, dealers, etc.); and 3) appeals from final decisions of the Department of Motor Vehicles. The Board also endeavors to arbitrate amicably disputes between consumers and new motor vehicle dealers and manufacturers.

Authority

The Vehicle Code, Division 2, Chapter 6.

41 ADMINISTRATION

Program Objectives and Description

The California Vehicle Code provides that the Department of Motor Vehicles will be under the control of a civil executive officer known as the Director of Motor Vehicles. The Director has the responsibility for administering and enforcing the provisions of the Vehicle Code, Revenue and Taxation Code and other codes relating to the department. The Director has the authority to adopt and enforce rules and regulations as may be necessary to carry out the provisions of these codes. The Director's immediate executive staff includes two Deputy Directors who coordinate the various line and staff functions through six Division Chiefs. The director's staff also includes support in the areas of research and development, legislative liaison, press liaison, equal employment opportunity, multilingual programs, employee relations, internal audits and legal services. The Division of Administration provides the staff support for administrative programs, including personnel management; financial management; and business and facilities management. The Division of EDP Service provides and coordinates the overall electronic data processing functions within the Department.

2760 TRAFFIC ADJUDICATION BOARD

Program Description and Objectives

The Traffic Adjudication Board (TAB) was established January 1, 1979, and became operational October 1, 1980. The program, which has been initiated on a pilot basis in the municipal court districts of Sacramento and Yolo counties, tests the feasibility of processing and adjudicating traffic safety violations (infractions) administratively, rather than in the courts.

Legislation effective January 1, 1984 (Chapter 1116, Stats. 1983) extended the term of the pilot program one year, until July 1, 1985, imposed stiffer penalties for those who fail to appear or who are habitual violators of the traffic laws, and limited the availability of denial hearings without the presence of the citing officer.

A comprehensive evaluation of this test program will be completed by independent consultants and forwarded to the Governor and the Legislature in January 1984.

The 1984–85 budget proposes a reduction of 6.2 personnel years and $417,000 to reflect the phase-out of the program effective January 1, 1985 pursuant to Chapter 1116, Statutes of 1983.

2780 STEPHEN P. TEALE DATA CENTER

The Mission of the Stephen P. Teale Data Center (TDC) is to assist State agencies in achieving program objectives through the application of advanced information systems technology. This will be accomplished by:

- Continually improving the quality, responsiveness and cost effectiveness of services.
- Helping users implement new and existing technologies.
- Adding new services to take advantage of emerging technologies.
- Providing the means of ensuring the security and confidentiality of data.

The TDC budget is based on client departments' requests and known costs of TDC operations. This allows TDC management to establish charging rates based on the costs of providing a specific service level as requested by the client departments at the time of budget submission. Since the Center's establishment in 1972, TDC has continually experienced a growth in the overall demand for data processing services and an increase in the number of client departments the Center now serves. As an indicator of this growth, the average number of monthly batch jobs processed at the Center in 1980, 1981 and 1982 was 90,340, 92,838 and 139,834 respectively. In the current year, TDC is processing an average of 161,166 batch jobs per month. As further indicators of the Center's growth, the projection for increased on-line, real-time service is currently at 13% annually and for Timesharing services the increase is 20%. The number of customers TDC services has increased from the original group of 34 to today's total of 120 separate State entities.

The revised 1983–84 budget reflects a workload increase of $3,190,000 to be funded pursuant to the provisions of Section 11006 of the Government Code.

Budgeted amounts for fiscal year 1983–84 and fiscal year 1984–85 reflect a shift of $4,179,050 and $5,100,027, respectively from EDP Rent and Maintenance to Equipment. This was effected by the conversion of several hardware rent/lease contracts to purchase agreements, realizing a future cost savings to the State.

Effective July 1, 1983, the Teale Data Center made an organizational change. The Customer Services Division was eliminated with 25 positions (User Support Branch) transferring intact to the Operations Division, and nine positions transferring to the Executive Office to form the newly established Client Relations Branch. One additional position was transferred from the Technical Services Division to the Client Relations Branch.

Due to the receipt of additional Career Opportunity Development funding, one personnel year is administratively established in Fiscal Year 1983–84 and proposed to continue in 1984–85.

The 1984–85 fiscal year budget reflects an increase of $4,668,000 over the 1983–84 budgeted level. The major reason for the increase is the proposed expenditure of $3,999,000 to provide for general vendor price increases and the implementation of the Caltrans Computer Assisted Design (CAD) project.

In an effort to reduce State expenditures and effect program efficiencies, the Teale Data Center is proposing to reduce its 1984–85 budget by two personnel years and $31,000.

10 SERVICE BUREAU OPERATIONS

Program Objectives and Description

The goal of this program is the operation and support of a service bureau operation in a manner which will:

1. Ensure efficient utilization of Teale Data Center resources within the confines of current and proposed client workload characteristics.
2. Economically and effectively process the data and applications currently necessary to provide effective EDP support to client organizations.
3. Expand the level of service so that Teale Data Center EDP products are more accessible to the managers and non-technical staff of client departments.

Major elements of this Program are:

1. EDP Operations—The functions performed by this element are concerned with operating the Teale Data Center central computers to ensure that work is accomplished in a timely and efficient manner. This equipment is operated to meet the clients' schedules. Normal operations are 24-hours a day, 5-days a week, Day and Swing Shifts on Saturday, Day shift on Sunday, with the Swing shift on Sunday devoted to system software and hardware maintenance. If clients require it, the computers are operated on holidays by prior arrangements.
2. Technical Services—This element is primarily concerned with maintaining the software operating system for the computers, maintaining the tele-communications system, maintaining the on-line inquiry systems, and installing and implementing vendor-supplied proprietary software packages. In addition, this element compiles and analyzes workload and resource utilization data as well as providing consultation and advice to current and new clients on the use of the above.
3. Client Relations—Due to the changing technology of the EDP industry, this element is responsible for keeping the Center's clientele abreast of the TDC environment. Client Relations staff function as the point of contact for clients in coordinating requests for services, resolving customer problems and avoiding crisis situations, and promoting the various services and applications available through TDC to existing and potential client departments. Additionally, this element shall be aware of clients' programmatic missions and EDP requirements to ensure the flow of information between clients and TDC management.

Two limited-term positions are proposed to support the third Timeshare Central Processing Unit (CPU) for the new CALTRANS Engineer Productivity pilot project and to assist the Job Handling Unit's increased workload demands. These positions are proposed to be established January 1, 1984 and will terminate December 31, 1984, with a budget increase of $24,000 for fiscal year 1983–84 and $40,000 for fiscal year 1984–85.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20 EXECUTIVE AND ADMINISTRATIVE OPERATIONS

Program Objectives and Description

The objective of this program is to provide executive and administrative support to the Service Bureau Operation of the Teale Data Center. Services include: providing staff support to line functions including personnel, fiscal, billing, budget, planning, contract administration, and general administrative services.

Two positions are being administratively established in the current year and proposed to continue in the budget year, with a budget increase of $21,000 and $39,000, respectively, to support increased Word Processing and Administrative Services workload. A technical reduction of one personnel year in 1984–85 reflects an adjustment to estimated salary savings.

California Environmental License Plate Fund	*385*	*750*	*370*

10 TAHOE REGIONAL PLANNING AGENCY

Program Objectives and Description

The Tahoe Regional Planning Agency (TRPA) was established by an interstate compact between California and Nevada and approved by Congress. The purpose of the agency is to provide coordinated planning and enforceable regulations designed to preserve and enhance the environment and resources of the Lake Tahoe Basin. The compact was amended in 1980 requiring, among other things, the adoption of a new regional plan and ordinances. It is expected that the new regional plan will be adopted by January 1984. Funding for this bi-state agency, according to the compact, is shared between the State of Nevada (one-third) and the State of California (two-thirds).

In 1984–85, funding in the amount of $270,000 is proposed from the California Environmental License Plate Fund to remap the soil survey of the Tahoe basin and $100,000 is proposed to establish in-stream flow standards. In addition, baseline funding for the Tahoe Regional Planning Agency is proposed from the General Fund.

Authority

Chapter 1589, Statutes of 1967 as amended by Chapter 988, Statutes of 1968, Chapter 1064, Statutes of 1973, and Chapter 872, Statutes of 1980.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Tahoe Regional Planning Agency	$300	$300	$718
General Fund	*165*	–	*348*
California Environmental License Plate Fund	*135*	*300*	*370*

30 SEA GRANT PROGRAM

Program Objectives and Description

This program provides state assistance to California institutions of higher education in helping to provide the necessary matching funds for selected projects under the Federal Sea Grant Program. Authority for this program was extended through the 1983–84 fiscal year through legislation enacted in 1978 (Chapter 1255, Statutes of 1978). Chapter 899, Statutes of 1980, provided for distribution of $500,000 for each of the fiscal years 1979–80 through 1983–84.

Chapter 1311, Statutes of 1983, extended this program through the 1988–89 fiscal year with an annual appropriation from the General Fund of $500,000.

Authority

Chapter 1115, Statutes of 1973, Chapter 1255, Statutes of 1978, Chapter 899, Statutes of 1980, Chapter 1311, Statutes of 1983.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Sea Grant Program *(General Fund)*	$392	$350	$500

40 LAKE TAHOE AREA LAND ACQUISITION STUDY

Program Objectives and Description

Chapter 833, Statutes of 1980 appropriated $50,000 from the California Environmental License Plate Fund for a land purchase study in the Lake Tahoe area. This study will serve as the basis for the purchase of lands with the proceeds of an $85 million general obligation bond issue approved by the voters (Proposition 4) on the November 1982 ballot. It is anticipated that the Tahoe Area Land Acquisition Commission will submit its recommendations to the Governor and the Legislature in January 1984. Therefore, the administering agency and the required appropriation will not be identified until the study is completed.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Lake Tahoe Area Land Acquisition Study *(California Environmental License Plate Fund)*	–	$50	–

60 HEATHER FARM GARDEN CENTER

Program Objectives and Description

Chapter 718, Statutes of 1982, appropriated $250,000 to the City of Walnut Creek from the California Environmental License Plate Fund for construction of the Heather Farm Garden Center, a public facility offering educational opportunities in the areas of horticulture, conservation, ecology, and the botanical sciences.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

70 CALIFORNIA TAHOE REGIONAL PLANNING AGENCY DEACTIVATION

Program Objectives and Description

In accordance with Government Code Section 67131, the California Tahoe Regional Planning Agency (CTRPA) shall cease to exist upon the effective date of the Tahoe Regional Planning Agency's new regional plan and implementing ordinances. The law further provides that the Secretary for Resources shall be the successor to the powers and duties of CTRPA and members of its governing body, for purposes of concluding the affairs of CTRPA following the latter's deactivation. It is anticipated that CTRPA will be deactivated in January 1984. Funds are proposed in the Resources Agency budget for 1984–85 to meet the cost of Attorney General services, and to administer outstanding CTRPA affairs, which include litigation, enforcement of permit conditions, refunding of security deposits when permit conditions are met, and assuring that any remaining project mitigation funds are properly disposed.

Authority

Chapter 1612, Statutes of 1982.

3150 CALIFORNIA TAHOE REGIONAL PLANNING AGENCY

Program Objectives and Description

The California Tahoe Regional Planning Agency (CTRPA) was created to provide independent environmental protection for the California portion of the Basin in conformance with provisions of the TRPA Compact and other California laws.

On December 19, 1980, the President of the United States signed a revised Bistate Compact into law. This Compact revamped the Tahoe Regional Planning Agency (TRPA), a planning agency with jurisdiction within the Tahoe Basin portions of both California and Nevada. (CTRPA jurisdiction is limited to the California portion of the Basin). The California legislation, which accepted the revised Bistate Compact, provides that, upon the effective date of ordinances, rules and regulations adopted by TRPA to implement its regional plan, no further state funds shall be expended for support of CTRPA. The new Plan and Ordinances are targeted for adoption by TRPA in January, 1984. Given that CTRPA is to be deactivated under the provisions of Government Code Section 67131, the Agency's role has been altered to provide assistance to TRPA in their planning studies, provide a transition in project review and enforcement activities and maintain policy support for the State of California pending successful completion of TRPA's plans and ordinances as mandated by the Compact.

The TRPA plan and implementing ordinances are scheduled for adoption in 1984. CTRPA's budget for 1983–84 assumes that these documents will be adopted within the proposed time frames, and that TRPA will assume the responsibilities of a Regional Transportation Planning Agency at that time. Therefore, planned activities and objectives for fiscal 1983–84 consist of addressing administrative matters necessary to deactivate the Agency, such as conducting the final Agency audit and disposing of files, equipment and other Agency property.

It is also recognized that TRPA must devote much of their resources to development of the new Regional Plan and Ordinances prior to January, 1984. It may be that transition of functions and assumption of all responsibilities may not be totally complete by this date.

The Attorney General's Office, as legal counsel to the Agency, has received appropriations in past years as part of the CTRPA budget item. CTRPA's deactivation bill, Chapter 1612, Statutes of 1982 (AB 2794) provides that future appropriations for the Attorney General's Office in support of CTRPA activities will be included as part of the Resources Agency's budget request. $380,000 has been included in the Resources Agency budget for Attorney General costs and related administrative costs as successor to the CTRPA. (Please see 0540—Secretary for Resources).

3180 GEOTHERMAL RESOURCES DEVELOPMENT PROGRAM

Program Objectives and Description

Chapter 139, Statutes of 1980, created the Geothermal Resources Development Account in the General Fund and requires all moneys received by the State for geothermal leases on federal lands be deposited in the Account. Further, the bill stipulates that an annual transfer of funds be made to the account from the State School Fund until a specified sum is reached. Funds in the account are available for the following purposes:

- The State shall disburse 40% of the revenues deposited in the account from rents and royalties to all counties of lease origin in proportion to the amounts of revenues derived from existing leases within each county of origin.
- Thirty percent of the revenues received and deposited in the account shall be available for expenditure by the State Energy Resources Conservation and Development Commission as grants to local jurisdictions having geothermal resources. Five percent of this amount, not to exceed $100,000, may be used to provide direct technical assistance to local jurisdictions eligible for grants.
- The State shall transfer 30% of the revenues received and deposited in the account to the Renewable Resources Investment Fund where, upon appropriation by the Legislature, it shall be available for the purposes of Section 34000 of the Public Resources Code.

Specific expenditure information will be found in the budgets for those departments or programs with expenditures reflected in the following Geothermal Resources Development Account fund condition statement.

3210 ENVIRONMENTAL PROTECTION PROGRAM

The Marks-Badham Environmental Protection and Research Act of 1970 established the California Environmental Protection Program. The source of revenue for this program is the sale of personalized motor vehicle license plates by the Department of Motor Vehicles. Revenues are deposited in the Environmental License Plate Fund. By authority of Chapter 1105, Statutes of 1979, the program is administered by the Secretary for Resources. Funds expended pursuant to Division 13.5 of the Public Resources Code shall have one or more of the following purposes:

a. The control and abatement of air pollution, including all phases of research into the sources, dynamics, and effects of environmental pollutants.
b. The acquisition, preservation, restoration, or any combination thereof, of natural areas or ecological reserves.
c. Purchase of real property for park purposes on an opportunity basis or the acquisition of public accessways to coastal areas.
d. Environmental education, including formal school programs and informal public education programs.
e. Enhancement of renewable and nonrenewable resources.
f. Protection of nongame species and rare and endangered plants and animals.
g. Protection of wildlife habitat, including review of the potential impact of development projects and land use changes on such habitat.

The appropriations and expenditures for programs and projects funded from the California Environmental License Plate Fund are contained in the budgets of the various State Boards, Commissions and Departments identified in the narrative provided below. *Chapter 1289, Statutes of 1983 authorizes, until December 31, 1984, the issuance of Olympic reflectorized license plates. As specified by Chapter 1289, part of the revenue from the sale of the Olympic reflectorized license will be made available to the California Environmental Protection Program. The effect of this legislation on revenues available for expenditure in this program will be evaluated in early 1984. Any need for revising the budget will be determined at that time. Also in 1984–85, $106,000 is proposed to be expended directly from the fund to the General Fund for statewide pro rata charges for departments which do not have budget act appropriations from the Environmental License Plate Fund.*

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

0650 OFFICE OF PLANNING AND RESEARCH

a. Energy Action in Schools

The 1981–82 budget provided $250,000 to the Energy Extension Service under contract to the Department of Education to provide information, training, and contracts to California elementary and secondary schools and school districts to develop integrated energy education/energy management programs which reduce energy demands, and produce measurable energy savings. The 1982–83 budget provided second year funding for the program with increased emphasis on actively replicating successful programs in other school districts. The 1982–83 appropriation was made available to the Energy Extension Service through the Office of Planning and Research. *In 1983–84, the ELPF provides for one month of funding, with the program to continue thereafter on a scaled-down basis using Federal Funds.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($250)	($13)	–

b. Urban Park Pest Control Alternatives

This project provided for development of a plan to employ safe substitutes to toxic pest control measures in urban public parks.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($62)	–	–

2660 CALIFORNIA DEPARTMENT OF TRANSPORTATION

a. Vista Point Projects

1982–83 and 1983–84 funding provided for the repair of existing roadside ecological viewing area facilities, and the design and construction of additional roadside ecological viewing areas.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($62)	($80)	–

b. Stratified Charge Engine Project

1982–83 funding provided for support of the Cal Trans Equipment and Laboratory Units to sponsor research and exploratory development of a retrofit system to permit conversion of existing gasoline-fueled, spark ignition engines to lean combustion air/fuel ratios as a means of improving the fuel economy and emissions of internal combustion engines.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($314)	–	–

3110 SPECIAL RESOURCES PROGRAMS

a. Tahoe Regional Planning Agency

The 1983–84 budget provided funding for California's share of costs for the support operations of TRPA. *In 1984–85, support operations funding is proposed from the General Fund. Funding from the ELPF is proposed to complete two activities included in the regional plan expected to be approved by TRPA in early 1984. An amount of $270,000 is proposed for remapping of the soil survey and $100,000 is proposed for establishment of in-stream flow standards for tributaries to Lake Tahoe.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($135)	($300)	($370)

b. Lake Tahoe Area Land Acquisition Study

Pursuant to the provisions of Chapter 833, Statute of 1980, as extended by Chapter 519, Statutes of 1982, these funds will be for the support of the Lake Tahoe Land Acquisition Committee, created to study all aspects of a state land purchase program. The land will be purchased with the proceeds from an $85 million general obligation bond issue.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($50)	–

c. Heather Farm Garden Center

Chapter 718, Statutes of 1982, appropriated $250,000 to the City of Walnut Creek from the ELPF for construction of the Heather Farm Garden Center, a public facility offering educational opportunities in the areas of horticulture, conservation, ecology, and the botanical sciences.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($250)	–	–

d. California Tahoe Regional Planning Agency

CTRPA was created to provide independent environmental protection for the California portion of the Tahoe Basin. The Agency is scheduled for deactivation in 1983–84.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($400)	–

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

3380 CALIFORNIA WASTE MANAGEMENT BOARD

a. Methane Gas From Landfills

Chapter 1019, Statutes of 1981 (AB 1619) provided $200,000 to assist the Board in an investigation of problems associated with methane gas migration from landfills. These monies will supplement existing current year resources. The two year study began in July 1982. Control language in the budget bill permits the Board to use the ELPF funds over the two year period of the study.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($111)	($80)	–

b. California Waste Management Task Force

Chapter 324, Statutes of 1983 (1983 Budget Act), provided $500,000 to be used by the California Waste Management Task Force established within the Board for the preparation of a comprehensive plan and implementation schedule for nonhazardous waste disposal in California. These funds are available for expenditure during the 1983–84 and 1984–85 fiscal years.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($356)	($144)

3400 AIR RESOURCES BOARD

a. Air Pollution Research Program:

In 1982–83, research studies undertaken by the Board were funded in part by ELPF funds.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($170)	–	–

3460 COLORADO RIVER BOARD

a. Salinity Control Forum

For 1984–85, $8,000 is proposed to continue to fund the State's share for the Colorado River Basin Salinity Control Forum. These funds will be matched with $16,000 from the major public water agencies serviced by the Colorado River System.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($8)	($8)

3480 DEPARTMENT OF CONSERVATION

a. Mammoth Lakes Volcanic Hazard Monitoring

In 1983–84, $356,000 was provided for volcanic hazard monitoring at Mammoth Lakes, of which $12,000 was for pro-rata.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($356)	–

3540 DEPARTMENT OF FORESTRY

a. Timber Harvest Plan Review

Timber harvesting operations must be preceded by the development and review of a timber harvest plan to assure compliance with the Forest Practice Act and the California Environmental Quality Act. *In 1984–85, $834,000 is proposed for this activity.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($212)	($735)	($834)

b. Forest Practice Act Corrective Actions

These funds are used to support activities needed to correct environmental damage caused by violations of the Forest Practice Act.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($50)	($50)	($50)

c. Chaparral Management

In 1983–84, a total of $2,973,000 was budgeted for chaparral management, of which $991,000 was from the Resources Account, Energy and Resources Fund, and $1,982,000 from the California Environmental License Plate Fund. *In 1984–85, a total of $3,245,000 is proposed to continue the program, with all funds coming from the ELPF.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($1,982)	($3,245)

d. CL-215 Study

Chapter 683, Statutes of 1982 appropriated $345,000 to the Department of Forestry to conduct a study of the Canadair CL-215 aircraft for possible use in California for wildland fire fighting.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($344)	–	–

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

3560 STATE LANDS COMMISSION

a. Lake Tahoe Shorezone Study

Chapter 326, Statutes of 1982 (1982 Budget Act), provided $63,000 to the State Lands Commission to develop, in conjunction with the University of Southern California and the University of California at Berkeley, original data which would enable the Commission to address the cumulative impacts associated with additional boating, recreation, and other facilities in the shore zone of Lake Tahoe.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($63)	–	–

3580 SEISMIC SAFETY COMMISSION

a. Earthquake Safety Education

Chapter 785, Statutes of 1981, directed the Seismic Safety Commission to develop earthquake education programs and materials for schools and communities. In 1982–83, the Seismic Safety Commission contracted with the University of California to develop a pilot program for use in Alameda, Contra Costa, and Los Angeles counties. Funds ($250,000) were provided in 1983–84 to complete this pilot program. In addition, $20,000 was included in 1983–84 to fund pro-rata.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($238)	($270)	–

3600 DEPARTMENT OF FISH AND GAME

a. Environmental Review and Evaluation

The Environmental Review and Evaluation Program is designed to prevent adverse impacts on fish and wildlife from projects affecting the land, water and water quality of California. Federal and state laws require review by the department of projects proposed or permitted by federal, state, or local agencies. *In 1984–85, it is proposed that this program be reduced by $200,000 in ELPF support. This reduction can be accomplished with no adverse impact on the environment through a more selective in-depth review of projects. The proposed 1984–85 appropriation includes $117,000 for pro-rata.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($1,713)	($1,721)	($1,571)

b. Land Acquisition/Ecological Reserve Program

The purpose of this program is to acquire lands for the protection of rare or endangered species, their habitats and other unique habitat types. The program provides for the acquisition and development of lands that would not normally qualify under other existing funding sources.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($236)	($533)	–

c. Natural Areas Office

The Natural Areas Office assists in the preservation of the natural diversity found throughout the State in areas such as critical habitats for rare and endangered species, habitats of vulnerable and threatened plants and animals, unique geologic and pedologic features, ecosystems of high species diversity, and representative examples of California's plant and animal communities. This is accomplished through a statewide identification and inventory program of the significant natural areas in California.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($435)	($461)	($483)

d. Buena Vista Lagoon Dredging

Chapter 497, Statutes of 1981, appropriated $500,000 for the purpose of dredging the Buena Vista Lagoon Ecological Reserve, San Diego County, to remove silt caused by flood damage in order to restore and preserve wetland resource values of the reserve. Of the $500,000 appropriated, $494,000 was spent in 1981–82 and the remaining $6,000 in 1982–83.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($6)	–	–

e. Nongame Species Improvement and Preservation

An estimated 89 species of wildlife and 124 plant species which exist in California or its coastal waters are classified either rare, endangered, or threatened. Twenty-three of these species, including the California bighorn sheep, San Joaquin kit fox, California brown pelican, Coachella sand lizard, desert pupfish, El Segundo blue butterfly, and California freshwater shrimp, are subject to an increased risk of extinction. Activities of this program include habitat improvement and preservation, management plans, and disease investigations.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($158)	($1,522)	($1,574)

f. Salmon and Steelhead Habitat Restoration

A total of $1,451,000 in funding is proposed for increased support for salmon and steelhead restoration and enhancement projects. Projects for 1984–85 include $244,000 for salmon and steelhead stream rehabilitation projects and $307,000 for the restoration of four spawning gravel sites. Also, a fund shift of $900,000 is proposed from the Renewable Resources Investment Fund to the ELPF to continue salmon and steelhead restoration projects in the North Coast.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($1,451)

---

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

g. Wildlife Habitat Improvement on Federal Lands

These funds provide for the support to expand and carryout 45 fish and wildlife habitat improvement projects for both game and nongame species on the State's 20 million acres of National Forest lands and 16 million acres of Bureau of Land Management lands. Benefits of this program include increased fish and wildlife resources on Federal lands through direct habitat improvement and intensified resource protection and management activities; improved and sustained ecological diversity; and enhanced economic and recreation values from the resources.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($1,000)

h. Bighorn Sheep Management

The purpose of these funds is to increase support for the management of the bighorn sheep. Activities of this program include helicopter surveys of bighorn sheep herds, transplanting sheep, diagnosing disease occurrence, and studying competing land uses as it relates to the sheep.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($200)

i. Condor Recovery Program

The Condor Recovery Program is designed to accelerate the potential for the recovery of the severely diminished California Condor population. Condor chicks will be hatched and reared in captivity at the Los Angeles and San Diego zoos and returned to the wild in spring 1985. This is a cooperative effort between the Los Angeles and San Diego zoos and the Department of Fish and Game.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($169)

j. Raptor Rehabilitation Center (Whittier Narrows Wildlife Santuary)

The center is designed for the rehabilitation and care of young and injured raptors (wild birds of prey) with the objective of increasing the number of raptors which are returned to their natural habitat. These funds will match private and volunteer contributions of labor and materials for an expanded rehabilitation center.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($10)

k. Oceanside Coastal Wetlands Restoration

This project is designed to enhance and expand a 7-acre wetland area located in the City of Oceanside in order to restore and preserve the coastal wetland resource values of the area.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($258)

l. Suisun Resource Conservation District

These funds augment the support for the Suisun Resource Conservation District to assist the district in implementing the provisions set forth in the Suisun Marsh Preservation Act of 1977 (Chapter 1155, Statutes of 1977). Currently, the district receives $45,000 in General Funds from the department for its support.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($37)

m. Buena Vista Lagoon Weir

Funds are proposed in 1984–85 to provide support for a weir improvement project at the Buena Vista Lagoon. An improved weir would, among other things, reduce siltation and provide increased shoreline protection for the preservation and enhancement of the resources and habitat of this fresh water lagoon.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($105)

n. Mad River Hatchery

Funds are proposed in 1984–85 to design and construct a fish screen to divert fish into the hatchery.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($300)

3640 WILDLIFE CONSERVATION BOARD

a. Land Acquisition—Ecological Reserves

For 1984–85, $3,000,000 is proposed for the acquisition and development of wetlands and riparian habitat for ecological reserves. These lands will provide valuable wildlife habitat for rare and endangered species.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	($3,000)

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

3680 DEPARTMENT OF BOATING AND WATERWAYS

a. Buhne Point Beach Erosion Project

Chapter 1164, Statutes of 1982, appropriated $50,000 for a beach erosion control project at Buhne Point in Humboldt Bay.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($50)	–	–

3720 CALIFORNIA COASTAL COMMISSION

a. Coastal Access Program

Pursuant to Section 30001.5 (c) of the Coastal Act of 1976, the Coastal Commission promotes public access to California's scenic coastal areas. The Commission is also charged, under authority of Chapter 868, Statutes of 1979, with responsibility to inventory existing, dedicated, proposed and pending coastal accessways; to develop standards for locating and developing accessways; to identify public agencies appropriate for maintaining and accepting liability for accessways; and to report to the Legislature and Governor on the costs and proposed financing methods for maintaining such accessways. The Commission proposes to develop a unified and comprehensive program to identify, locate, develop, and manage accessways to coastal areas, and to serve as lead agency in an ongoing coastal access program. The proposed 1984–85 appropriation includes $7,000 for pro-rata.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($150)	($196)	($200)

b. Coastal Resource Information Center and Guide to Coastal Resources

For 1983–84, $82,000 was provided for implementation of Chapter 1470, Statutes of 1982, which directs the Commission to establish a Coastal Resource Information Center and to publish a "Guide to Coastal Resources". *In 1984–85, $84,000 is proposed to continue this activity. The Commission will use these monies to investigate automated approaches to data storage and retrieval, inventory relevant studies and data bases, and provide assistance to other agencies, local government, and the public.*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($82)	($84)

3760 STATE COASTAL CONSERVANCY

a. Sensitive Habitat Area Signing Program

This program provided funds to the State Coastal Conservancy for the design, construction, and placement of signs to inform, educate, and direct the public concerning: specific points of coastal access; the importance of the resource and the proper conduct while observing the resource; the identification of key aspects or features of the resource; and access prohibitions governing the sensitive resource area or specific sites within the resource area. These activities were carried out in cooperation with the Coastal Commission and the California Conservation Corps.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($65)	–	–

b. Estuarine Sanctuary Education and Research

Monies for the development and construction of an interpretive center at the Tijuana River Estuary in San Diego County were approved in 1982–83.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($50)	–	–

c. Eureka Waterfront Restoration

Funds were provided in 1982–83 for acquisition of a portion of a 10-acre strip of shorefront land on Humboldt Bay in the City of Eureka, Humboldt County.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($500)	–	–

3790 DEPARTMENT OF PARKS AND RECREATION

a. Resources and Environment Exhibit, California Museum of Science and Industry, Los Angeles

Funds were provided in 1982–83 for the design, construction and installation of the new Resources and Environment Exhibit at the California Museum of Science and Industry, Exposition Park, Los Angeles.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($225)	–	–

b. Heritage Corridor

Chapter 844, Statutes of 1979, appropriated funds for the development and printing of a map and interpretive guide for the Great Overland Heritage Corridor.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($20)	–

c. Cazadero Music and Arts Center

1982–83 funding provided for a local assistance grant to the City of Berkeley for a rehabilitation and access project for the Cazadero Music and Arts Center. The Center offers environmental education as well as music and arts elements.

---

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($200)	–	–

d. Coyote Point Museum

1982–83 funding enabled the Coyote Point Museum Association to develop a master plan and contract documents for an animal center to complement the Museum's Permanent Exhibition which instructs the public in the complex biological interrelationships of the environment.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($130)	–	–

e. Lighthouse Point

1982–83 funding provided for a local assistance grant to the City of Santa Cruz to repair erosion damage at Lighthouse Point in Santa Cruz County.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($75)	–	–

f. Jurupa Hills Regional Park Interpretive Center

1982–83 funding provided for a local assistance grant to the City of Fontana for development of Jurupa Hills, a regional park.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($150)	–	–

g. Golden Gate Park

1983–84 funding provided for a local assistance grant to the City and County of San Francisco to develop alternatives to pesticides to control insect and other pests in the San Francisco Conservatory.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($60)	–

h. Jaines House

1983–84 funding provided for a local assistance grant to the County of Los Angeles for the acquisition of the historic Jaines House by Hollywood Heritage, Inc.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($225)	–

i. Baldwin School Park

1983–84 funding provided for a local assistance grant to the County of Contra Costa-City of Danville.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($263)	–

j. Bridgeport Covered Bridge State Historical Landmark

Chapter 903, Statutes of 1982, appropriated funds for the purchase of picnicking and road access suitable for gold panning and swimming access for physically disabled persons at the north side of Bridgeport Covered Bridge State Historical Landmark.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($50)	–

3860 DEPARTMENT OF WATER RESOURCES

a. Wastewater Treatment Process

1982–83 funding provided for the development of an innovative wastewater treatment and reclamation process and an environmentally safe means of handling municipal sludge. A pilot operation was designed, constructed, and operated by the San Diego Region Water Reclamation Agency.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($470)	–	–

b. California Irrigation Management Information System

Funds are proposed in 1984–85 for the fourth and final year of a pilot project to research and develop a computerized weather station and information dissemination system for agricultural use in California. The objective of the project is to conserve water by scheduling irrigation times and water quantities.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	($884)	($888)

6100 DEPARTMENT OF EDUCATION

a. Environmental Education

The Department of Education conducts a minigrant program which will result in the funding of environmental education programs throughout the State.

Grants are made available to school and governmental agencies, museums, and non-profit educational associations. The Department of Education will (1) develop application procedures, (2) screen applications and select projects for funding, (3) monitor projects once underway, and (4) collect and disseminate information gained through the program as appropriate.

* Dollars in thousands

3210 ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($495)	($500)	($500)

6440 UNIVERSITY OF CALIFORNIA

a. Agroecology Program, Santa Cruz Campus

1982–83 and 1983–84 funding provided for the development of a program of intensive, low chemical farming with applicability to commercial agriculture in California without duplication of the work of the Agricultural Extension.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($317)	($211)	–

8290 CALIFORNIA PUBLIC BROADCASTING COMMISSION

a. Environmental Reporter

Funds were provided for a contract with the Sacramento News Bureau of the California Public Radio Network to fund two energy and environmental reporters. Weekly and special reports on environmental topics were produced and distributed via satellite to the 19 public radio stations in California.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($100)	–	–

b. Television Documentary

In 1982–83, funds were provided for grants to public television stations throughout California to produce documentaries on energy and environmental issues of statewide concern. Matching funds were required.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($100)	–	–

c. Environmental Debates

Funds were provided for the Commission's Public Policy Project for contracts with the University of California to produce three environmental debates in cooperation with California Public Television stations.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($150)	–	–

8570 DEPARTMENT OF FOOD AND AGRICULTURE

a. Integrated Pest Management Program (IPM)

The Department of Food and Agriculture received funding to:

1. Deliver pest management information to urban environmental residents.
2. Properly identify pest problems using trained persons with the support of the California Department of Food and Agriculture (CDFA) laboratory services.
3. Provide information about planting, care, and maintenance of trees and shrubs (as directed by the Department of Forestry, Urban Forestry Program).
4. Provide information about safe storage and proper use of pesticides.
5. Determine the type of information to be implemented by homeowners.
6. Coordinate various state and local agencies and programs relating to this program in delivering IPM.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($119)	–	–

b. Gene Resources Conservation Project

The purpose of this project was to develop a reference system in order to safeguard specific gene resources of plant and animal species that are vital to California's agricultural industry. Preservation of gene resources is a key factor in the State's ability to adapt to new resource needs. The work was performed through a contract with the Bodega Bay Institute, a non-profit research and educational organization.

This work included: 1) an inventory of animals, plants, and micro-organisms with their use, site of growth, origin, and degree of domestication; 2) standards for assessment of commercially valuable species, such as cotton, cattle, fir trees, and salmon; 3) a description and evaluation of current conservation technologies, existing programs and policies.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($653)	–	–

c. Guayule Research Project

Funds were provided in 1982–83 to examine the feasibility of using guayule as a low-water use crop in California commercial agriculture. This project had been operating for three years on Title II funds and General Fund appropriations. Additional federal funds were not available.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($175)	–	–

d. Farmland Preservation

Funds were provided in 1982–83 for a task force designed to study existing research efforts in the field of farmland preservation in California, explore public and private land trusts, purchase development rights, arrive at specific findings, conclusions, and recommendations, present seminars and a conference, and publish a final report.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	($100)	–	–

3300 STATE ASSISTANCE FUND FOR ENERGY, CALIFORNIA BUSINESS AND INDUSTRIAL DEVELOPMENT CORPORATION

Program Objectives and Description

Chapter 819, Statutes of 1980, created the State Assistance Fund for Energy, California Business and Industrial Development Corporation (SAFE-BIDCO) for the purpose of providing financial assistance to small businesses in the alternative energy industry.

The board of directors of the corporation consists of nine members: the Secretary of the Business, Transportation, and Housing Agency; the State Controller; the President of the Corporation, a member of the Energy Commission; and five public members. The Board is responsible for setting financial and administrative policy.

The fundamental objective of SAFE-BIDCO is to stimulate the creation of jobs and new economic activity by investment in innovative small businesses whose products, technologies and services reduce the use of conventional energy sources in the state. In pursuing this objective, the corporation receives loan applications from small businesses throughout the state and makes loans only to those who, because they are new or dealing with unfamiliar technologies, cannot obtain financing from private sources. Though its clientele is limited, the corporation is nevertheless obliged to do business only with those companies which are credit worthy and capable of repaying their loans. When unable to make financing available to applicants, the corporation attempts to refer small businesses to other suitable sources of finance. The corporation is licensed and regulated by the Department of Banking and certified as a lender under the Small Business Administration 7-a Loan Guarantee program.

The enabling legislation, Chapter 819, of the Statutes of 1980, appropriated $750,000 from the Energy Resources Conservation and Development Reserve Account to the corporation for initial organization and operating costs. Chapter 819 also provided for the transfer of up to $2,500,000 from the General Fund to meet loan requests of the corporation. In the Budget Act of 1982, the Legislature limited the total amount which could be transferred from the General Fund to $1,500,000 until July 1, 1983. Chapter 323 of the Statutes of 1983, limited the amount available for transfer from the General Fund to $1,500,000 but provided authority to transfer $1,000,000 from the Energy Resources Program Account to the State Energy Loan Fund.

The enabling legislation permits the corporation to supplement its lending capital through the sale of loans to private investors. Such sales are facilitated by the use of U.S. Small Business Administration and other government loan guarantees.

3310 CALIFORNIA ALTERNATIVE ENERGY SOURCE FINANCING AUTHORITY

Chapter 908, Statutes of 1980, established the California Alternative Energy Source Financing Authority for the purpose of providing industry within the State an alternative method of financing the establishment of facilities utilizing alternative methods and sources of energy which are necessary to help meet the energy needs of the State in a manner which minimizes the degradation of the environment and conserves scarce energy resources.

The Authority consists of five members: the Director of Finance, the chairpersons of the Energy Commission and the PUC, the State Controller and State Treasurer.

It is empowered to: establish criteria for projects selected for financing, issue revenue bonds, enter into loan agreements for the sale, construction, installation, or acquisition of projects, and assist small business entities in locating a funding source for projects not approved by the Authority.

Chapter 908 appropriated $200,000 from the Energy Resources Conservation and Development Special Account to the Authority for initial organization and operating expenses. Proposition 8 on the June 3, 1980, ballot was approved by the electorate and authorizes the Authority to issue up to $200 million in revenue bonds to finance alternative energy projects. As of June 30, 1983, $5.8 million in bonds had been sold.

3320 CALIFORNIA POLLUTION CONTROL FINANCING AUTHORITY

Program Objectives and Description

The issuance of pollution control revenue bonds was approved by a vote of the people November 7, 1972 (Proposition 3). Enabling legislation (Chapter 1257, Statutes of 1972) created the Authority which presently consists of: the State Treasurer (chairman), the State Controller, and the Director of Finance. The chief purpose of the Authority is to provide California businesses with a reasonable method of financing pollution control facilities needed in the state, and to foster compliance with government standards and requirements. The program provides an opportunity for industrial firms and agricultural producers to utilize this method of financing to acquire, construct or install pollution control facilities to meet environmental requirements mandated by public agencies.

Bonds issued by the Authority to raise necessary funds carry interest which is exempt from both federal and state income taxes (as provided for in Section 103 of the Federal Internal Revenue Code, and Section 17137 of the California Revenue and Taxation Code). The issuance of tax-exempt bonds has resulted in annual interest rates significantly below comparable conventional financing methods. Companies using this financing are also eligible for rapid amortization, depreciation and investment tax credit incentives for pollution control installations.

Companies which have received assistance through the program include food processors, cooperatives, manufacturers, recreational facilities, waste disposal firms, petroleum producers, refiners and marketers, metal platers, and public utilities. The Authority consults with lenders and investors to tailor programs for specific needs. Projects costing $75,000 to $70,000,000 have been funded. As of June 30, 1983, bonds totalling $795,757,000 had been sold by the Authority.

Consistent with its Legislative mandate to "provide maximum opportunity" for small businesses to benefit from its lower cost financing programs, the Authority has developed a number of financing approaches for this purpose. In 1976, California provided the "pilot" financing for what became a very successful nationwide program for small businesses. Under this plan, the Authority employed 100 percent guarantees of a company's credit by the U.S. Small Business Administration to assure that long-term tax-exempt financing was available to small businesses on a basis comparable to larger businesses. As of June 30, 1983, 79 small businesses had been financed for a total $73,432,000 with net interest costs ranging between 5.72% and 12.00% repayable over 20 years. In 1982 and 1983, Federal action limited the availability of the program.

In August 1983, the State Treasurer announced the California Loans for Energy and Environment (CLEEN) Program as a joint effort of the California Pollution Control Financing Authority and the California Alternative Energy Source Financing Authority in conjunction with participating banks. CLEEN is a type of loans-to-lenders program which will assist businesses, principally smaller ones, in financing certain energy conservation, alternative energy and pollution control equipment. When a sufficient pool of loans is accumulated, the Authorities will sell tax-exempt revenue bonds backed by the credit standing of participating banks, and lend the bond proceeds to the banks. These banks, in turn, must lend the funds to designated businesses installing qualified energy or pollution control equipment.

The California Pollution Control Financing Authority Act specifically provides that any incurred indebtedness shall not be secured by the taxing power of the State, nor any of its political subdivisions. Under no circumstances can the Authority create any debt, liability, or obligation on the part of the State. Principal and interest payments are derived entirely from project revenues or other moneys received by the Authority.

The Authority is self-supporting from fees which it charges for its services. Projects are certified by the California Waste Management Board, regional air pollution control districts, regional water resources control districts, and the California Department of Health Services (Hazardous Waste Management Section). The Authority employs the State Treasurer as the Trustee for certain bond issues and the Attorney General as its counsel. These officials are reimbursed for costs incurred on behalf of the Authority.

The Initial statutory authorization limited the amount of bonds which could be issued to $200,000,000. Chapter 839, Statutes of 1979, removed the maximum dollar limitation for total authorized financings. This measure also revised the membership, powers and duties of the Authority. In addition, it specified time frames within which the Authority must act on applications for financing. Chapter 794, Statutes of 1980, authorized the financing of pollution control projects which include the use of renewable energy resource devices or the development of an energy conservation program.

The enabling legislation is contained in the California Pollution Control Financing Act (Division 27, Chapter 1 of the Health and Safety Code, commencing with Section 44500 as amended by Chapter 277, Statutes of 1973; Chapter 1473, Statutes of 1974; Chapter 1165 and 957, Statutes of 1975; Chapters 1381 and 1384, Statutes of 1976; Chapters 650, 1082, and 1195, Statutes of 1977; Chapter 839, Statutes of 1979; Chapter 794, Statutes of 1980; Chapter 1091, Statutes of 1981; Chapter 1605, Statutes of 1982; Chapters 101 and 352, Statutes of 1983).

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

3340 CALIFORNIA CONSERVATION CORPS

The California Conservation Corps is a disciplined work force which assists federal, State, and local agencies in conserving and improving California's natural resources while providing work, employment, and educational opportunities for the young men and women of the State.

Since the inception of the CCC in 1976, corpsmember strength has grown to provide nearly three million hours of conservation work each year. In addition to tree planting, stream clearance, trail building, park development, landscaping, home weatherization, and wildlife habitat restoration, the Corps responds to emergencies such as fires, floods, earthquakes and other natural disasters.

Among the accomplishments of the Corps since its creation are the planting of more than 11 million trees and the clearing of over 300 miles of salmon and steelhead streams. Needed trail rehabilitation is accomplished each year on portions of California's 20,000 plus miles of trails, providing increased access to wilderness areas. The Corps also restores historical buildings, including early California missions and local landmarks.

A CCC native plant nursery grows thousands of seedlings that will reestablish native forests throughout California. Two centers concentrate on energy conservation efforts, through the production and the installation of solar panels and the retrofitting of state facilities to reduce energy consumption.

The essence of the CCC is young people doing hard work to conserve and improve California's natural resources. The CCC acts as a ready and available labor pool for other state agencies, assisting with flood prevention work for the Department of Water Resources, landscape maintenance for the Department of Transportation, and agricultural pest eradication for the Department of Forestry and the Department of Food and Agriculture.

The work has provided substantial benefits not only to these resources but to the economy as well. Every dollar invested in the CCC returns $1.65 in overall benefits to the state of California. The North Coast stream habitat improvement project for the Department of Fish and Game, for instance, will eventually return some $2.5 million to commercial fisheries and private fishermen through increased catches.

Significant 1984–85 proposed changes include the consolidation of ten centers' administrative activities into five, increasing corpsmember capacity at all centers to accommodate the larger statewide population of corpsmembers, and the decrease of field staff (from 322 to 319). The facility at Bollinger Canyon will be vacated and service to the area will be assumed by expanded centers in the vicinity. Further changes include relocation of the Solar Project and Energy Conservation Program at a common site (Placer Center), the relocation of the functions currently performed at the Placer Center to the Greenwood Center, and conversion of the Stockton Center to a base center with the contingency mission of supporting emergency operations. With savings resulting from these changes, the CCC proposes to increase its level of resource-conservation and youth-opportunity by expanding the average number of corpsmembers by more than 10 percent, to 1947 corpsmembers per month.

10 TRAINING AND WORK PROGRAM

Program Objectives and Description

Corpsmembers:

The CCC hires 18–23 year old California residents with the assistance of the Employment Development Department. Corpsmembers are paid minimum wage, from which the partial cost of room and board is deducted. The Corps reflects the diversity of the state and is striving to reach a goal of 50% women. Disabled youth are encouraged to join.

Benefits to Corpsmembers:

The CCC fosters an appreciation for the value of disciplined work habits and conservation of California's natural resources. Particular emphasis is placed on project work which will maximize corpsmember employability upon leaving the CCC.

Opportunities exist outside the 8 to 5 workday which enhance the employability of corpsmembers as well. Evening classes are mandatory for corpsmembers who have not completed high school, or whose reading ability is below the eighth grade level. Corpsmembers are urged to practice writing skills every day.

Corpsmembers are required to participate in workshops for career development and job-seeking skills. The CCC career development unit actively generates employment opportunities for Corps graduates.

Each center has second-year "supergrade" positions which allow corpsmembers to gain additional experience. Those corpsmembers with leadership potential may be promoted to crewleaders. Corpsmembers "specialists" receive specific training in areas ranging from food preparation to vehicle maintenance to energy conservation.

The CCC proposes a reduction of 3 personnel years in the Training and Work Program as an efficiency measure.

Authority

Chapter 342, Statutes of 1976; Chapter 50, Statutes of 1980; Chapter 1241, Statutes of 1983.

10.10 Orientation and Training Center

CCC Academy:

The Training Academy introduces new corpsmembers to the expectations of the CCC during three weeks of strict training and orientation. A strong emphasis is placed on physical conditioning.

Corpsmembers are trained in tool use and safety, first aid, fire fighting, flood control, and water safety. Much of the training is conducted on actual projects benefiting the citizens in the area surrounding the Academy.

Corpsmembers who complete the three-week training are then ready to begin work at the CCC centers to which they have been assigned.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Academy graduates	1,928	1,831	2,800

General Fund				*2,476*	*2,678*	*2,749*
Reimbursements				*115*	*142*	*131*

10.20 Base and Fire Centers

There are several types of CCC centers. Currently, there are 15 residential base centers, four residential fire centers, and three non-residental centers.

Residential Centers:

Residential centers are staffed around the clock and allow for immediate response to emergencies. Temporary base locations and satellite centers are established when the travel to a project is beyond reasonable commuting distance.

The four residential fire centers provide fire fighting services to the State and are operated in conjunction with the Department of Forestry.

One residential center, the Salmon Restoration Project, is operated through an interagency agreement with the Department of Fish and Game. Corpsmembers clear North Coast streams and revegetate stream banks in an efforts to increase the spawning habitat of anadromous fish, particularly salmon and steelhead.

Non-Residential Centers:

Non-residential centers located at Fresno, Los Angeles, and San Diego allow corpsmembers to live at home and commute to work each morning. These centers focus their effort on urban conservation projects.

Chapter 1241, Statutes of 1983, augmented the 1983–84 budget by $3,000,000 to support three base centers, including the Oat Mountain Center and to offset reductions from the General Fund. This funding is proposed for continuation in 1984–85 and it is further proposed that $500,000 of Energy and Resources Funds included in this legislation be replaced with $500,000 from the General Fund.

In 1984–85 the CCC will replace seasonal help as the primary labor source on the Dutch Elm Disease eradication project. The Corps will contract with the Department of Forestry to assist in the inspection and removal of infected trees in the Central Coast and Bay area counties where the disease is known to exist.

In 1984–85, the CCC proposes the replacement of $867,000 in reimbursements with California Environmental License Plate Funds. This will provide the Corps with greater flexibility to respond to emergencies such as floods and forest fires.

Performance Measures

	1982–83	*1983–84*	*1984–85*
1. Emergencies	789,725 hours	839,500 hours	589,000 hours

10.30 Energy Program

Energy Conservation Program:

The CCC operates an energy conservation program with specially-selected corpsmembers. These corpsmembers receive three months of classroom and on-the-job training, and learn to conduct energy audits, install energy conservation devices, and retrofit public facilities and low-income homes for state and local agencies. Corpsmembers acquire a wide variety of skills which make them highly competitive for employment in energy-related fields and the building trades.

Solar Program:

Corpsmember in the solar program fabricate and install water heating solar panels in state parks and other state facilities. The panels, which pay for themselves in 5–7 years, have a 25-year life expectancy. Corpsmembers receive credited training and experience that prepares them for employment in the solar industry and the building trades.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Energy conservation	37,997 hrs.	41,785 hrs.	96,750 hrs.

20 ADMINISTRATION

Program Objectives and Description

Support Services:

Administration provides support services for the program functions of the Corps. These services include management, policy and program direction, public information, legislative liaison, project planning and evaluation, and fiscal, personnel, and business services.

A reduction of 7 personnel years is proposed in the headquarters administrative staff as an efficiency measure.

3360 ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION

The Energy Resources Conservation and Development Commission is working to ensure the continuance of a reliable supply of energy at a level consistent with California's needs, while complying with environmental, safety, and land use goals. The Commission's programs are aimed at processing utility applications for siting new power plants, encouraging measures to reduce wasteful and inefficient use of energy, and monitoring alternative ways to conserve, generate, and supply energy.

The Commission experienced significant program changes in the 1983–84 fiscal year which precipitated substantial reductions in authorized personnel. The costs associated with the transition could not be quantified, so no funds were included in the 1983 Budget Act. The Commission has now achieved the necessary staff reductions and transition costs are estimated to be $1,886,000, for which a deficiency appropriation will be proposed.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**

10 REGULATORY AND PLANNING PROGRAM

Program Objectives and Description

The primary goals of the Regulatory and Planning Program are as follows: (1) to ensure the maintenance of adequate statewide energy supplies through the development of accurate long range forecasts of future energy supply and demand; (2) to maintain a current knowledge of the statewide electrical generation and fossil fuels supply and demand situation; (3) to assess the need for and certify new energy facilities in conformance with state energy policies as required by statute; (4) to develop an informed state energy policy through the Biennial Report process on issues derived from the economic, financial, security and environmental implications of supply, demand and price forecasts; (5) to disseminate information from the Biennial Report regarding the State's energy future, price projections, and related issues.

The Commission is proposing to continue 30.4 limited term personnel years for power plant siting activities; specific needs for these activities will be re-assessed on the basis of the most current workload projections in the spring. The Commission is also proposing $243,000 in contract funds to purchase data for forecasting effort, to study "loop flow" problems associated with importing surplus power and to provide technical expertise on fossil fuels issues for Biennial Report hearings. Seven positions approved for the Petroleum Industry Information Reporting Act (PIIRA) expire on January 1, 1985. The Commission proposes 3.3 personnel years to extend these positions until June 30, 1985, in anticipation of legislation that will extend PIIRA.

20 ENERGY RESOURCES CONSERVATION PROGRAM

Program Objectives and Description

Under the Energy Resources Conservation Program, the Commission: develops a set of policies and activities to improve efficiency of fuel and electrical energy use, with emphasis placed upon those sectors of the economy which exhibit the highest levels of consumption, the greatest potential for cost-effective conservation, and the most direct opportunities for efficiency and usage to be influenced; coordinates and monitors utilities' implementation of mandated conservation programs; facilitates implementation of statewide conservation programs that create employment opportunities within the State and stimulate investment within the State by reducing the need for imported fuel supplies.

The Commission is proposing $584,000 in contract funds to continue current year efforts in the following areas; appliance and insulation testing; maintenance of building standards through technical assistance and training, updating design tools and computer programs, and reimbursement of the Building Standards Commission for code changes; development of a voluntary home energy rating and labelling system; updating of price lists for Residential Conservation Service conservation measures; distribution of energy information to local governments; acquisition of data for analysis of the State's solar and conservation tax credits; and training and certification of energy auditors.

The Commission is also proposing to continue Schools and Hospitals and Streetlight loan programs and the federal Solar and Energy Conservation Energy Bank grants at levels of $4.5 million, $4.5 million and $2.5 million, respectively.

30 DEVELOPMENT PROGRAM

Program Objectives and Description

The principal goals of the Development Program are: ensure less costly and more secure energy supplies for all sectors of the State by encouraging the emergence of small power producers as significant contributors to the State's energy mix; and to facilitate the introduction and widespread use throughout the State of alternative transportation and stationary fuels. These goals are pursued through programs involving loans, grants, and technical assistance for industry and local governments.

In FY 1984–85 the Commission is proposing to continue biomass projects cofunded by the private sector which use biomass residues and technologies not previously demonstrated; the Commission's total contribution of $2.7 million will come from loan repayments from previously successful projects. The Commission is also proposing to continue 4.8 personnel years until June 30, 1985, to complete the methanol fleet test program.

40 POLICY, MANAGEMENT AND ADMINISTRATION PROGRAM

Program Objectives and Description

The Policy, Management, and Administration Program provides management and administrative support to the line programs by: (1) setting policies and priorities which meet the changing energy needs and demands of California; (2) ensuring the full and adequate participation by all interested groups and the public at large in Commission activities; (3) providing liaison between local, federal, and state government organizations; (4) maintaining and disseminating information to the public about mandated Commission functions; and (5) providing centralized support and management services which include fiscal management, personnel management, training, business and central office services, data processing, library, and publication services.

Costs associated with this program are allocated back to the line programs on a pro-rata basis, by fund, using a percentage of the line programs total costs, as compared to the commission's total costs.

3370 RENEWABLE RESOURCES INVESTMENT PROGRAM

Chapter 1104, Statutes of 1979, established the Renewable Resources Investment Program and created the Renewable Resources Investment Fund. The bill initially transferred $10 million from the General Fund to the Renewable Resources Investment Fund.

This program also receives annual funding from 30 percent of the royalties deposited in the Geothermal Resources Development Account (General Fund) from monies received by the State from the Federal Government for geothermal leases. Renewable Resources Investment Funds shall be expended only for the following purposes:

(a) For salmon and steelhead hatchery expansion and fish habitat improvement.
(b) For forest resource improvement projects pursuant to the California Forest Improvement Act of 1978.
(c) For urban forestry projects pursuant to the California Urban Forestry Act of 1978.
(d) For agricultural soil drainage programs.
(e) For support of technical assistance programs which will prevent soil erosion.
(f) For agricultural, industrial, and urban water conservation programs.
(g) For wildland fire protection programs pursuant to the Wildland Fire Protection and Resources Management Act of 1978.
(h) For coastal resource enhancement projects.

Specific project and program expenditures for the Renewable Resources Investment Program are included in the budgets for the Department of Fish and Game, the Department of Forestry, and the Department of Water Resources. (See Table 1.)

In Fiscal Year 1982–83, because of the State's critical General Fund fiscal needs, $600,000 was transferred from the Renewable Resources Investment Fund to the General Fund, pursuant to Chapter 10, Statutes of 1983, 1st Extraordinary Session.

Commencing in 1984–85, the following significant programs are proposed:

(a) Department of Fish and Game: $1,241,000 is proposed to continue the salmon stream clearance projects. Also, a fund shift of $900,000 is proposed from the Renewable Resources Investment Fund to the California Environmental License Plate Fund to continue salmon and steelhead projects in the North Coast.

(b) Department of Forestry: $834,000 and 3.5 personnel years are proposed to continue watershed mapping, soil erosion studies and timber harvest plan reviews.

(c) Department of Water Resources: $402,000 and 3 personnel years are proposed to continue the distribution of water conservation kits.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.
* Dollars in thousands, excluding salary range.

3380 CALIFORNIA WASTE MANAGEMENT BOARD

The purpose of the California Waste Management Board is to establish and maintain a comprehensive state solid waste management and resource recovery policy, the objectives of which are to provide guidance to local governments to manage solid wastes in this state so as to protect the public health, safety, and well-being; to preserve the environment; and to provide for maximum reutilization and energy conversion of waste materials.

These objectives are accomplished through technical assistance to local governments and to private entities; review and approval of County solid waste management plans; studies and investigations of new or improved methods of solid waste handling, disposal or reclamation; public awareness and education programs; studies of methods to reduce and control litter; development and implementation of a statewide information and retrieval system; and promotion of alternatives to landfill disposal.

10 MONITORING AND ENFORCEMENT

Program Objectives and Description

The purpose of the Monitoring and Enforcement Program is to ensure that all non-hazardous solid wastes are stored, collected, processed and disposed of in a sanitary, safe, and environmentally sound manner.

The California Waste Management Board (CWMB) sets overall policy and establishes minimum standards for facility operations. County and city governments are responsible for local planning under State guidelines. Local enforcement agencies (LEAs) are responsible for issuing permits to new facilities and enforcing compliance with permit conditions and State standards under CWMB oversight. For each enforcement jurisdiction, the CWMB is responsible for designating an appropriate local agency (e.g., county environmental health department) as the LEA. In addition, the CWMB provides technical assistance and training in planning, enforcement and facility operations; monitors and evaluates LEAs; acts as LEA when no local agency has been designated; conducts research to improve disposal operations and reviews relevant plans and environmental documents; inspects all solid waste facilities on a fixed schedule; and maintains an inventory of solid waste facilities that violate state standards. In addition 5.0 P.Y. from this program are allocted to investigate illegal, abandoned or closed disposal sites.

This program reflects funding from the Environmental License Plate Fund of $142,000 (2.4 P.Y.) in the current year and $57,000 (1.2 P.Y.) in the budget year for a Solid Waste Task Force created to develop a comprehensive plan that will assure California communities the ability to provide acceptable waste management systems.

Chapter 1019, Statutes of 1981, appropriated $200,000 from the Environmental License Plate Fund (ELPF) and permitted the Board to redirect funds budgeted for resource recovery grants for a two year study of problems associated with methane gas migration from landfills. $300,000 was redirected in the 1982–83 Fiscal year. The Budget reflects the expenditure of $111,000 in 1982–83 and $80,000 in 1983–84 from the Environmental License Plate Fund to complete the study.

The 1984–85 budget reflects: the elimination of one limited term position which was established for the methane gas study; the reduction of 0.9 personnel years included in 1983–84 for activities being phased-out; and the reduction of 0.3 personnel years to reflect operational efficiencies.

Authority

Government Code Section 66700 et seq. and Health and Safety Code Section 4500 as amended by Chapter 342, Statutes of 1972.

20 RESOURCE CONSERVATION AND RECOVERY

Program Objectives and Description

The purpose of the Resource Conservation and Recovery Program is to promote the recovery and re-use of recyclable materials from the waste stream and to promote the integration of resource recovery into local solid waste management systems.

Activities of this program include the promotion of resource recovery through research; waste to energy projects; community assistance; litter control; and the development and implementation of programs to increase source separation, public awareness, and the markets for secondary materials.

This program also reflects funding from the Environmental License Plate Fund of $214,000 (3.6 P.Y.) in the current year and $87,000 (1.8 P.Y.) in the budget year for a Solid Waste Task Force created to develop a comprehensive plan that will assure California communities the ability to provide acceptable waste management systems.

The 1984–85 budget reflects a reduction of 0.8 personnel years included in 1983–84 for activities being phased-out and an associated adjustment of 0.2 personnel years to salary savings.

30 ADMINISTRATION (Distributed)

Program Objectives and Description

The Executive Office provides management, policy, program direction and evaluation.

The administrative services activities include:

1. Personnel and training.
2. Accounting, budgeting, contract coordination, and management services.
3. Office management functions such as duplication, graphic arts, procurement, boardwide clerical support, central supply and property control.
4. Audit of grant programs.

The 1984–85 budget reflects: a reduction of 0.9 personnel years included in 1983–84 for activities being phased-out; an associated adjustment of 0.3 in salary savings; and the reduction of 1 personnel year to permanently capture efficiencies realized as a result of the 1983 hiring freeze.

3400 AIR RESOURCES BOARD

The Air Resources Board has primary responsibility for protecting air quality in California. This responsibility includes establishment of ambient air quality standards for specific pollutants, administration of air pollution research studies, evaluation of standards adopted by the U.S. Environmental Protection Agency and development and implementation of the State Implementation Plan for the attainment and the maintenance of these standards. The plan includes emission limitations for vehicular and industrial sources established by the Board and local air pollution control districts.

3400 AIR RESOURCES BOARD—*Continued*

10 AIR POLLUTION CONTROL PROGRAM

Program Objectives and Description

Air pollution impacts the health of California's citizens; it impairs productivity; it damages crops and reduces their yields; and it lessens our enjoyment of our surroundings. Control of air pollution, while ensuring that growth and needed development may occur, is the objective of the Air Resources Board. In order to meet that objective, the Board develops and implements a variety of control strategies.

The Technical Support element provides the Board, air pollution control districts, and general purpose local government agencies with technical information on emissions, air quality, the interaction of air pollutants in air, trends, the relationships of emissions to air quality, and the effectiveness of control strategies.

The Stationary Source element focuses on developing and evaluating procedures and strategies to monitor and control emissions from new and existing nonvehicular air pollution sources, and works with local air pollution control districts to promote the adoption and implementation of effective control measures.

The Mobile Source element develops, implements, and enforces laws and regulations controlling emissions from new and in-use vehicles.

The Compliance element investigates complaints against polluters, assists local districts in enforcing emission requirements against major sources of pollution and prepares documentation on chronic and flagrant violations for referral to local or State prosecutors.

The Research element conducts and sponsors research on the composition, the chemical process and the distribution trends of pollution in the atmosphere; on the effects of air pollution on human health, vegetation, and on the economy of the State; and on measures for the control of such pollution.

The Aerometric Data element collects and analyzes aerometric data which are needed to develop and evaluate air pollution control strategies, make daily agricultural burn decisions, and predict severe air pollution episodes.

The Haagen-Smit Laboratory element provides sampling and analysis to other elements of the Air Pollution Control Program.

The General Support element provides executive leadership, policy guidance and administrative services.

10.10 Technical Support

The Board, air pollution control districts, and general purpose local government agencies are provided with technical information on emissions, air quality, the interaction of air pollutants in air, trends, the relationships of emissions to air quality, and the effectiveness of control strategies through this element. It uses computer based techniques and provides data processing services to other Board elements. It coordinates with local, State and Federal programs to ensure consistency with the Clean Air Act and State regulations.

Under this element the Board continuously supports air pollution control programs through the following activities:

1. Compilation and maintenance of an up-to-date inventory of the kinds, amounts, and distribution of emissions from air pollution sources in California.
2. Analysis of emission, air quality, meteorological, and demographic data to assess air pollution control progress and needs for additional control strategy development.
3. Conduct sophisticated air quality modeling to determine the impact of changing strategies and new sources for the Board and local agencies.
4. Updating of the State Implementation Plan (SIP) for achieving and maintaining national ambient air quality standards pursuant to the Federal Clean Air Act in such a manner as to avoid the Federal imposition of sanctions on California.
5. Review and comment on environmental impact reports relating to general projects, as required by the Public Resources Code, the Government Code, and the National Environmental Policy Act, and provide technical assistance to local and regional agencies.
6. Develop the Information Systems Plan for ARB in conformity with Legislative and Executive direction as expressed in the State Administrative Manual and coordinate with local, State and Federal agencies to produce compatible computer based information systems.

In 1984–85, 1.7 personnel-years are proposed for reduction in order to permanently capture operational efficiencies.

10.20 Stationary Source

Under this element the Board works with air pollution control districts and the business and scientific communities to ensure that measures for reducing emissions from stationary sources are implemented to the extent necessary to comply with State and federal laws. The functions performed include:

1. Developing measures for reducing emissions from stationary sources and working with air pollution control districts to implement measures as needed to achieve and maintain ambient air quality standards.
2. Developing measures for the control of emissions of toxic air contaminants as required by State law.
3. Defining best available control technology for stationary sources.
4. Testing, evaluating, and, where required by law, certifying new stationary source emission control equipment.
5. Assisting industries wishing to locate or expand in California and commenting to lead agencies on applications for permits to construct or modify major sources of air pollution.
6. Developing and implementing, in conjunction with districts, a new source siting program for California that meets Clean Air Act and State requirements.
7. Commenting on industrial and energy related environmental impact reports as required by the Public Resources Code, the Government Code, and the National Environmental Policy Act.
8. Providing technical assistance, such as source testing and engineering support, to districts which request such assistance.

In 1984–85, 1.6 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. One personnel-year and $361,000 are proposed to provide testing support necessary for identifying and quantifying emissions of toxic air contaminants. The Board proposes $87,000 to augment efforts to mitigate pollution impacts from increasing offshore oil and gas developments.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

10.30 Mobile Source

Motor vehicles and the many other uses of the internal combustion engine are the major sources of carbon monoxide emissions as well as very significant sources of the photochemically reactive pollutants: oxides of nitrogen and hydrocarbons. Violations of the air quality standards for mobile-source related pollutants occur throughout California. The worst example continues to be the South Coast Air Basin (generally, the Los Angeles Metropolitan area but including the San Benardino-Riverside areas as well) where the worst photochemically-generated air pollution in the United States exists. This element is directed at controlling emissions from internal combustion engines. Activities of this element include the following items:

1. Developing, implementing, and enforcing laws and regulations limiting emissions from new and in-use vehicles. Surveillance of both new and in-use vehicles is performed to assess the efficacy of established procedures. In addition, the effects of replacement parts, retrofitted emission control devices, and fuel additives on emission are also studied.
2. Developing test and evaluation procedures for vehicles, engines, emission control components, fuel additives, and test equipment to assure emission standards are met for the useful life of required emissions control components.
3. Coordinating with Federal, State, and local agencies and the regulated industries in the control of emissions from internal combustion engines.
4. Conducting information and training seminars for vehicle dealers, mechanics, and members of the public on vehicle emissions and the resulting air pollution.
5. Developing inspection standards, performing effectiveness evaluations, and providing analytical capabilities for unplanned projects and for California's motor vehicle inspection program.
6. Developing regulations for presently unregulated modes of internal combustion engine use, as well as other mobile sources.

Because the existing Motor Vehicle Inspection Program in the South Coast Air Shed terminates in March 1984, the Vehicle Inspection element has been incorporated into the Mobile Source element.

In 1984–85, 0.6 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. In order to identify the in-use vehicles and emission control components which produce the largest excess emissions and work with manufacturers for improvements in vehicular emissions control system, $139,000 is proposed.

* Dollars in thousands

3400 AIR RESOURCES BOARD—*Continued*

New Vehicles

As a result of ARB's regulations governing new motor vehicles and engines the California motoring public operates the least polluting vehicle in America. ARB's efforts in this area include new vehicle/engine certification for exhaust and evaporative emissions, monitoring of manufacturing quality control, inspection of dealerships for proper sale and service of new vehicles, and emission control system warranty regulations.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
New vehicle surveillance actions	280	280	300
Dealership and fleet inspection tests	6,227	6,000	6,000
New vehicle certification application evaluations	285	280	280
Manufacturer quality audit evaluations	104	105	105
Consumer complaints investigated	19	20	20
Special surveys completed	112	100	100
Warranty arbitrations completed	82	85	85

In-Use Vehicles

Once correctly certified and prepared vehicles have been sold, they must be maintained properly if they are to continue to meet standards. In use vehicles are inspected for tampering of Emission Control Systems and for proper maintenance to ensure compliance with law. Replacement as well as original parts must be durable and compatible if emissions control is to be maintained at a reasonable cost. Surveillance of in-use vehicles allows the evaluation of long-term control program effectiveness and also provides information for emissions inventory compilation and future control strategy planning. The Motor Vehicle Inspection Program will increase demands upon manufacturers and dealers to honor their emissions control warranty obligations, and the warranty regulations will increase the benefits from the Motor Vehicle Inspection Program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
In-use vehicles tested	4,066	4,250	4,350
Special emissions tests	838	950	950
Aftermarket parts tested for performance	60	60	60
Aftermarket parts evaluated for exemption	172	150	150

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	63	63	62.2	$21,361	$18,780	$5,596

Federal Trust Fund[1]				*331*	*409*	*419*
Automotive Repair Fund				*1,520*	*1,030*	*1,154*
Vehicle Inspection Fund				*16,368*	*13,922*	–

10.40 Compliance

The objectives of this element are four-fold:

1. Review local district programs for conformity to State and Federal requirements.
2. Assure efficient and effective enforcement of laws and regulations controlling health related emissions from stationary sources, agricultural burning, gasoline vapor recovery and major existing and new point sources.
3. Identify, document, and refer stationary source violations for prosecution.
4. Assure adequate training for State and local air pollution investigators.

Compliance activities include review of districts' programs for compliance with Federal and State requirements and the inspection and monitoring of major emitting facilities subject to local emission limitations, New Source Review permit requirements, New Source Performance Standards, and standards for hazardous pollutants, including carcinogens. The staff of this element also monitors agricultural burning and works with local districts and growers to encourage compliance with regulations. It enforces regulations on the volatility of gasoline and on the vapor recovery systems required for gasoline marketing and distribution and conducts field inspections of major stationary sources by means of three mobile source-test vans. The staff also compiles quarterly and annual reports for the U.S. Environmental Protection Agency's national compliance data system.

In 1984–85, 1.1 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. Funding of $124,000 for additional sampling and analysis is proposed to expand the Board's enforcement of fuel specification regulations in light of increasing evidence of violations.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Major source compliance: number of major sources inspected by ARB	126	100	100
APCD audits: number of audits conducted	18	21	21
In-stack monitoring: number of excess emission detections reported	210	185	185
Variance reviews: number of APCD-issued variances reviewed	1,071	1,000	1,000
Public complaints: total number of complaints received	563	550	550
Mobile van testing: number of sources tested using mobile vans	61	60	60
Fuels storage and distribution: number of tests performed	23,364	1,100	1,100
Fuels specification: number of tests performed	1,563	1,500	2,250
Training: number of inspection training courses conducted	22	22	22

3400 AIR RESOURCES BOARD—*Continued*

10.60 Research

As a basis for its regulatory and standards-setting decisions, the Air Resources Board requires the fullest and most accurate scientific and technical information on air pollution and its control. Access to the knowledge and skills of a broad range of disciplines is required to assemble this information. The Research element provides the Board with the scientific and technical information necessary to formulate regulations and standards by maintaining the following activities:

1. Sponsoring extramural research in various aspects of air pollution, including its effects and its control.
2. Monitoring air pollution research conducted by Federal agencies and other organizations.
3. Establishing appropriate air quality standards for California and coordinating the review of Federal and State ambient air quality standards.
4. Identifying toxic substances in the air environment and establishing acceptable levels of community exposure for those substances that present the greatest potential risk.
5. Evaluating the socioeconomic impacts of air pollution and of control measures designed to reduce those impacts.
6. Developing and operating the Board's reference library, which provides reference services and disseminates technical information to the ARB staff and others.
7. Designing and implementing a comprehensive research and monitoring program to study acid deposition in California pursuant to Chapter 1473, Statutes of 1982.

In 1984–85, 0.3 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. For 1984–85 an increase of 3.7 personnel-years and $1,767,000 is proposed to augment the Board's five-year study into the causes and effects of acid deposition in California pursuant to Chapter 1473, Statutes of 1982. Funds totaling $98,000 are proposed in 1984–85 to identify and quantify the extent air pollution damages crops and forests in California. The budget also proposes an additional 2.4 personnel-years and $900,000 to provide extramural research support to continue an effective air pollution control program.

10.70 Aerometric Data

A cost-effective air pollution program requires timely and accurate aerometric measurements to define the nature, extent, and trend of the air pollution problem. This element supports the State Board by gathering, documenting, and publishing the aerometric data which are needed to develop and evaluate air pollution control strategies; make daily agricultural control decisions; and predicting severe air pollution episodes. This element operates the Board's air monitoring quality assurance program, the Board's Sacramento Laboratory and continuously supports the Air Pollution Control Program through the following activities:

1. Continuously monitoring ambient air pollutant concentrations in various parts of the state; coordinate statewide air pollution monitoring efforts through the Board's Air Monitoring Technical Advisory Committee;
2. Conducting a statewide quality assurance program to assure the accuracy and precision of air quality data;
3. Cooperating with local agencies to improve the accuracy of spatial and temporal representations of air quality data by continuously reviewing the statewide monitoring network to ensure the stated objectives are being met and the exposure of the stations meet given criteria;
4. Conducting special aerometric and interlaboratory analysis studies;
5. Providing laboratory analyses of particulate pollutant material, acid rain samples and toxic substances; provide air monitoring instrument calibration, methods evaluation and gas standards certification to other Board elements and local air pollution control districts;
6. Issue daily agricultural burning control notices based on an evaluation of real-time aerometric data and established meteorological criteria of eleven California air basins; and
7. Defining interbasin pollutant transport routes and make daily predictions of air quality in specific air basins during seasons when potentially severe air pollution episodes may occur.

In 1984–85, 1.9 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. To establish laboratory capability to analyze samples collected in northern and central California of acid deposition and toxic substances, one personnel-year and $147,000 and 3.7 personnel-years and $351,000, respectively, are proposed. Funding of $157,000 is proposed to monitor non-methane hydrocarbon concentrations in major cities throughout the State to develop and assess mitigation measures to control hydrocarbons. In 1984–85, $15,000 is proposed for a contract with Kern County Air Pollution Control District to augment local efforts in monitoring air quality impacts of tertiary oil recovery procedures.

10.80 Haagen-Smit Laboratory

The Haagen-Smit Laboratory, located in El Monte, provides sampling and analysis services to other elements of the air pollution control program. A major function is to support the regulatory activities of the Mobile Source element through a wide variety of vehicle emissions related tests and services. The Atmospheric Testing component provides nonroutine atmospheric sampling and testing services to the Executive Office and to other elements of the air pollution control program.

In 1984–85, 2.0 personnel-years are proposed for reduction in order to permanently capture operational efficiencies. One personnel-year and $62,000 are proposed to provide for the more difficult laboratory analysis of the acid deposition samples and studies of rainfall and fog. To improve the data system for toxic pollutant test results, one personnel-year and $162,000 are proposed in 1984–85.

Vehicle Testing

This service is essential to the laboratory support of the vehicle emissions regulatory program described in the Mobile Source element.

Performance Measures	*1982–83**	*1983–84**	*1984–85**

10.90 General Support

The objective of the General Support element is to provide executive direction and administrative support to the program functions of the Board. The executive office provides essential management, policy and program direction as well as legal, public information, legislative liaison, and program evaluation. The administrative services component provides fiscal, personnel and business services to the Air Pollution Control program.

In 1984–85, 0.7 personnel-years are proposed for reduction in order to permanently capture operational efficiencies.

20 ENVIRONMENTAL AFFAIRS PROGRAM

Program Objectives and Description

The State's environmental programs are administered by the Office of Environmental Affairs. The Secretary of Environmental Affairs, a member of the Governor's Cabinet, advises the Governor on major policy and program matters, and oversees the operations of the three environmental boards: Air Resources Board, State Water Resources Control Board, and California Waste Management Board. In addition, the Secretary is responsible for supervision and coordination of all offshore leasing, exploration and development. The Secretary also chairs the multi-agency task force charged with investigating the State's toxic cleanup and radioactive waste program.

3410 HUMBOLDT BAY FUND

Program Objectives and Description

The purpose of the Humboldt Bay Fund is to provide assistance for expenses attributable to litigation involving title to or boundaries of tidelands in the City of Eureka.

Chapter 1095, Statutes of 1978 (AB 925), provided for the transfer of $750,000 during 1978–79 from the oil and dry gas revenues payable to the State under Chapter 138, Statutes 1964, pursuant to Section 6217 of the Public Resources Code, to be appropriated to the State Controller for the purpose of allocating the funds. The General Fund receives 15 percent of the amount deposited by the City of Eureka into the Humboldt Bay Fund during the preceding fiscal year after deducting specified expenses. These payments are perpetual, and are reported as revenue by the State Controller. The appropriation made in Chapter 1095, Statutes of 1978 will continue until exhausted, or until the objective of settling land titles within the Eureka grant has been substantially achieved.

Chapter 1068, Statutes of 1982, set aside $200,000 of the unexpended balance in the appropriation provided by Chapter 1095, Statutes of 1978, for resolving future title litigation concerning Eureka's tidelands. The balance of the appropriation made in Chapter 1095, Statutes of 1978, remaining after encumbrances and Chapter 1068 (approximately $89,000) reverted in 1982–83. No expenditures are anticipated from this appropriation during either the 1983–84 or 1984–85 fiscal years.

3460 COLORADO RIVER BOARD OF CALIFORNIA

The principal objective of the Colorado River Board is to protect California's rights and interests in the water and power resources of the Colorado River system. This is accomplished through investigations and through working with the other basin states, federal agencies, the Congress, and the courts. Activities include analyses of the engineering, legal and economic matters concerning the Colorado River resources of the seven basin states (Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming) and all factors involved in the 1944 U.S.-Mexico Water Treaty obligation to deliver Colorado River water to Mexico. The Board develops a single position among the agencies having the major established water and power rights in the Colorado River. The Board also collaborates with other California agencies, primarily the Department of Water Resources, State Water Resources Control Board, and Department of Fish and Game and works closely with the Attorney General, the Board's counsel.

By statute, the Board consists of ten members that are appointed by the Governor: one from each of the six major public agencies having rights to the use of water or power from the Colorado River, two from the general public, and the Directors of the Departments of Water Resources and Fish and Game. The agencies are: Palo Verde Irrigation District, Imperial Irrigation District, Coachella Valley Water District, The Metropolitan Water District of Southern California, San Diego County Water Authority, and the Department of Water and Power of the City of Los Angeles. These six agencies provide ⅔ of the Board's funding, the remaining ⅓ is derived from state funds.

10 PROTECTION OF CALIFORNIA'S COLORADO RIVER RIGHTS AND INTERESTS

Program Objectives and Description

California's rights and interests in the Colorado River Basin must be preserved in order to continue the successful irrigation of about 650,000 acres in the Imperial, Coachella, Palo Verde, and Yuma Valleys of California and the furnishing of municipal, industrial, and agricultural water supplies and hydroelectric energy to portions of the six counties comprising the coastal area of southern California. The area served by Colorado River water and power has a population of nearly thirteen million—more than half the state's population—and represents more than half the state's assessed valuation. The public agencies having the rights to use Colorado River water and power have invested about $800 million in facilities for diversion and beneficial use of nearly five million acre-feet of water per year and for the generation and transmission of three and a half billion kilowatt-hours of hydroelectric energy annually.

Protection of California's Colorado River rights, including water quantity, water quality, and hydroelectric power, requires a continuous effort because plans for use of water by the seven states plus Mexico's deliveries exceed the available supply. California's present uses of the Colorado River water amount to approximately 65 percent of the water used in Southern California. As the other states increasingly utilize their apportionments of Colorado River water, the river's problems will become more severe.

After the Central Arizona Project commences deliveries, scheduled for late 1985, there will be a significant change in the procedures used to determine deliveries to California. California will no longer be able to divert all the water it can beneficially use and will be limited to its basic apportionment of 4.4 million acre-feet per year. It is essential to the well-being of California's Colorado River water users and the State's overall water supply situation that continuous efforts be undertaken to maximize the river's resources.

* Dollars in thousands

3460 COLORADO RIVER BOARD OF CALIFORNIA—*Continued*

Fulfillment of the Board's functions and obligations is a continuing program, requiring analysis and action on dynamically changing factors affecting Colorado River water and power supplies.

The major objectives of the program are as follows:

1. Maintain or increase the quantity of California's Colorado River water resources by (a) obtaining credit for subsurface return flows to the River, (b) assuring that the federal government's operating rules for Colorado River reservoirs optimize the projects' purposes and maximize California's resources, (c) working with California's Colorado River contractors to implement water conservation measures, system improvements and other means that allow for increased beneficial use of California's river resources, (d) identifying and implementing an affordable water supply for municipal and recreational uses along the Colorado River, (e) achieving a peaceful settlement of basic disagreements between the Colorado Basin states over interpretation of the Colorado River Compact and other water rights issues, (f) fostering federal studies of weather modification and vegetation management in the Colorado River Basin that would augment the river's flow, and (g) developing and implementing a plan for storing (banking) water in Lake Mead through the coordinated use of Colorado River and State Water Project waters.
2. Maintain Colorado River salinity at or below the States' adopted standards through continual review, improvement, and implementation of the basin-wide federal-state salinity control program.
3. Maintain California's Colorado River resources that are impacted by the U.S.-Mexico Water Treaty through cooperative efforts with the U.S. International Boundary and Water Commission and other states.

California's share of the seven state Colorado River Basin Salinity Control Forum is funded through the Board's budget, one-third from the California Environmental License Plate Fund and two-thirds from reimbursements. The Forum's major objective is to expedite state and federal Colorado River salinity control efforts.

To assist the Board in meeting its high priority workload, an additional 1.0 personnel year is proposed for a one-year period effective January 1, 1984 through December 31, 1984. In 1983–84, it is proposed that the position be funded entirely from reimbursements ($30,000). In 1984–85, it is proposed that the position be funded two-thirds ($20,000) from the General Fund and one-third ($10,000) from reimbursements.

3480 DEPARTMENT OF CONSERVATION

The Department of Conservation is responsible for promoting the development and wise management of the State's land, energy, and mineral resources. The Department provides services and disseminates information in the following areas: geology and seismology, mineral resources, geothermal and petroleum resources, and agricultural and open space lands.

These services and information are critical to the public and private sectors for land use decisions, siting of facilities, regulation and conservation of petroleum resources, protection of agricultural and open space lands, optimum utilization of mineral resources consistent with sound conservation practices, and conservation of soil resources.

In 1984–85, the department will achieve a net reduction of 9.8 personnel years. This will be accomplished through departmentwide program efficiencies.

10 GEOLOGIC HAZARDS AND MINERAL RESOURCES CONSERVATION

Program Objectives and Description

The Division of Mines and Geology develops information and makes interpretive judgments about the geology and seismology of California. This information provides a critical perspective for governmental organizations and private enterprise in planning for and making decisions about the most appropriate use of the earth's terrain and its mineral resources. Emphasis is placed on providing information for prudent land use decision making; responsible development of mineral resources; safety of persons and property from geologic hazards; and effective reclamation of mined lands.

The work of the division is accomplished through three major Program Elements: Land Use Geology and Seismology; Mineral Resources Conservation; and Geologic Information and Publications.

The Mammoth Lakes Volcanic Risk Assessment activity is proposed to continue in 1984–85 at a reduced level of $162,000 and 2 personnel years from the General Fund. It is expected that in 1984–85 most of the equipment necessary for monitoring activities will be procured and in operation. The work activities will mainly involve ongoing analyses of data recorded by the monitoring equipment and establishing the organizational and scientific procedures for long-term monitoring of the seismically active Mammoth Lakes area.

The California-Mexico Seismic Hazards Reduction Program is proposed to continue at $145,000 and 3 personnel years. Formerly funded from the Resources Account, Energy and Resources Fund, this activity will be funded in 1984–85 from the General Fund.

In 1983–84, the department is completing the Geothermal Resource Investigation in the Sonoma Valley area. In 1983–84 the U.S. Department of Energy is making grant funds available for geothermal studies in the Sierra Valley (Sierra County) and Twentynine Palms (San Bernardino County) regions. It is proposed to continue this activity using Federal funds of $136,000 and 2 personnel years limited term to June 30, 1985.

Also in 1984–85, there will be a net reduction of 6.8 personnel years. This is due to personnel reductions resulting from expiring programs and efficiencies offset by the personnel increases noted above.

10.10 Land Use Geology and Seismology

Through this element, the division provides comprehensive geotechnical information and interpretive judgments about the basic geologic and seismic conditions affecting all California land uses, both onshore and offshore. In this highly cooperative work effort, the division works with local government, Federal and State agencies, university researchers and scientists in the private sector.

The division issued two public service reports dealing with the effects California would experience as a result of major earthquake activity in both Northern and Southern segments of San Andreas Fault during 1982–83. The division is continuing to work closely with the Task Force on Earthquake Preparedness, local, State, and Federal officials in the development of these planning scenarios.

10.10.010 Basic Investigations

This component focuses on the basic geologic and seismologic framework of California. The on-going objective is to establish and make available a baseline source of geotechnical information for a wide range of land-use applications.

Performance Measures

This work effort produces information which is compiled into regional geologic maps, additions to The Fault Map of California, supportive data for the State Regional Geologic Map series, the State Bouguer Gravity Map, the State Aeromagnetic Map, state and regional epicenter maps, the California Earthquake Catalog, and special maps and reports. Also included are:

Fault zoning studies—Seismic monitoring of faults, evaluations of fault activity, Special Studies Zone maps and policy and guidelines assistance to local government.

Strong-motion studies—Installation of strong-motion instruments, both free field and in structures; the maintenance, servicing and updating of installed instruments; the collection, processing, interpretation, and publication of all significant records.

Crustal strain studies—Reports on earth crustal conditions developed through application of geodimeter networks for transfault strain; precise-level surveys and other pertinent scientific measurements.

Volcanic studies—Reports on areas with volcanic potential based on specific scientific measurements.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	53.8	64.1	60.3	$3,083	$4,082	$4,029

10.10.020 Hazards Reduction

This component includes identification, interpretation and evaluation of specific geologic and seismologic hazards which must be considered for informed land-use decisions. Maps and reports produced through these efforts focus on particular geotechnical problems and potential problems that threaten specific localities. Priorities are placed on high-risk projects, where major seismic events could have the most catastrophic consequences.

Performance Measures

The projects undertaken through this component result in maps, reports, and other products which are used by public agencies and the private sector in zoning decisions, facility site selections, and permitting and licensing processes. They also provide critical background information for further interpretation in design and construction decisions. Work activities are funded through other governmental entities. Work includes cooperative projects and advisory services to such Federal agencies as the Department of Energy and the U.S. Geological Survey; state agencies including the Departments of Parks and Recreation, Forestry, General Services and Public Utilities Commission; and various local agencies. In 1983–84, $356,000 was made available from the Environmental License Plate Fund to investigate the volcanic hazard potential at Mammoth Lakes, Mono County.

Site evaluation and review—Review and comment on: geologic and seismic reports on proposed sites for critical facilities such as dams, nuclear reactors, and hospitals; environmental impact reports; and seismic safety and safety elements of local government general plans.

Seismological investigations—Studies of earthquake mechanisms and precursors; evaluation of earthquake predictions, and preparation of damage and ground response maps (both predictive and post-event).

Fault mechanism studies—Maps and interpretive studies of fault zones such as Rose Canyon, San Diego County, and the Lake Oroville Area.

Volcanic studies—Site-specific investigations.

10.20 Mineral Resources Conservation

Activities in this element include the inventory and study of known mineral deposits, and the compilation of resource data as to type, grade, and extent; assistance to local Governments in planning for surface mining and reclamation of mined lands; the classification of urbanizing lands according to their mineral content; and the encouragement of sound conservation practices in the development and recovery of the State's mineral resources.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	35.8	28.8	28.8	$1,826	$1,697	$1,756

10.20.030 Mined Land Reclamation	5.3	5.5	5.5	253	265	276

10.20.010 Mineral Deposit Inventory

The objective of this component is to identify, evaluate, and describe known deposits of potentially useful minerals in California. Emphasis is placed on determining generic relationships and mineralization processes and discerning any regional structure trends among known mineral occurrences. Such investigations identify potential reserves and permit projections of depletion rates for developed deposits.

Performance Measures

Results of these investigations are compiled in maps and reports which are made available to other governmental agencies and the public.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	12	5.8	5.8	$692	$508	$515

Energy Resources Programs Account, General Fund				–	*114*	–
Federal Trust Fund[1]				–	–	*136*

10.20.020 Land Classification

The objective of this component is to carry out the mandate of the Surface Mining and Reclamation Act of 1975 (SMARA) as amended by Chapter 800, Statutes of 1980 (SB 1300) and subsequent policies established by the State Mining and Geology Board. The purpose is to classify those urbanizing and non-urbanizing areas in California threatened with irreversible uses that would make impossible the future recovery of needed mineral resources. Such lands are classified as to "significant minerals present", "no significant minerals present", or "minerals present, but significance not determined", so that appropriate planning steps can be taken by the State Mining and Geology Board and local lead agencies to prevent irrevocable mineral loss due to other land uses. Information developed in this component is used in close conjunction with that developed in the Mineral Deposit Inventory component (Program 10.20.010).

Performance Measures

Land classification zoning is to be completed for 1,250 square miles of urban and urbanizing land in California as well as other areas in the state where there are imminent significant land use decisions pending. The significance of the lands classified as containing mineral deposits is documented in written reports.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Surface Mining and Reclamation Account, General Fund)*	18.5	17.5	17.5	$881	$924	$965

10.20.030 Mined Land Reclamation

The objective of this component is to provide policy guidance and technical assistance to local governments responsible under SMARA for reclamation of mined lands under their jurisdictions. Chapter 800, Statutes of 1980, requires the state to strengthen its support efforts in reclamation by broadening the state's assistance to local agencies by monitoring lead agency compliance and by supporting the ordinance certification and reclamation plan approval process.

Performance Measures

Case studies will be used to evaluate the effectiveness of reclamation activities throughout the state. Reclamation workshops will provide for the exchange and dissemination of information. Reclamation practice guidelines will be developed for use by local agencies in judging the adequacy of reclamation plans. Reclamation plans will be reviewed and in some cases approved by the State Mining and Geology Board.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Surface Mining and Reclamation Account, General Fund)*	5.3	5.5	5.5	$253	$265	$276

10.30 Geologic Information and Publications

The objective of this element is to facilitate the preparation and distribution of geologic information. This element has two separate functional components: disseminating technical information and processing maps and publications.

---

* Dollars in thousands

3480 DEPARTMENT OF CONSERVATION—*Continued*

Performance Measures

The information staff prepares technical presentations and news releases, produces the monthly magazine "California Geology" and technical information pamphlets and bulletins. Distribution of "California Geology" exceeds 13,000 copies. It provides a vehicle for disseminating technical geologic information of current interest to a wide spectrum of readers from layman to scientist.

The publications staff drafts maps and prepares reports and maps for publication and ensures appropriate distribution. These are used by all levels of government and the public in land use planning, geologic evaluations, construction siting, and other resource evaluation planning functions. The State mineral exhibit in San Francisco has been relocated to Mariposa, Mariposa County, under a long-term loan agreement with the county.

20 OIL, GAS, AND GEOTHERMAL PROTECTION

Program Objectives and Description

The Division of Oil and Gas regulates the oil, gas, and geothermal resources operations within the State. This program is concerned with administration of State laws for the conservation of oil, gas, and geothermal resources and to prevent damage to life, health, property and natural resources. Compliance activities include review of applications and issuance of well operation permits, and on-site surveillance and monitoring of: (1) drilling and abandonment operations, both onshore and offshore; (2) enhanced oil recovery, gas storage, and wastewater disposal projects; and (3) operations for the abatement of subsidence of lands overlying oil fields. The State is fully reimbursed for these activities by annual assessments and fees from the respective industries.

The program's main objectives are to prevent damage to the hydrocarbon or geothermal reservoirs, to the environment, and to other natural resources; to prevent contamination of freshwater deposits penetrated by wells; to prevent conditions that may be hazardous to life or health; and to encourage the wise development of oil, gas, and geothermal resources.

In 1984–85, it is proposed to add $43,000 and 2 temporary help personnel years from the General Fund to assist in document preparation for microfilming the division's oil, gas, and geothermal well records. In addition, it is proposed to budget $52,000 from the General Fund to make necessary repairs to the district office in Coalinga, which was damaged by the May 2, 1983 earthquake. These proposed increases will be funded from assessments on oil, gas, and geothermal operators. Also in 1984–85 1 personnel year will be reduced as a result of program efficiencies.

Ending Resources [3]	$714	$337	–

[1] Sec. 3402 of the Public Resources Code requires the Department to annually assess operators of oil or gas wells in California a sufficient amount to finance the regulation of oil and gas operations. Geothermal operations are partially supported through drilling fees. Sec. 3110 requires that all revenues be deposited in the General Fund.

[2] Chapter 375, Statutes of 1983 establishes a system of assessments for active geothermal wells. The first revenue will be applicable to the 1984–85 fiscal year. Formerly, geothermal operations were partially supported from fees and the remainder from the industry, generally.

[3] Sec. 3410 allows the Department, when establishing the revenue required, to take into account any adjustments for savings or increased expenditures in the current and prior fiscal years.

3480 DEPARTMENT OF CONSERVATION—*Continued*

20.10 Regulation of Oil and Gas Operations

The purpose of this element is to prevent damage to and waste from underground oil and gas deposits; prevent loss of oil and gas reservoir energy; prevent damage to underground and surface waters prevent other surface environmental damage, including subsidence; prevent conditions that may be hazardous to life or health; encourage the wise development of oil and gas resources through good conservation and engineering practices; and protect correlative rights so that landowners, royalty owners, producers, and the general public realize and enjoy the greatest possible benefits from these vital resources.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Reimbursements				*62*	*191*	*189*

20.20 Regulation of Geothermal Operations

Geothermal energy is indigenous to California and has the potential to lessen—when developed—California's dependence on imported fuels. It can be developed within acceptable environmental standards, even in critical areas such as The Geysers in Sonoma County, when due consideration is given to proper mitigating measures.

The purpose of this element is to prevent damage to and waste of underground geothermal deposits; prevent loss of geothermal reservoir energy; prevent damage to underground and surface waters suitable for irrigation or domestic use; prevent other surface environmental damage, including subsidence; prevent conditions that may be hazardous to life or health; encourage the wise development of geothermal resources through good conservation and engineering practices; and protect correlative rights so that landowners, royalty owners, producers, and the general public realize and enjoy the greatest possible benefits from this important resource. Chapter 1271, Statutes of 1978, assigned lead agency responsibility to the Department under the California Environmental Quality Act for all exploratory geothermal well projects.

30 SPECIAL SERVICES FOR RESOURCE PROTECTION

There is a need to provide information on the conversion of agricultural land in California, and to provide incentives to farmers and ranchers to conserve agricultural and open space lands. These goals are accomplished through a statewide farmland mapping and monitoring program which provides map and statistical information on agricultural land conversion activity, a subvention program to local government which encourages the long-term protection of productive agricultural land and open space, and a computerized resource information and mapping program. Elements which address these concerns on an ongoing basis are Open Space Subvention Administration, Farmland Mapping and Monitoring, California Resources Information System, and Soils Resource Protection.

Chapter 864, Statutes of 1983, established a Farmlands Mapping Account in the General Fund for the purpose of carrying out the Farmland Mapping and Monitoring Program. It is proposed to continue 9.5 personnel years and budget $450,000 using this newly-created funding source. The program was formerly funded from the Resources Account, Energy and Resources Fund.

The reduction of 1 personnel year in 1984–85 is part of the reductions in personnel years achieved departmentwide through program efficiencies.

30.10 Open-Space Subvention Administration

Agricultural lands and open space lands of statewide significance must be preserved for the continued economic and social well being of the people of California. Local government is encouraged to preserve these lands by the Open-Space Subvention Program which is administered by the Department of Conservation for the Secretary for Resources. Under this program cities and counties are reimbursed, in part, for tax revenue losses resulting from reduced assessments of lands restricted to agricultural and open space uses under the provisions of the Williamson Act and other open space legislation. These lands are assessed on the basis of income produced rather than market value.

Performance Measures

Outputs include review and where applicable, comment on environmental documents; review of open-space plans; evaluation of requests for cancellation of Williamson Act contracts when waiver of the penalties is included; and processing applications and apportionment of the subvention funds.

	*1982–83**	*1983–84**	*1984–85**

30.20 Farmland Mapping and Monitoring

The ability of California to support its $14 billion per year agricultural industry depends, in part, on an adequate supply of crop and grazing land. In recent years there has been considerable discussion and controversy surrounding the conversion of farmland to nonagricultural uses, and what the long-term implications are. This element focuses on mapping and categorizing farm and grazing lands in cooperation with the US Soil Conservation Service, the California Association of Resource Conservation Districts and the California Department of Food and Agriculture.

In 1980–81 this work was begun with funds from the Environmental License Plate Fund. In 1981–82 an appropriation was made to the Department of Food and Agriculture from the Agricultural Investment Fund. In 1982–83 and 1983–84, funds are from the Resources Account, Energy and Resources Fund. In 1984–85, funds are from the Farmlands Mapping Account in the General Fund.

30.30 California Resources Information System

This element is a comprehensive effort employing computer technology to provide public and private sector access to natural resources and environmental information in California. Initiated in 1980–81, the initial effort was devoted to computer software development, procurement of access terminals and staff acceptance to others in the department who were developing computerized farmland and soils bases. The system is now operational and is funded from internal transfers and reimbursements from other agencies.

40 ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and the administrative services required to meet the department's program objectives. Activities include the provision of uniform departmentwide staff services, policy coordination, environmental impact review, and program negotiation with other State, Federal, and local government agencies, and specialized staff services to management.

Administrative activities are performed at several organizational levels within the department. Departmental headquarters provides leadership from the directorate and central services in accounting, budgeting, management analysis, personnel, office services, training, safety and EDP management. Division field units provide localized general support throughout a variety of locations in the State.

The reduction of 3 personnel years in 1984–85 is part of the reductions in personnel years achieved departmentwide through program efficiencies.

3540 DEPARTMENT OF FORESTRY

The Department of Forestry, under the policy direction of the State Board of Forestry, is responsible for providing fire protection and watershed management services for private and State-owned watershed lands.

The primary objectives of the Department are to:

1) Maintain a fire prevention program that minimizes fire losses due to human causes.

2) Provide an efficient fire control system that holds damages from wildfire to a level that will not seriously impair the use or benefits received from Forestry protected lands.

3) Maintain and improve the quality of land and vegetative resources in order to maximize the economic and social benefits that are derived from these resources now and in future generations.

In addition, the Department of Forestry provides fire protection services for some local governments on a cost reimbursement basis. Forestry employees and equipment are used for other emergencies such as floods and earthquakes.

Authority

Constitution, Public Resources Code (principally), Health and Safety Code, Penal Code, Welfare and Institutions Code, Military and Veterans Code, Governor's executive orders, administrative orders, Board of Forestry policy, Administrative Code, federal law, contracts and agreements.

11 FIRE PROTECTION

Program Objectives and Description

California's forest, brush, and grass covered wildlands provide a rich but limited abundance of natural resources which require protection from potential damages resulting from uncontrolled fire. The Fire Protection Program is managed by the Department of Forestry for the purposes of providing the required protection on private and State-owned lands of statewide interest and of enhancing the quality and usefulness of the resources.

The Department maintains an integrated and balanced fire protection program designed to provide "basic fire protection" to those wildlands and wildland areas which the Department protects under contract with other agencies, and to hold fire damage below the level at which it would seriously impair them from the flow of economic and social benefits. As designed, Fire Protection recognizes that uncontrolled fire must be abated as a public nuisance by a combination of the Fire Prevention, Fire Environment Modification, Fire Control, Cooperative Fire Protection, Planning and Research, and Conservation Camps elements.

11.70	Civil Disasters and Non Fire Emergencies	–	4	4	–	211	218

11.10 Fire Prevention

The Legislature has defined fire prevention as "the employment of the most effective methods, material, and procedures in the dissemination of information, to remove or mitigate physical risk and hazards, and the enforcement of pertinent laws for the reduction of fire incidence". The term "fire prevention" shall connote an action program designed to reduce the occurrence of human caused fires.

Fire cause investigations show that 75 percent of California's human-caused wildfires are preventable. This element provides fire prevention personnel to educate the public in the safe use of fire and to regulate the use of fire or potential ignition sources in such a way that "uncontrolled fires", as defined in Section 4104 Public Resources Code, are restricted to an acceptable level.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of people exposed to program by personal contact	351,391	352,000	375,000
Number of inspections	21,806	18,000	30,000
Number of fire cause investigations	7,647	7,000	8,000

11.10.030 Law Enforcement	44.2	74	74	2,201	3,169	3,385

11.20 Fire Environment Modification

The objective of Fire Environment Modification is to modify the Fire Environment by actions and efforts of fuel reduction, fire safety measures, and the installation of fire defense improvements. The intent is to provide "built-in" fire protection to minimize conflagration potential, to enable the initial attack forces to control a greater number of fire starts at a smaller size class, and to reduce the fire threat and damage to life and property.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Acres needing treatment[1]	10 million	10 million	10 million

11.20.020 Fire Defense Improvement	3.3	24.3	24.3	136	1,417	1,520
11.20.030 Fire Safety in Land Use Planning	26.9	47.1	47.1	1,031	2,727	2,917

11.30 Fire Control

The objective of this element is to detect, respond to, attack and control each wildland fire occurring in or threatening State Responsibility Area within a time and size which will hold net damages to natural resources and exposed life and property within reasonable economic and social limits. Fire Control is accomplished through a balanced and integrated system of Detection, Dispatch and Communications, Ground Attack, Air Attack, and Mutual and Outside Aid components.

The Fire Control element includes 220 forest fire stations, 72 lookouts, 8 helitack units, 13 primary Air Attack bases, and back-up crews located at 34 conservation camps and 4 California Conservation Corps Fire Centers. This system is designed to meet the objective of holding the average number and acres burned by large damaging fires within the state zone to no more than the current 15-year average. The emphasis of Fire Control is the protection of high-value areas; i.e., commercial timberlands, critical watershed, high-value recreation areas, areas with a high density of exposed life and property, and areas with unique wildland value.

The significant changes in this element are:

Three air tankers were previously destroyed in accidents. One air tanker will be replaced in 1983–84 through redirection of operating funds. This budget proposes replacement of the remaining two air tankers in 1984–85 at a cost of $274,000.

Due to increases in unemployment insurance payments, this budget provides an augmentation of $1,500,000 for 1983–84 and 1984–85.

In order to comply with CAL/OSHA standards, this budget provides an augmentation of $756,000 to purchase structural and wildland fire protection clothing.

[1] The elimination or modification of vegetative fuel is seldom permanent; thus, this figure will change little over the years. Some areas will be retreated on a 25–50 year rotation.

11.40 Cooperative Fire Protection

The Department of Forestry provides life and property protection under cooperative agreement with local governments within and adjacent to State Responsibility areas.

In addition, the Department contracts with six counties for the protection of lands classified as State Responsibility. Performance measures are included in 11.30 Fire Control.

Based upon established protection boundaries between the Department and the U.S. Forest Service and Bureau of Land Management, CDF protects certain federal lands, and in turn, receives federal protection on certain State Responsibility lands. The Department also protects other scattered and intermingled federal lands under jurisdiction of the Bureau of Reclamation, the Bureau of Indian Affairs and others.

In 1984–85 the Department of Forestry has entered into a contract to provide fire protection services in San Diego and Riverside Counties, which will result in a 1.5 personnel year increase.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of local government cooperative agreements	50	49	49
Acres of Federal land protected by CDF	3,344,391	3,344,391	3,344,391

11.40.030 Federal Government	22.4	–	–	4,169	4,337	4,395

11.50 Planning and Research

The Department of Forestry has defined Planning and Research as "to chart a course of action" that is intended to achieve specific goals or objectives as smoothly and efficiently as possible. This charge and responsibility is carried out by planning the Fire Protection system for certain wildlands designated as State Responsibility Areas under Public Resources Code 4125.

Seven and six tenths personnel years of temporary help have been added in 1983–84 to assist in one-time special projects funded from Federal Cooperative Forestry Assistance Act funds ($197,000).

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	20.3	24.6	17	$955	$929	$954
General Fund				*322*	*367*	*392*
Federal Trust Fund				*633*	*562*	*562*

11.60 Conservation Camps

The Department of Forestry operates 23 adult conservation camps and two adult training centers in cooperation with the Department of Corrections, eight youth conservation camps and two youth training centers in cooperation with the Department of the Youth Authority, two camps in cooperation with San Diego County and one camp in cooperation with Shasta County. In 1983–84, camp populations are budgeted for 1,964 for adult camps, 600 for youth camps and 220 for county camps. Additionally, the Department operates four Fire Centers in cooperation with the California Conservation Corps.

This element provides the primary hand crew labor force for firefighting and other emergency assignments. When not engaged in firefighting, other emergency assignments and training, camp inmates and wards, under the Department's supervision, work on in-camp projects and fire defense improvements for the Department and conservation projects for state, federal, and local government agencies.

* Dollars in thousands

3540 DEPARTMENT OF FORESTRY—*Continued*

Of the changes in this program, the significant ones are:

Due to an increase in the camp population, the participating correctional agencies are funding 37.1 personnel years commencing in the current year, and 40 personnel years in 1984–85, to supervise the inmates and wards at Bautista and Alder and the expansion of Oak Glen and Mt. Home Conservation Camps.

In 1984–85, the Department of Forestry will be assuming the administration of three (3) conservation camps from the Department of Corrections for the continued support of 22 personnel years. This will result in a General Fund increase of $1,268,000 in the Department of Forestry and a like reduction in the Department of Corrections.

The Department of Forestry also proposes restoration of two (2) fire crew supervisors at Deadwood Conservation Camp and proposes State funding for two (2) fire crew supervisors at Crystal Creek Conservation Camp previously funded by Shasta County.

Bollinger Canyon and Placer Fire Centers are proposed for closure July 1, 1984 as an administrative efficiency for a savings of 14 personnel years.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Work on non-fire suppression projects (personnel days)	378,000	418,000	455,500
In-camp project work and camp operations (personnel days)	264,600	292,600	318,850
Training (personnel days)	37,800	41,800	45,550

11.70 Civil Disasters and Non-Fire Emergencies

The Department of Forestry has been assigned, by Governor's Executive Order, civil defense, and disaster responsibilities in the areas of fire, rescue and radiological monitoring.

In addition, because of its capability as a state resource, the Department assists local, state and federal government in a wide array of emergencies and disasters.

Performance Measures	*1982–83**	*1983–84**	*1984–85**

3540 DEPARTMENT OF FORESTRY—*Continued*

12.10 Resources Protection and Improvement

A number of activities are conducted within this element in pursuing the objective of protecting and developing state and private forest lands. These activities include: the detection, evaluation, and control of forest pests; growing and sale of tree seedlings from three State nurseries for reforestation and soil erosion control; genetic tree improvement; advice and assistance to owners of small forest lands on management of forests and improved harvesting practices; management of demonstration State forests; implementation of the California Forest Improvement Act and Urban Forestry Act of 1978, and demonstration of the use of wood waste and forest growth for energy production.

The objective of vegetation management is to assist public and private landowners achieve land use objectives by reducing damage from wildland fires, increasing productivity of forest and rangelands, improving water yields and air quality and in general maintaining desirable ecosystems. The Department of Forestry works with federal, state and local agencies and private property owners to develop and achieve land use objectives. Activities include the disposal, rearrangement, or conversion of vegetation utilizing various treatment measures including prescribed fire and mechanical, manual, biological and chemical methods.

The Department of Forestry manages 18 State School Land parcels for the State Lands Commission. 1.4 personnel years were permanently established in 1983–84 to manage the parcels. These positions are funded from the Forest Resources Improvement Fund at a level of $43,000. In addition, 3.4 personnel years have been administratively established in 1983–84 to manage state lands parcels and are funded by a contract with the State Lands Commission. These limited term positions are scheduled to terminate June 30, 1984.

In 1984–85, the California Forest Improvement Program is proposed to continue at a level of $3,657,000.

An augmentation of $40,000 is proposed for the State Forest program in 1984–85 to pay in-lieu county property taxes as required by Public Resources Code 4654.

A reduction of eight (8) personnel years is proposed from the Vegetation Management program as an administrative efficiency.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Insect and disease evaluations	95	100	100
Seedlings distributed (CDF nurseries)	5,300,000	5,000,000	5,000,000

12.20 Urban Forestry/Urban Pest Protection

In 1984–85, the department proposes to contract with the California Conservation Corps to conduct tree inspections and removals in the Dutch Elm Disease Program. This will allow the department to eliminate 35 seasonal personnel years from the 1983–84 level and still expand the program to San Francisco and the remaining portions of three other Bay Area counties. For this expansion, an augmentation of $834,000 is proposed from the General Fund.

In 1983–84 the Urban Forestry Program received $2,013,165 from the Small Business Administration's Parks and Recreation Area Development Grant Program under the Federal Jobs Bill. This resulted in a 3.8 personnel year increase in the current year. Because no funding is proposed in 1984–85, those positions will terminate June 30, 1984.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Urban projects completed	21	99	–
Number of host trees inspected	124,500	189,000	240,000
